

Liber Imperatus

The Fist of the Emperor:
An Unofficial Expansion for the Age of Darkness

ACKNOWLEDGEMENTS

This document has been an immense labour between a team who have gone above and beyond to get everything ready for release.

This expansion was written by the Liber Panoptica Developer Team:

Codewalrus, Sorakamii, The Ironic Warrior, Diagonalfire, Lauren Hughes, Lord Marshal Aly, Arcangellord, Celebrimbor, Drakeran, Falkenrath, Kidder666, Kira Nagisho, Lord NaCl, Malice, Mephistopheles-Kaisarion,, Walrusette, The Count, Martin (Col. Hertford), Legio Traitoris, Belisarius Cool, Yekeran, Max, Archmagos Alyx, Funnybus, Filwilliamson, Jervoise, Kari, realSnice

The Liber Panoptica Developer Team were supported by a group of dedicated play-testers, who we'd like to thank:

Alsoned, Ana Nas, Groppcw, Blade of Omegon, Djinnpachiro, Grey, Grifftofer, Ian - Custodes4life, LordDukeSirDave, OilSpillPaintingStudio, Pauper&Salt, Trajann Valoris, Kevhooper224 (and the whole team at Stafford Nerdgasm!)

We'd also like to thank our collaborators from a wide range of other community teams, without who this project would not have been possible:

The Veterans of Terra Team, The Aus3ok Team, King Fluff

In addition, we'd also like to thank the following contributors who helped us with previous iterations of this project:

Ash and Gold, GOOTS, Spartan CXVII, Zerk, Quinn / IHF, FreakyM, Gallant, Goltron, JB Minis, The Casual, Wiking, The J, Zewl, OriginalApplesauce

Finally, a special thanks goes out to the following people:

The Games Workshop, Forge World, and Black Library teams for providing the rules and lore that have inspired and propelled this work forward.
The entire HH: Age of Darkness Discord Server for helping us play-test these units and FAQ items - without you this would not have been possible.
Thanks to Lauren Hughes for the custom-commissioned page backgrounds, detail elements, and faction iconography.
Thanks to Quinn / IHF for the custom-commissioned HH: Age of Darkness Logo.

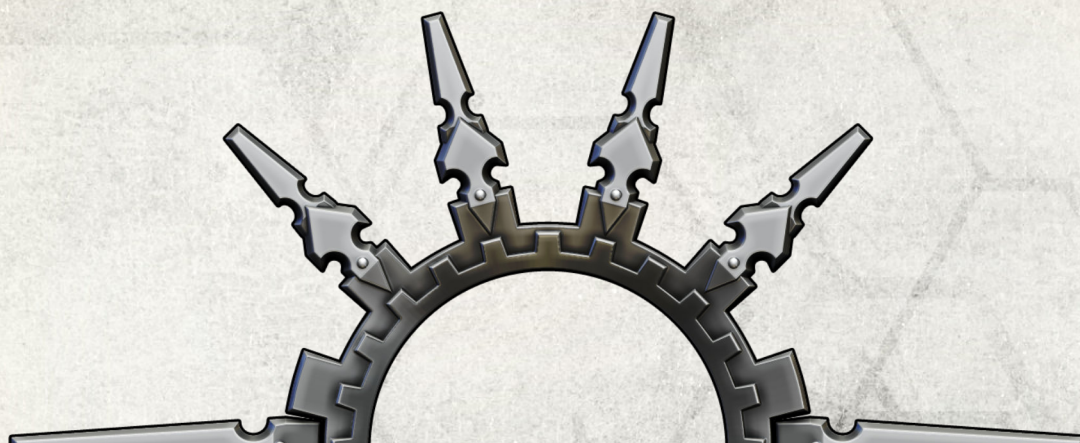

This ruleset is entirely community-made, unofficial, and not for profit. It is not to be sold, distributed for profit, or otherwise restricted in any way. It is shared entirely out of love for The Horus Heresy game system and our desire to for it to continue. Infringement on any legal rights is not intended.

Some words, terms, and logos in this document are copyrighted – these are used in compliance with copyright laws and procedures, including this notice.

This document is shared under the provisions of the CC BY-NC-ND 4.0 Licence, more information on which can be found here:

This version was released on: 08 / 01 / 2024 - V1.2

Foreword

When the **HH: Age of Darkness** Discord Partner server's moderation team first saw the playtest rules for **Warhammer: The Horus Heresy's** second edition, we were overjoyed that our favourite tabletop game was getting the attention and love it deserved. We also were keenly aware that with such an undertaking, there would be a few clarifications required for a handful of rules, and some units would unfortunately be left on the cutting room floor. Some of these units were fan-favourites, though - and so we decided it would be an undertaking we would happily expend effort ourselves to remedy. Our first effort - which was internally known as **Operation: Retrograde** during development - was the result.

This document is intended to stand alongside the great works of The **Warhammer: Age of Darkness** team, providing additional units, options, sub-factions, and more for the various forces of the Imperium - though you will still need a copy of the core **Warhammer: Age of Darkness** Rulebook, as well as one of the various **Liber** or **PDF** faction books, and the PDFs published via **Warhammer Community**, to make use of this document.

We're keenly aware that the rules in this book may, now or in the future, be rendered obsolete by way of **Games Workshop** releasing official rules for any of the items contained within this document. If that is the case, it should be assumed that those rules supersede these - unless you agree otherwise with your opponent!

We hope you enjoy these rules, and **Warhammer: The Horus Heresy**!

The HH: Age of Darkness Discord Partner Server and Liber Panoptica Development Teams

Introduction

Within this document, you'll find expansions to several established Imperial factions - The Legio Custodes, Sisters of Silence, Solar Auxilia, and Imperialis Militia - as well as an entirely new faction, the Traders Militant. All the units and concepts presented here are intended to pay homage to various previous editions of the game, and lore from across many varied sources.

All of the units and options contained within this document were extensively play-tested by a dedicated team of community writers from the Liber Panoptica Team. We recommend you use the Liber Panoptica FAQ, Errata, and Balance Changes whilst using these units, for the best game-play experience - and we all hope you enjoy using our supplements in your games of The Horus Heresy!

LIBER IMPERATUS:
Traders Militant

INTRODUCTION

Amongst the various Imperial factions that blossomed during the Great Crusade, perhaps one of the strangest might have been the Traders Militant - or Rogue Traders, as they were informally known. Comprised of an eclectic mix of fanciful nobility, the disgraced children of powerful families, and even some political rivals of the Emperor's new Imperium, to be a Rogue Trader was to bear the seal of the Emperor through a Letter of Marque.

With these marked documents, the Rogue Traders were compelled to disperse far and wide, out of the borders of the Imperium and beyond even the advancing Expeditionary Fleets, cataloguing the immensely varied worlds of the galaxy to allow the trailing, ponderous behemoth that was Imperial bureaucracy to decide where next to expend its might to claim another world, another system, another quadrant in His name. It was in this fashion that despite the very nature of the Rogue Traders - as rebellious, impetuous individuals - that even they found both use and purpose in the Emperor's design. This individualism and rebelliousness was a unique privilege afforded only to them - and it included an allowance to consort with alien species, to befriend xenos - a charge all others were expressly forbidden from.

In the coming of the Heresy, however, some among the Traders Militant found a darker purpose. In Horus' war was a new calling for some; one that required not their fealty or loyalty but their pride and anger, their devotion instead of their cowed submission. It was in this crucible that the first of the Rogue Traders cast aside their Letters of Marque, becoming piratical raiders and reaver lords and forsaking their honour and bearing in the doing so.

Even still, in those dark days, some of the Traders Militant held out hope in His vision - and continued their quests, heading back toward the birthplace of Humanity instead of away from it, trailing their fleets, consorts, and their resources to Terra, in a vain hope that perhaps they might be the ones to quell the Age of Darkness' flames - or perhaps only quench them for long enough for the Emperor to reclaim the galaxy...

AEGIS MILITANT DETACHMENTS

The **Aegis Militant** Force Organisation Chart allows the forces amassed under the command of a Trader Militant to take to the field in their combined might, arraying their varied panoply of war against their foes! This section presents a unique Force Organisation chart for Trader Militant armies; the Rogue Traders and their entourages who took to the field at their command in the Age of Darkness.

Instead of using a Crusade Force Organisation Chart to select your Primary and Allied Detachments as normal, you may choose to use the **Aegis Militant** Force Organisation Chart to construct your army. An **Aegis Militant Detachment** entirely replaces the Crusade Force Organisation Chart and its Detachments, and is counted as your **Primary Detachment** for the purposes of all Special Rules, Limitations, and Gameplay Interactions, including the Allies Matrix. For the purposes of the Alliance Matrix, Traders Militant are either "Agents of the Emperor" if Loyalist, or "Agents of the Warmaster" if Traitor, and any models selected from the **Traders Militant Army List** have the "Traders-Militant" Sub-faction. A Detachment with the Trader Militant Sub-faction may not be taken as a Primary Detachment outside of the **Aegis Militant** Force Organisation Chart, and the **Aegis Militant** Force Organisation Chart may only be used if the Detachment with the Trader Militant Sub-Faction is the Primary Detachment.

An **Aegis Militant Detachment** may only be taken as a **Primary Detachment**. If you choose to do so, you may include one **Allied Detachment** as an **Optional Detachment** per 1,000 points in your army. See page 281 of the **Horus Heresy: Age of Darkness Core Rulebook** for more information about **Allied Detachments**. This means that in a game of 3,000 points size, you could include the **Aegis Militant Detachment** as your Primary Detachment and up to three Allied Detachments. Any Detachment which explicitly replaces an Allied Detachment may be selected in an army using the **Aegis Militant** Force Organisation Chart, replacing a single one of the Allied Detachments permitted by the game's points size.

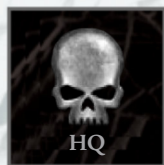

Allied Detachments in the army must be of different Factions (or sub-factions, where applicable) - though this can be modified by the Warrants of Trade Special Rule found on the Rogue Trader Militant. **Allied Detachments** can be of any Faction or Sub-faction, as long as their Allegiance matches - though this can be modified by the Warrants of Trade Special Rule. The Levels of Alliance between such Detachments is modified by the Fragile Alliance Special Rule, found on the Rogue Trader Militant. If the Rogue Trader Militant is slain, or otherwise removed from play for any reason, then in the case of Factions or Sub-factions with varying Levels of Alliance depending on who is ordinarily the Primary or Optional Detachment, the lowest Level of Alliance between the two Factions or Sub-factions should be used. In addition, no **Optional Detachments** outside of a single **Lord of War Detachment** may be selected if a **Aegis Militant Detachment** is selected. Any unit selected as part of a **Lord of War Detachment** must have the same Faction or Sub-Faction as one of the other **Primary** or **Allied Detachments** selected as part of the same Army.

An **Aegis Militant Detachment** may only include units from the profiles listed in the **Trader Militant** section of the **Liber Imperatus**. These units may not be selected as part of any other Force Organisation chart or Detachment besides an **Allied Detachment** or a **Zone Mortalis Engagement Force Organisation Chart** - if selected in this manner, however, a Warrant of Trade may not be selected for your Rogue Trader Militant. If an **Allied Detachment** or a **Zone Mortalis Engagement Force Organisation Chart** is composed of models with the Trader Militant Sub-Faction, then any unit with the Trader Militant Sub-Faction able to be selected as an Elites Choice may also be selected as a Troops Choice.

Additionally, an **Aegis Militant Detachment** may include a single unit from one of the following lists as a non-Compulsory Elites Choice, even though they are normally taken as HQ choices:

- Knights Errant
- Divisio Assassinorum
- Cults Abominatio

WARRANTS OF TRADE

Written and signed most often by the Emperor's hand Himself, these Warrants were worth more than entire sub-sectors to those intelligent enough to understand them; though some among those handed these documents of authorisation understood that they were in effect also orders of banishment; permanent exile formalised and sealed with a wax crest.

During Army Selection, a model with the Warrants of Trade Special Rule must select one of the following Warrants; these may grant certain additional effects to the Detachment containing the model with this Special Rule, as well as affecting which Factions and Sub-factions may be included in the same army. A model may never select more than one Warrant of Trade, and if a model with the Warrants of Trade Special Rule is selected as part of an Allied Detachment then no Warrant may be selected.

WARRANT OF COMPLIANCE

The most common Warrant in issue, the Warrant of Compliance was handed out in bulk to legitimise those who wished to enact personal campaigns to subdue star systems, enabling their brief but effective massacres to benefit those in command. Those issued these Warrants were often watched closely, though - and were not forgiven for mistakes made under the watchful eyes of their patrons.

An army containing a model with this Warrant of Trade may not include any Detachments from any Faction which may select the Xenos Allegiance.

If the army containing a model with this Warrant of Trade has the Loyalist Allegiance, it may include a single Allied Detachment with the Agents of the Emperor Faction, but may not include more than one such selection.

If the army containing a model with this Warrant of Trade has the Traitor Allegiance, it may include a single Allied Detachment with the Agents of the Warmaster Faction, but may not include more than one such selection.

WARRANT OF CONQUEST

The Warrant of Conquest was handed to those Rogue Traders who possessed a single-minded, bloody-handed nature; only those sought to carve out space for the Imperium to inhabit no matter the cost could truly bear such a writ. To this end, those issued this Warrant would enact great wars to reclaim systems for their patron - and were even willing to accept xenos aid to achieve their aims...

An army containing a model with this Warrant of Trade may include a single Detachment from any Faction which may select the Xenos Allegiance, but may not include more than one such selection.

An army containing a model with this Warrant of Trade may not include any Allied or Optional Detachments from the Agents of the Emperor or Agents of the Warmaster Factions.

WARRANT OF EXPLORATION

Ranging far ahead of the main exploration fleet's advances, those who bore a Warrant of Exploration were known for fraternising with the scattered human settlements they found, as well as the varied races of Xenos they encountered - and it was for this reason that the Legiones Astartes would often refuse to walk alongside them; though the denizens of the Mechanicum often did not hold such qualms...

An army containing a model with this Warrant of Trade may only include a single Detachment from any Faction which contains models with the Legiones Astartes (X) Special Rule.

An army containing a model with this Warrant of Trade may include up to two Detachments from the Mechanicum Faction, but may not include more than two of such selections.

An army containing a model with this Warrant of Trade must include a Detachment from any Faction which may select the Xenos Allegiance, but may not include more than one such selection.

A Detachment containing a model with this Warrant of Trade may not include any Allied or Optional Detachments from the Agents of the Emperor or Agents of the Warmaster Factions.

WARRANT-BREAKER

Even so soon after their issue, tales abounded of those among the Traders Militant who could not remain within the terms of their Warrants; often, these Rogue Traders would find their Warrants declared null and void, and were set upon by loyalist and traitors both upon returning to Imperial space - to the detriment of those mortal souls they trailed with them to their doom.

An army containing a model with this Warrant of Trade may only include Allied or Optional Detachments from any Faction which may select the Xenos Allegiance, or with the Imperial Army Faction. The same Factions or Sub-factions may be selected in these Detachments, but no Faction or Sub-faction may be selected more than twice. It should be noted that this overrides any restrictions applied to selecting more than one Faction or Sub-faction which may select the Xenos Allegiance.

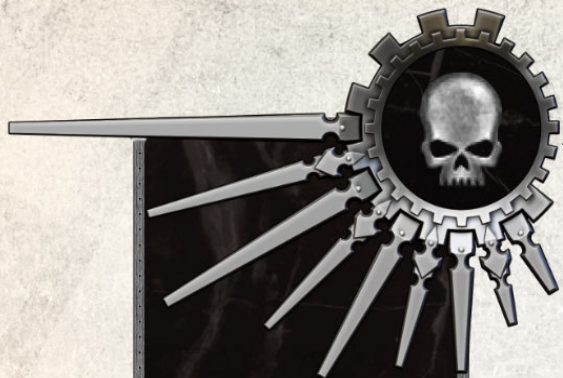

All enemy models gain Hatred (Traders Militant) when fighting against an army that includes a model with this Warrant of Trade.

Rogue Trader	6	5	5	3	3	3	4	4	10	4+

Unit Composition

- 1 Rogue Trader

Unit Type

- Infantry (Character)

HQ

Singular figures within the Imperium as well as without, the Rogue Traders were the Emperor's attempt to solve two problems facing Him and His great design for mankind's new domain; lack of resources and upstart rivals.

In issuing the documents known as Warrants of Trade, the Emperor legitimised those so invested with the right to stray outside both the borders and rules of the Imperium - For theirs was the way of negotiation, bartering, and compromise; and their Warrants permitted them to do so with not only human colonies not yet reintegrated into the Imperium, but also with the varied and multitudinous races of Xenos they encountered.

The individuals issued with Warrants were often as varied as the forces they commanded - whether raging egomaniacs, paranoid despots, ruthless privateers, or just and honest commanders, the common thread that linked them all was their dedication to their new life - and the acquisition of fame and fortune.

Not all Rogue Traders were so happy with their lot, however, and in those cases, Warrants could be quickly voided, their bearers named as traitors to the cause as a result. In these cases, the Trader Militant's forces and their allies would find no peace or respite among the stars - for they would be hunted to the ends of the galaxy for daring to transgress against the Emperor Himself.

Wargear

Militant Bodyguard	6	5	5	3	3	2	4	2	8	4+
Trader-Militant Standard Bearer	6	5	5	3	3	2	4	2	9	4+

Unit Composition

- 2 Militant Bodyguards
- 1 Trader-Militant Standard Bearer

Unit Type

- Infantry

HQ

The Retainers Militant were those closest to the bearer of the Warrant of Trade, and in this trusted position they advised the Rogue Trader on all matters, warded their lives, and guarded their honour.

It was not uncommon for those among the factions that found themselves allied with the Traders Militant to send a representative to stand among such a cadre, allowing their concerns and motivations to be heard and understood directly - and ensuring the conditions of their support were upheld. Whilst occasionally uncomfortable in having to rub shoulders with the giants of the Astartes or Custodians, or the strange and varied forms of the Xenos, none among the retinue ever showed such weaknesses openly; for theirs was the way of alliances and promises, careful negotiations, and the weaving of friendships for mutual gain.

Wargear

- Las pistol
- Close Combat Weapon
- Void Armour
- Refractor Field
- Frag Grenades
- Krak Grenades
- Melta Bombs
- Trader-Militant Banner (Trader-Militant Standard Bearer only)

Special Rules

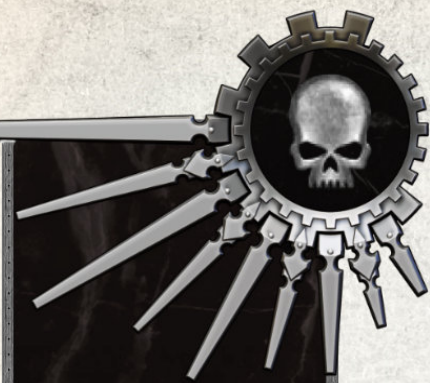

- Guardian Retainers
- Chosen Warriors
- Stubborn
- Battle-Hardened (1)

Dedicated Transport:

- A Retainers Militant unit may select a Land Raider Armoured Carrier, Aurox Transport, or Arvus Transport as a Dedicated Transport, so long as they would be permitted to embark upon it and fit within its Transport Capacity. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points cost must still be paid for as part of the army.

Options:

- A Retainers Militant unit may include:
 - Up to 2 additional Militant Bodyguards +20 points per model
- A Militant Bodyguard or Trader-Militant Standard Bearer in the unit may replace their Laspistol with one of the following options:
 - Blast Pistol +2 points
 - Needle Pistol +2 points
 - Bolt Pistol +2 points
 - Hot-Shot Laspistol +5 points
 - Volkite Serpenta +5 points
 - Hand Flamer +5 points
 - Plasma Pistol +5 points
 - Shotgun +5 points
 - Archaeotech Pistol +10 points
- A Militant Bodyguard or Trader-Militant Standard Bearer in the unit may replace their Close Combat Weapon with one of the following options:
 - Chainsword +2 points
 - Power Weapon +5 points
 - Charnabal Weapon +5 points
 - Storm Axe +10 points
 - Power Fist +15 points
- Any Militant Bodyguard or Trader-Militant Standard Bearer in the unit may replace their Void Armour with:
 - Power Armour +5 points
 - Heavy Void Armour +10 points
 - Artificer Armour +15 points
- The Trader-Militant Standard Bearer may replace their Refractor Field with:
 - Iron Halo +15 points
- A Retainers Militant unit may include one of each of the following options:
 - Adjuevant Medicae +25 points
 - Jokaero Courtier +30 points
 - Navigator Nobilis +35 points
 - Templax Challenger +50 points
 - Astropathica Primus +55 points
 - Primus Psykana +65 points
- A Retainers Militant unit may include up to two of the following option:
 - Defensor-Automata +15 points per model
- In an Army that contains a Detachment composed of models with the Legiones Astartes (X) Special Rule, a Retainers Militant unit may include:
 - Presage of the Legion +80 points
- In an Army that contains a Detachment with the Mechanicum Faction, a Retainers Militant unit may include:
 - Magos Attendis +100 points
- In an Army that contains a Detachment with the Imperial Army Faction (of any Sub-faction), a Retainers Militant unit may include:
 - Militaris Adjutant +30 points
- In an Army that contains a Detachment with the Legio Custodes Sub-faction, a Retainers Militant unit may include:
 - Custodian Observer +100 points
- In an Army that contains a Detachment with the Sisters of Silence Sub-faction, a Retainers Militant unit may include:
 - Executor of the Black Fleet +80 points
- In an Army that contains a Detachment with the Asuryani Sub-faction, a Retainers Militant unit may include:
 - Envoy of the Asur +40 points
- In an Army that contains a Detachment with the Saedath Sub-faction, a Retainers Militant unit may include:
 - Faceless Delegate +65 points

- Infantry

HQ

The medicae attached to the fleets of the Traders Militant were often paid handsomely for exclusive, life-long service to the Trader Militant cause, and equipped as such with the very best equipment - paid for from the Rogue Trader's own pocket - to ensure they were effective in their duties.

Often it would be required for the Adjuevants to undergo extensive training in the arts of rejuvenat treatments, allowing the Rogue Trader and those they deemed worthy to extend their voyages for decades beyond human capacities, living lives of a length far beyond ordinary human ken.

Wargear

- Narthecium
- Laspistol

 - Blast Pistol+2 points
 - Needle Pistol+2 points
 - Bolt Pistol+2 points
 - Hot-Shot Laspistol+5 points
 - Volkite Serpenta.....+5 points
 - Hand Flamer+5 points
 - Plasma Pistol+5 points
- The Adjuevant Medicae may replace their Close Combat Weapon with one of the following options:
 - Chainsword+2 points
 - Power Weapon.....+5 points
 - Charnabal Weapon.....+5 points
- The Adjuevant Medicae may replace their Void Armour with:
 - Power Armour.....+5 points
 - Heavy Void Armour.....+10 points
 - Artificer Armour+15 points

JOKAERO COURTIER

	M	WS	BS	S	T	W	I	A	Ld	Sv
Jokaero Courtier	6	1	3	2	3	1	3	1	7	-

Unit Composition

- 1 Jokaero Courtier

Unit Type

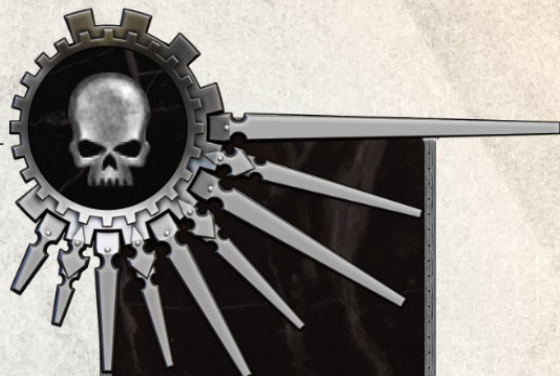

- Infantry

Wargear

- Jokaero Armaments
- Close Combat Weapon
- Refractor Field

Special Rules

- Guardian Retainers
- Sworn to Serve
- Weaponsmith's Ingenuity

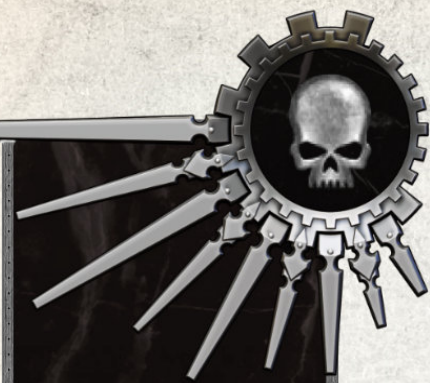

HQ

The strange creatures known as Jokaero were an uncommon sight across the nascent Imperium - for in truth, they represented one of the very few Xenos races openly tolerated by humanity - and actively sought out by a few. Jokaero, whilst animalistic and close in form to an ancient Terran simian, were seemingly remarkably intelligent despite lacking the ability to speak, having an innate skill with technology that outstripped their physical appearance. Anything left long enough in their presence would eventually be tinkered with, modified to fit the creature's whims - though it was just as likely the modifications would do nothing as it was to make the object in question incredibly potent in its uses.

The Jokaero themselves often were surrounded by small, hovering metallic orbs which projected energy fields to defend them whenever the creature perceived a threat, whilst their long and spindly fingers were often replaced with metallic armatures that contained miniaturised weapons of unbelievable potency.

Rogue Traders often enjoyed the company of such creatures, bartering food and shelter to them in return for the Jokaero's continued presence - as well as knowing that anything 'accidentally' left in their presence for a while might become immensely more useful...

NAVIGATOR NOBILIS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Navigator Nobilis	6	2	4	3	3	2	3	1	8	4+

Unit Composition

- 1 Navigator Nobilis

Unit Type

- Infantry (Psyker)

HQ

The Navigator households were not ignorant to the needs of the wider Crusade, and many found themselves requested to provide assistance to the mustering expeditionary fleets. Some saw this as a perfect opportunity to rid themselves of ascendant members of the households perceived to be a threat in times ahead - and so, many Navigators assigned to the far-flung Rogue Trader fleets would come to realise their assignment was as much to fulfil the obligations to the Emperor as it was to get rid of their troublesome selves.

Wargear

- Laspistol
- Force Staff
- Aetherlabe Instrumenta
- Void Armour
- Refractor Field
- Frag Grenades
- Krak Grenades

Special Rules

- Guardian Retainers

- Battle-Hardened (1)
- Counter-Attack (1)

Options:

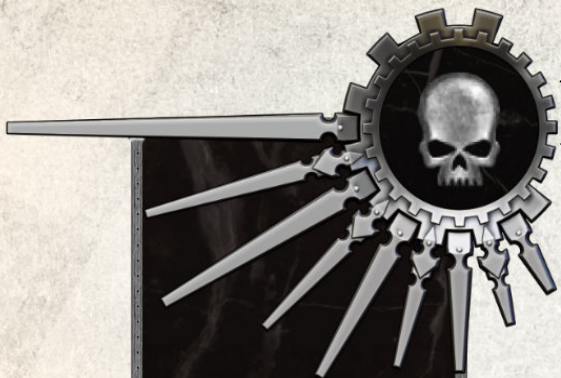

- The Templax Challenger may replace their Laspistol with one of the following options:
 - Blast Pistol +2 points
 - Needle Pistol +2 points
 - Bolt Pistol +2 points
 - Hot-Shot Laspistol +5 points
 - Volkite Serpenta +5 points
 - Hand Flamer +5 points
 - Plasma Pistol +5 points
 - Archaeotech Pistol +10 points
 - Proteus Pattern Storm Shield +15 points
- The Templax Challenger may replace their Charnabal Weapon with one of the following options:
 - Power Weapon Free
 - Paragon Blade +15 points
- The Templax Challenger may replace their Void Armour with:
 - Power Armour +5 points
 - Artificer Armour +15 points

HQ

The individuals known as Templax Challengers were a diverse and unusual group; comprised as often of high-born nobles with something to prove as much as they were hiver scum with a grudge to settle. These varied beginnings aside, however, the singular thread that linked these disparate individuals into a single classification was their consummate skill with a blade.

No matter the case of their upbringing, these individuals would swear bonds of fealty to a Trader Militant - perhaps hoping to earn favour or fortune - and would thusly be expected to fight in defence of their lives, bound by their honour to take on any who offered insult or injury to their liege lord no matter the risk to their own life. Armed and equipped to complete their duties from the Rogue Trader's own supplies and pockets, the legends these individuals would weave in service to their lieges would live beyond their mortal lifespan.

ASTROPATHICA PRIMUS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Astropathica Primus	6	3	4	3	3	2	3	1	8	4+

Unit Composition

- 1 Astropathica Primus

Unit Type

- Infantry (Psyker)

HQ

The Astropaths bound to a Trader Militant fleet were often selected specifically for their abilities above and beyond the more ordinary of their kin; able to project clear messages in comparison to others of their order and skilled in diplomacy in ways others not of their order could not hope to manage. Indeed, as advisors and confidants many found their place at the right hand of the Rogue Traders themselves, able to enjoy the comforts of such a life despite the solitude a psyker might ordinarily expect.

Wargear

- Laspistol
- Force Staff
- Void Armour
- Refractor Field
- Frag Grenades
- Krak Grenades

Special Rules

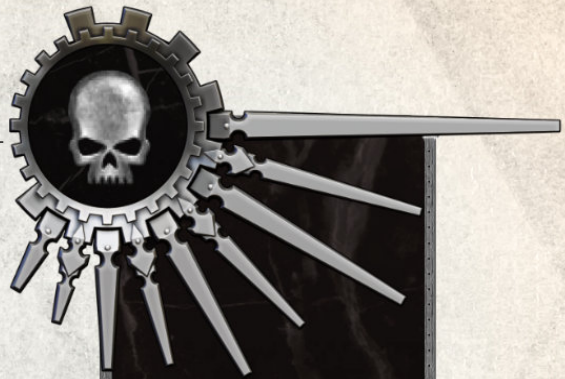

- Guardian Retainers
- Sworn to Serve
- Astra Telepathica

 - Artificer Armour+15 points

PRIMUS PSYKANA

	M	WS	BS	S	T	W	I	A	Ld	Sv
Primus Psykana	6	4	4	3	3	2	3	2	8	4+

Unit Composition

- 1 Primus Psykana

Unit Type

- Infantry (Psyker)

Wargear

- Laspistol
- Force Weapon
- Void Armour
- Refractor Field
- Frag Grenades
- Krak Grenades

Special Rules

- Guardian Retainers
- Sworn to Serve
- Psykana Militis
- Psychic Mastery (2)
- Adamantium Will (4+)

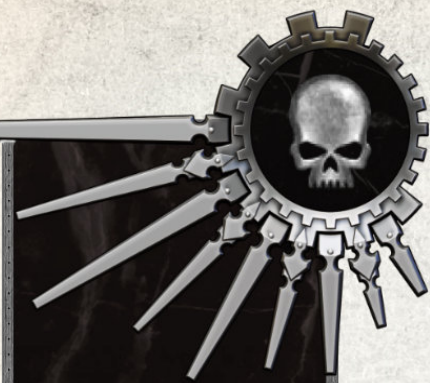

Options:

- The Primus Psykana may replace their Laspistol with one of the following options:
 - Blast Pistol+2 points
 - Needle Pistol+2 points
 - Bolt Pistol+2 points
 - Hot-Shot Laspistol+5 points
 - Volkite Serpenta.....+5 points
 - Hand Flamer+5 points
 - Plasma Pistol+5 points
- The Primus Psykana may replace their Void Armour with:
 - Power Armour.....+5 points
 - Heavy Void Armour.....+10 points
 - Artificer Armour+15 points

HQ

Whilst generally a broad classification, the sanctioned psykers known as Psykana were a tolerated transgression against the Emperor's will that wielded psychic powers openly, trained in the methods of doing so safely in order to bolster the ranks of the Imperium's armies against the poorly understood sorcerous threats of the Great Crusade. The most powerful of their number were known as Primus Psykana, and were able to pour forth great bolts of esoteric lightning, gelid flame, and even more unusual and abhorrent power.

Among the fleets bound to Rogue Traders, whilst rare, there were still accounts of Primus Psykana being unleashed in battle at the will of their masters; their deadly and arcane powers being put to seeming good use against foes with unknowable power of their own.

DEFENSOR-AUTOMATA

	M	WS	BS	S	T	W	I	A	Ld	Sv
Defensor-Automata	6	3	3	4	5	2	1	1	6	4+

Unit Composition

- 1 Defensor-Automata

Unit Type

- Automata (Guardian)

HQ

Defensor-Automata were a common sight in the retinues of the most paranoid and reclusive Rogue Traders, who purchased their augmented charges from Mechanicum Forge Worlds with which they had relatively good standing. Their immense bulk, resistance to pain, and ability to bear heavier armaments than most humans could manage was well liked and respected by many in the Trader Militant - and none could deny their effectiveness having witnessed them in battle - though the primary attraction to them was often joked to be their inability to refuse orders.

Wargear

- Close Combat Weapon

Special Rules

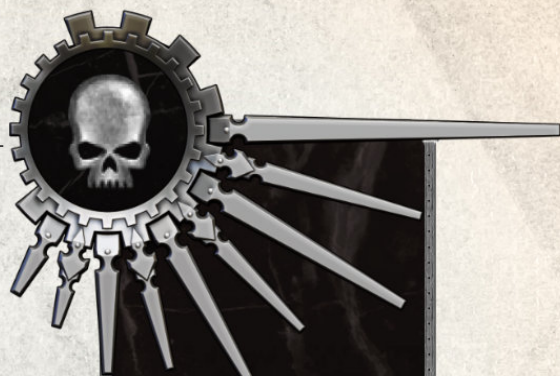

- Guardian Retainers
- Sworn to Serve
- Feel No Pain (5+)

Options:

- Any Defensor-Automata may replace their Close Combat Weapon with one of the following options:
 - Heavy Chainsword+2 points
 - Servo Arm+5 points
 - Flamer+5 points
 - Rotor Cannon+5 points
 - Heavy Bolter+10 points
 - Missile Launcher (with Frag, Krak, and Flak Missiles)+15 points
 - Volkite Culverin+15 points
 - Lascutter+15 points
 - Plasma Cannon+20 points
 - Multi-Melta+20 points

PRESAGE OF THE LEGION

	M	WS	BS	S	T	W	I	A	Ld	Sv
Legion Presage	7	5	5	4	4	2	5	3	9	2+

Unit Composition

- 1 Legion Presage

Unit Type

- Infantry

Wargear

- Bolt Pistol
- Chainsword
- Artificer Armour
- Iron Halo
- Frag Grenades
- Krak Grenades

Special Rules

- Guardian Retainers
- Sworn to Serve
- Chosen Warriors
- Legiones Astartes (X)
- Representative of the Legion
- Relentless
- Stubborn

Options:

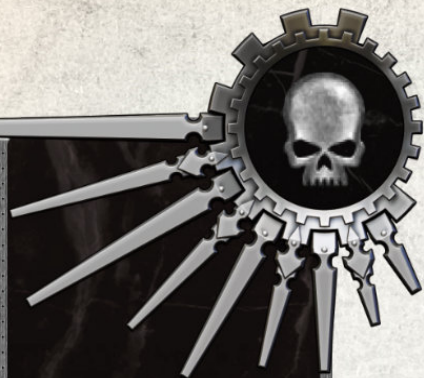

- The Legion Presage may select one of the following options:
 - Bolter +2 points
 - Astartes Shotgun +2 points
 - Volkite Charger +2 points
 - Minor Combi-Weapon +5 points
 - Magna Combi-Weapon +10 points
 - Nemesis Bolter +10 points
- The Legion Presage may replace their Bolt Pistol and/or Chainsword with one of the following options:
 - Boarding Shield* Free
 - Volkite Serpenta +2 points
 - Hand Flamer +2 points
 - Chainaxe +5 points
 - Plasma Pistol +10 points
 - Charnabal Weapon +10 points
 - Power Weapon +15 points
 - Lightning Claw +15 points
 - Power Fist +25 points
 - Thunder Hammer +30 points
- The Legion Presage may replace their Bolt Pistol and Chainsword with the following option:
 - Two Lightning Claws +15 points
- The Legion Presage may select any of the following options:
 - Combat Shield Free
 - Melta Bombs +10 points

*A Legion Presage that selects a Boarding Shield also gains the Heavy Sub-type.

HQ

Hailing from the serried ranks of the Legiones Astartes, those commanders seconded to the Rogue Trader courts as representatives were known as Presages. In this role they were expected to safeguard the interests of the Legion during their duties, as well as the honour of the Legion itself. To invite dishonour upon the Astartes was accepted by most mortals who had witnessed them in battle to be a death sentence; as a result, the presence of a Presage would still the tongue of even the most outspoken of a Trader Militant's courtiers.

Despite their relatively pedestrian assignment, however, a Presage was still a member of the Legiones Astartes, and a high-ranking one at that - and so whilst consummate skill with their weapons was expected as the default, their wit and insight was often rather more unexpected of them - though all who treated with them agreed their tongues could be just as sharp, if not more so, than their blades.

MAGOS ATTENDIS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Magos Attendis	6	4	5	5	5	3	4	2	9	2+

Unit Composition

- 1 Magos Attendis

Unit Type

- Infantry

HQ

Hailing from the forges of Mechanicum, the Magos Attendis were responsible for upholding the laws of their holy order during the ranging missions performed by the Traders Militant fleets. In this role, many different castes and sub-classifications of the Taghmata and Divisios were represented - including both the Legio Titanicus and the Questoris Households, as well as ever more obscure sub-divisions and doctrines of the Martian Priesthood. No matter their origin, these magi were expected to assist in matters of both their cult's doctrinal purity - and in matters of war, co-ordinating the deployment of their engines of destruction as requested by the Rogue Trader.

Wargear

- Laspistol
- Power Weapon
- Mechanicum Protectiva

Special Rules

- Guardian Retainers
- Sworn to Serve
- Chosen Warriors
- Relentless
- Stubborn
- Firing Protocols (2)
- Battlesmith (5+)

Options:

- The Magos Attendis may select any of the following options:
 - Augury Scanner +5 points
 - Melta Bombs +5 points
 - Rad Grenades +10 points
 - Cyber-Familiar +15 points
 - Cortex Controller +15 points
- The Magos Attendis may exchange either their Laspistol and/or Power Weapon each for one of the following options:
 - Volkite Serpenta +2 points
 - Archaeotech Pistol +5 points
 - Lucifex +5 points
 - Maxima Bolter +5 points
 - Photon Gauntlet +10 points
 - Plasma Pistol +10 points
 - Power Fist +10 points
 - Corpusant Stave +10 points
 - Chainfist +15 points
- The Magos Attendis may take one of the following options:
 - Servo Arm +10 points
 - Conversion Beamer +25 points
 - Graviton Imploder +25 points
 - Machinator Array +25 points
- The Magos Attendis may take one of the following additional weapon options:
 - Rotor Cannon +10 points
 - Graviton Gun +15 points
 - Meltagun +15 points
 - Magnarail Lance +20 points
 - Irad-Cleanser +20 points
 - Phased Plasma-Fusil +25 points
 - Transonic Cannon +30 points

 - Charnabal Weapon..... +5 points
 - Power Fist +15 points
- The Militaris Adjutant may select any of the following options:
 - Augury Scanner +5 points
 - Nuncio-Vox..... +5 points
 - Cognis-Signum +10 points
- The Militaris Adjutant may replace their Void Armour with:
 - Power Armour..... +5 points
 - Heavy Void Armour..... +10 points
 - Artificer Armour +15 points
- If the Militaris Adjutant is equipped with a Lasrifle or Bolter, they may select the following option:
 - Bayonet +1 point

HQ

Those from among the massed ranks of human soldiers who formed the most numerous of the armies of the Great Crusade who fought alongside the Traders Militant were known as the Militaris Adjutants. Responsible for the provisioning of ammunition, food, and all the other materiel needed for the mortal elements of a fleet to stage a campaign, Adjutants had to be both diplomatic and ruthless beyond even the other elements of a Rogue Trader's entourage; for it was all too easy for an Astartes or Custodian to dismiss the concerns of an unmodified human, and so fighting their corner was a required skill.

For their bravery - their single-minded willingness to stomp down upon the Transhuman Dread that bubbled from within when faced with one of the Emperor's sons and speak their minds or fight for their lives - did these officers earn the grudging respect of all.

CUSTODIAN OBSERVER

	M	WS	BS	S	T	W	I	A	Ld	Sv
Custodian Observer	8	5	5	5	5	3	5	4	9	2+

Unit Composition

- 1 Custodian Observer

Unit Type

- Infantry (Skirmish)

HQ

Assigned often at the instruction of the Emperor Himself, the Custodians known as Observers were not a specific rank, but instead a duty - instructed to watch for signs that a fledgling Rogue Trader was correctly utilising their Warrant of Trade and that their investiture as such was not a mistake or a waste.

In this duty, the Custodian so appointed would remain steadfastly committed - though it was not entirely unknown, over the long periods of their assignment, for a Custodian to become somewhat attached to their mortal charge, sharing a bond that could even be taken by outsiders for something approaching friendship.

Wargear

- Guardian Spear

- Ex Oblivio
- Loyalist
- Null-Soul

Options:

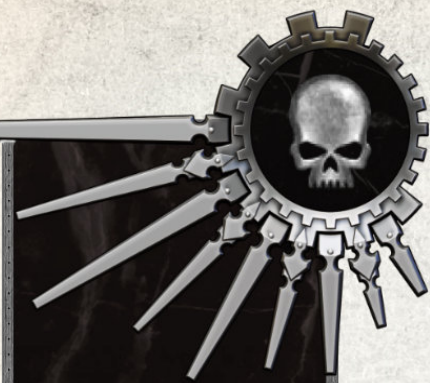

- The Executor of the Black Fleet may exchange her Execution Blade for one of the following options:
 - Power Weapon +5 points
 - Charnabal Weapon +5 points
 - Proteus Neuro-Lash +5 points
- The Executor of the Black Fleet may exchange her Bolt Pistol for one of the following options:
 - Hand Flamer Free
 - Needle Pistol +5 points
 - Plasma Pistol +10 points
 - Archaeotech Pistol +10 points
- The Executor of the Black Fleet may upgrade a single weapon she is equipped with to have the following Special Rule:
 - Master-Crafted +10 points

HQ

Executors of the Black Fleets held a sinister and dubious prestige among the Rogue Traders, for the duties that required standing shoulder-to-shoulder with such ominous figures were often rumoured to be some of the most important or critical to the survival of the nascent Imperium, and so to be tasked to them was considered an honour of sorts.

Among the Silent Sisterhood themselves, no such feeling was present. Regarding their assignments to the Traders Militant as an irritation and a distraction, often many of them would simply slog through the time their forces spent bound, desperate to be released from their shared service to once again pursue their highest calling in the hunting of the Mutant and the Psyker.

Those Sisters given the task of representing their warhost in the court of the Rogue Traders were often noted to be particularly powerful blanks; ones who could both hide their true nature as nulls to assuage the horror inspired by their presence, or otherwise go in the opposite direction and amplifying the effects of their blank-souled nature to cause discomfort or even outright pain in those foolish or unlucky enough to irritate them.

ENVOY OF THE ASUR

	M	WS	BS	S	T	W	I	A	Ld	Sv
Envoy of the Asur	7	5	5	3	3	2	5	3	9	4+

Unit Composition

- 1 Envoy of the Asur

Unit Type

- Infantry (Asuryani)

HQ

Tolerated with barely-suppressed contempt by some within the Traders Militant, but welcomed with open arms and warm smiles by others, the Envoys of the Asuryani were representatives of the great Aeldari Craftworlds, tasked with ensuring that any alliance between human and Eldar was at the least beneficial to at least the Asur and Traders Militant - if not the wider Imperium.

Despite the obvious mistrust from some, or the doubts of falsehood in others, many such alliances were witnessed - for the list of allies available to the Asur grew thin during the waning years of the Great Crusade, and many understood it would more conducive to their continued survival to ally themselves with the burgeoning Imperium.

Unbeknownst to both sides of these uneasy alliances, the horrors of Horus' war upon the galaxy would soon reveal the folly of such logic.

Wargear

- Chainsword
- Shuriken Pistol
- Heavy Mesh Armour
- Forceshield

 - Harlequin's Embrace..... +5 points
 - Harlequin's Caress.....+10 points
 - Harlequin's Edge..... +20 points
- The Faceless Delegate may select:
 - Haywire Grenades.....+10 points

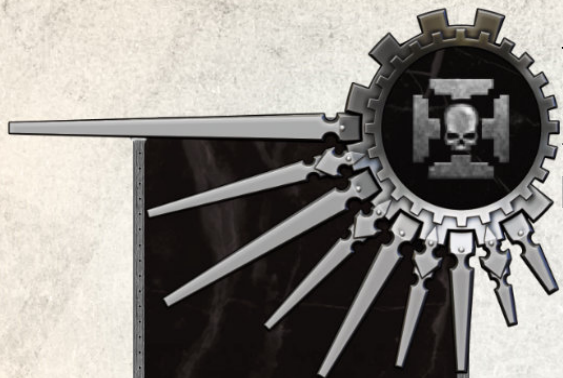

HQ

Where the representatives of other groups, or even races in the case of the Xenos, were distinctive and varied, the Faceless Delegates of the Saedathii were all alike in every way. From the colourations of their cloaks, to their soft-spoken lilting voices, and especially the facelessly blank masks they wore, no Delegate was ever distinctive enough to pick apart, and it was often whispered one would change place with another at random to try and unnerve or wrong-foot the Rogue Traders who consorted with them. Despite these theatrics, the Faceless Delegates were always fair and amicable, offering terms that seemed generous to all who heard them and reasonable even to the standards of the most demanding negotiators - though to what ends the Harlequins were playing, none could ever tell...

TRADERS MILITANT: Elites

VOIDSMEN CADRE 85 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Voidsman	6	4	4	3	3	1	3	1	7	4+
Voidmaster	6	4	4	3	3	1	3	2	8	4+

Unit Composition

- 9 Voidsmen
- 1 Voidmaster

Unit Type

- Voidsman: Infantry (Line)
- Voidmaster: Infantry (Character, Line)

ELITES

Recruited from among the ranks of the Solar Auxilia and other prestigious regiments of the Imperial Army - or otherwise drawn from private militaries and protectorates - the Voidsmen of the Traders Militant were usually employed in the role of protecting the interests of the Rogue Trader and their entourage. Well-armed and equipped, the loyalty displayed by Voidsmen was proof that such a thing could be bought - for the right price.

The best men and women from among the Voidsmen were often recruited into other functions in the Trader Militant's forces - whether to pilot Grav-Attacks, Carnodons, or transports, or otherwise to join the ranks of the Savaris or Imperatrix; any among them who showed skill was surely rewarded, in an effort not only to field the best possible forces, but to keep their purchased loyalty firmly and truly in place.

Wargear

- Lasgun
- Void Armour
- Frag Grenades
- Krak Grenades

Special Rules

- Inexorable

Dedicated Transport:

- A Voidsmen Cadre of no more than ten models may select a Land Raider Armoured Carrier, Aurox Transport, or Arvus Transport as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points cost must still be paid for as part of the army.

Options:

- A Voidsmen Cadre may include:
 - Up to 10 additional Voidsmen +8 points per model
- For every five models in the unit, one Voidsman may replace their Lasgun with one of the following options:
 - Assault Needler +5 points
 - Rotor Cannon +5 points
 - Volkite Caliver +5 points
 - Multi-Laser (with Suspensor Web) +5 points
 - Hot-Shot Volley Gun (with Suspensor Web) +10 points
 - Lascutter +15 points
- Any model in the unit may replace their Lasgun with one of the following options:
 - Shotgun Free
 - Lasrifle Free
 - Volkite Charger +2 points
 - Hot-Shot Lasgun +5 points
- The Voidmaster may take one of the following melee weapon options:
 - Chainsword +2 points
 - Power Weapon +10 points
 - Charnabal Weapon +10 points
 - Power Fist +15 points
 - Chainfist +20 points
- The Voidmaster may take one of the following ranged weapon options:
 - Laspistol +1 point
 - Blast Pistol +2 points
 - Needle Pistol +2 points
 - Bolt Pistol +2 points
 - Hot-Shot Laspistol +5 points
 - Volkite Serpenta +5 points
 - Hand Flamer +5 points
 - Plasma Pistol +10 points
- The unit may replace their Void Armour with:
 - Heavy Void Armour +2 points per model
- The unit may select:
 - Melta Bombs +25 points

 - Plasma Gun..... +10 points
 - Meltagun..... +15 points
- The Imperatrix Bondmaster may take one of the following melee weapon options:
 - Chainsword..... +2 points
 - Power Weapon..... +10 points
 - Charnabal Weapon..... +10 points
 - Power Fist..... +15 points
 - Chainfist..... +20 points
- The Imperatrix Bondmaster may take one of the following ranged weapon options:
 - Laspistol..... +1 point
 - Blast Pistol..... +2 points
 - Needle Pistol..... +2 points
 - Bolt Pistol..... +2 points
 - Hot-Shot Laspistol..... +5 points
 - Volkite Serpenta..... +5 points
 - Hand Flamer..... +5 points
 - Plasma Pistol..... +10 points
- The unit may select:
 - Melta Bombs..... +25 points

ELITES

Among those bondsmen who excelled in the art of ranged combat, there was often the chance for promotion to an Imperatrix Cadre. On the battlefield, the Imperatrix were expected to provide covering fire for their employers should their deals go awry. A prospective Imperatrix would be drilled in the skills required for precision under pressure, as well as the methods and skills required to maintain the weapons they were assigned.

Once their training was complete, the Imperatrix would be formally invested into a corps, and equipped with their choice from a maddening array of man-portable ranged equipment - ranging from needle to volkite weaponry, and including everything between.

SAVARIS BONDSMEN CADRE 60 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Savarite	6	4	4	3	3	2	4	2	7	4+
Savaris Bondmaster	6	4	4	3	3	2	4	3	8	4+

Unit Composition

- 4 Savarites
- 1 Savaris Bondmaster

Unit Type

- Savarite: Infantry
- Savaris Bondmaster: Infantry (Character)

Special Rules

- Stubborn
- Support Squad

Wargear

- Close Combat Weapon
- Laspistol
- Void Armour
- Frag Grenades
- Krak Grenades

Dedicated Transport:

- A Savaris Bondsman Cadre of no more than ten models may select a Land Raider Armoured Carrier, Aurox Transport, or Arvus Transport as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points cost must still be paid for as part of the army.

Options:

- A Savaris Bondsman Cadre may include:
 - Up to 15 additional Savarite +11 points per model
- Any model in the unit may select the following option:
 - Shotgun +2 points
- Any model in the unit may replace their Laspistol and/or Close Combat Weapon with one of the following options:
 - Blast Pistol +2 points
 - Needle Pistol +2 points
 - Bolt Pistol +2 points
 - Chainsword +2 points
 - Hot-Shot Laspistol +5 points
 - Volkite Serpenta +5 points
 - Hand Flamer +5 points
 - Plasma Pistol +5 points
 - Heavy Chainsword +5 points
 - Power Weapon +5 points
 - Charnabal Weapon +5 points
 - Storm Axe +10 points
- For every five models in the unit, one Savarite may replace their Laspistol or Close Combat Weapon with one of the following options:
 - Power Fist +15 points
 - Chainfist +20 points
 - Lascutter +20 points
- Any model in the unit may select:
 - Boarding Shield (and the Heavy Sub-type) +2 points
- The Savaris Bondmaster may take replace their Close Combat Weapon with one of the following options:
 - Power Fist +10 points
 - Chainfist +15 points
- The unit may replace their Void Armour with:
 - Heavy Void Armour +2 points per model
- The unit may select:
 - Melta Bombs +25 points

ELITES

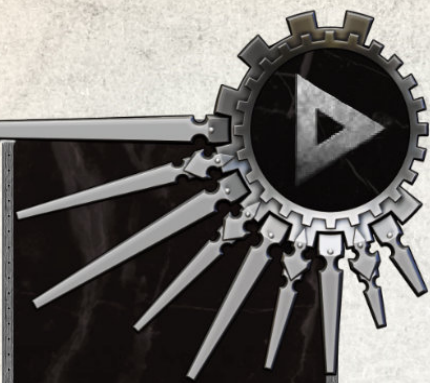

Where the Imperatrix Bondsman Cadres were composed of those individuals raised from the Voidsman who excelled in ranged combat, the Savaris Cadres were instead entirely formed of those Voidsman who were most at home in the swirling maelstrom of bloody melee.

In combat, the Savaris were well known for savagery - contrasting the orderly rank and file of the Imperatrix, or the cautious masses of Voidsman - and were often witnessed charging into battle with shouted obscenities and chats; marking themselves as the veterans of a thousand wars, kept in fighting condition by a mix of rejuvant treatments and stimms.

TRADERS MILITANT: Troops

ARVUS TRANSPORT 60 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Arvus Transport	20	4	11	11	10	2	12

DEDICATED TRANSPORT

The Arvus Lighter was a common and mass-produced transport that was within reach and budget for almost all branches of the Imperial military - as well as for the private armies of planetary governors, Auxilia commanders, and Rogue Traders. A venerable design that had been in use since before the dawn of the Great Crusade, the Arvus was well known for being easy to repair and refit, a quirk that ensured it remained popular despite other more advanced models being introduced toward the Crusade's end.

Unit Composition

- 1 Arvus Transport

Unit Type

- Vehicle (Flyer, Hover, Transport)

Wargear

- Hull (Front) Mounted Heavy Stubber
- Smoke Launchers

Special Rules

- Infantry Transport
- Deep Strike

Access Points:

- An Arvus Transport has one Access Point at the rear.

Options:

- The Arvus Transport may exchange its Hull (Front) Mounted Heavy Stubber for one of the following options:
 - Hull (Front) Mounted Multi-Laser +5 points
 - Hull (Front) Mounted Heavy Bolter +10 points
 - Hull (Front) Mounted Autocannon +10 points
 - Hull (Front) Mounted Lascannon +15 points
- An Arvus Transport may choose to give a single Ranged Weapon it is equipped with the following Special Rule:
 - Twin-Linked +10 points
- The Arvus Transport may select any of the following options:
 - Searchlights +5 points
 - Flare Shield +25 points

AUROX TRANSPORT 40 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Aurox Transport	15	4	11	11	10	3	12

Unit Composition

- 1 Aurox Transport

Unit Type

- Vehicle (Transport)

Wargear

- Smoke Launchers

Special Rules

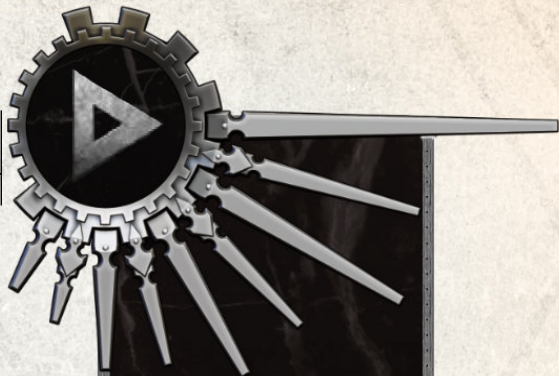

- Infantry Transport

Access Points:

- An Aurox Transport has one Access Point on each side of the hull and one at the front.

Options:

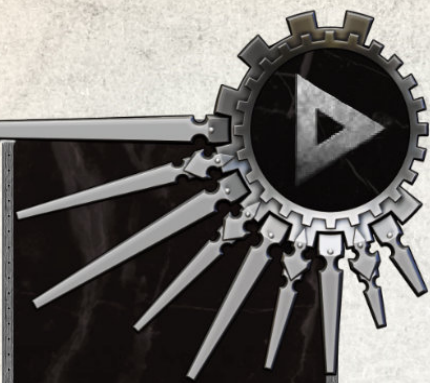

- The Aurox Transport may select one of the following options:
 - Pintle Mounted Heavy Stubber.....+5 points
 - Pintle Mounted Multi-Laser+5 points
 - Pintle Mounted Heavy Flamer+5 points
- The Aurox Transport may select any of the following options:
 - Searchlights+5 points
 - Dozer Blade+5 points

DEDICATED TRANSPORT

Comprising a robust, modular chassis, and an armoured crew compartment big enough to seat twelve passengers, the Aurox Transport was a relatively recent innovation, designed and produced in bulk at the commencement of the Crusade to enable the massed ranks of the Imperial Army to be transported without the comparatively high expenditures required to produce the Rhino Transporter chassis.

These massive production quantities inevitably resulted in surplus vehicles, which were left behind as the grinding advance of the Great Crusade pushed onward - and these were eagerly taken up by many, including the forces of the Traders Militant, allowing them a cheap and reliable mode of traversing alien worlds.

LAND RAIDER ARMOURED CARRIER 200 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Land Raider Armoured Carrier	12	4	14	14	14	5	12

Unit Composition

- 1 Land Raider Armoured Carrier

Unit Type

- Vehicle (Transport, Reinforced)

DEDICATED TRANSPORT

Only the most fantastically wealthy Rogue Traders could afford the statement of absolute authority that was a Land Raider Armoured Carrier - the immense size and complexity in constructing them ensuring they commanded a high price from any Magos willing to entertain the concept of selling one to the Trader Militant in the first place. Yet, despite the prohibitive cost involved, some Rogue Traders owned not one of these powerful vehicles but several, using them to ensure that any who took to the field at their command was properly protected in order to allow them to properly fulfil their duties.

Thanks to their high cost, however, it was common for the Land Raiders to purchased to be customised further to ensure their purchase could properly defend itself; various configurations proved popular over the years of the Great Crusade, with the ever-common Lascannon and Heavy Bolter combination oft-seen - though everything from Melta to Volkite loadouts were recorded as having been witnessed in battle.

Wargear

- Two Sponson Mounted Gravis Heavy Bolter Batteries
- Hull (Front) Mounted Twin-Linked Heavy Bolter
- Smoke Launchers

Special Rules

- Power of the Machine Spirit
- Assault Vehicle

Access Points:

- A Land Raider Armoured Carrier has one Access Point on each side of the hull and one at the front.

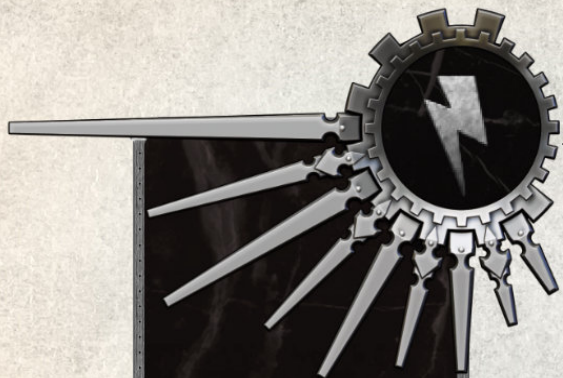

Options:

- The Land Raider Armoured Carrier may exchange its Two Sponson Mounted Gravis Heavy Bolter Batteries for one of the following options:
 - Two Sponson Mounted Flamestorm Cannons +5 points
 - Two Sponson Mounted Volkite Dual-Culverins +10 points
 - Two Sponson Mounted Gravis Melta Cannons +15 points
 - Two Sponson Mounted Gravis Lascannons +20 points
- The Land Raider Armoured Carrier may exchange its Hull (Front) Mounted Twin-Linked Heavy Bolter for one of the following options:
 - Hull (Front) Mounted Twin-Linked Heavy Flamer Free
 - Hull (Front) Mounted Twin-Linked Lascannon +15 points
 - Explorator Augury Web +40 points
- The Land Raider Armoured Carrier may select one of the following options:
 - Pintle Mounted Heavy Stubber +5 points
 - Pintle Mounted Multi-Laser +5 points
 - Pintle Mounted Heavy Flamer +5 points
- The Land Raider Armoured Carrier may select any of the following options:
 - Searchlights +5 points
 - Dozer Blade +5 points

TRADERS MILITANT: Fast Attack

GRAV-SPEEDER SQUADRON50 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Grav-Speeder	16	4	4	3	5	3	3	1	7	4+

Unit Composition

- 1 Grav-Speeder

Unit Type

- Cavalry (Antigrav)

FAST ATTACK

The Grav-Attack was a finicky and awkward piece of equipment that proved annoyingly difficult for many to master, in spite of its incredible top speed and ability to bear a pilot to unusually high altitudes for an anti-grav vehicle. In being unable to support the weight of a fully-armoured Astartes, it also never found favour amongst the Legionaries - and this lack of favour would have led to its extinction, if it were not for the diligent work of the Forge World of Arkadia, alongside the Traders Militant.

Refining the chassis to include stabilisation fins, and to use the weight of multiple items of heavy armament to balance the grav-attack itself, allowed the craft to finally see active use - although solely within the purview of the Rogue Trader's forces themselves.

Wargear

- Void Armour
- Arkadia Pattern Grav-Attack
- Laspistol
- Close Combat Weapon

Special Rules

- Deep Strike
- Relentless
- Firing Protocols (3)
- Outflank
- Hit & Run
- Heralds of the Advance
- Skilled Rider

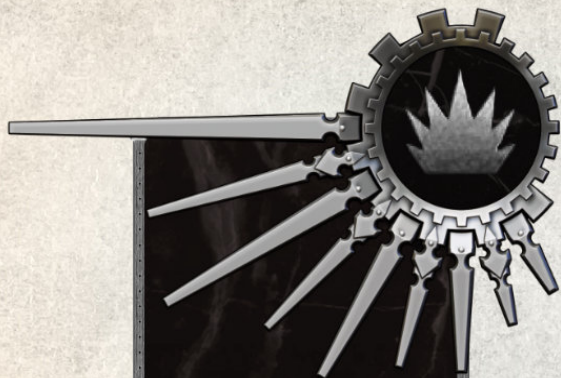

Options:

- A Grav-Speeder Squadron may include:
 - Up to 5 additional Grav-Speeders +50 points per model
- Any model may replace either or both of their Arkadia Pattern Grav-Attack's Heavy Bolters with one of the following options:
 - Heavy Flamer Free
 - Multi-Laser Free
 - Havoc Launcher +5 points
 - Plasma Cannon +10 points
 - Volkite Culverin +10 points
 - Graviton Gun +10 points
 - Autocannon +10 points
 - Needle Cannon +15 points
 - Multi-Melta +20 points
- Any model may take up to two of the following option:
 - One Hunter-Killer Missile +5 points

TRADERS MILITANT: Heavy Support

CARNODON SEVERAX SQUADRON..... 85 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Carnodon-Severax	15	4	12	11	10	3	-

Unit Composition

- 1 Carnodon-Severax

Unit Type

- Vehicle

HEAVY SUPPORT

The Carnodon was being largely put aside within the Imperium toward the end of the Great Crusade, finding itself replaced by the Leman Russ for a variety of reasons in many forces. One place where the Carnodon was not just maintained, but preferred, however, was the forces of the Traders Militant - where the increased speed and manoeuvrability of the chassis had earned it the favour of all who crewed them.

Used in formations known as 'Severax', these Carnodon squadrons would separate after rolling from their landers, peeling off into distinct groups to encircle and harass the enemy to allow the lighter elements of the Rogue Trader's forces to advance under their enfilading crossfire.

Wargear

- Turret Mounted Gravis Multi-Laser
- Two Sponson Mounted Multi-Lasers
- Smoke Launchers

Special Rules

- Severax Talon
- Scout

Options:

- A Carnodon Severax Squadron may include:
 - Up to 5 additional Carnodon-Severax.....+85 points per model
- Any model in the Squadron may exchange their Turret Mounted Gravis Multi-Laser for one of the following options:
 - Turret Mounted Volkite Culverin..... Free
 - Turret Mounted Gravis Autocannon +10 points
 - Turret Mounted Gravis Lascannon +20 points
- Any model in the Squadron may exchange their Two Sponson Mounted Multi-Lasers for one of the following options:
 - Two Sponson Mounted Heavy Flamers..... Free
 - Two Sponson Mounted Volkite Calivers..... Free
 - Two Sponson Mounted Heavy Bolters Free
 - Two Sponson Mounted Autocannons +5 points
 - Two Sponson Mounted Lascannons..... +15 points
- Any model in the Squadron may select one of the following options:
 - Pintle Mounted Heavy Stubber..... +5 points
 - Pintle Mounted Heavy Flamer +5 points
 - Pintle Mounted Multi-Laser +10 points
- Any model in the Squadron may select any of the following options:
 - Searchlights +5 points
 - Dozer Blade +5 points

LIBER IMPERATUS:
Legio Custodes

CHAMBERS OF THE GOLDEN HOST

Throughout the whole of the Unification Wars and most of the early Great Crusade, the forces of the Legio Custodes were not widespread nor commonly seen among the nascent Imperium. Tasked solely with protecting the Emperor and enacting His will, they were only found en-mass when their ranks surrounded their ward. While smaller sodalities and even individual warriors were often tasked with highly specific missions such as watching over the Primarchs, the onset of the Heresy proved the folly of this method of deployment. As the fires of war engulfed the galaxy once more, the peerless warriors of the Legio Custodes assembled into their mighty Shield-Hosts to deny Horus' ascendancy once and for all.

Each Chamber of the Golden Host represents a different philosophy of waging war embodied by the Legio Custodes, and is chosen when a player selects their army - before the start of a battle. The rules for each individual Chamber will present a number of Effects which will grant the Detachment new options or special rules, as well as a number of Limitations which will deny the Detachment access to certain options or rules it might otherwise have been able to make use of. Unless otherwise stated as part of the Chamber's rules, all Effects and Limitations must be applied to models and units that are selected as part of the Detachment that it has been chosen for.

GAINING ACCESS TO CHAMBERS OF THE GOLDEN HOST

A Primary Detachment that has the Legio Custodes Sub-faction may use a Chamber of the Golden Host. These Chambers of the Golden Host may not be used by Optional or Allied Detachments of any kind.

CHAMBER OF THE GOLDEN HOST: HYKANATOI

The Hykanatoi made up the bulk of the Legio Custodes, heavy infantry clad in Auramite armour that effortlessly crushed all resistance against them. Most were armed with the iconic Guardian Spear and Misericordia, though this chamber also held the defensive specialists of the Sentinel Guard and the Emperor's three-hundred Companions, the Hetaeron Guard. Taken together, the Hykanatoi represented the absolute authority of the Emperor's will.

Effects

- Custodian Host-Masters are a 0-2 selection option in a Detachment using this Chamber, instead of a 0-1 selection as normal.
- Custodian Guard Squads, Sentinel Guard Squads, and Hetaeron Guard Squads selected as part of a Detachment using this Chamber gain the Counter-Attack (1) and Crusader Special Rules while holding or contesting an Objective Marker. If the mission being used does not use Objective Markers, then this benefit has no effect.

Limitations

- If, at the start of your player turn, you control less Objective Markers than your opponent, then friendly models with the Legio Custodes Special Rule selected as part of a Detachment using this Chamber may only claim the benefits of the Nemesis Special Rule against enemy units that are Controlling or Contesting an Objective Marker until the start of your next player turn. If the mission being used does not use Objective Markers, then this restriction has no effect.
- A Detachment using this Chamber must include at least one Custodian Host-Master.
- A detachment using this Chamber may not include more units with the Vehicle and Dreadnought Unit Type than units without the Vehicle or Dreadnought Unit Type.

CHAMBER OF THE GOLDEN HOST: THARANATOI

The Tharanatoi were the elite shock troops of the Legio Custodes, especially skilled in siege warfare and boarding operations. Befitting this role, the Tharanatoi were almost universally clad in the nigh-invulnerable Allarus and Aquilon patterns of Terminator Armour. Without fear, hesitation, or mercy, the Tharanatoi exemplified the unbridled strength of the Emperor's wrath.

Effects

- A Detachment using this Chamber may select Aquilon Terminator Squads and Allarus Terminator Squads as Troops choices.
- Allarus Terminator Squads and Aquilon Terminator Squads selected as Compulsory Troops and composed of no more than 5 models can purchase the Deep Strike special rule for +20 points per model.
- Allarii Shield Captains and Aquilus Shield Captains included in a Detachment using this Chamber may purchase the Deep Strike special rule for +30 points each.
- If the army's Warlord is drawn from a Detachment using this Chamber, then they must use the Wrath of the Tharanatoi Warlord Trait instead of the Golden Exemplar Warlord Trait, and are unable to select any other Warlord Trait.

Warlord: Wrath of the Tharanatoi

All Melee Attacks made by a model with this Warlord Trait gain the Concussive (1) and Wrecker Special Rules.

Furthermore, the first Reaction made in each Game Turn by this Warlord and any unit he has joined does not use up a point of the Controlling Player's Reaction Allotment.

Limitations

- A Detachment using this chamber must select a Custodian Allarii Shield Captain or a Custodian Aquilus Shield Captain as its compulsory HQ.
- A Detachment using this chamber must select either Allarus Terminator Squads and/or Aquilon Terminator Squads as its Compulsory Troops choices. Each Compulsory Troops choice selected in a Detachment using this Chamber is worth an additional +1 Victory Point when destroyed by an Opposing Player.
- A Detachment using this Chamber may not select any models with the Cavalry unit type.
- A Detachment using this Chamber may only select a single Fast Attack choice.

CHAMBER OF THE GOLDEN HOST: KATAPHRAKTOI

Composed of the fast attack and reconnaissance units of the Legio Custodes, the Kataphraktoi were the premier rapid-response and first strike forces of all the Imperium. Mounted atop Agamatus and Dawneagle jetbikes, or else strapped into the grav-powered Venetari jump harness, Custodians of this Chamber were the Emperor's heavy cavalry and swift hunting eagles, ensuring none remained beyond His reach.

Effects

- A Detachment using this Chamber may select Custodian Venetari Squads as Troops choices, and all Custodian Venetari Squads selected as Troops choices gain the Line Unit Sub-type.
- A Detachment using this Chamber may select Agamatus Jetbike Squadrons and Dawneagle Jetbike Squadrons as non-compulsory Troops choices.
- If the army's warlord is drawn from a detachment using this Chamber, then they must use the Kataphraktoi Charger Warlord Trait instead of the Golden Exemplar Warlord Trait, and are unable to select any other Warlord Trait.

Warlord: Kataphraktoi Charger

A model with this Warlord Trait, and all models in a unit that he has joined, gain the Hammer of Wrath (1) Special Rule, or otherwise increase the value of their Hammer of Wrath (X) Special Rule by +1 if they already have it. All hits inflicted by any variant of the Hammer of Wrath (X) Special Rule caused by the Warlord and all models in a unit he has joined gain the Breaching (6+) Special Rule.

Furthermore, the first Reaction made in each Game Turn by this Warlord and any unit he has joined does not use up a point of the Controlling Player's Reaction Allotment.

Limitations

- A Detachment using this chamber must select a Custodian Verto Shield Captain, Custodian Agamatii Shield Captain, or a Custodian Venataris Shield Captain as its compulsory HQ.
- A Detachment using this Chamber may not include any models equipped with Aquilon Terminator Armour or Allarus Terminator Armour.
- A Detachment using this chamber may not select any Heavy Support choices that do not have the Antigra Unit Sub-type.
- A Detachment using this chamber may not select any Dedicated Transports that do not have the Antigra Unit Sub-type.

CHAMBER OF THE GOLDEN HOST: MORITOI

The smallest of all the Chambers, the Moritoi were the honoured dead of the Legio Custodes, those few warriors who fell in battle and were interred in a dreadnought sarcophagus. When the situation demanded, whole formations of these venerable warriors were awakened and sent unto the fires of war that the galaxy might tremble at the coming of the Emperor's fury.

Effects

- Contemptor-Achillus Dreadnoughts and Contemptor-Galatus Dreadnoughts may be taken as Troops choices in a Detachment using this Chamber.
- Sagittarum Guard Squads may be taken as Troops choices in a Detachment using this Chamber. All Sagittarum Guard Squads in a Detachment using this Chamber gain the Line Unit Sub-type.
- A single Contemptor-Achillus Dreadnought or Contemptor-Galatus Dreadnought may be selected as this Detachment's Compulsory HQ choice. If this option is chosen, then that model must be upgraded to an Honoured Ancient at a cost of +30 points, and additionally this model must be the army's Warlord. The model must select the Ancient of War Warlord Trait, and is unable to select any other Warlord Trait.

Honoured Ancient

A model upgraded to be an Honoured Ancient is equipped with an Iron Halo and gains the Eternal Warrior Special Rule.

Warlord: Ancient of War

All models with the Dreadnought Unit Type in a Detachment including a model with this Warlord Trait gain the It Will Not Die (5+) Special Rule.

Furthermore, the first Reaction made in each Game Turn by this Warlord and any unit he has joined does not use up a point of the Controlling Player's Reaction Allotment.

Limitations

- Compulsory Troops Choices in a Detachment using this Chamber must be composed of either Contemptor-Achillus Dreadnoughts or Contemptor-Galatus Dreadnoughts in any combination.
- Any model with the Dreadnought Unit Type selected in a Detachment using this Chamber is worth an additional +1 Victory Point when destroyed by an Opposing Player.
- A Detachment using this Chamber may not select more Fast Attack and Heavy Support choices combined than Troops choices.
- A Detachment using this Chamber can never roll to Seize the Initiative.
- An army whose primary Detachment uses this Chamber cannot select Fortification choices or a Lord of War Optional Detachment.

SHIELD-HOSTS OF THE LEGIO CUSTODES

Among the Legio Custodes, many distinctive and recognisable differences in how different Shield-Hosts waged war existed, even before the outbreak of the Horus Heresy. These Shield-Hosts would often take immense pride in their unique methods of war; seeing their prowess and traditions as their own personal dedication to the Emperor made manifest. Foremost in the Legio Custodes in shaping and maintaining these traditions were the Host-Masters, and when an army of Custodians sallied forth in His name, they often included these representatives of a Shield-Host.

A model with the Master of the Shield Hosts Special Rule is required to select a single Shield-Host upgrade. However, no model may take more than one such upgrade, and no model in your army may select the same Shield-Host upgrade option as another. Each Shield-Host upgrade must be paid for at a cost in points, indicated as part of the army list entry for the unit. Shield-Host upgrades may provide Special Rules, Wargear, Unit Sub-types, or other effects; these are noted in their description, along with any other benefits or restrictions. In all cases, the Shield-Host's description will indicate all changes, benefits and restrictions.

AQUILAN SHIELD

Among the Legio Custodes, there were some who were charged not with defending the Emperor, but instead those deemed vitally important by either His unknowable will, or that of Malcador's design. The Aquilan Shield undertook these protective duties with stoic determination, their protection often as unexpected as it was unwavering.

Special Rules

A model with the Aquilan Shield Shield-Host gains the Auric Guardians and For the Future of All Mankind Special Rules.

Wargear

A model with the Aquilan Shield Shield-Host is equipped with a Praesidium Shield, at no additional points cost.

Auric Guardians

Whilst a unit containing at least one model with this Special Rule is within 3" of a friendly model with the Infantry Unit Type and the Independent Character Special Rule, and without the Legio Custodes Special Rule, whenever a Wound is allocated to that model (even those caused by the Precision Strikes (X), Precision Shots (X), or Sniper Special Rules), it must instead be allocated to a model from this unit instead as long as they would otherwise have been a valid target.

For the Future of All Mankind

A model with the Aquilan Shield Shield-Host may only be selected in an army that includes an Allied Detachment. If a model with this Shield-Host is selected as part of an Allied Detachment, the model loses the Support Squad Special Rule.

DREAD HOST

Masters of the lightning assault, shock and awe strikes, and overwhelming power, the Dread Host took sole responsibility for delivering the hammer-blow of the Emperor's will upon those who dared to defy Him. Striking out across the galaxy from their three immense vessels, the Moiraides, there were none who could stand against their might.

Special Rules

A model with the Dread Host Shield-Host gains the Moiraides Strike Special Rule.

Wargear

A model with the Dread Host Shield-Host is equipped with a Tenebris Praetoria, at no additional points cost.

Moiraides Strike

A model with this Special Rule, and any unit they join during Deployment, gains the Deep Strike and Crusader Special Rules, and must be assigned to a Deep Strike Assault.

SHADOW KEEPERS

Only the custodians of truly singular will, even among their exemplary order, were recruited to the ranks of the Shadow Keepers; tasked to maintain and protect the vaults and cells in the darkness beneath the Imperial Palace. To aid them in this duty, the Shadow Keepers kept technologies that brought low their foes, either living or dead - though many of their enemies would sooner die than be taken alive...

Special Rules

A model with the Shadow Keepers Shield-Host gains the Walkers in Shadow, Vaults of Rython, and Preferred Enemy (Characters) Special Rule.

Wargear

A model with the Shadow Keepers Shield-Host is equipped with a Tempest Spear and Auric Shackles, at no additional points cost.

Walkers in Shadow

An army containing a model with this Special Rule may not include an Allied Detachment. In addition, a model with this Special Rule may not be included in an Allied Detachment.

Vaults of Rython

A model with this Special Rule may select a Custodian Guard Squad as a Retinue. A unit selected in this manner is considered a 'Retinue Squad' and the model with the Master of the Shield-Hosts Special Rule is referred to as the Retinue Squad's Leader for the purposes of this Special Rule. The Retinue Squad does not use up a Force Organisation slot and is considered part of the same unit as the model selected as its Leader. The Retinue Squad must be deployed with the model selected as its Leader deployed as part of the unit and the Leader may not voluntarily leave the Retinue Squad during play.

A Custodian Guard Squad selected in this manner must exchange their Guardian Spears for Tempest Spears, at a cost of +10 points per model.

SOLAR WATCH

The white-armoured castellans of the Solar Watch held their sacred duty to monitor the Sol system as a singular honour. Tasked as the first line of defence against incursion, theirs were the huge motor pools and repositories of craft with which to bring their forces to bear against any foolish enough to assail the birthplace of humanity itself.

Special Rules

A model with the Solar Watch Shield-Host gains the Shining Fleet and Taloned Onslaught Special Rules.

Shining Fleet

A Detachment that includes a model with this Special Rule must have more of the units within it with the Infantry Unit Type start the game embarked in a Transport than units which do not. Note that for the purposes of this Special Rule, models with the Independent Character Special Rule are not counted.

Taloned Onslaught

A model with this Special Rule, and any unit they have joined, gain the Pathfinder, Move Through Cover, and Fleet (1) Special Rules, for as long as the model with the Taloned Onslaught Special Rule is part of that unit.

EMISSARIES IMPERATUS

The heralds of the Emissaries Imperatus proclaimed the coming of the Emperor in all things - for theirs was the task to relay His orders, to know His design, and to enact His desires. To this end, the Vexillum the Emissaries carried into battle would fill the hearts of those loyal to the vision of an Imperium unified under His will with hope that such could still be achieved - even in the darkest days of the siege.

Special Rules

A model with the Emissaries Imperatus Shield-Host gains the Fearless Special Rule.

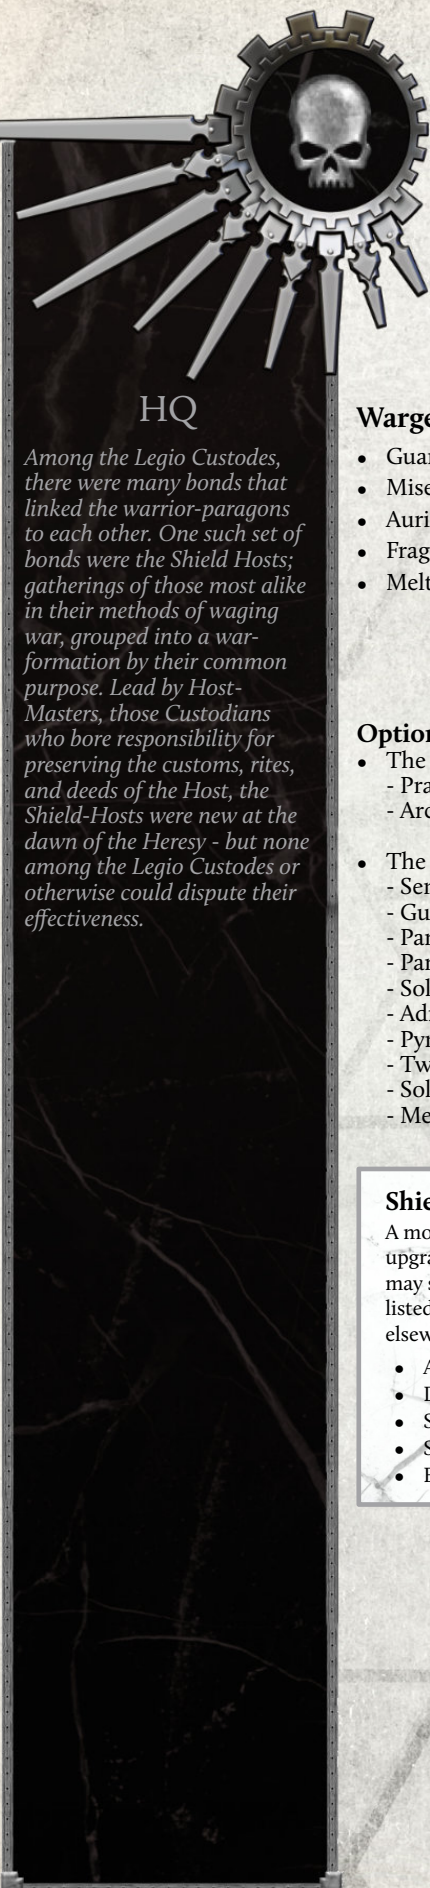

Wargear

A model with the Emissaries Imperatus Shield-Host is equipped with a Vexillum Imperatus, at no additional points cost.

LEGIO CUSTODES:
HQ

O-I CUSTODIAN HOST-MASTER..... 150 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Host-Master	8	6	5	5	5	3	5	4	10	2+

Unit Composition

- 1 Host-Master

Unit Type

- Infantry (Character, Skirmish)

HQ

Among the Legio Custodes, there were many bonds that linked the warrior-paragons to each other. One such set of bonds were the Shield Hosts; gatherings of those most alike in their methods of waging war, grouped into a war-formation by their common purpose. Lead by Host-Masters, those Custodians who bore responsibility for preserving the customs, rites, and deeds of the Host, the Shield-Hosts were new at the dawn of the Heresy - but none among the Legio Custodes or otherwise could dispute their effectiveness.

Wargear

- Loyalist

HQ

Some Shield Captains of the Kataphractoi were akin to the great eagles of the past ages of Terra, known to favour the thrill of the hunt; the raw joy in feeling their spear puncture their prey unleashing within them a primal, vicious excitement at bringing down their quarry. To this end, those who took up the long haft of a Solarite Power Lance and the helm of a Gyrfalcons Jetbike became known as Agamatii - the Leader of the Agamatus squadrons, and the premier sky-borne predators of the Legio Custodes.

Options:

- The Agamatii Shield Captain may select the following option:
 - Archaeotech Pistol +5 points
- The Agamatii Shield Captain may replace his Solarite Power Lance with one of the following options:
 - Sentinel Warblade Free
 - Guardian Axe Free
 - Paragon Blade Free
 - Paragon Glaive +5 points
 - Solarite Power Talon +5 points
 - Adrasite Spear +5 points
 - Pyrrhite Spear +10 points
 - Solarite Power Gauntlet +15 points
- The Agamatii Shield Captain may replace his Custodes Gyrfalcons Jetbike's Two Lastrum Bolt Cannon with one of the following options:
 - Adrathic Devastator +15 points
 - Twin-Linked Corvae Las-Pulser +35 points

O-I CUSTODIAN VERTOII SHIELD CAPTAIN235 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Vertoii Shield Captain	14	6	5	5	5	3	5	3	10	2+

Unit Composition

- 1 Vertoii Shield Captain

Unit Type

- Cavalry (Character, Antigra, Skirmish)

HQ

Whilst many Custodes Shield Captains excelled at leading charges on foot or otherwise directing the flow of battle from the swirling maelstrom of combat, a small few preferred the harrying and flanking manoeuvres afforded by the power of a Jetbike. Those who excelled at directing war from their steeds, and were proficient enough to bring low the enemy's elite formations in the doing so, were monikered the 'Vertus Praetorians' - though upon those Shield Captains who accepted such a duty, the name 'Vertoii' was commonly added to their rote of names as they enacted their deeds.

Wargear

- The Allarii Shield Captain may replace his Balistus Grenade Launcher with one of the following options:
 - Praesidium Shield..... Free
 - Lastrum Storm Bolter Free
 - Adrathic Destructor+10 points
 - Solarite Power Talon.....+10 points

HQ

A relatively new invention before the dawning of the Heresy, Allarus Terminator Armour nevertheless had both its detractors and its proponents among the Legio Custodes. Some praised its retained speed and dexterity despite the improved protection it offered a wearer, whilst some scorned it as lesser than the mighty Aquilon suits. Despite this, Allarus Armour was seen in greater numbers by the days of the siege, its inbuilt targeting systems allowing the Custodians who wore it to engage in acts of headhunting to attempt to blunt the traitor offensives.

Following such successes, none among the ranks of the Custodians could doubt the armour's effectiveness when worn by a skilled leader - and the results it offered in defence of the scions of the Emperor were beyond doubt.

O-I CUSTODIAN AQUILUS SHIELD CAPTAIN.....250 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Aquilaus Shield Captain	7	6	5	5	5	4	5	5	10	2+

Unit Composition

- 1 Aquilus Shield Captain

Unit Type

- Infantry (Character, Skirmish, Heavy)

HQ

A rare breed among the Legio Custodes, those Shield Captains regarded as Aquilius were content to move at a far slower pace than that of their brethren. Not for them the lightning assault, but instead the ponderous and slow grind of Aquilon Terminator Armour, and the grim finality that came with the pounding footfalls of armoured suits that out-weighted some battle tanks.

Making use of this weighty, somewhat unwieldy, advantage was a skill few among the Custodians could master; yet those of the Tharanatoi who did so would go to war clad in armoured plate that rendered their forms as golden statues of lore.

HQ

For some Shield Captains, time spent among their charges could often result in idiosyncrasies in fighting style despite the singular way in which they were normally witnessed to make war. In these instances, some would opt to take up the wargear in which they felt best suited their preferences; and so it could sometimes be witnessed that a Shield Captain descended from on high, like some golden-armoured vision of an angel from old Terran myth.

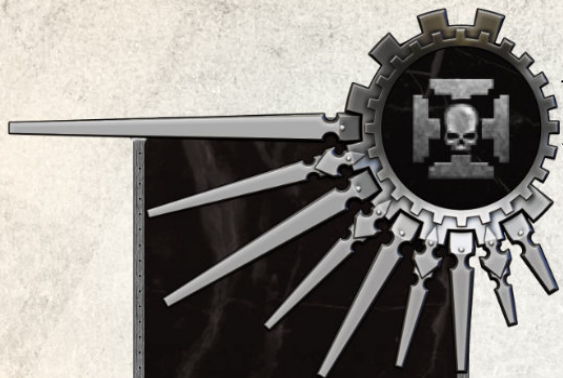

Options:

- The Venataris Shield Captain may select the following option, in addition to his normal wargear:
 - Kinetic Destroyer+10 points
- The Venataris Shield Captain may replace his Tarsus Buckler with one of the following options:
 - Sentinel Warblade Free
 - Guardian Axe..... Free

Allarus Terminator	8	5	5	5	5	3	5	3	10	2+

Unit Composition

- 3 Allarus Terminators

Unit Type

- Infantry (Skirmish)

ELITES

Where the mighty Aquilon pattern Terminator Armour was an evolution of the Cataphractii armour used by the Legiones Astartes, the Allarus pattern was a furthering of the Tartaros pattern, and nowhere was this more evident than in the manoeuvrability it granted its Custodian charges.

In this extra mobility came a unique duty and usage for those Custodians who took up its use; the ordained duty as the hunters of men, the slayers of kings; the killers of the Emperor Himself, beholden to His needs alone to remove a foe's command structure to allow their golden-armoured brothers to bring low the enemy.

Wargear

Dedicated Transport:

- An Allarus Terminator squad of no more than three models may select a Custodes Land Raider as a Dedicated Transport. An Allarus Terminator squad of no more than four models may select a Coronus Grav-Carrier as a Dedicated Transport. An Allarus Terminator squad of no more than seven models may select a Custodes Spartan Assault Tank as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points cost must still be paid for as part of the army.

Options:

- An Allarus Terminator Squad may include:
 - Up to 7 additional Allarus Terminators +80 points per model
- Any model in the unit may exchange their Guardian Spear with one of the following options:
 - Guardian Axe Free
 - Adrasite Spear +10 points
 - Pytherite Spear +15 points
- One model in the unit may exchange their Guardian Spear with one of the following options:
 - Magisterium Vexilla & Master-Crafted Power Weapon +15 points
 - Magisterium Vexilla & Paragon Blade +25 points
- Any model in the unit may exchange their Balistus Grenade Launcher for one of the following options:
 - Lastrum Storm Bolter Free
 - Adrathic Destructor +10 points
- Any model in the unit may exchange their Guardian Spear and Balistus Grenade Launcher for the following option:
 - Two Solarite Power Talons +15 points

 - Gravis Plasma Cannon.....+10 points
 - Kheres Assault Cannon+10 points
 - Volkite Dual-Culverin.....+10 points
 - Gravis Lascannon +20 points
 - Adrathic Decimator +20 points
- Any Contemptor-Moritiax Dreadnought in the unit may replace a in-built Lastrum Storm Bolter on either a Gravis Power Fist or Gravis Chainfist with one of the following options:
 - Infernus Incinerator..... +5 points
 - Twin-Linked Adrathic Destructor..... +15 points
 - Proteus Plasma Projector +15 points
- Any Contemptor-Moritiax Dreadnought in the unit may take one of the following options:
 - Helical Targeting Array+10 points
 - Havoc Launcher+10 points

ELITES

As the horrors of Horus' betrayal and the scale of the destruction he unleashed were revealed upon the galaxy, not even the peerless warriors of the Legio Custodes could hope to avoid the spiralling cost of lives. To this end, as ever more Custodes fell in battle, the Chamber of the Honoured Dead Who Walked, the Moritoi, proffered an answer; and so, upon the battlefields of sunless realms, across dead moons, and even on the surface of Terra itself, did Contemptor Dreadnoughts retrofitted with advanced technology held only by the Emperor and His most trusted allies walk.

ADDITIONAL WARGEAR OPTIONS FOR EXISTING ELITES UNITS

In addition to the normal options presented in the rules for various units, the additional wargear presented below may be selected for units at the costs shown. These are intended to be used alongside various publications, including all of Games Workshop's official publications and releases.

HETAERON GUARD SQUAD

Options:

- Any model in the unit may exchange their Paragon Blade for the following option:
- Paragon Glaive +10 points
- As long as no other model in the unit is equipped with a Magisterium Vexilla, one Hetaeron Guard in the unit may exchange his Paragon Blade for one of the following options:
- Magisterium Vexilla & Paragon Blade +10 points

LEGIO CUSTODES: Troops

ADDITIONAL WARGEAR OPTIONS FOR EXISTING TROOPS UNITS

CUSTODIAN GUARD SQUAD

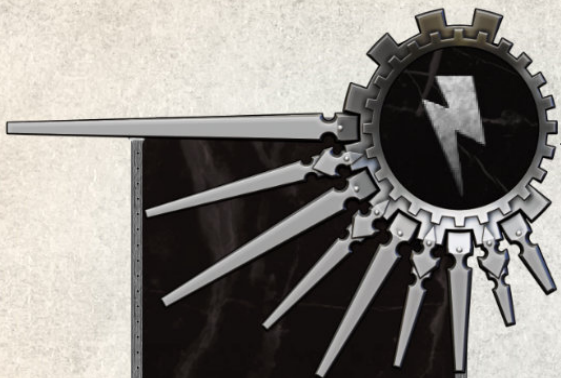

Options:

- One Custodian in the unit may exchange his Guardian spear for one of the following options:
 - Magisterium Vexilla & Paragon Blade+25 points

**LEGIO CUSTODES:
Fast Attack**

DAWNEAGLE JETBIKE SQUADRON..... 285 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Dawneagle	14	5	5	5	5	3	5	2	9	3+

Unit Composition

- 3 Dawneagles

Unit Type

- Cavalry (Antigrav, Skirmish)

FAST ATTACK

If the Custodians who rode the Agamatus Jetbikes into battle were the mighty lancer's charge, the ones who rode the Dawneagle jetbikes were the scouts, aimed to harry and punish the foe from an unexpected quarter. Slower than the Agamatus, the Dawneagles relied upon manoeuvrability and the power of their mounts to do damage - as well as their specially-designed lances, which were far more apt for shredding their foes in brutally effective charges that none could hope to easily defend against.

Wargear

- Interceptor Lance
- Misericordia
- Melta Bombs
- Auric Demi-Plate
- Custodes Dawneagle Jetbike

Special Rules

Heavy Support**

CUSTODIAN LAND RAIDER CARRIER SQUADRON..... 285 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Custodes Land Raider	12	5	14	14	14	5	12

Unit Composition

- 1 Custodes Land Raider

Unit Type

- Vehicle (Transport, Reinforced)

HEAVY SUPPORT

Whilst many factions in the Age of Darkness utilised the Land Raider chassis in various forms and formats, none did so in quite an exemplary manner as the Legio Custodes. As befitted their high station, their Land Raiders were often retrofitted with various weaponry not available to any outside of their elevated brotherhoods, whilst the chassis themselves were of the finest make; wargear often only seen in scant numbers common to their frames. It was upon such peerless transports that the Custodians of the Emperor made war - and in the doing so did they set the patterns in which others would merely ape in their use of the Land Raider in war.

Wargear

- Two Sponson Mounted Gravis Lascannons
- Hull (Front) Mounted Twin-Linked Lastrum Bolt Cannon
- Smoke Launchers
- Flare Shield

Special Rules

- Legio Custodes
- Loyalist
- Power of the Machine Spirit

- Any Custodes Grav-Raider may select any of the following options:
 - Searchlights +5 points

HEAVY SUPPORT

Unlike the more common Land Raider, the Legio Custodes retained near-unique access to an anti-gravity equipped variant. Dubbed the 'Grav-Raider' - much to Arkhan Land's annoyance - this variant chassis was uncommon even before the Heresy began, requiring much material and toil to manufacture even a single example. It was also slower, thanks to the extra weight required for the gravity-repellers it utilised to remain afloat; a factor that limited its utility for those among the Custodes who required rapid transportation to the front lines.

CUSTODIAN LAND RAIDER SPARTAN ASSAULT TANK.....415 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Custodes Land Raider Spartan	12	5	14	14	14	6	26

Unit Composition

- 1 Custodes Land Raider Spartan

Unit Type

- Vehicle (Transport, Reinforced)

HEAVY SUPPORT

Where the Legiones Astartes war-machine would bring a Land Raider Spartan to bear only for their most skilled warriors to ride to war within, the Legio Custodes held no such qualms about their use, allowing any who required swift passage upon the field of battle to make use of their thickly armoured hulls.

Indeed, thanks to the sheer size and scale of such a vehicle, the Spartan Assault Tank was one of only a handful of vehicles which could successfully transport larger squads of the Emperor's elite, safe from the myriad firepower raining down upon the outer ceramite skin of their steed.

Wargear

- Two Sponson Mounted Lascannon Arrays
- Hull (Front) Mounted Twin-Linked Lastrum Bolt Cannon
- Smoke Launchers
- Flare Shield

Special Rules

- Legio Custodes
- Loyalist

- Any Custodes Grav-Spartan may select any of the following options:
 - Searchlights +5 points

HEAVY SUPPORT

Requiring even greater expenditure and effort to produce and maintain than a standard Spartan Assault Tank and a Grav-Raider combined, the Grav-Spartan, as it was commonly known, was a behemoth seen so rarely upon the battlefields of the Great Crusade that it was often rumoured to not exist; a butt of jokes told by Astartes and mortals alike.

The sight of such an immense craft hovering cleanly a few feet above the turmoil of churned earth, shell and shot, and more that composed most battle-grounds oft killed the humour dead.

The colossal bulk of such vehicles, coupled with the powerful anti-gravitic repulsion effect they generated, inspired awe and dread in those who witnessed their approach - a fitting chariot for the guardians of Mankind.

ADDITIONAL WARGEAR OPTIONS FOR EXISTING HEAVY SUPPORT UNITS

In addition to the normal options presented in the rules for various units, the additional wargear presented below may be selected for units at the costs shown. These are intended to be used alongside various publications, including all of Games Workshop's official publications and releases.

SAGITTARUM GUARD SQUAD

Options:

- Any model in the unit may select the following option:
 - Solarite Power Gauntlet +30 points

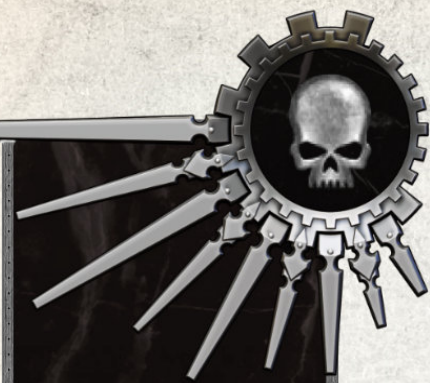

LIBER IMPERATUS:
Sisters of Silence

SISTERS OF SILENCE: HQ

SIKARI DAR.....125 POINTS

Knight-Executioner of the Silent Sisterhood, The Abyss-Slayer, Eater of Daemons

	M	WS	BS	S	T	W	I	A	Ld	Sv
Sikari Dar	6	6	5	3	4	3	5	4	10	2+

Unit Composition

- 1 Sikari Dar

Unit Type

- Infantry (Character, Light, Anathema, Unique)

HQ

Knight Sikari Dar had fought and bled as one of the Silent Sisterhood almost since its inauguration, and by the time the Great Crusade's end neared her face was lined and worn with the weight of her duty to the cause. A war-leader by her actions, Sikari had chosen to allow others to lead the Sisterhood from the higher echelons of power - for her leadership required only to be at the head of a charge, a vicious but noiseless snarl upon her lips, as her immense polearm Nightfall ripped through the flesh of her enemy.

Indeed, the strength possessed by Dar was famed by many within and without the ranks of the Null-Maidens - for even some Custodians offered her genuine respect, seeing in her a strength that did not exist in most mortals. This respect was well-earned; the tales of her besting xenos war-beasts and warlords both in single combat were well-known, even outside the signed-and-signalled speech of the Sisters, but in the dawning of Horus' war upon the Imperium and the coming of the benighted horrors of the warp was an even greater prey for her to claim her victory over; the fel-daemons of the Great Enemy her greatest and truest foes. Into such a crucible would a lesser being have simply capitulated, overwhelmed by the sheer malice of such an enemy - and yet, in such battles did Sikari Dar thrive.

Wargear

- Nightfall
- Archaeotech Pistol
- Frag Grenades
- Krak Grenades
- Psyk-Out Grenades
- Voidscale Cloak
- Artificer Armour

Special Rules

- Silent Sisterhood (Chamber of Oblivion)
- Fleet (1)
- Fearless
- Hatred (Psykers, Daemons, Corrupted)
- Precision Strikes (4+)
- Precision Shots (6+)
- Battle-Hardened (1)
- Ex Oblivio
- Monster Hunter
- Loyalist
- Independent Character
- **Warlord:** Eater of Daemons

Warlord: Eater of Daemons

Sikari Dar must always be selected as the army's Warlord if she is selected as part of the army's Primary Detachment. If chosen as the army's Warlord, Sikari Dar automatically has Eater of Daemons as her Warlord Trait and may not select any other Warlord Trait.

The first time any enemy unit with the Psyker, Corrupted, or Daemon Unit Sub-type comes within 12" of Sikari Dar for any reason, it must take an immediate Leadership Characteristic test. If this test is passed, the unit suffers no ill-effect - but if it is failed, all models in the unit suffer a -1 penalty to their Weapon Skill, Ballistic Skill, and Initiative Characteristics until the end of the next Game Turn. It should be noted that whilst each unit can only be made to take a Leadership Characteristic test once from this Warlord Trait's effects, multiple units can trigger this effect during the course of a game, and game turn.

An army that contains Sikari Dar may select up to two additional Fast Attack choices, but these additional slots must be filled with Pursuer Cadre units if selected. Units selected in this way are not counted toward the maximum number of units allowed as per the Silent Sisterhood (X) Special Rule in regards to Chamber restrictions.

In addition, an army that has Sikari Dar as its Warlord increases its Reaction Allotment by +1 in the Assault phase as long as Sikari Dar has not been removed as a casualty.

Nightfall

Nightfall

Range	Str	AP	Type
-	x2	2	Melee, Two-Handed, Reaping Blow (2) Murderous Strike (6+), Brutal (2)

ADDITIONAL WARGEAR OPTIONS FOR EXISTING HQ UNITS

In addition to the normal options presented in the rules for various units, the additional wargear presented below may be selected for units at the costs shown. These are intended to be used alongside various publications, including all of Games Workshop's official publications and releases.

KNIGHT ABYSSAL

Options:

- A Knight Abyssal may exchange her Execution Blade and/or Bolt Pistol for one of the following options: Free
 - Indictor Axe.....

KNIGHT CENTURA

Options:

- A Knight Centura may exchange her Execution Blade and/or Bolt Pistol for one of the following options: Free
 - Indictor Axe.....

QUESTORA CADRE

Options:

- Any model in the unit may exchange their Vratine Bolter for one of the following options:
 - Minor Combi-Weapon+5 points
 - Magna Combi-Weapon +10 points
 - Plasma Gun +10 points
 - Meltagun..... +15 points

RAPTORA CADRE

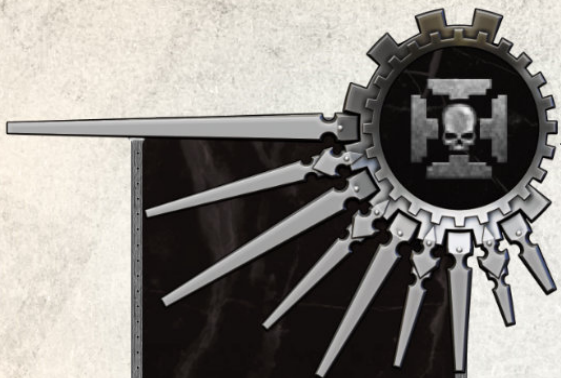

Options:

- Any model in the unit may exchange their Execution Blade for one of the following options:
 - Power Weapon..... Free
 - Charnabal Weapon..... Free
 - Indictor Axe..... Free

SISTERS OF SILENCE:
Elites

O-I KNIGHT ENSIGN COVENANT30 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Knight Ensign	6	5	5	3	3	2	5	2	9	3+

Unit Composition

- 1 Knight Ensign

Unit Type

- Infantry (Character, Light, Anathema)

ELITES

A division of the Chamber of Vigilance, Knight Ensigns were inspiring emissaries and warriors born under the Vigilant Standard. A beacon of authority and inspiration, they acted as icons of judgement against the warp-touched.

Not only were they expected to bear these standards, they were also made to bare blade alongside the fellow sisters and act as a figurehead for their fellows to rally around in the midst of combat, their charges rousing valour and fervour around the Emperor's own icon.

Wargear

- Two Bolt Pistols
- Frag Grenades
- Krak Grenades
- Psyk-Out Grenades
- Vigilant Standard
- Vratine Armour

Special Rules

- Silent Sisterhood (Chamber of Vigilance)
- Fleet (1)
- Stubborn
- Hatred (Psykers, Daemons, Corrupted)
- Loyalist
- Vigilant Covenant

Options:

- A Knight Ensign Covenant may include:
 - Up to 2 additional Knight Ensigns..... +30 points per model
- Any Knight Ensign may select one of the following options:
 - Power Weapon+10 points
 - Charnabal Weapon.....+10 points
 - Execution Blade+10 points
- Any Knight Ensign may exchange either or both Bolt Pistols for one of the following options:
 - Needle Pistol+5 points
 - Archaeotech Pistol+10 points
- Any Knight Ensign may exchange both Bolt Pistols for one of the following options:
 - Bolter Free
 - Vratine Bolter+2 points
 - Minor Combi-Weapon+5 points
 - Magna Combi-Weapon+10 points
- Any Knight Ensign may exchange their Vratine Armour for the following option:
 - Artificer Armour+10 points

INDICTOR CADRE.....160 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Indictor	6	4	4	3	4	2	4	2	8	2+
Indictor Mistress	6	4	4	3	4	2	4	3	9	2+

Unit Composition

- 4 Indictors
- 1 Indictor Mistress

Unit Type

- Indictor: Infantry (Heavy, Anathema)
- Indictor Mistress: Infantry (Character, Heavy, Anathema)

Wargear

- Indictor Axe
- Frag Grenades
- Krak Grenades
- Vratine Voidplate
- Voidsheen Cloak

Special Rules

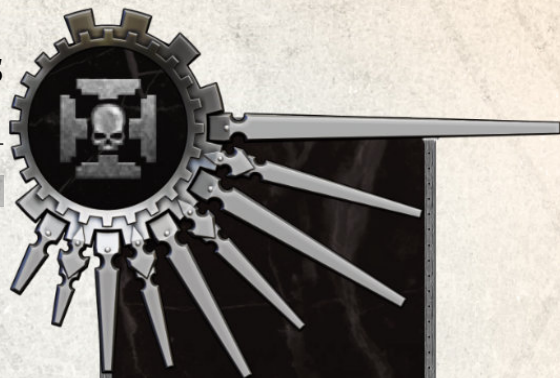

- Silent Sisterhood (Chamber of Vigilance)
- Precision Strikes (6+)
- Fleet (1)
- Stubborn
- Loyalist
- Bulky (2)
- Hatred (Psykers, Daemons, Corrupted)

Dedicated Transport:

- An Indictor Cadre numbering no more than five models may take a Kharon Pattern Acquisitor as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points cost must still be paid for as part of the army.

Options:

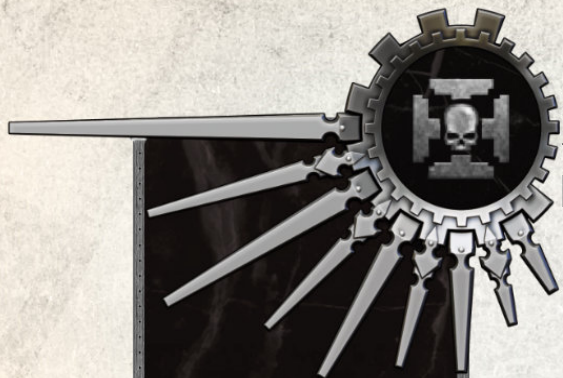

- An Indictor Cadre may include:
 - Up to 5 additional Indictors..... +30 points per model
- Any model in the unit may exchange their Indictor Axe for one of the following options:
 - Execution Blade Free
 - Proteus Neuro-Lash Free
 - Charnabal Glaive Free
- The Indictor Mistress may exchange her Indictor Axe for one of the following options:
 - Chainfist.....+10 points
 - Thunder Hammer +15 points
- The Indictor Mistress may exchange her Voidsheen Cloak for the following option:
 - Voidscale Cloak.....+10 points
- The entire unit may be given:
 - The Deep Strike Special Rule.....+30 points

ELITES

Where the Eradicator Cadres of the Chamber of Vigilance were one of the Order's many hammers, the rare Indictor Cadres acted as the anvil. An unopposed wall of veterans, they imposed their vigil-watch aboard the black ships, wrangling the most uncooperative in the name of the Great Tithe; called upon to form an indomitable spearhead in the field against psyker incursions.

The voidscale plate in which they were clad made use of technologies borne from both Selenite void-mail and astartes power armour; although it also incorporated advanced technologies gained through the long development of Tactical Dreadnought Armour. This vastly improved protection had the side effect of slowing the wearer - but not reducing their overall manoeuvrability, and allowing the Indictor Cadres to act as a bastion of nullifying power.

PERDITOR CADRE 80 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Perditor	6	4	4	3	3	1	4	2	7	3+
Perditor Mistress	6	4	4	3	3	1	4	3	8	3+

Unit Composition

- 4 Perditors
- 1 Perditor Mistress

Unit Type

- Perditor: Infantry (Light, Anathema)
- Perditor Mistress: Infantry (Character, Light, Anathema)

ELITES

Bearers of esoteric and forbidden weapons deployed only in the most dire of times, Perditor Cadres were assemblies of Silent Sisters who bore the mournful honour of taking those dread weapons to battle.

By the Knight-Commander's command, license to use such horrific devices against the Imperium's foes was granted. Mass-reactive Null armaments and esoteric beams of molecular disruption were but a few weapons borne into battle in the hands of the Perditors - the Oblivion Chamber making use of these accursed weapons to decisively eradicate any foe they faced.

Wargear

- Two Bolt Pistols
- Execution Blade
- Rad Grenades
- Psyk-Out Grenades
- Frag Grenades
- Krak Grenades
- Vratine Armour

Special Rules

- Silent Sisterhood (Chamber of Oblivion)
- Fleet (1)
- Stubborn
- Counter-Attack (1)
- Hatred (Psykers, Daemons, Corrupted)
- Loyalist
- Bitter Duty

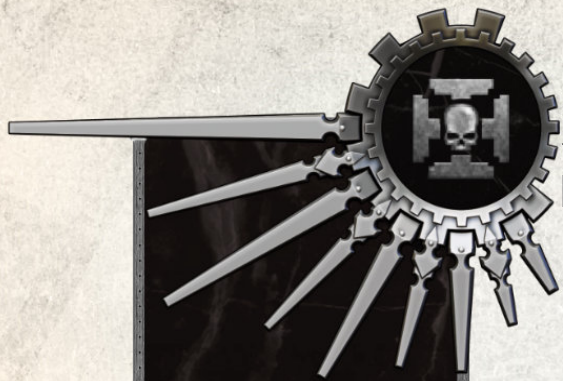

Dedicated Transport:

- A Perditor Cadre of any size which has not selected Venetari Jump Harnesses may take a Kharon Pattern Acquisitor as a Dedicated Transport. A Perditor Cadre of no more than ten models which has not selected Venetari Jump Harnesses may take a Termite Assault Drill, Silent Sisterhood Rhino Transport, or Silent Sisterhood Grav-Rhino as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points cost must still be paid for as part of the army.

Options:

- A Perditor Cadre may include:
 - Up to 10 additional Perditors +15 points per model
- One Perditor may select:
 - Augury Scanner +10 points
- One Perditor may select:
 - Nuncio-Vox..... +10 points
- The entire unit may be equipped with any of the following options:
 - Melta Bombs+25 points
 - Venatari Jump Harnesses* +10 points per model
- Any model in the unit may select:
 - Compression Tanks.....+5 points
- Any model in the unit may exchange their two Bolt Pistols for any of the following options:
 - Vratine Grenade Launcher.....+5 points
 - Vratine Bolter.....+5 points
 - Two Hand Flamers.....+5 points
 - Two Needle Pistols..... +10 points
- For every five models in the unit, one Perditor may exchange one of her Bolt Pistols for one of the following options:
 - Needle Cannon (with Suspensor Web)+5 points
 - Vratine Nemesis Bolter (with Suspensor Web)..... +10 points
 - Snare Cannon (with Suspensor Web)..... +10 points
 - Toxiferran Flamer..... +10 points
 - Vratine Bolt Cannon (with Suspensor Web) +20 points
 - Disintegrator +20 points
 - Missile Launcher (with Suspensor Web, and Rad and Psyk-Out missiles)..... +30 points
- The Perditor Mistress may take one of the following options:
 - Twin-Linked Vratine Bolter +2 points
 - Minor Combi-Weapon+5 points
 - Magna Combi-Weapon +10 points
 - Disintegrator Pistol..... +20 points
- The Perditor Mistress may take one of the following option:
 - Phosphex Bomb +10 points
- The Perditor Mistress may exchange her Execution Blade for one of the following options:
 - Power Weapon Free
 - Charnabal Weapon..... Free
 - Proteus Neuro-Lash+5 points
 - Power Fist +10 points

*A Perditor or Perditor Mistress that selects a Venatari Jump Harness also gains the Bulky (2) Special Rule.

REPRESSOR AUTOMATA MANIPLE 350 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Repressor Automata	8	4	4	7	7	5	3	3	8	3+
Repressor Mistress	6	4	4	3	3	2	4	2	8	3+

Unit Composition

- 2 Repressor Automata
- 1 Repressor Mistress

Unit Type

- Repressor Automata: Automata (Sycophantica, Anathema)
- Repressor Mistress: Infantry (Light, Anathema, Character)

ELITES

As the Crusade raged on, the tithe-fleets of the Sisterhood began to meet harsher resistance from both psychically-skilled Xenos and human colonies both. To ensure their continued ability to enact the tithes without throwing the lives of the ever-rare Null-Maidens away, the Emperor commanded in secret that the Mechanicum assist Him in finding a solution.

The end result of this collaboration were hulking automata which could capture those empowered with arcane abilities thanks to the protection offered by the interworked wards and intricate psy-circuitry within their armour. In secret, however, a third factor tied this unholy miracle together - for at their core lay an enigma; the Mechanicum had constructed a system by which they could seal the very mind of one of the Sisterhood who had perished, ensuring that even in death, they would not know peace - their very essence reforged into something akin to the automata which the Martian Priesthood so venerated.

Knowledge of this bastardisation of the minds of their kin was entrusted only to a scant handful of Sisters, and though they were disgusted at the truth, the Emperor Himself had approved the Automata's use - and so, the Mistresses of the Repressors were taught to maintain and to safeguard the machines, prosecuting the Emperor's will in both the Crusade - and later, in the darkened days of the Heresy.

Wargear

- Excrutia Armatus (Repressor Automata only)
- Two Reclaimator-Chainclaws (Repressor Automata only)
- Atomantic Deflector (Repressor Automata only)
- Execution Blade (Repressor Mistress only)
- Bolt Pistol (Repressor Mistress only)
- Vratine Armour (Repressor Mistress only)
- Frag Grenades (Repressor Mistress only)
- Krak Grenades (Repressor Mistress only)

Special Rules

- Silent Sisterhood (Chamber of Judgement)
- Fleet (1)
- Stubborn
- Loyalist
- Hatred (Psykers, Daemons, Corrupted)
- Battlesmith (5+) (Repressor Mistress only)
- Abominant Aura (Repressor Automata only)

Options:

- A Repressor Automata Maniple may include:
 - Up to 3 additional Repressor Automata..... +160 points per model
- A Repressor Automata Maniple may include:
 - Up to 1 additional Repressor Mistress..... +30 points per model
- A Repressor Mistress may exchange her Bolt Pistol for one of the following options:
 - Hand Flamer Free
 - Needle Pistol +5 points
 - Plasma Pistol +10 points
 - Archaeotech Pistol +15 points
 - Inferno Pistol +15 points
- A Repressor Mistress may select one of the following options:
 - Voidscale Cloak..... +10 points
 - Servo Arm +10 points
 - Machinator Array +25 points

ADDITIONAL WARGEAR OPTIONS FOR EXISTING ELITES UNITS

In addition to the normal options presented in the rules for various units, the additional wargear presented below may be selected for units at the costs shown. These are intended to be used alongside various publications, including all of Games Workshop's official publications and releases.

KNIGHT VESTAL COVENANT

Options:

- Any Knight Vestal may exchange their Vratine Armour for the following option:
- Artificer Armour +10 points

ERADICATOR CADRE

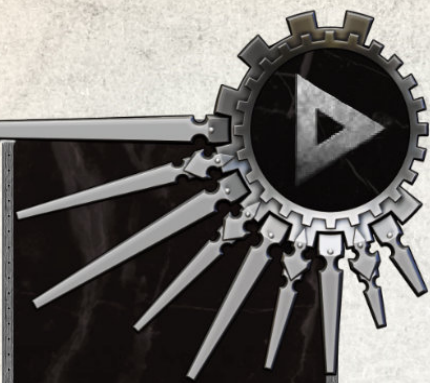

Options:

- Any model in the unit may exchange their Vratine Bolter for one of the following options:
- Assault Needler +5 points

SISTERS OF SILENCE:
Troops

SILENT SISTERHOOD RHINO TRANSPORT.....35 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Silent Sisterhood Rhino Transport	14	4	11	11	10	3	12

DEDICATED TRANSPORT

As the Silent Sisterhood carried out their ordained duties in the name of the Emperor during the Great Crusade, it became increasingly obvious that material shortages were hampering their efforts. Chief among this was a lack of transportation vehicles for their chambers - for Aquisitors were expensive to produce and difficult to maintain at the best of times, but at the far end of an advancing crusade fleet this issue was exacerbated tenfold. To remedy this, the Silent Sisterhood began experimenting with the use of Rhino Transports.

Refitting a Rhino to carry twelve Sisters was an easy affair, as was the task of learning how to control such a vehicle - and so the effort to introduce the Rhino was deemed an immediate success, and all Chambers found themselves with a stockpile of the vehicles within scant years of the program's approval.

Unit Composition

- 1 Silent Sisterhood Rhino Transport

Unit Type

- Vehicle (Transport)

Wargear

- Pintle Mounted Twin-Linked Bolter
- Smoke Launchers

Special Rules

- Silent Sisterhood (Chamber Militant is the same as that of the unit for which this model is selected)
- Repair
- Infantry Transport
- Loyalist

Dedicated Transport Options:

- A Questora Cadre, Raptora Cadre, Oblivion Knight Cadre, Eradicator Cadre, Prosecutor Cadre, Vigilator Cadre, Pursuer Cadre, Firebrand Cadre, Sanctioner Cadre, or Expurgator Cadre may select a Silent Sisterhood Rhino Transport as a Dedicated Transport, provided the unit fits into the Silent Sisterhood Rhino Transport's Transport Capacity. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points cost must still be paid for as part of the army.

Access Points:

- A Silent Sisterhood Rhino Transport has one Access Point on each side of the hull and one at the rear.

Options:

- A Silent Sisterhood Rhino Transport may take any of the following options:
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points
 - Searchlights +5 points
 - Dozer Blade +5 points
- A Silent Sisterhood Rhino Transport may take one of the following options:
 - Pintle Mounted Twin-Linked Bolter +5 points
 - Pintle Mounted Heavy Flamer +5 points
 - Pintle Mounted Heavy Bolter +10 points
 - Pintle Mounted Combi-Weapon (any type) +10 points
 - Pintle Mounted Havoc Launcher +15 points
 - Pintle Mounted Snare Cannon +20 points
 - Pintle Mounted Multi-Melta +30 points

SILENT SISTERHOOD GRAV-RHINO TRANSPORT 50 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Silent Sisterhood Grav-Rhino	12	4	11	11	10	3	12

Unit Composition

- 1 Silent Sisterhood Grav-Rhino

Unit Type

- Vehicle (Transport, Antigrav)

Wargear

- Pintle Mounted Twin-Linked Bolter
- Smoke Launchers

Special Rules

- Silent Sisterhood
(Chamber Militant is the same as that of the unit for which this model is selected)
- Gravitic Repulsion
- Repair
- Infantry Transport
- Loyalist

Dedicated Transport Options:

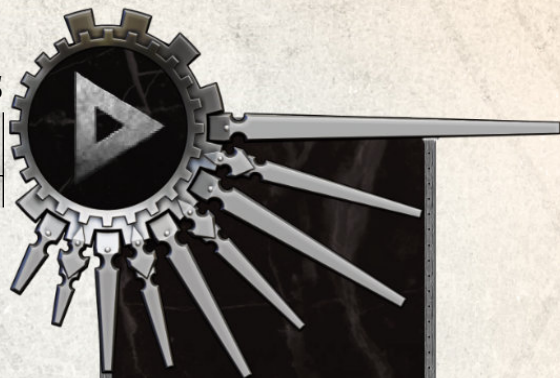

- A Questora Cadre, Raptora Cadre, Oblivion Knight Cadre, Eradicator Cadre, Prosecutor Cadre, Vigilator Cadre, Pursuer Cadre, Firebrand Cadre, Sanctioner Cadre, or Expurgator Cadre may select a Silent Sisterhood Grav-Rhino as a Dedicated Transport, provided the unit fits into the Silent Sisterhood Grav-Rhino's Transport Capacity. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points cost must still be paid for as part of the army.

Access Points:

- A Silent Sisterhood Grav-Rhino has one Access Point on each side of the hull and one at the rear.

Options:

- A Silent Sisterhood Grav-Rhino may take any of the following options:
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points
 - Searchlights +5 points
- A Silent Sisterhood Grav-Rhino may take one of the following options:
 - Pintle Mounted Twin-Linked Bolter +5 points
 - Pintle Mounted Heavy Flamer +5 points
 - Pintle Mounted Heavy Bolter +10 points
 - Pintle Mounted Combi-Weapon (any type) +10 points
 - Pintle Mounted Havoc Launcher +15 points
 - Pintle Mounted Snare Cannon +20 points
 - Pintle Mounted Multi-Melta +30 points

DEDICATED TRANSPORT

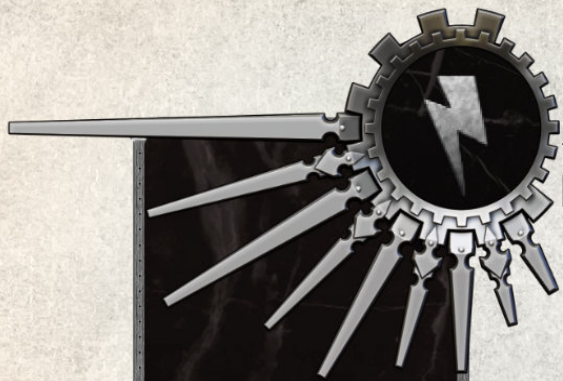

Unique among the Rhino Transport variants found across the Imperium, the Grav-Rhino was a rare variant of the ubiquitous vehicle found in every Legiones Astartes Armoury - and in that of many mortal armies too. Fitted with serried rows of repulsor plates, these vehicles were capable of a limited kind of flight - and could traverse almost any kind of terrain with ease.

Often used to ferry squads of Silent Sisters to their targets in locations where a Kharon Pattern Aquisitor would not be practical, by the time of the dark days of the Horus Heresy the Grav-Rhino was an uncommon sight on the battlefields visited by the Sisterhood - but nevertheless one recognisable as a mark of their presence.

**SISTERS OF SILENCE:
Fast Attack**

SHRIKE CADRE 80 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Shrike	7	4	4	3	3	1	5	2	7	4+
Shrike Mistress	7	4	4	3	3	1	5	3	8	4+

FAST ATTACK

Shrikes were the rapid-response and reconnaissance spearhead of the Chamber of Oblivion. Fast, even for the Sisters of Silence, the Shrikes wore chainmail of selenite origin; often wielding twin blades coated in an ichor which disrupted and distorted the very fabric of space. To those unattuned, this was a dangerous toxin unlike any other - but to those who held even a sliver of aetheric power it could cause catastrophic and often fatal repercussions.

Shrikes were rarely seen, in part due to their null-soul, but also due to their alacrity. Hopping from cover to cover in an unseen blur to the mortal eye, they would close on key targets and - like the Terran bird of ages past - swoop down to butcher the foe; irregardless of their origin in either real-space or the immaterium.

Unit Composition

- 4 Shrikes
- 1 Shrike Mistress

Unit Type

- Shrike: Infantry (Light, Skirmish, Anathema)
- Shrike Mistress: Infantry (Character, Light, Skirmish, Anathema)

Wargear

- Bolt Pistol
- Two Shrike Talons
- Frag Grenades
- Krak Grenades
- Vratine Chainmail

Special Rules

- Silent Sisterhood (Chamber of Oblivion)
- Fleet (2)
- Shrouded (5+)
- Move Through Cover
- Scout
- Stubborn
- Hatred (Psykers, Daemons, Corrupted)
- Loyalist

Dedicated Transport:

- A Shrike Cadre of any size may take a Kharon Pattern Acquisitor as a Dedicated Transport. A Shrike Cadre numbering no more than ten models may take a Silent Sisterhood Rhino Transport or Silent Sisterhood Grav-Rhino as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points cost must still be paid for as part of the army.

Options:

- A Shrike Cadre may include:
 - Up to 10 additional Shrikes..... +15 points per model
- One Shrike may select:
 - Augury Scanner +10 points
- One Shrike may select:
 - Nuncio-Vox..... +10 points
- Any model in the unit may select:
 - Vratine Bolter +5 points
- Any model in the unit may exchange their two Shrike Talons for any of the following options:
 - Two Charnabal Tabars..... +5 points
 - Two Charnabal Sabres..... +10 points
 - Two Power Weapons +15 points
- The Shrike Mistress may replace her Bolt Pistol with one of the following options:
 - Hand Flamer +5 points
 - Needle Pistol +5 points
 - Plasma Pistol +10 points
- The Shrike Mistress may exchange her two Shrike Talons for one of the following options:
 - Power Fist +5 points
 - Proteus Neuro-Lash +5 points
 - Two Lightning Claws..... +10 points

IMPETOR CADRE 90 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Impetor	16	4	4	3	3	2	4	1	7	3+
Impetor Mistress	16	4	4	3	3	2	4	2	8	3+

Unit Composition

- 2 Impetor
- 1 Impetor Mistress

Unit Type

- Impetor: Cavalry (Skirmish, Anathema)
- Impetor Mistress: Cavalry (Character, Skirmish, Anathema)

Wargear

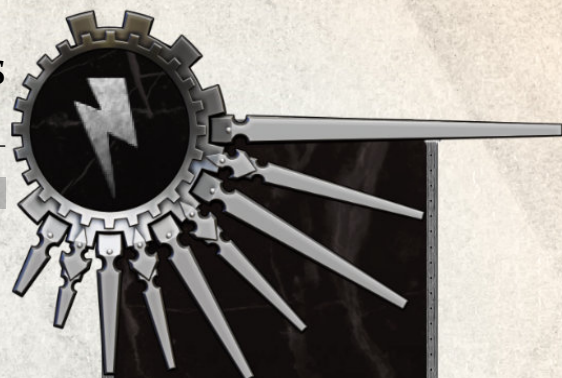

- Bolt Pistol
- Impetus Lance
- Vratine Armour
- Alkonost Combat Bike

Special Rules

- Silent Sisterhood (Chamber of Oblivion)
- Relentless
- Scout
- Stubborn
- Hit & Run
- Firing Protocols (2)
- Hatred (Psykers, Daemons, Corrupted)
- Loyalist

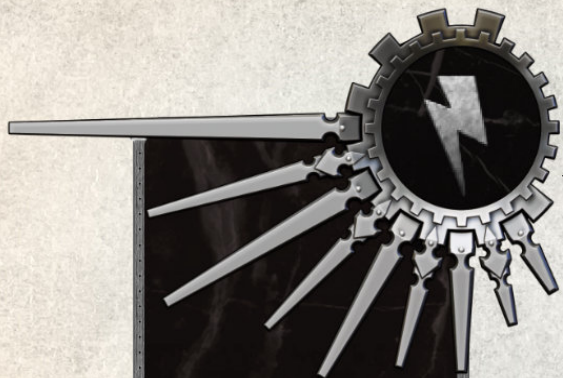

Options:

- An Impetor Cadre may include:
 - Up to 7 additional Impetor +15 points per model
- One Impetor may select:
 - Augury Scanner +10 points
- One Impetor may select:
 - Nuncio-Vox.....+10 points
- Any model in the unit may replace their Alkonost Combat Bike's Twin-Linked Vratine Bolter with one of the following options:
 - Twin-Linked Flamer Free
 - Twin-Linked Vratine Grenade Launcher.....+10 points
- Any model in the unit may replace their Impetus Lance with any of the following options:
 - Vratine Bolter Free
 - Execution Blade +5 points
 - Charnabal Weapon..... +5 points
 - Power Weapon.....+10 points
 - Solarite Power Lance +20 points
- Any model in the unit may replace their Bolt Pistol with one of the following options:
 - Hand Flamer +2 points
 - Needle Pistol +5 points
 - Plasma Pistol +10 points
- Any model in the unit may select the following option:
 - Compression Tanks..... +5 points
- The Shrike Mistress may exchange her Impetus Lance for one of the following options:
 - Proteus Neuro-Lash +5 points
 - Power Fist +15 points

FAST ATTACK

A harrowing mirror to the ethereal nature of the Erinyes Jetbikes, Impetor Cadres were near silent in their running. Taking to the field on elegantly crafted all-terrain Alkonost Bikes, these mounts allowed the Impetors to advance silently before delivering lightning-hard strikes with their lances, delivering bursts of actinic energy to engulf unsuspecting foes. Mounted firearms on their mount's sides allowed the Sisters to harass targets from afar as they sought the perfect opening on their next target; cycling their charges to deliver continuous strikes from their weapons.

OTOS TRANSPORT CRAFT.....125 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Otos Transport	20	4	12	12	11	3	8

Unit Composition

- 1 Otos Transport

Unit Type

- Vehicle
(Flyer, Hover, Transport, Reinforced)

FAST ATTACK

Modified from the chassis of the Stymphalia Gunship, the Otos was designed to facilitate the rapid insertion or extraction of members of the Sisterhood and their unfortunate charges from combat zones. In this regard the Otos was wildly successful, able to transport an elite squad of Sisters to or from orbit quickly, fighting its way through enemy resistance where required with its inbuilt armament.

Wargear

- Centreline Mounted Twin-linked Spiculus Bolt Launcher
- Spectra Distort Shield

Special Rules

- Silent Sisterhood (Chamber of Vigilance)
- Deep Strike
- Night Vision
- Outflank
- Infantry Transport
- Loyalist
- Armoured Doors

Access Points:

- An Otos Transport has one Access Point on each side of the hull.

Options:

- An Otos Transport may exchange their Centreline Mounted Twin-linked Spiculus Bolt Launcher for the following option:
- Centreline Mounted Twin-Linked Corvae Las-Pulser +15 points

AYMHARI INTERCEPTOR190 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Aymhari Interceptor	20	4	11	11	11	3	-

Unit Composition

- 1 Aymhari Interceptor

Unit Type

- Vehicle (Flyer)

Wargear

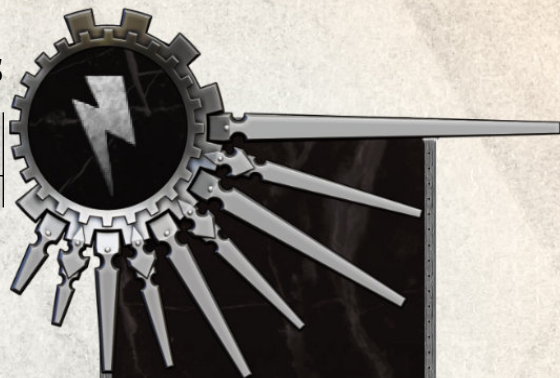

- Two Hull (Front) Mounted Vratine Rotary Missile Launchers
- Hull (Front) Mounted Iliastus Accelerator Cannon Arrays
- Spectra Distort Shield

Special Rules

- Silent Sisterhood (Chamber of Judgement)
- Deep Strike
- Loyalist
- Silence Descends

Options:

- An Aymhari Interceptor may select the following option:
- Ramjet Diffraction Grid +20 points

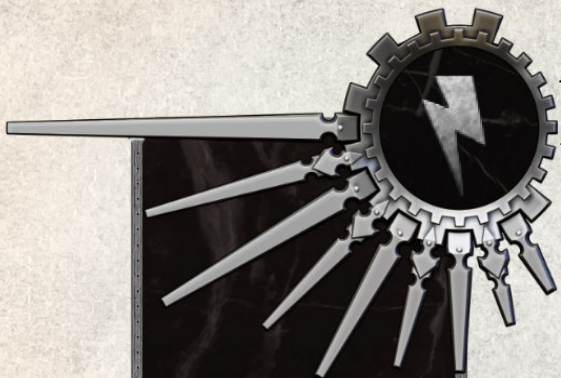

FAST ATTACK

Where the Xiphon Interceptor flown by the Legionis Astartes was a well-known sight above the battlefields of the Great Crusade, as well as the Age of Darkness that followed, the Aymhari was a far more elusive and unknown beast. Sharing a technological base with the Xiphon, the Aymhari was a descendent of the Amhut Voyager; bearing strange and fanciful wing-vanes with bladed edges to better manoeuvre at immense speeds.

Where the Xiphon required either an cybernetically-enhanced human pilot - or one of the trans-human Legionaries - to master its incredible speed and agility, the Aymhari circumvented this need by instead invasively linking into its pilot's mind directly via an MIU, maintaining and stabilising their conscious mind, whilst automated systems monitored and dumped quantities of stimulant and aero-active drugs as required directly into the pilot's bloodstream to ensure they remained intact despite the gravitational and inertial forces applied to their mortal bodies.

The invasive nature of the craft's control mechanisms, as well as the complexity of its construction, played a large hand in all-but-guaranteeing its exclusive adoption by only the Silent Sisterhoods.

ARBITER CADRE 65 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Arbiter	16	4	4	3	5	3	4	2	8	3+

Unit Composition

- 1 Arbiter

Unit Type

- Cavalry (Antigrav, Skirmish, Anathema)

FAST ATTACK

Capable of carrying a selection of armaments which could be tailored to suit any foe, Arbiter Cadres provided the Silent Sisterhood with a fast moving reserve that could be brought to bear against enemy units with both speed and precision. Usually equipped with either Heavy Snare Cannons, Hellion Heavy Cannons, or the formidable Corvae Las-Pulsers, these massive speeders were more than capable of devastating any foe they encountered.

Wargear

- Bolt Pistol
- Close Combat Weapon
- Halian Heavy Jetbike
- Spectra Cloak

Special Rules

- Silent Sisterhood (Chamber of Judgement)
- Stubborn
- Relentless
- Firing Protocols (2)
- Hatred (Psykers, Daemons, Corrupted)
- Loyalist
- Outflank
- Deep Strike
- Hit and Run
- Harbingers of Judgement

Options:

- An Arbiter Cadre may include:
 - Up to 4 additional Arbiters+65 points per model
- Any model may exchange their Halian Heavy Jetbike's Heavy Snare Cannon with one of the following options:
 - Hellion Heavy Cannon Array+10 points
 - Corvae Las-Pulser+20 points

ADDITIONAL WARGEAR OPTIONS FOR EXISTING FAST ATTACK UNITS

In addition to the normal options presented in the rules for various units, the additional wargear presented below may be selected for units at the costs shown. These are intended to be used alongside various publications, including all of Games Workshop's official publications and releases.

SUBJUGATOR CADRE

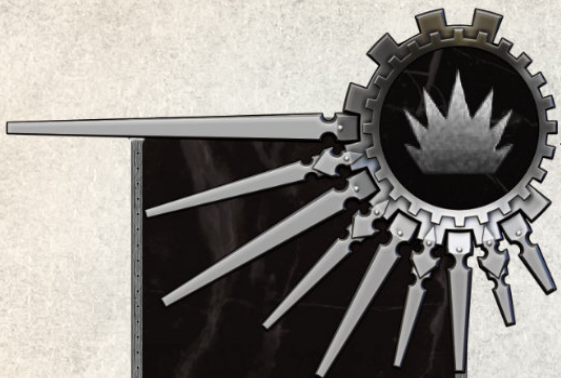

Options:

- Any model in the unit may select one of the following options:
 - Power Weapon..... +10 points
 - Charnabal Weapon..... +10 points

**SISTERS OF SILENCE:
Heavy Support**

CAEDECIUS EXOFRAME CADRE175 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Caedecii Exoframe	7	5	5	7	6	4	4	3	8	2+

Unit Composition

- 1 Caedecii Exoframe

Unit Type

- Dreadnought (Anathema, Skirmish)

HEAVY SUPPORT

Recruited from among the ranks of the Oblivion Knights, the pilots of Caedecii exo-frames were well known for being some of the most aggressive and unforgiving members of the Silent Sisters, and it was to this end that they were entrusted with some of the heaviest weaponry their order could bring to bear.

The exo-frames with which they were equipped were themselves masterworks from a time far before the dawning of the Imperium - armoured suits granting their wearer both immense strength and resilience, whilst not hindering their fighting ability. This came at a high cost, however - for the suits were rare beyond measure, and maintaining them was a task that even the minds of the Mechanicum's best artificers were frequently puzzled by.

Whilst the delicate mechanical internals of the suits themselves were often hard to decipher, one more modern addition the Emperor and Malcador themselves had sanctioned was the power of the Sinistrae Magnificat - prototypes of the weapons found on the dread Ordo Sinister titans, capable of ripping at the very souls of the unfortunate psykers who found themselves treated as mere batteries to power their dread mechanisms.

Wargear

- Atomantic Deflector
- Executor Great-Blade with in-built Vratine Bolter
- Vratine Bolt Cannon

Special Rules

- Silent Sisterhood (Chamber of Oblivion)
- Loyalist
- Hatred (Psykers, Daemons, Corrupted)
- Precision Strikes (6+)

Options:

- A Caedecius Exoframe Cadre may include:
 - Up to 4 additional Caedecii Exoframes +175 points per model
- Any Caedecii Exoframe may exchange their Executor Great-Blade with in-built Vratine Bolter or Vratine Bolt Cannon for one of the following options:
 - Executor Great-Blade with in-built Vratine Bolter Free
 - Vratine Bolt Cannon Free
 - Needle Cavalcade +10 points
 - Twin-Linked Corvae Las-Pulser +15 points
 - Twin-Linked Adrathic Devastator +15 points
 - Terminus Power Claw +20 points
- A single Caedecii Exoframe in the unit may exchange their Executor Great-Blade with in-built Vratine Bolter or Vratine Bolt Cannon for the following - no model may select this option more than once:
 - Sinistrae Magnificat +35 points
- Any Caedecii Exoframe not equipped with a Sinistrae Magnificat may select one of the following options:
 - Spiculus Bolt Launcher +10 points
 - Vratine Missile Launcher +15 points

STYMPHALIA ATTACK CRAFT 225 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Stymphalia	20	4	12	12	11	3	-

Unit Composition

- 1 Stymphalia

Unit Type

- Vehicle (Flyer, Hover, Reinforced)

Wargear

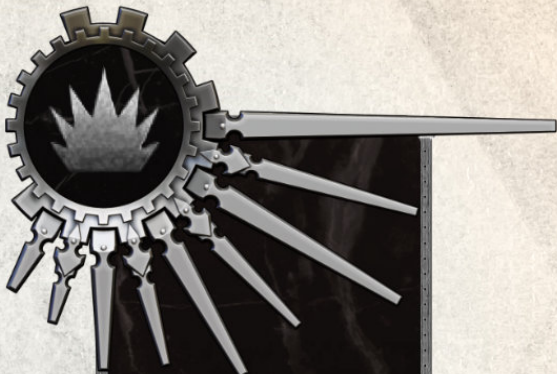

- Centreline Mounted Enhanced Arachnus Blaze Cannon
- Centreline Mounted Twin-Linked Spiculus Bolt Launcher
- Spectra Distort Shield

Special Rules

- Silent Sisterhood (Chamber of Vigilance)
- Deep Strike
- Night Vision
- Outflank
- Loyalist

Options:

- A Stymphalia may exchange their Centreline Mounted Twin-Linked Spiculus Bolt Launcher for the following option:
 - Centreline Mounted Twin-Linked Corvae Las-Pulser +15 points

HEAVY SUPPORT

Frequently seen swarming around the Black Ships of the Sisters of Silence, the Stymphalia Attack Craft was occasionally pressed into service as a ground attack role when heavier vehicles could not be brought to bear. Fielding both potent weapons and intense speed, the Stymphalia performed admirably as a strike fighter capable of contending with both enemy aerospace assets and hardened ground targets.

LIBER IMPERATUS:
Solar Auxilia

SOLAR AUXILIA WARLORD TRAITS

The warlords of the Solar Auxilia were incredibly varied, united only by two factors - rank and skill. In this regard, no matter their preferred battlefields or specialisations, it was well-known among those who faced the serried ranks of the Auxilia on the field that to underestimate these mortal commanders was to court destruction and death.

If your Warlord is of the Solar Auxilia Sub-faction, instead of choosing a Warlord Trait from the Core Rulebook's Warlord Traits, you may instead choose a Warlord Trait from the options below.

SOLAR AUXILIA WARLORD TRAIT: VOID MASTER

Tasked with exploring the harshest the galaxy has to offer, from the Galactic core to the furthest edges of the frontier, some commanders had fought in environments which would have broken lesser officers. From leading firefights in ever-shifting gravity, co-ordinating armoured warfare in gas so thick it slowed movement, and sieging fortresses of foul xenos which defied the very laws of geometry - under these commander's instructions, their regiments displayed the discipline and skill necessary to survive the most deadly environs.

A Warlord with this Warlord Trait gains the Stubborn and Move Through Cover Special Rules, and in addition may ignore the Movement Penalty imposed by Debris Terrain. They may also choose to re-roll any failed Dangerous Terrain or Hazardous Debris tests. If this Warlord is a model with the Independent Character Special Rule and has joined a unit with the Tercio Special Rule then these bonuses apply to all models in that unit, as well as to all models which are part of that Tercio and are 'In Formation' with the unit containing the Warlord.

In addition, an army whose Warlord has this Trait may make an additional Reaction during the Opposing Player's Movement phase as long as the Warlord has not been removed as a casualty.

SOLAR AUXILIA WARLORD TRAIT: CO-ORDINATED DEVASTATION

Drilled to a standard higher than even the most elite of Exertus Imperialis regiments, this commander and the Auxiliaries they lead were not merely crack shots, but were so well trained that they were able to lay down seemingly unending volleys of fire; even whilst one squad stopped to reload or to cool down their barrels, another had already replaced it in the firing line.

A Warlord with this Warlord Trait increases the range of all Ranged Weapons they are equipped with by +6".

At the start of the Controlling Player's Shooting Phase, a Warlord with this Warlord Trait may nominate a single enemy unit within 30" and Line of Sight. A Warlord with this Warlord Trait, and any unit they have joined with the Tercio Special Rule and any other squads 'In Formation' with that unit, add +1 to their To-Hit rolls when making Shooting Attacks against that unit until the end of the Phase.

In addition, an army whose Warlord has this Trait may make an additional Reaction during the Opposing Player's Shooting phase as long as the Warlord has not been removed as a casualty.

SOLAR AUXILIA WARLORD TRAIT: BITTER BLOOD

It is sometimes said that an hour of combat is worth one hundred hours of training; if that axiom held true then some warriors held incalculable skill. Forged in the crucible of cramped close-quarters void combat, some even dared to suggest that even the Legiones Astartes might fail to live up to this warrior's ferocity and zeal; inspiring Auxiliaries around them to ever greater acts in the name of mere bloody single-mindedness.

A Warlord with this Warlord Trait increases their Weapon Skill by +1 and gains the Hatred (Everything!) and Fleet (1) Special Rule.

A Warlord with this Warlord Trait and the Independent Character Special Rule may elect to purchase a single unit of Solar Auxilia Companion Sections or Solar Auxilia Tactical Command Sections as a retinue - if selected in this manner, the unit loses the Tercio Special Rule. This unit is designated the 'Household Retinue', and all models in that unit increase their Weapon Skill Characteristic by +1, gain the Hatred (Everything!) and Fleet (1) Special Rules, and in addition gain the Line Unit Sub-Type for as long as the Warlord is part of that unit. The Warlord with this Trait must be deployed as part of the 'Household Retinue' unit and may not voluntarily leave that unit during play.

In addition, an army whose Warlord has this Trait may make an additional Reaction during the Opposing Player's Assault phase as long as the Warlord has not been removed as a casualty.

ADDITIONAL COHORT DOCTRINES

The following list comprises additional Cohort Doctrines that may be used by any Detachment that either includes at least one model with the Cohort Doctrines Special Rule, or the Detachment can upgrade at least one model from the Detachment to have the Cohort Doctrines Special Rule as noted in a specific Cohort Doctrine that allows this.

COHORT DOCTRINE: APOSTLE PATTERN COHORTS

Whilst few Traitor cohorts went untouched by the corruption that swept through the Warmaster's armies, some proved more willing than most to supplicate themselves before the Primordial Annihilator. Among the ranks of those who embraced these dark powers, void armour became daubed in bloody scripture, officers wielded twisted weapons of unnatural origin and the remains of sacrificed victims hung from vexillas. These cohorts inevitably lost much of their once lauded discipline and cohesion – reduced a debased parody of the Solar Auxilia's legacy – but with damnation came power, as mutation and possession turned whole Tercios into monsters.

Effects

- A Detachment using this Cohort Doctrine may select Possessed Auxilia as Troop choices.
- A Detachment using this Cohort Doctrine may select Mutated Spawn as Fast Attack choices (see page 227).
- Auxilia Battle Psykers in a Detachment using this Cohort Doctrine may select the Anathemata Psychic Discipline instead of a Core Psychic Discipline.
- Any unit in a Detachment using this Cohort Doctrine made up entirely of models with the Infantry, Cavalry, Dreadnought or Mechanised Type may be given the Corrupted Unit Sub-Type for a cost of +25 points per unit – models that are attached to units, such as Medicae, must be upgraded separately. In addition, any unit upgraded in this way loses the Close-Order Unit Sub-type if they had it.
- Any Character in a Detachment using this Cohort Doctrine may exchange a Power Weapon for a Tainted Blade, Tainted Axe or Tainted Maul for +5 points each.

Limitations

- A Detachment using this Cohort Doctrine may not include more than a single Auxilia Armoured Tercio.
- A Detachment using this Cohort Doctrine may not include more than a single Auxilia Artillery Tercio.
- A Detachment using this Cohort Doctrine must have the Traitor Allegiance.

COHORT DOCTRINE: ECHOES OF LOST GLORY

Throughout the Great Crusade, the forces of the Imperium came across untold numbers of human civilisations, all of whom faced Compliance. For those that bent the knee to the Golden Throne, their duty was simply to join His forces. Some of these civilisations knew of exotic, arcane, and dark technological secrets; and their militaries were thusly equipped. Furnished with these fearsome arms and armaments, these forces became some of the most exceptional members of the Excertus Imperialis - and so these remnants fought on for the glory of their new masters, even as they were watched rigorously for any sign they might have begun to rethink their oaths of allegiance....

Effects

- All units selected as part of Detachment using this Cohort Doctrine gain the Advanced Weapons Special Rule.

Advanced Weapons

A unit with this Special Rule increases the strength of any Rotor Cannons, Laspistols, or Lasrifles they are equipped with by +1, to a maximum of Strength 4.

- Any Infantry Unit without the Monstrous Unit Sub-Type in a Detachment using this Cohort Doctrine may be upgraded to replace their Void Armour or Reinforced Void Armour with Heavy Void Armour at a cost of +30 points per unit.
- Any model in a Detachment using this Cohort Doctrine may exchange a Blast Pistol for a Needle Pistol at no additional points cost, a Heavy Bolter with a Needle Cannon at a cost of +5 points each, or a Volkite Culverin at a cost of +10 points each.
- Any Infantry model in a Detachment using this Cohort Doctrine equipped with a Volkite Charger may exchange it for an Assault Needler at a cost of +2 points per model, and any model equipped with a Rotor Cannon may exchange it for a Needle Cannon at a cost of +10 points per model. If this option is selected, then all models in a unit must exchange their weapon in the same way.

Limitations

- A Warlord in an army using this Cohort Doctrine must be a model with the Cohort Doctrines Special Rule.
- All Tercios in a Detachment using this Cohort Doctrine that have the ability to include a Command Section of any kind must do so.
- If a Warlord in an army using this Cohort Doctrine is ever removed as a casualty then all units in the Detachment which are not locked in close combat must immediately take a Morale test. Units which do not take Morale Checks, such as units with the Vehicle Unit Type, or models with any ability to automatically pass them, such as the Fearless Special Rule, ignore this Restriction.

COHORT DOCTRINE: LEGION-SWORN COHORTS

A number of cohorts were raised from the homeworlds and tributaries of the Legiones Astartes. These cohorts usually counted large numbers of failed Legion-aspirants among their ranks, as well as those who were too old, or otherwise incompatible with the process required to become a Space Marine. Owing to their shared origins, these cohorts fought fiercely to live up to the example set by the Astartes. Other cohorts had no lineage with a particular Legion, but had fought together across so many battlefields – typically as part of the same Expeditionary Fleet – that their tactics, experiences and losses bound them closer to the Legion and its Primarch than the greater Imperium.

Effects

- Detachments using this Cohort Doctrine are classed as one level higher on the Levels of Alliance by a single Space Marines Legion Faction.
- Any model in a Detachment using this Cohort Doctrine may exchange a Lasrifle for a Bolter for free.
- Any model in a Detachment using this Cohort Doctrine may exchange a Laspistol for a Bolt Pistol for +2 points per model.

Limitations

- This Cohort Doctrine may only be taken by an Allied Detachment.

COHORT DOCTRINE: LINEBREAKER PATTERN COHORTS

Where the fiercest resistance was met by Cohorts of the Auxilia, Linebreaker Cohorts were summoned to the front lines to resolve the problem. Composed of armoured exosuits and dreadnought chassis both, the spearheads of these cohorts would rampage forward at speed unmatched by their contemporaries on foot, barrelling into their foes and shattering lines of enemy resistance utterly.

Effects

- A Detachment using this Cohort Doctrine may select Solar Auxilia Furibundus Dreadnought Talons as Troop Choices.
- A Detachment using this Cohort Doctrine may select Solar Auxilia Extremis Boarding Rig Sections as Troops.
- Solar Auxilia Furibundus Dreadnought Talons and Solar Auxilia Extremis Boarding Rig Sections selected as Compulsory Troops in a Detachment using this Cohort Doctrine gain the Line Sub-Type.

Limitations

- A Detachment using this Cohort Doctrine may not include any Auxilia Armoured Tercios, Solar Auxilia Praetorian Heavy Tank Squadrons, Solar Auxilia Macharius Omega Heavy Tank units, or Solar Auxilia Macharius Heavy Tank Squadron.
- A Detachment using this Cohort Doctrine may not select any Fortification choices.
- An army whose Primary Detachment is using this Cohort Doctrine may not roll to Seize the Initiative.

COHORT DOCTRINE: PIONEER COMPANIES

It was the duty of Pioneer Companies to range ahead of a cohort's main strength; charged with securing and holding forward positions until heavier firepower could be brought to bear. Pioneer Sections comprised the mainstay of these pathfinding sub-cohorts and were equipped to demolish static defences and other obstacles that could impede the cohort's momentum. Aethon Heavy Sentinels – piloted by veteran Pioneers – were primarily deployed as part of Pioneer Companies, being light enough to undertake reconnaissance duties whilst acting as fire support platforms for infantry.

Effects

- Solar Auxilia Pioneer Sections gain the Line Unit Sub-Type and Infiltrate Special Rule in a Detachment using this Cohort Doctrine.
- Auxilia Infantry Support Tercios composed entirely of Solar Auxilia Ancillary Command Sections and/or Solar Auxilia Pioneer Sections may be taken as Compulsory Troops Choices in a Detachment using this Cohort Doctrine.
- All units selected as part of an Auxilia Veletaris Tercio in a Detachment using this Cohort Doctrine gain the Scout Special Rule.
- Aethon Heavy Sentinel Squadrons may be taken as Non-Compulsory Troops choices in a Detachment using this Cohort Doctrine.
- A player whose army includes a Primary Detachment using this Cohort Doctrine may re-roll any dice they roll to see which player takes the first turn, or when attempting to Seize the Initiative.

Limitations

- A Detachment using this Cohort Doctrine may not select any Fortification choices except those purchased in place of Dedicated Transports for Solar Auxilia Pioneer Sections.
- A Detachment using this Cohort Doctrine may not include more than a single Auxilia Armoured Tercio.

COHORT DOCTRINE: SCOURGE PATTERN COHORTS

During the Great Crusade, some Xenos entities proved to be of such terrible power and unspeakable origin that nothing less than their complete and total annihilation could be tolerated; the ground on which they had trodden burnt away and salted – assuming it could ever be sanctified for human habitation. Even at their peak, there had only been so many Legiones Astartes to engage these threats, and coupled with the sheer number of Expeditionary Fleets active in the galaxy, this led to the raising of several Solar Auxilia cohorts trained and equipped for the explicit purpose of scouring whole battle-sectors or even entire planets clean of life.

Effects

- A Detachment using this Cohort Doctrine may select Solar Auxilia Hellhound Squadrons as Non-Compulsory Troop choices.
- Any model in a Detachment using this Cohort Doctrine may exchange a Flamer or Heavy Flamer with a Toxiferran Flamer for Free.
- Any Character in a Detachment using this Cohort Doctrine may be equipped with Rad Grenades for +10 points per model.
- Any Auxilia Rapier Carrier with Quad Launchers in a Detachment using this Cohort Doctrine may be upgraded to have Phospex Canister Shot at a cost of +20 points per model.
- Any Auxilia Malcador Infernus in a Detachment using this Cohort Doctrine may replace its Centreline Mounted Inferno Cannon with a Centreline Mounted Chem Destroyer at a cost of +25 points per model.

Limitations

- This Cohort Doctrine may only be selected for a Primary Detachment.
- An army whose Primary Detachment is using this Cohort Doctrine may not select an Allied Detachment.
- A Detachment using this Cohort Doctrine may not select any Fortification choices.

COHORT DOCTRINE: STEEL FURY PATTERN COHORTS

Although among the rarest of doctrines, the sheer scale of the Excertus Imperialis – between the material resources it could call upon and the scope of threats its armies confronted – meant that some cohorts were near-wholly committed to the deployment of super-heavy tanks. Not dissimilar to Armoured Fist doctrines; these cohorts developed their tactics around the overwhelming firepower and resilience of its super-heavies. Every other element, be it infantry or armour, was dedicated to supporting these behemoths as they ground hostiles to pulp beneath their treads and obliterated strongholds with the most powerful weaponry in the Solar Auxilia's arsenal.

Effects

- A Detachment using this Cohort Doctrine must select a Lord of War in place of a Primarch on the Crusade Force Organisation Chart. This Lord of War gains the Cohort Doctrines Special Rule and must be selected as the army's Warlord regardless of any rules which would require a model to be selected as the army's Warlord and must use the Super-Heavy Armoured Legate Warlord Trait (see below).
- A Detachment using this Cohort Doctrine may select Solar Auxilia Macharius Heavy Tank Squadrons as Elite choices.

Warlord: Super-Heavy Armoured Legate

A Warlord with this Warlord Trait gains the Dictatii Armoured Marshal upgrade at no additional points cost, and also increases its Ballistic Skill Characteristic by +1 in addition to any other bonuses.

Limitations

- All Lords of War Detachments in an army with this Cohort Doctrine must belong to the Solar Auxilia Sub-Faction.
- A Detachment using this Cohort Doctrine must contain more units with the Vehicle Unit Type than units without.

COHORT DOCTRINE: VALKYRIA PATTERN COHORTS

By the conclusion of the Great Crusade, the adoption of gunships and assault carriers among the Solar Auxilia was not especially widespread – with most cohorts still relying on the Arvus to shuttle individual sections to-and-from orbit. There were however a number of well-supplied cohorts who took advantage of these new aircraft and constructed innovative doctrines to emphasise their use. These gunships rapidly inserted larger numbers of line Tercios directly into battle, but remained on station to provide close air support; punching holes in enemy ranks and armour that could have otherwise overwhelmed those on the ground.

Effects

- A Detachment using this Cohort Doctrine may select Solar Auxilia Aello Gunship Squadrons as Heavy Support choices.
- All units in a Detachment using this Cohort Doctrine eligible to take an Aurox Transport as a Dedicated Transport may instead select an Arvus Transport as a Dedicated Transport.
- All units in a Detachment using this Cohort Doctrine eligible to take a Chimera Transport as a Dedicated Transport may instead select an Auxilia Kelaino or Auxilia Aello as a Dedicated Transport.
- For any model with the Vehicle Unit Type and both the Flyer and Transport Sub-Types in a Detachment that is using this Cohort Doctrine, and that is in Reserve, the Controlling Player may choose to automatically have them enter play at the start of their First Turn without making a Reserves roll. If they are not brought into play on Turn One then Reserves rolls are made for the models normally from Turn Two onwards.

Limitations

- All units composed entirely of models with the Infantry Unit Type must begin the battle Embarked on a model with the Transport Unit Sub-Type or in Reserves.

MODIFICATIONS TO EXISTING COHORT DOCTRINES

The following list comprises additions to the existing Cohort Doctrines that can be found in the **Liber Imperium** Rulebook. These changes are to be considered in addition to the rules presented in those publications.

COHORT DOCTRINE: IRON PATTERN COHORTS

Effects

- Enginseer Auxilia Sections selected in a Detachment using this Cohort Doctrine gains the Line Unit Sub-type, and may optionally select a Triaros Armoured Conveyor as a Dedicated Transport (see Liber Mechanicum for rules and points cost).

COHORT DOCTRINE: SIEGE PATTERN COHORTS

Effects

- Any unit which is eligible to purchase an Aurox Transport may instead purchase a Solar Auxilia Termite Assault Drill, and any unit which is eligible to purchase a Dracosan Armoured Transport may instead purchase an Auxilia Hades Breaching Drill.

SOLAR AUXILIA ARMoured MARSHALS

Among the ranks of the mortal armies of the Imperium, the thunder of engines and treads often marked the coming of the Solar Auxilia. Within their armoured corps, however, there were occasionally stories of individuals - tank commanders - who rose to prominence beyond that expected of their station. These experts in armoured warfare were often recognised with the rank of Marshal, rewarded and honoured for their uniquely potent contributions to the way the Auxilia waged war.

An Armoured Marshal may be selected as an upgrade for models with the Vehicle Unit Type and the Imperial Army (Solar Auxilia) Faction and Sub-Faction. No single model may select more than one Armoured Marshal upgrade, but more than one eligible model in an army may select Armoured Marshal upgrades. Furthermore, each individual Armoured Marshal upgrade may include specific limitations regarding which models may select that upgrade – these limitations will be detailed in the entry for that Armoured Marshal upgrade.

Each Armoured Marshal upgrade must be paid for at a cost in points, as indicated in the entry for that Armoured Marshal upgrade – note that the cost for a given Armoured Marshal upgrade may vary depending on the model that is to receive the upgrade. In addition, each Armoured Marshal upgrade may grant the model to be upgraded with a number of new Special Rules or items of additional Wargear, or may modify the upgraded model's Unit Type, Unit Sub-Type, or Characteristics. In all cases, the Armoured Marshal upgrade will specify all changes, benefits and limitations. An Armoured Marshal upgrade does not use up a slot of any kind on the Force Organisation chart, or change the slot used by the unit to which it is applied as an upgrade.

Armoured Marshal upgrades must be visually represented on the upgraded model by a suitable model placed in an otherwise empty cupola or hatch.

UNALIGNED ARMoured MARSHAL UPGRADES

The following Armoured Marshal upgrades can be purchased for specified models with any variant of the Imperial Army (Solar Auxilia) Faction and Sub-Faction.

It should be noted that an Armoured Marshal upgrade purchased for a Lord of War Choice is counted toward that Force Organisation Chart Slot's cost, and should be used when calculating the 25% limit on Lords of War and Primarch Choices in an army.

SOLAR AUXILIA ARMoured MARSHAL: ORDNANCE CORPS MARSHAL

Among the many Armoured Marshal ranks bestowed, those most commonly seen during the Great Crusade and beyond were known as the Ordnance Corps - specialising in the application of immense firepower, trading blows at extreme range with any who dared to challenge them. Broadcasting a command to all tanks in range, Ordnance Corps Armoured Marshals could coordinate a creeping barrage that would flush enemy troops from their hidden refuges amongst a deadly hail of explosive shells.

This upgrade may be purchased for a single model from any of the following units in an army, at a cost of +50 points:

- Solar Auxilia Armoured Battery
- Solar Auxilia Minotaur Battery
- Solar Auxilia Manticore Missile Tank Battery

This upgrade may be purchased for a single model from any of the following units in an army, at a cost of +75 points:

- Solar Auxilia Praetor Armoured Assault Launcher

Special Rules

A model with this upgrade gains the Blitz Barrage Special Rule.

Wargear

A model with this upgrade is equipped with a Nuncio-Vox.

Blitz Barrage

Once per game, before any Shooting Attacks are resolved during any of the Controlling Player's Shooting Phases, the Controlling Player may declare a unit that contains a model with an Ordnance Corps Marshal will fire a Blitz Barrage.

For that Shooting Phase only, a unit declared as firing a Blitz Barrage may fire any weapons they are equipped with that have the Ordnance type twice. This second Shooting Attack may be made at a different target to the first, but otherwise follows all the normal rules and conventions around making a Shooting Attack.

SOLAR AUXILIA ARMoured MARSHAL: ARMoured FIST MARSHAL

The best among the Solar Auxilia's tank commanders were known by the moniker "Armoured Fists" due to the precision with which they wielded the firepower of their vehicles; despite the informality of such a term, many commanders bore it with pride, and eventually those Marshals were able to petition for its formal recognition as not only their designated rank, but as a badge of honour for their conduct in combat.

This upgrade may be purchased for a single model from any of the following units in an army, at a cost of +50 points:

- Solar Auxilia Armoured Command Section
- Solar Auxilia Carnodon Command Section
- Solar Auxilia Malcador Heavy Tank Squadron

Special Rules

A model with this upgrade may make the Concentrated Fire Advanced Reaction.

Wargear

A model with this upgrade may be equipped with a Nuncio-Vox at a cost of +10 points. In addition, a model with this upgrade may be equipped with a Cognis Signum at a cost of +15 points.

Advanced Reaction: Concentrated Fire

Advanced Reactions are available to specific players as noted in their description. Unlike Core Reactions, they are activated in unique and specific circumstances as noted in their descriptions, and can often have game changing effects. Advanced Reactions use up points from a Reactive player's Reaction Allotment as normal and obey all other restrictions placed upon Reactions, unless it is specifically noted otherwise in their descriptions.

Concentrated Fire - This Advanced Reaction may be made whenever any enemy unit makes a Shooting Attack targeting a unit eligible to make this reaction. Once the Active player has resolved all To-Hit rolls, Armour Penetration rolls, Invulnerable Saves and any Damage Mitigation rolls are made, but before effects of any lost Hull Points or Vehicle Damage Chart rolls as a result of the Shooting Attacks made by all weapons in the Active player's unit that made the Shooting Attack are applied, the Reactive player may make a Shooting Attack, targeting the unit that triggered this Reaction and following all the usual rules for Shooting Attacks. Models which are part of a unit which includes a model with this Special Rule attacking as part of this Reaction may attack with all of their Defensive Weapons, and up to one Battle Weapon each. Template weapons may only be used as part of a Concentrated Fire Advanced Reaction if the target unit is within 8" and must use the Wall of Death Special Rule instead of firing normally.

SOLAR AUXILIA ARMoured MARSHAL: DICTATII MARSHAL

The influence of some Marshals spanned beyond their immediate command and into those soldiers who milled around their vehicles in battle, inspiring acts of great bravery or insane stubbornness, depending on the viewpoint of the observer. Indeed, such was the reverence held for these Dictatii that they were often afforded the best steed their Legate could procure, and the equipment retrofitted into it was of a singular quality, improving their offensive and defensive capabilities both.

This upgrade may be purchased for a unit composed of a single model from any of the following units in an army, at a cost of +75 points:

- Solar Auxilia Macharius Heavy Tank Squadron
- Solar Auxilia Praetorian Heavy Tank Squadron

This upgrade may be purchased for a single model from any of the following units in an army, at a cost of +100 points:

- Solar Auxilia Stormhammer
- Solar Auxilia Baneblade
- Solar Auxilia Stormblade
- Solar Auxilia Banehammer
- Solar Auxilia Stormlord
- Solar Auxilia Shadowsword
- Solar Auxilia Stormsword

An army may not contain more than one model with this Armoured Marshal Upgrade.

Special Rules

A model with this Special Rule gains the Void Shields (2) Special Rule. A model with this upgrade also gains +1 to its Ballistic Skill Characteristic, and +2 to its Hull Points Characteristic.

In addition, all friendly models with the Solar Auxilia Sub-faction within 12" of a model with this upgrade automatically pass any Morale or Pinning Tests they are called upon to make.

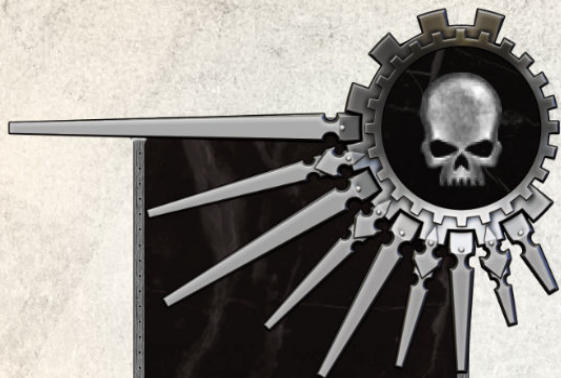

Wargear

A model with this upgrade is equipped with a Flare Shield at no additional Points cost, though may not purchase a Flare Shield from any other source.

SOLAR AUXILIA:
HQ

LORD MARSHAL IRETON MASADE.... 135 POINTS

The Old General, Protector of Agathon, Master of the 60th Expeditionary Fleet

	M	WS	BS	S	T	W	I	A	Ld	Sv
Ireton MaSade	6	4	5	3	3	3	3	3	10	2+
Ireton MaSade Mechanised	8	4	5	5	5	4	3	3	10	2+

Unit Composition

- 1 Ireton MaSade

Unit Type

- Ireton MaSade: Infantry (Character, Unique)
- Ireton MaSade Mechanised: Infantry (Character, Unique, Light, Mechanised)

HQ

Ireton MaSade was a legend among the Solar Auxilia. Having risen from humble origins as a scavenger on Terra, he began at the bottom as a common-line Auxiliary and part of the first muster of the Great Crusade. From there, his ascension through the ranks of the Solar Auxilia was meteoric and ultimately led to command of an entire Expeditionary Fleet. To have come from nothing and end his service as Imperial Commander over the worlds of the Agathean Domain, it is no surprise that recruiting officers held his career up as an example all would-be soldiers could aspire to in the Emperor's service. Nevertheless, Ireton MaSade's tale was largely overshadowed by the Legiones Astartes and their Primarchs.

By the conclusion of the Great Crusade, it was expected that MaSade would live out the rest of his days in retirement on Agathon – his lifespan already extended well beyond its natural limits by rejuvenats and augmetics. However, the outbreak of the Horus Heresy and the death of his beloved granddaughter – Jocasta MaSade – at the fall of Port Maw would lead Ireton to stage a short, bloody coup against Agathon's squabbling parliamentarians. With Agathon once again under the direct control of the 60th Expeditionary Fleet's 'Old Guard', Ireton MaSade mobilised the Domain for war against the Traitors.

Wargear

- Archaeotech Pistol
- Paragon Blade
- Frag Grenades
- Krak Grenades
- Ambulator Frame
- Iron Halo
- Psi-Jammer

Special Rules

- Battle-Hardened (1)
- Cohort Doctrines
- Field Officer
- Hatred (Traitors)
- Independent Character
- Loyalist
- Stubborn
- **Warlord:** Master of the Battlefield

Options:

- Ireton MaSade may be equipped with:
 - Extremis Warsuit* +35 points

**If this option is chosen, you must use the 'Ireton MaSade Mechanised' profile, and Ireton MaSade's Unit Type is changed to Infantry (Character, Mechanised, Light, Unique).*

Warlord: Master of the Battlefield

If chosen as the army's Warlord, Ireton MaSade automatically has the Master of the Battlefield Warlord Trait and may not select any other Warlord Trait.

At the start of the battle, once all players have deployed all of their units onto the battlefield (including Infiltrators and Scouts) and any rolls to Seize the Initiative have been made, but before the game begins, the Controlling Player may select up to three units that are under their control. The selected units may be redeployed as the Controlling Player wishes, within the constraints of the mission being played. The selected units may be placed into Reserves, but may not be assigned to a Deep Strike Assault, Subterranean Assault or Flanking Assault. If a unit with the Tercio Special Rule is selected, each unit is counted separately, though that unit may ignore the normal rules for Tercio deployment when it is being redeployed.

In addition, the Controlling Player of an army with Ireton MaSade as its Warlord may select one Phase at the start of the battle, before any models are deployed onto the battlefield. During the chosen Phase of their opponent's turn, an army that includes Ireton MaSade gains an additional Reaction as long as Ireton MaSade has not been removed as a casualty.

Ambulator Frame

A relic of the Dark Age of Technology, this irreplaceable marvel functioned as both an exo-skeleton and life support for Ireton MaSade, allowing him to overcome the infirmities of his advanced age.

An Ambulator Frame provides a 2+ Armour Save and grants the It Will Not Die (5+) Special Rule.

Extremis Warsuit

Ireton MaSade was known to take the field aboard a heavily personalised Extremis Warsuit to further mitigate the limitations of his centuries-old body – typically alongside similarly equipped Companions.

If upgraded to have an Extremis Warsuit, Ireton MaSade must use the Ireton Mechanised profile, and gains the following benefits:

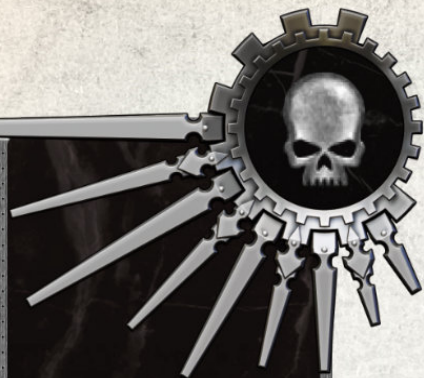

- Exchanges his Archaeotech Pistol for a Rotary Bolt Cannon.
- The Fleet (2), Inexorable, and Move Through Cover Special Rules.
- The Mechanised and Light Unit Sub-Types.

In addition, an Extremis Boarding Rig Section may be selected as a Retinue Squad in a Detachment where Ireton MaSade has been upgraded to have an Extremis Boarding Rig. A unit selected as Retinue Squad does not use up a Force Organisation slot and is considered part of the same unit as Ireton MaSade. An Extremis Boarding Rig Section selected as a Retinue Squad must be deployed with Ireton MaSade deployed as part of the unit and Ireton MaSade may not voluntarily leave the Retinue Squad during play.

All models in an Extremis Boarding Rig Section selected as a Retinue Squad lose the Battlesmith (X) Special Rule, and gain the Chosen Warriors and Counter-Attack (1) Special Rules.

One Extremis Boarding Rig may exchange a Vox Interlock for a Command Vox for +5 points.

One Extremis Boarding Rig may exchange an Auxilia Vexilla for a Cohorts Vexilla for +5 points.

SOLAR AUXILIA BATTLE PSYKER.....75 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Auxilia Battle Psyker	6	4	4	3	3	2	3	2	8	4+

Unit Composition

- 1 Auxilia Battle Psyker

Unit Type

- Infantry (Character, Psyker)

HQ

Battle Psykers were rare individuals possessed of both the ability to wield such powers and the mental fortitude to do so amidst the violence of frontline combat. Most Battle Psykers were, at best, distrusted by their comrades, however their unparalleled impact upon the battlefield usually made them respected assets by Auxilia officers who wielded them.

Although the Edicts of Nikaea rendered judgement on the Librarius of the Legiones Astartes, some elements of the Imperialis Auxilia who utilised psykers were inevitably impacted, albeit indirectly. Several more superstitious units quietly had their psykers disappeared, while others were taken into custody, but many nonetheless continued to utilise their powers on active battlefronts where news of the Emperor's judgement had yet to reach them – or was otherwise ignored, if not considered irrelevant to mortal soldiers.

In the chaos of the Horus Heresy some desperate, previously disconcerted Loyalist cohorts authorised Battle Psykers to utilise their powers once more, especially when their effectiveness against malevolent Warp horrors had been proven. Traitor forces were far less hesitant to unleash the full might of their own psykers, whether they had previously served in that role or possessed latent potential they were now free to wield without persecution, albeit at far greater risk to themselves and their comrades.

Wargear

- Laspistol
- Force Weapon
- Void Armour
- Refractor Field
- Frag Grenades
- Krak Grenades

Special Rules

- Battle Psyker
- Field Officer
- Independent Character
- Support Squad

Options:

- An Auxilia Battle Psyker may exchange their Laspistol for one of the following options:
 - Blast Pistol+2 points
 - Needle Pistol+2 points
 - Hand Flamer+2 points
 - Volkite Serpenta.....+2 points
 - Plasma Pistol+5 points
 - Inferno Pistol+5 points
- An Auxilia Battle Psyker may exchange their Void Armour for:
 - Heavy Void Armour.....+10 points
- An Auxilia Battle Psyker may select any of the following options:
 - Cyber-Familiar +15 points
 - Psychic Hood..... +15 points
 - Melta Bombs +20 points

ADDITIONAL WARGEAR OPTIONS FOR EXISTING HQ UNITS

In addition to the normal options presented in the rules for various units, the additional wargear presented below may be selected for units at the costs shown. These are intended to be used alongside various publications, including all of Games Workshop's official publications and releases.

SOLAR AUXILIA TACTICAL COMMAND SECTION

Options:

- Any model in the unit may exchange their Lasrifle for one of the following options:
 - Hot-Shot Lasgun+5 points
 - Charnabal Weapon and Hot-Shot Laspistol +10 points
 - Power Weapon and Hot-Shot Laspistol..... +10 points
 - Storm Axe +10 points
- The entire unit may exchange their Void Armour for:
 - Heavy Void Armour..... +30 points

SOLAR AUXILIA COMPANION SECTION

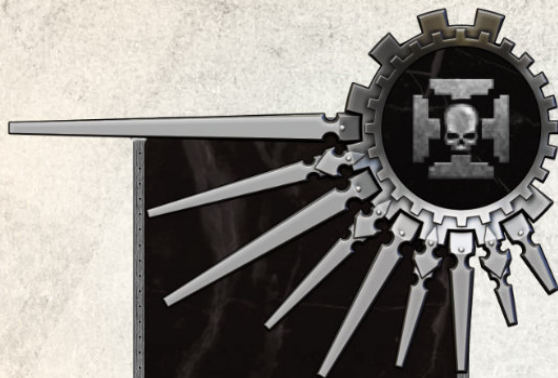

Options:

- Any model in the unit may exchange their Lasrifle for one of the following options:
 - Hot-Shot Lasgun+5 points
 - Charnabal Weapon and Hot-Shot Laspistol +10 points
 - Power Weapon and Hot-Shot Laspistol..... +10 points
 - Storm Axe +10 points
- The entire unit may exchange their Void Armour for:
 - Heavy Void Armour..... +30 points

**SOLAR AUXILIA:
Elites**

SOLAR AUXILIA FURIBUNDUS DREADNOUGHT TALON160 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Furibundus Dreadnought	8	4	4	7	6	5	4	3	8	2+

Unit Composition

- 1 Furibundus Dreadnought

Unit Type

- Dreadnought

ELITES

Whilst the Dreadnoughts of the Legiones Astartes were reserved for those warriors fallen in battle, allowing the slain one last chance at fighting to reclaim their honour, the Dreadnoughts utilised by the Solar Auxilia were a very different beast. Most often of the Furibundus pattern, these gangly, rotund machines did not require a permanent connection to their wearer, instead making use of an MIU link to allow a pilot to interface with their chassis in battle.

A pattern older than even the dawning of the Emperor's Imperium, the Furibundus made use of colossal claw-tipped power gloves, varied ranged armaments, and an unstable yet potent reactor core that afforded it a speed beyond that of the Contemptor Chassis at the risk of uncontrollable thermal explosions should it be breached. Despite these risks and shortcomings, however, the Solar Auxilia persisted in their use; for the carnage that could be wrought upon the battlefield by a Furibundus in the hands of a skilled pilot was second to none.

Wargear

- Two Dreadnought Power Gloves with in-built Twin-Linked Bolters
- Atomantic Deflector

Special Rules

- Thermal Runaway
- Furibundus Talon
- Fleet (1)

Options:

- A Solar Auxilia Furibundus Dreadnought Talon may include:
 - Up to 2 additional Furibundus Dreadnoughts +160 points per model
- Any Furibundus Dreadnought may select one of the following options:
 - Havoc Launcher +10 points
 - Helical Targeting Array +20 points
- Any Furibundus Dreadnought may replace either of its Dreadnought Power Gloves with in-built Twin-Linked Bolters for one of the following options:
 - Gravis Bolt Cannon +5 points
 - Gravis Autocannon +10 points
 - Gravis Missile Launcher (with Frag and Krak Missiles) +10 points
 - Volkite Culverin +10 points
 - Kheres Assault Cannon +15 points
 - Multi-Melta +15 points
 - Gravis Plasma Cannon +15 points
 - Gravis Lascannon +20 points
- Any Furibundus Dreadnought may replace an in-built Twin-Linked Bolter on a Dreadnought Power Glove for one of the following options:
 - Flamer +5 points
 - Meltagun +15 points
- Any Furibundus Dreadnought may select the following option:
 - Searchlights +5 points

POSSESSED AUXILIA 110 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Possessed Auxilia	6	3	2	4	4	2	3	2	7	4+
Greater Possessed Auxilia	6	3	-	5	4	3	3	3	7	4+

Unit Composition

- 10 Possessed Auxilia

Unit Type

- Possessed Auxilia: Infantry (Corrupted)
- Greater Possessed Auxilia: Infantry (Corrupted)

Wargear

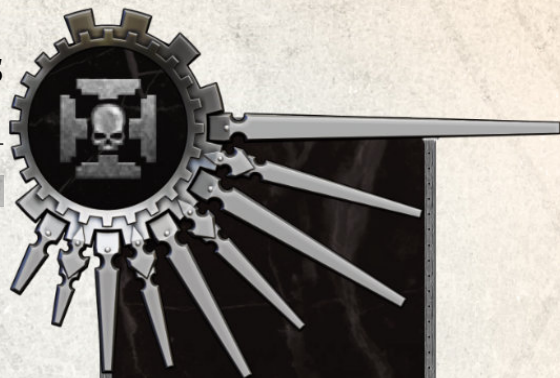

- Lasrifle (Possessed Auxilia only)
- Mutated Appendage (Greater Possessed Auxilia Only)
- Frag Grenades
- Krak Grenades
- Void Armour

Special Rules

- Feel No Pain (6+)
- Hatred (Everything)
- Relentless
- Traitor
- Bulky (3) (Greater Possessed Auxilia only)
- Hammer of Wrath (1) (Greater Possessed Auxilia only)
- Rage (2) (Greater Possessed Auxilia only)

Options:

- A Possessed Auxilia unit may include:
 - Up to 10 additional Possessed Auxilia +11 points per model
- For every five models in the unit, one Possessed Auxilia may be upgraded to a:
 - Greater Possessed Auxilia +15 points
- Any Possessed Auxilia with a Lasrifle may take:
 - Bayonet +1 point
- Any Possessed Auxilia may exchange their Lasrifle for one of the following options:
 - Laspistol and Close Combat Weapon Free
 - Two Close Combat Weapons Free
 - Shotgun Free
 - Volkite Charger +2 points
 - Chainsword and Laspistol +2 points
 - Mutated Appendage +5 points
 - Storm Axe +5 points
- For every five models in the unit, one Possessed Auxilia may exchange their Lasrifle with one of the following options:
 - Power Weapon and Laspistol +5 points
 - Flamer +5 points
 - Grenade Launcher (with Frag and Krak Rounds) +5 points
 - Power Fist and Laspistol +10 points
- For every five models in the unit, one Possessed Auxilia may exchange a Laspistol with one of the following options:
 - Blast Pistol +2 points
 - Needle Pistol +2 points
 - Hand Flamer +2 points
 - Plasma Pistol +5 points

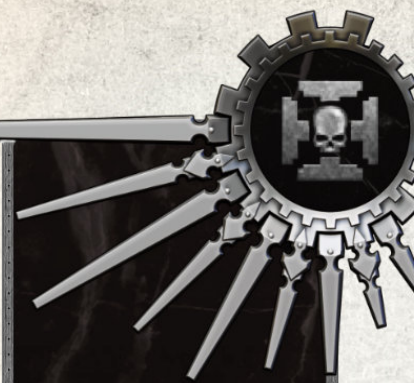

ELITES

The proliferation of unholy rites and worship of dark powers spread quickly among the mortal auxiliaries of Traitor forces, and Solar Auxilia cohorts proved no exception. Many succumbed to the false promises of power that daemoniac entities offered, or else were given over to possession in rituals meant to forcibly claim the bodies and souls of prisoners and wounded comrades too weak to fend off damnation. Others were simply overwhelmed by an overabundance of Warp-energy; rapidly devolving in mind and body.

Whether some inkling of humanity remained within these possessed vessels was hard to say, for they displayed little willpower beyond the compulsion to satiate a newfound bloodlust. Possessed Auxilia pushed their forms to the limits of human endurance; surging onwards even after suffering blows that would have slain a man outright. Most retained the weapons they carried in life, but almost always preferred to close in to engage in melee.

Mortal flesh proved extremely malleable to the Warp's touch, and as such few Possessed Auxilia ever looked alike. Many had their bodies violently twisted and reshaped to become larger, more powerful creatures that barely resembled anything close to a human. While some would further mutate into abominations known as Spawn, most of these meat puppets inevitably degraded beyond use after a short span of time, ultimately casting their possessor back into the Emphyrean.

SOLAR AUXILIA EXTREMIS BOARDING RIG SECTION.....185 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Extremis Boarding Rig	8	4	4	5	5	3	3	2	8	3+

Unit Composition

- 3 Extremis Boarding Rigs

Unit Type

- Infantry (Mechanised, Light)

ELITES

The Solar Auxilia began as a space-bound fighting force, and many of the original regiments never forgot those vaunted origins. In the press and claustrophobia of space-combat, down void-sealed corridors and within the wrecks of airless hulks was the need for the Extremis Rigs first conceived.

The earliest Extremis Boarding Rigs were ugly, brutish affairs; all gangly piston-actuated limbs and grinding claws to shear through bulkheads and hull walls alike. In the darkened confines of such environments did the crewmen of the Rigs build their skill, and in time, not only could they repair their own Rigs in times of need, but also assist in ship repairs for their commanders when required, such was their skill. This earned them both grudging respect and disdain from the Mechanicum; for to be utterly uninitiated in the ways of the Machine-God and yet able to repair such venerable vessels was a paradox no amount of cogitator stacks among their host could resolve.

In time, the Extremis Rigs would be codified into a true pattern, boasting a range of weapons, a gimbal-mounted Heavy Lascutter slung over a shoulder, and a flexible equipment mount to allow for servo-arms, vox gear, or any other manner of useful tool to be harnessed in their operations.

Wargear

- Pneumatic Claw
- Heavy Lascutter
- Multi-Laser
- Refractor Field
- Frag Grenades

Special Rules

- Battlesmith (5+)
- Inexorable
- Fleet (2)
- Move Through Cover

Options:

- A Solar Auxilia Extremis Boarding Rig Section may include:
 - Up to 3 additional Extremis Boarding Rigs +60 points per model
- One Extremis Boarding Rig may select:
 - Auxilia Vexilla +5 points
- Any model may exchange their Multi-Laser and/or Heavy Lascutter for one of the following options:
 - Heavy Flamer Free
 - Grenade Launcher (with Frag and Krak Rounds) Free
 - Heavy Bolter +5 points
 - Rotary Bolt Cannon +10 points
 - Volkite Culverin +10 points
 - Missile Launcher (with Frag, Krak, and Flak Missiles) +15 points
 - Multi-Melta +20 points
 - Lascannon +20 points
- Any model may select one of the following options:
 - Vox Interlock +10 points
 - Servo Arm +10 points
- Any model may select any of the following options:
 - Searchlights +5 points
 - Augury Scanner +10 points

ENGINEER AUXILIA SECTION 65 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Engineer Adept	6	3	3	3	3	1	3	1	7	4+
Servo-Automata	6	3	3	4	5	1	1	1	6	5+

Unit Composition

- 1 Engineer Adept
- 4 Servo-automata

Unit Type

- Engineer Adept: Infantry (Character)
- Servo-automata: Automata (Guardian)

Wargear

- Laspistol (Engineer Adept only)
- Power Axe (Engineer Adept only)
- Servo-arm (Engineer Adept only)
- Close Combat Weapon (Servo-automata only)

Special Rules

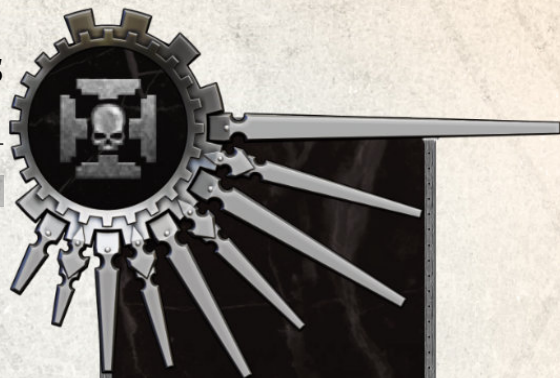

- Battlesmith (6+) (Engineer Adept only)
- Battle-Automata (Engineer Adept only)
- Stubborn (Engineer Adept only)
- Techo-Arcana: Engineer (Engineer Adept only)

Dedicated Transport:

- An Engineer Auxilia Section of no more than ten models may take an Aurox Transport or Solar Auxilia Termite Assault Drill as a Dedicated Transport. A unit of no more than twelve models may take a Solar Auxilia Chimera Transport as a Dedicated Transport. A unit of any size may take a Dracosan Armoured Transport as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points must still be paid for as part of the army.

Options:

- An Engineer Auxilia Section may include:
 - Up to 2 additional Engineer Adepts +20 points per model
- An Engineer Auxilia Section may include:
 - Up to 6 additional Servo-automata +5 points per model
- Any Engineer Adept may take any of the following options:
 - Augury Scanner +5 points
 - Vox Interlock +5 points
 - Nuncio-Vox +10 points
 - Volkite Charger +10 points
 - Cortex Controller +15 points
 - Graviton Gun +15 points
- Any Engineer Adept may take any of the following options:
 - Cyber-Familiar +5 points
 - Melta Bombs +5 points
- Any Servo-automata may take one of the following options:
 - Las-lock +2 points
 - Flamer +5 points
 - Maxima Bolter +5 points
 - Servo-Arm +5 points
 - Grenade Launcher (with Frag and Krak Rounds) +10 points
 - Rotor Cannon +10 points
 - Heavy Bolter +15 points
 - Multi-Melta +25 points

ELITES

The hosts of the Excertus Imperialis would undoubtedly have floundered without the support of the Mechanicum, owing to the sheer volume and diversity of machinery and equipment utilised across its ranks – from its lowest Militia conscript to the loftiest Legate Marshal. To this end, an array of adepts drawn from numerous rungs of the Mechanicum accompanied the Imperialis Auxilia wherever the Imperium sent its armies.

Many of these Engineers were deployed to the battlefield alongside Solar Auxilia Cohorts, usually surrounded by a retinue of servo-automata that assisted them in their duties. While the tech-priests and their guardians were known to carry a fearsome, often esoteric array of weaponry, these disciples of the Omnissiah were primarily recognised for their ability to repair damage inflicted onto war machines and static defences even under heavy fire.

ADDITIONAL WARGEAR OPTIONS FOR EXISTING ELITES UNITS

In addition to the normal options presented in the rules for various units, the additional wargear presented below may be selected for units at the costs shown. These are intended to be used alongside various publications, including all of Games Workshop's official publications and releases.

SOLAR AUXILIA VELETARIS COMMAND SECTION

Options:

- Any model in the unit may exchange their Volkite Charger for one of the following options:
 - Hot-Shot Lasgun +2 points
 - Power Weapon and Blast Pistol +5 points
 - Power Weapon and Hot-Shot Laspistol..... +5 points
 - Storm Axe +5 points

SOLAR AUXILIA VELETARIS STORM SECTION

Options:

- Any Veletarii in the unit may exchange their Volkite Charger for one of the following options:
 - Hot-Shot Lasgun +2 points
 - Power Weapon and Blast Pistol +5 points
 - Power Weapon and Hot-Shot Laspistol..... +5 points
- The Veletarii Prime may exchange their Volkite Charger for the following option:
 - Hot-Shot Lasgun +2 points

SOLAR AUXILIA VELETARIS VANGUARD SECTION

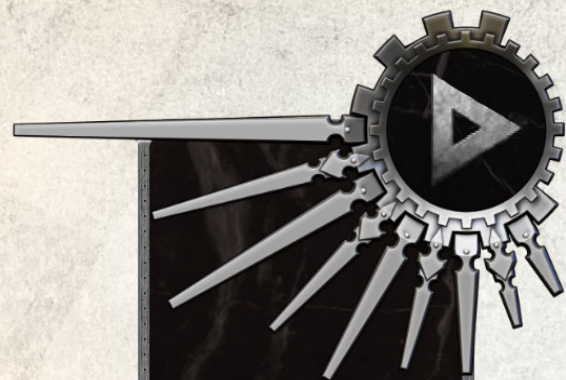

Options:

- Any Veletarii in the unit may exchange their Rotor Cannon for one of the following options:
 - Volkite Caliver..... +5 points
 - Multi-Laser (with Suspensor Web) +5 points
 - Hot-Shot Volley Gun (with Suspensor Web)..... +10 points
- The Veletarii Prime may exchange their Rotor Cannon for one of the following options:
 - Heavy Flamer Free
 - Volkite Caliver..... +5 points
 - Multi-Laser (with Suspensor Web) +5 points
 - Hot-Shot Volley Gun (with Suspensor Web)..... +10 points

SOLAR AUXILIA: Troops

TROOPS

Breacher Tercios were favoured by cohorts who were expected to fight in gruelling 'Zone Mortalis' engagements, where even the superior training and armament of the Solar Auxilia were pushed to their limits. The heavier arsenal and discipline required to maintain the integrity of a Breacher formation ensured they were typically drawn from experienced, veteran Auxiliaries.

Although the mortality rate among Breacher Tercios could be truly appalling – even by the standards of the Solar Auxilia – serving in such a role nonetheless proved attractive to Auxiliaries who sought advancement through the ranks. Leading a forlorn hope into certain death guaranteed commendations and ascension, but survival was as much about luck as it was any ability to survive. For this reason, Troop Masters of Breacher Tercios – as well as their protectors – tended to be younger than their contemporaries, though were no less battle-hardened for it.

AUXILIA BREACHER TERCIO

Each Auxilia Breacher Tercio is a single Troops choice, using up a single Troops slot on the Force Organisation chart. Each Auxilia Breacher Tercio is composed of a number of separate units – the exact number of units in the Tercio is shown on the Auxilia Breacher Tercio organisation chart (shown below). An Auxilia Breacher Tercio may not include more than three units.

AUXILIA BREACHER TERCIO ORGANISATION CHART

An Auxilia Breacher Tercio may include the following units:

- 0-1 Solar Auxilia Breacher Command Section
- 1-3 Solar Auxilia Breacher Sections

SOLAR AUXILIA BREACHER COMMAND SECTION 50 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Auxilia Breacher Veteran	6	3	3	3	3	1	3	2	6	4+
Auxilia Breacher Troop Master	6	4	4	3	3	2	3	3	8	4+

Unit Composition

- 4 Auxilia Breacher Veterans
- 1 Auxilia Breacher Troop Master

Unit Type

- Auxilia Breacher Veteran: Infantry (Line, Close-Order, Heavy)
- Auxilia Breacher Troop Master: Infantry (Line, Close-Order, Heavy, Character)

Wargear

- Shotgun
- Reinforced Void Armour
- Boarding Shield
- Frag Grenades
- Krak Grenades
- Breacher Charges

Special Rules

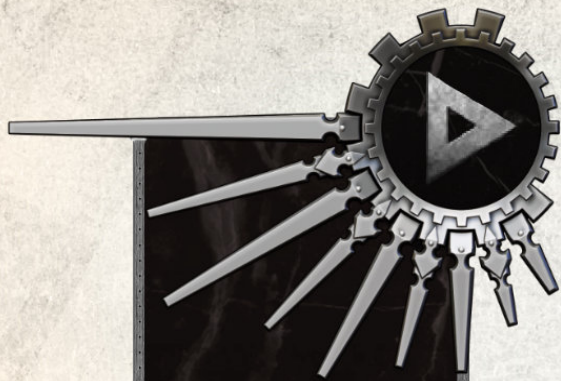

- Tercio

Dedicated Transport:

- A Solar Auxilia Breacher Command Section of no more than ten models may take an Aurox Transport or Solar Auxilia Termite Assault Drill as a Dedicated Transport. A unit of no more than twelve models may take a Solar Auxilia Chimera Transport as a Dedicated Transport. A unit of any size may take a Dracosan Armoured Transport or Solar Auxilia Hades Breaching Drill as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points must still be paid for as part of the army.

Options:

- A Solar Auxilia Breacher Command Section may include:
 - Up to 15 additional Auxilia Breacher Veterans..... +8 points per model
- One Auxilia Breacher Veteran may select:
 - Command Vox +10 points
- One Auxilia Breacher Veteran may select:
 - Auxilia Vexilla.....+5 points
- One Auxilia Breacher Veteran may select:
 - Augury Scanner+5 points
- The Auxilia Breacher Troop Master may exchange their Shotgun for the following option:
 - Laspistol Free
- Any model in the unit may exchange their Shotgun for one of the following options:
 - Lascarbine..... Free
 - Volkite Charger +2 points
- The Auxilia Breacher Troop Master may exchange a Laspistol for one of the following options:
 - Blast Pistol +2 points
 - Needle Pistol +2 points
 - Hand Flamer +2 points
 - Plasma Pistol+5 points
- The Auxilia Breacher Troop Master may select one of the following options:
 - Charnabal Weapon..... +10 points
 - Power Weapon +10 points
 - Power Fist +15 points
 - Chainfist..... +15 points
- The Auxilia Troop Master may select any of the following options:
 - Refractor Field+5 points
 - Melta Bombs+5 points

SOLAR AUXILIA BREACHER SECTION.....90 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Auxilia Breacher	6	3	3	3	3	1	3	1	6	4+
Auxilia Breacher Sergeant	6	3	3	3	3	1	3	2	7	4+

TROOPS

Breacher Sections regularly served in the vanguard of the most perilous frontal assaults where other shock troops could not be relied upon to survive. They were expected to advance without hesitation and in tight lockstep with their comrades to maintain a shield-wall against enemy fuselages that might otherwise break the advance of lesser equipped Tercios.

Owing to the close formation doctrines of the Solar Auxilia, Breacher Sections were as suited to deployment on open battlefields as they were 'Zone Mortalis' engagements, spearheading the push through breached defences and down exposed city streets. Auxiliaries who made up Breacher Sections were drilled to be remorseless on the advance, instinctively filling holes in a line left by a fallen comrade to maintain its integrity – always denying the enemy a gap they could exploit.

Unit Composition

- 9 Auxilia Breachers
- 1 Auxilia Breacher Sergeant

Unit Type

- Auxilia Breacher: Infantry (Line, Close-Order, Heavy)
- Auxilia Breacher Sergeant: Infantry (Line, Close-Order, Heavy, Character)

Wargear

- Shotgun
- Reinforced Void Armour
- Boarding Shield
- Frag Grenades
- Krak Grenades
- Breacher Charges

Special Rules

Dedicated Transport:

- A Solar Auxilia Breacher Section of no more than ten models may take an Aurox Transport or Solar Auxilia Termite Assault Drill as a Dedicated Transport. A unit of no more than twelve models may take a Solar Auxilia Chimera Transport as a Dedicated Transport. A unit of any size may take a Dracosan Armoured Transport or Solar Auxilia Hades Breaching Drill as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points must still be paid for as part of the army.

Options:

- A Solar Auxilia Breacher Section may include:
 - Up to 10 additional Auxilia Breachers..... +8 points per model
- One Auxilia Breacher may select:
 - Vox Interlock..... +5 points
- One Auxilia Breacher may select:
 - Auxilia Vexilla..... +5 points
- One Auxilia Breacher may select:
 - Augury Scanner +5 points
- The Auxilia Breacher Sergeant may exchange their Shotgun for the following option:
 - Laspistol Free
- Any model in the unit may exchange their Shotgun for one of the following options:
 - Lascarbine Free
 - Volkite Charger +2 points
- The Auxilia Breacher Sergeant may exchange a Laspistol for one of the following options:
 - Blast Pistol +2 points
 - Needle Pistol +2 points
 - Hand Flamer +2 points
 - Plasma Pistol +5 points
- The Auxilia Breacher Sergeant may select one of the following options:
 - Charnabal Weapon..... +10 points
 - Power Weapon..... +10 points
 - Power Fist +15 points
 - Chainfist..... +15 points
- The Auxilia Breacher Sergeant may select any of the following options:
 - Melta Bombs +5 points

TROOPS

While Infantry Tercios served as the backbone of the Solar Auxilia cohorts, Infantry Support Tercios regularly fought in close formation alongside the massed ranks of Rifle Sections. As per their namesake, the sections that made up Infantry Support Tercios were responsible for eliminating threats that could withstand even massed lasrifles, or to pave the way for their marching advance – greasing the proverbial wheels of the Solar Auxilia's mainstay.

To this end, the Troop Masters of Ancillary Command Sections were responsible for directing their subordinate sections in battle; whether by following the directives of superior officers and deploying them accordingly, or acting on requests for support from other Command Sections.

AUXILIA INFANTRY SUPPORT TERCIO

Each Auxilia Infantry Support Tercio is a single Non-Compulsory Troops choice, using up a single Troops slot on the Force Organisation chart. Each Auxilia Infantry Support Tercio is composed of a number of separate units – the exact number of units in the Tercio is shown on the Auxilia Infantry Support Tercio organisation chart (shown below). An Auxilia Infantry Support Tercio may not include more than three units.

AUXILIA INFANTRY SUPPORT TERCIO ORGANISATION CHART

An Auxilia Infantry Support Tercio may include the following units:

- 0-1 Solar Auxilia Ancillary Command Section
- 1-3 of any of the following choices, in any combination: Solar Auxilia Pioneer Sections, Solar Auxilia Special Weapons Sections, or Solar Auxilia Heavy Weapons Sections.

SOLAR AUXILIA ANCILLARY COMMAND SECTION40 POINTS

SOLAR AUXILIA PIONEER SECTION.....70 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Pioneer	6	3	3	3	3	1	3	1	6	4+
Pioneer Weapons Team	6	3	3	3	3	2	3	2	6	4+
Pioneer Sergeant	6	3	3	3	3	1	3	2	7	4+

Unit Composition

- 9 Pioneers
- 1 Pioneer Sergeant

Unit Type

- Pioneer: Infantry
- Pioneer Weapons Team: Infantry
- Pioneer Sergeant: Infantry (Character)

TROOPS

Pioneer Sections were combat engineers vital to the doctrines of active defence that came to define the Solar Auxilia. These strategies called for the rapid fortification of newly seized ground in preparation for enemy counter-attacks, against which their foe would break upon their lines to be cut down by massed-ranks of lasrifle fire.

On many battlefields, Pioneer Sections were also called upon to range ahead of a Cohort's main thrust; scouting enemy positions and, where they were able, destroy static defences such as minefields, bunkers and other obstacles to ensure a cohort's grinding advance maintained momentum.

Unlike most other Solar Auxilia units – who were generally equipped in an inflexible and universal manner – Pioneer Sections were known to requisition varied armaments and equipment, owed to the range of roles they fulfilled and obstacles they were expected to overcome.

Wargear

- Lasrifle
- Void Armour
- Frag Grenades
- Krak Grenades
- Breacher Charges
- Mole Mortar (Pioneer Weapons Team only)

Special Rules

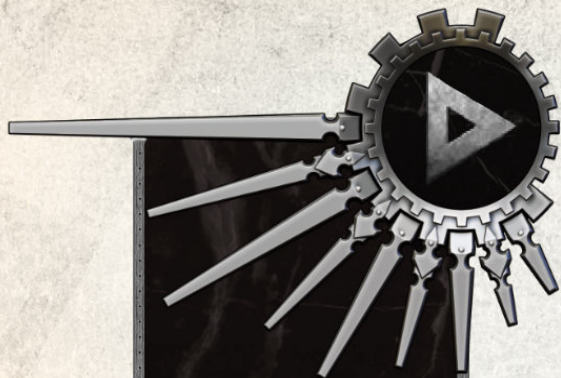

- Bulky (3) (Pioneer Weapons Team only)
- Emplaced Position (Pioneer Weapons Team only)
- Crew-Served Weapon (Pioneer Weapons Team only)
- Forward Defences
- Scout
- Tercio

Dedicated Transport:

- A Solar Auxilia Pioneer Section of no more than ten models may take an Aurox Transport or Solar Auxilia Termite Assault Drill as a Dedicated Transport. A unit of no more than twelve models may take a Solar Auxilia Chimera Transport as a Dedicated Transport. A unit of any size may take a Dracosan Armoured Transport or Solar Auxilia Hades Breaching Drill as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points must still be paid for as part of the army.

Options:

- A Solar Auxilia Pioneer Section may include:
 - Up to 10 additional Pioneers +6 points per model
- A Solar Auxilia Pioneer Section may include:
 - Up to 2 Pioneer Weapons Teams +25 points per model
- Any model with a Lasrifle may select the following option:
 - Bayonet +1 point
- One Pioneer may select:
 - Vox Interlock +5 points
- One Pioneer may select:
 - Auxilia Vexilla +5 points
- One Pioneer may select:
 - Augury Scanner +5 points
- The Pioneer Sergeant may exchange their Lasrifle for the following option:
 - Laspistol and Close Combat Weapon Free
- The Pioneer Sergeant may exchange a Laspistol for one of the following options:
 - Blast Pistol +2 points
 - Needle Pistol +2 points
 - Hand Flamer +2 points
 - Plasma Pistol +5 points
- The Pioneer Sergeant may exchange a Close Combat Weapon for one of the following options:
 - Charnabal Weapon +5 points
 - Power Weapon +5 points
 - Power Fist +10 points
- Any Pioneer in the unit may exchange their Lasrifle for one of the following options:
 - Shotgun Free
 - Lascarbine Free
 - Power Axe +5 points
- For every five models in the unit, one Pioneer may exchange their Lasrifle for one of the following options:
 - Heavy Flamer +2 points
 - Meltagun +15 points
 - Lascutter +15 points
- The entire unit may select any of the following options:
 - Shroud Bombs +20 points
 - Melta Bombs +25 points
- The entire unit may exchange their Void Armour for the following option:
 - Reinforced Void Armour +25 points

SOLAR AUXILIA SPECIAL WEAPONS SECTION80 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Auxilia	6	3	3	3	3	1	3	1	6	4+
Auxilia Sergeant	6	3	3	3	3	1	3	2	7	4+

TROOPS

Special Weapon Sections acted as fire-support for Infantry Tercios, bringing to bear more powerful weaponry to eliminate especially stubborn or unconventional threats that could otherwise endure their comrades' volleys of lasrifles fire. It was for this reason that with the outbreak of the Horus Heresy, Special Weapon Sections quickly proved invaluable assets to commanders faced with confronting the Legiones Astartes and Mechanicum.

In order to take advantage of these powerful but shorter ranged armaments, Special Weapon Sections were typically kept mobile – responding rapidly to the shifting tides of battle – utilised where their massed-firepower was needed to drive back breakthroughs or else force open holes in the enemy's defensive lines. Special Weapon Sections favoured deployment in transport vehicles for this reason, but could be relied upon to march in close-order with other Tercios or coordinate their fire alongside Heavy Weapon Sections to hold a defensive position.

Unit Composition

- 9 Auxilia
- 1 Auxilia Sergeant

Unit Type

- Auxilia: Infantry (Line, Close-Order)
- Auxilia Sergeant: Infantry (Character, Line, Close-Order)

Wargear

- Flamer
- Void Armour
- Frag Grenades
- Krak Grenades

Special Rules

- Tercio

Dedicated Transport:

- A Solar Auxilia Special Weapons Section of no more than ten models may take an Aurox Transport as a Dedicated Transport. A unit of no more than twelve models may take a Solar Auxilia Chimera Transport as a Dedicated Transport. A unit of any size may take a Dracosan Armoured Transport as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points must still be paid for as part of the army.

Options:

- A Solar Auxilia Special Weapons Section may include:
 - Up to 10 additional Auxilia+7 points per model
- One Auxilia may select:
 - Vox Interlock+5 points
- One Auxilia may select:
 - Auxilia Vexilla+5 points
- One Auxilia may select:
 - Augury Scanner+5 points
- The entire unit may exchange their Flamers for one of the following options (all models in the unit must take the same option):
 - Volkite Charger Free
 - Grenade Launcher (with Frag and Krak Rounds) Free
 - Plasma Gun+10 points per model
 - Meltagun+15 points per model
- The Auxilia Sergeant may exchange their Flamer for the following option:
 - Laspistol and Close Combat Weapon Free
- The Auxilia Sergeant may exchange a Laspistol for one of the following options:
 - Blast Pistol+2 points
 - Needle Pistol+2 points
 - Hand Flamer+2 points
 - Plasma Pistol+5 points
- The Auxilia Sergeant may exchange a Close Combat Weapon for one of the following options:
 - Charnabal Weapon+5 points
 - Power Weapon+5 points
 - Power Fist+10 points

SOLAR AUXILIA HEAVY WEAPONS SECTION..... 45 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Auxilia Weapons Team	5	3	3	3	3	2	3	2	6	4+

Unit Composition

- 3 Auxilia Weapon Teams

Unit Type

- Infantry (Heavy, Skirmish)

Wargear

- Heavy Stubber
- Void Armour

Special Rules

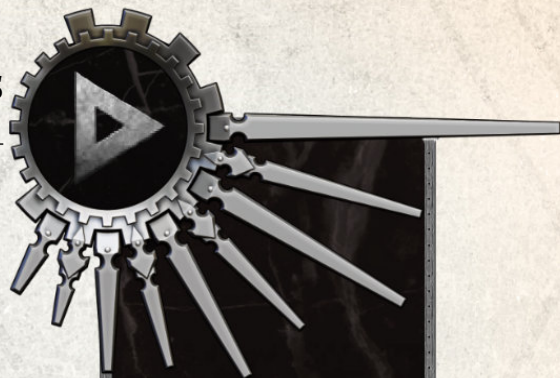

- Bulky (3)
- Emplaced Position
- Tercio
- Crew-Served Weapon

Dedicated Transport:

- A Solar Auxilia Heavy Weapons Section of no more than three models may take an Aurox Transport as a Dedicated Transport. A unit of no more than four models may take a Solar Auxilia Chimera Transport as a Dedicated Transport. A unit of no more than six models may take a Dracosan Armoured Transport as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points must still be paid for as part of the army.

Options:

- A Solar Auxilia Heavy Weapons Section may include:
 - Up to 7 additional Auxilia Weapons teams +15 points per model
- One Auxilia may select:
 - Vox Interlock +5 points
- One Auxilia may select:
 - Auxilia Vexilla +5 points
- One Auxilia may select:
 - Augury Scanner +5 points
- The entire unit may exchange their Heavy Stubbers for one of the following options (all models in the unit must take the same option):
 - Mortar +5 points per model
 - Heavy Bolter +5 points per model
 - Multi-Laser +5 points per model
 - Missile Launcher (with Frag, Krak, and Flak Missiles) +10 points per model
 - Autocannon +10 points per model
 - Volkite Culverin +10 points per model
 - Mole Mortar +10 points per model
 - Plasma Cannon +15 points per model
 - Lascannon +15 points per model

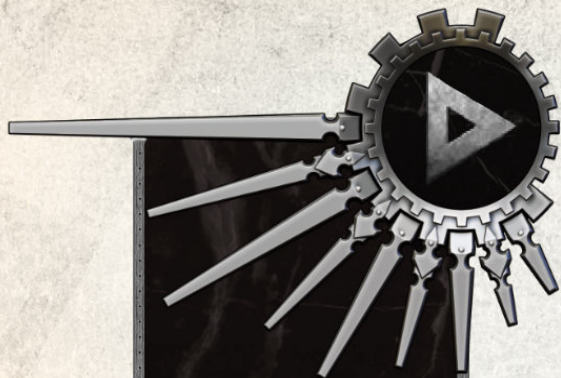

TROOPS

Solar Auxilia Cohorts utilised Heavy Weapon Sections to provide close fire support for advancing Infantry Tercios, typically in concert other supporting elements such as Special Weapon Sections and Pioneer Sections. While these portable crewed-weapons were lighter than rapier platforms, what Heavy Weapon Sections sacrificed in firepower they made up for in manoeuvrability and tighter coordination with other infantry elements.

Heavy Weapon Sections were equipped with a variety of man-portable weapons, all of them powerful but requiring a short delay for the crews to emplace and range in, an exercise they were relentlessly drilled in again and again, for every second counted on the battlefields of the Great Crusade. Heavy Stubbers raked down scores of slaving xenos beasts, while mortars reigned down from above, missile launchers cleared the skies and exploded among advancing infantry, as lascannons obliterated armour columns and alien monstrosities.

With the outbreak of the Horus Heresy and the need for weaponry that could penetrate the armour of the indomitable Legiones Astartes, the importance of the Heavy Weapon Sections was emphasised time and again. The lives of whole Tercios were spent to buy time for crews to reposition, or as bait to draw the post-human warriors into prepared kill-zones where only heavy weapons were guaranteed to destroy them.

SOLAR AUXILIA CHIMERA TRANSPORT.....60 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Auxilia Chimera Transport	14	3	12	10	10	3	14

Unit Composition

- 1 Auxilia Chimera Transport

Unit Type

- Vehicle (Transport, Reinforced)

DEDICATED TRANSPORT

The Chimera Armoured Infantry Transport was a rugged and durable vehicle that was beginning to see widespread use by the Imperialis Auxilia at the of the Horus Heresy. Its chassis was the basis upon which numerous other variants were designed, but by far the most endearing was its original role as an armoured personnel carrier.

Many infantry units favoured the Chimera not only for the impressive protection it provided, but also the firepower mounted atop it, which allowed the Chimera to act in a fire-support role after its charges had disembarked.

Among the Solar Auxilia adoption of the Chimera was not as far reaching as some other branches of the Imperialis Auxilia and many of the Cohorts who utilised it forwent the lasgun arrays popular with regular Army regiments. Instead, efforts were made to further modify and reinforce their Chimeras with extensive life support systems and superior material components, though this was far from universal.

Wargear

- Turret Mounted Multi-Laser
- Hull (Front) Mounted Multi-Laser
- Smoke Launchers

Special Rules

- Amphibious
- Infantry Transport

Dedicated Transport Options:

- A Solar Auxilia Tactical Command Section, Solar Auxilia Companion Section, Solar Auxilia Veletaris Command Section, Solar Auxilia Veletaris Storm Section, Solar Auxilia Veletaris Vanguard Section, Solar Auxilia Line Command Section, Solar Auxilia Rifle Section, or Solar Auxilia Artillery Command Section of no more than twelve models may take a Solar Auxilia Chimera Transport as a Dedicated Transport. A Solar Auxilia Cyclops Demolition Section of no more than four models may take a Solar Auxilia Chimera Transport as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points must still be paid for as part of the army.

Access Points:

- An Auxilia Chimera Transport has one Access Point at the rear.

Options:

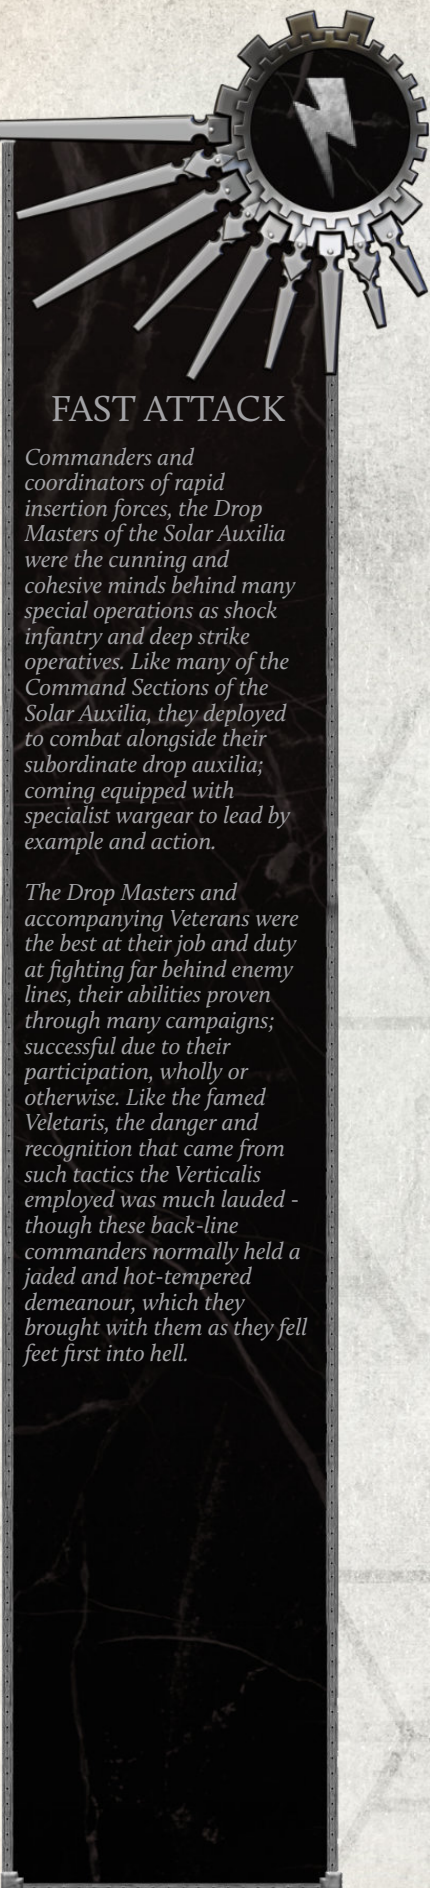

- An Auxilia Chimera Transport may exchange its Turret Mounted Multi-Laser for one of the following options:
 - Turret Mounted Heavy Bolter..... Free
 - Turret Mounted Heavy Flamer..... Free
 - Turret Mounted Twin-Linked Heavy Bolter..... +5 points
 - Turret Mounted Autocannon..... +5 points
- An Auxilia Chimera Transport may exchange its Hull (Front) Mounted Multi-Laser for one of the following options:
 - Hull (Front) Mounted Heavy Flamer..... Free
 - Hull (Front) Mounted Heavy Bolter..... Free
- An Auxilia Chimera Transport may select one of the following options:
 - Pintle Mounted Heavy Stubber..... +5 points
 - Pintle Mounted Heavy Flamer..... +5 points
 - Pintle Mounted Multi-Laser..... +10 points
- An Auxilia Chimera Transport may select up to two of the following option:
 - Hull (Front) Mounted Hunter-Killer Missile..... +5 points
- An Auxilia Chimera Transport may select any of the following options:
 - Searchlights..... +5 points
 - Dozer Blade..... +5 points
 - Two Sponson Mounted Lasgun Arrays*..... +10 points

*An Auxilia Chimera Transport that selects this option loses the Reinforced Sub-type.

**SOLAR AUXILIA:
Fast Attack**

FAST ATTACK

Commanders and coordinators of rapid insertion forces, the Drop Masters of the Solar Auxilia were the cunning and cohesive minds behind many special operations as shock infantry and deep strike operatives. Like many of the Command Sections of the Solar Auxilia, they deployed to combat alongside their subordinate drop auxilia; coming equipped with specialist wargear to lead by example and action.

The Drop Masters and accompanying Veterans were the best at their job and duty at fighting far behind enemy lines, their abilities proven through many campaigns; successful due to their participation, wholly or otherwise. Like the famed Veletaris, the danger and recognition that came from such tactics the Verticalis employed was much lauded - though these back-line commanders normally held a jaded and hot-tempered demeanour, which they brought with them as they fell feet first into hell.

AUXILIA VERTICALIS DROP TERCIO

Each Solar Auxilia Drop Tercio is a single Fast Attack choice, using up a single Fast Attack slot on the Force Organisation chart. Each Solar Auxilia Drop Tercio is composed of a number of separate units - the exact number of units in the Tercio is shown on the Solar Auxilia Drop Tercio organisation chart (shown below). A Solar Auxilia Drop Tercio may not include more than three units.

AUXILIA VERTICALIS DROP TERCIO ORGANISATION CHART

An Auxilia Verticalis Drop Tercio may include the following units:

- 0-1 Solar Auxilia Verticalis Drop Command Section
- 1-3 Solar Auxilia Verticalis Drop Sections
- 0-1 Solar Auxilia Verticalis Drop Sentinel Squadron

Unit Type

- Drop Auxilia: Infantry
- Drop Auxilia Sergeant: Infantry (Character)

FAST ATTACK

Some of the most skilled and capable of the Solar Auxilia, alongside the famed Veletarii hosts, the sections of the Drop Auxilia were veterans in their own right. Trained to utilise their Verticalis Drop Harnesses to descend and deploy into high-priority locations and target-rich environments, they were a contrast to the Veletarii, but their job was by no means less dangerous. Bringing lighter arms, with shorter and specialised patterns to lend to their lightweight nature, their weapons were still capable of overwhelming the foe, and their discipline as soldiers of the Solar Auxilia allowed them to perform as dangerous and unexpected forces dropped directly into the foes' flanks.

 - Smoke Launchers +5 points

FAST ATTACK

Whilst the mass-produced mechanical walkers of the Imperium were generally regarded as too weak for front-line military service, their somewhat lightweight build when compared to other mechanised forces lent to their capabilities in other ways of war.

When fitted with weaponry to complement the troops they deployed with, and a combination of thrusters and gravitic plates, they were dropped from high or low orbit from assault carriers to quickly descend alongside the rest of their drop forces. Used as a highly mobile weapons platform to be inserted where needed, whether that be in response to front-line combat, or to aid in the dismantling of a key target or objective, their weapons provided the heavy hitting punch that some tactical insertions required to complete their battlefield objectives.

FAST ATTACK

Equipped with enhanced augur suites and grand auspex arrays, the Salamander Command Vehicle was a command and control vehicle built to rapidly receive and relay data and form an unbreakable link in the chain of battlefield communication.

Frequently fielded by Armoured Columns as the figurehead of forward-operating armoured reconnaissance operations, the Salamander Command vehicle, the commander, and their learned crew were together able to read the flow of data through their data suites, synchronise reinforcements, and stave off assaults through the disruption of enemy communications.

Like its predecessor, Cohorts utilising the Salamander Command Vehicle refitted them to suit the needs of the Solar Auxilia, enclosing the rear platform, and environmentally sealing weapon ports, as well as outfitting it with further visual display systems to compensate.

AUXILIA LIGHT ARMoured TERCIO

Each Auxilia Light Armoured Tercio is a single Fast Attack choice, using up a single Fast Attack slot on the Force Organisation chart. Each Auxilia Light Armoured Tercio is composed of a number of separate units - the exact number of units in the Tercio is shown on the Auxilia Light Armoured Tercio organisation chart (shown below). An Auxilia Light Armoured Tercio may not include more than three units.

AUXILIA LIGHT ARMoured TERCIO ORGANISATION CHART

An Auxilia Light Armoured Tercio may include the following units:

- 0-1 of either Solar Auxilia Salamander Command Vehicle
- 1-3 of either Solar Auxilia Salamander Scout Squadrons or Solar Auxilia Pegasus Assault Squadrons, in any combination

- A Salamander Scout Vehicle may select any of the following options:
 - Searchlights+5 points
 - Dozer Blade+5 points
 - One Hull (Front) Mounted Hunter-Killer Missile+5 points

FAST ATTACK

The Salamander Scout Vehicle was a light reconnaissance vehicle based upon the Chimera chassis, which came into service in the shadow of its sibling. The Salamander took the rugged capabilities of the Chimera and reduced its size and weight, allowing it fulfil the role of a low-profile scout vehicle and observe enemy positions whilst operating at the forefront of a battle and relay information.

It was in this capacity that the Salamander proved its use time and again, harassing the lines of the enemy during the Age of Darkness.

SOLAR AUXILIA PEGASUS ASSAULT SQUADRON 85 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Pegasus Assault Vehicle	14	3	12	11	10	3	-

Unit Composition

- 1 Pegasus Assault Vehicle

Unit Type

- Vehicle (Fast, Reinforced)

FAST ATTACK

Where the punch of a Battle Tank was required alongside the speed and manoeuvrability of a scout vehicle, the Pegasus was called to the field. One of the last Chimera-Chassis vehicles to see official construction before the outbreak of the Heresy, the Pegasus Assault Vehicle was utilised amongst armoured scouting forces as a method of both a rapid assault vehicle, and an escort to more vulnerable reconnaissance assets.

Building upon the Chimera's capabilities as a Fire Support vehicle, using the space provided by its transport compartments to utilise a larger engine and heavier weapons allowed the Pegasus to bring a sizeable amount of stopping power to Reconnaissance Columns.

Wargear

 - Pintle Mounted Heavy Flamer +5 points
 - Pintle Mounted Multi-Laser +10 points
- A Carnodon Command Tank may select any of the following options:
 - Searchlights +5 points
 - Cognis-Signum +20 points

FAST ATTACK

Although the Carnodon medium battle tank was beginning to enter strategic reserves at the conclusion of the Great Crusade, a number of Solar Auxilia cohorts and officers still favoured the versatility and speed it offered over newer, heavier armoured designs – or simply hadn't been inundated with sufficient numbers to yet retire their ageing vehicles.

Whatever the reason, some cohorts continued to organise their Carnodon Squadrons into Tercio formations, relying on numbers and speed over technological advancements to win the day. These Tercios were led into battle by officers who had spent years or even decades within the familiar confines of the Carnodon and many were stubborn, ageing veterans who balked at the idea of mounting any other vehicle.

SOLAR AUXILIA TEMPESTOR LAND SPEEDER SQUADRON 85 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Tempestor Land Speeder	16	3	3	3	5	4	3	2	7	3+

Unit Composition

- 1 Tempestor Land Speeder

Unit Type

- Cavalry (Antigrav)

FAST ATTACK

Based off of the ubiquitous Proteus pattern Land Speeders issued to both the Imperial Army and the Legiones Astartes, the Tempestor sub-pattern featured a fully enclosed and environmentally sealed cockpit to fit the Solar Auxilia's exacting needs.

The Tempestor pattern came into being after initial testing of it among the Auxilia found the Proteus pattern lacking - mainly due to the design clashing against the Auxilia's particular combat doctrines - and so work began to adapt the anti-grav platforms by the Forges of Mars.

Armoured and equipped in a similar way to the more common Land Speeder patterns, the Tempestor was a scouting and reconnaissance vehicle and as such found itself used mostly by the pioneer companies of the Auxilia, ranging out alongside the Aethon Sentinels and other light vehicles before the main forces of the Solar Auxilia mounted their attack.

Feeding valuable target and topography data back to the main thrust of the Auxilia's forces, whilst also being rugged enough to mount a number of heavy weapons, the finalised versions of these strike craft were well-liked and entered into priority production alongside other staples of the Auxilia's forces - serving with distinction throughout the Great Crusade.

- Any Aethon Heavy Sentinel may select any of the following options:
 - Searchlights +5 points
 - Heavy Chainsword +5 points
- Any Aethon Heavy Sentinel may select up to two of the following option:
 - One Hunter-Killer Missile +5 points

FAST ATTACK

One of the first forays into adaptation of the sentinel chassis for front-line conflict, the Aethon sported much heavier armour than the standard Hermes-pattern Sentinels without sacrificing manoeuvrability. Specialised for reconnaissance in extremely hostile environments, Aethons were commonly piloted by pioneer veterans which specialised in terrain assessment and counter ambush tactics.

Up-armoured and armed considerably when compared to standard sentinel, the reinforced chassis of an Aethon allowed additional racks of heavy weapons to be fitted to their frames, allowing them to become the dominant force in reconnaissance firefights among the Auxilia. Even when battle was joined proper by the rest of their companions, their prodigious firepower and solid manoeuvrability led to many a fortified position or armoured squadron being cut down under the withering onslaught of their assault.

SOLAR AUXILIA HELLHOUND FLAME TANK SQUADRON.....70 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Auxilia Hellhound	14	3	12	12	10	3	-

Unit Composition

- 1 Auxilia Hellhound

Unit Type

- Vehicle (Reinforced)

FAST ATTACK

Based on the Chimera chassis, Hellhound Flame Tanks sacrificed transport capacity for one of several devastating, short-range armaments. The most common of these were large flamethrowers designed to bathe wide areas in their lethal payload, flushing out entrenched infantry and swarming xenos. Less common variants mounted Melta Cannons to deliver a devastating punch through the toughest of strongpoints and vehicles.

Due to the limited range of the Hellhound's weaponry, as well as the volatility of their payload, squadrons were kept mobile and fluidly redeployed, favouring engagements where they could rely on speed and the density of terrain to cover their approach. Many infantry sections understandably preferred to keep a wide berth, owing to the risk posed by a Hellhound's destruction.

Wargear

- Turret Mounted Gravis Heavy Flamer
- Hull (Front) Mounted Heavy Flamer
- Smoke Launchers

Special Rules

- Containment Breach

Options:

 - Dozer Blade+5 points
 - One Hull (Front) Hunter-Killer Missile+5 points

DIVISIO AERONAUTICA

AVENGER STRIKE FIGHTER160 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Auxilia Avenger Strike Fighter	22	3	11	11	10	3	-

Unit Composition

- 1 Auxilia Avenger Strike Fighter

Unit Type

- Vehicle (Flyer)

Wargear

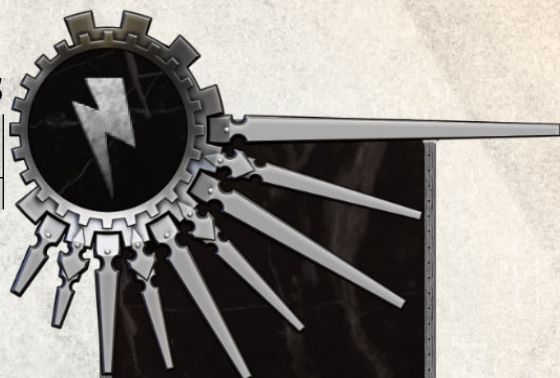

- Two Hull (Front) Mounted Lascannons
- Hull (Front) Mounted Avenger Bolt Cannon
- Hull (Rear) Mounted Heavy Stubber

Special Rules

- Deep Strike

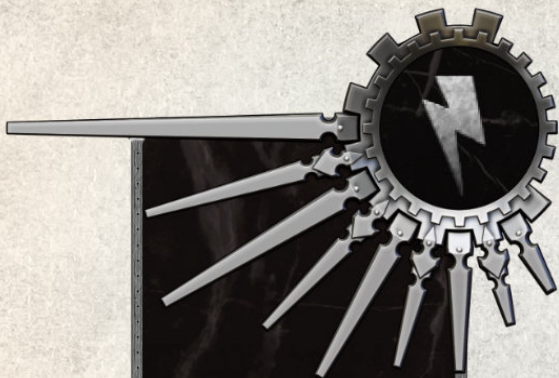

Options:

- An Auxilia Avenger Strike Fighter may select up to two of the following options:
 - Two Hull (Front) Mounted Hellstrike Missiles+10 points
 - Two Hull (Front) Mounted Skystrike Missiles.....+10 points
 - Hull (Front) Mounted Gravis Multi-Laser+10 points
 - Hull (Front) Mounted Cyclone Missile Launcher +20 points
- An Auxilia Avenger Strike Fighter may select any of the following:
 - Battle Servitor Control +5 points
 - Ramjet Diffraction Grid +5 points

FAST ATTACK

Whilst the Avenger Strike Fighter saw use among almost every arm of the Imperial war machine, it was argued that among the Solar Auxilia was where it was most beloved - for as both a capable void and atmospheric fighter craft, it could be relied upon to swoop into battle, the spooling of its Avenger Bolt Cannon before it unleashed an inevitable hail of explosive bolts well-known to spell doom for any who dared to defy the Emperor's will in the form of the massed Regiments of the Solar Auxilia.

SOLAR AUXILIA KELAINO SQUADRON100 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Auxilia Kelaino	20	3	12	12	10	3	12

Unit Composition

- 1 Auxilia Kelaino

Unit Type

- Vehicle
(Flyer, Hover, Transport, Reinforced)

FAST ATTACK

A relatively recent addition to the armories of the Crusade, the Kelaino-class of combat aircraft was in reality a collection of similar vehicles pressed into service by the forces of the Crusade to replace older craft, and to phase out craft of a less military bent, such as the Arvus Lighter. Whilst these multitudinous Kelaino variants bore many similarities to the Arvus in terms of capacity, they were however a substantial improvement in terms of firepower, and were capable of bearing multiple heavy weapons to aid them in clearing a landing zone or fighting their way through hostile airspace.

As the Great Crusade ended, and Horus began his terrible war upon the Emperor's great Imperium, the most common variant seen in the Kelaino classification would take up a name from old Terra's Nordyc Enclaves; the Valkyrie, an avenging angel upon wings of fire and wrath.

Wargear

- Centreline Mounted Multi-Laser
- Two Hull (Front) Mounted Hellstrike Missiles
- Searchlight

Special Rules

- Deep Strike
- Infantry Transport
- Unified Assault

Access Points:

- An Auxilia Kelaino has one Access Point on each side of the hull and one at the rear.

Options:

- A Solar Auxilia Kelaino Squadron may include:
 - Up to 2 additional Auxilia Kelaino +100 points per model
- Any Auxilia Kelaino may exchange their Centreline Mounted Multi-Laser for the following option:
 - Centreline Mounted Lascannon +10 points
- Any Auxilia Kelaino may exchange their Two Hull (Front) Mounted Hellstrike Missiles for the following option:
 - Two Centreline Mounted Multiple Rocket Pods +10 points
- Any Auxilia Kelaino may select one of the following options:
 - Two Sponson Mounted Heavy Bolters +20 points
 - Two Sponson Mounted Multi-Lasers +20 points

SOLAR AUXILIA AELLO GUNSHIP SQUADRON.....125 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Auxilia Aello	20	3	12	12	10	3	6

Unit Composition

- 1 Auxilia Aello

Unit Type

- Vehicle
(Flyer, Hover, Transport, Reinforced)

Wargear

- Three Centreline Mounted Twin-Linked Lascannons
- Searchlight

Special Rules

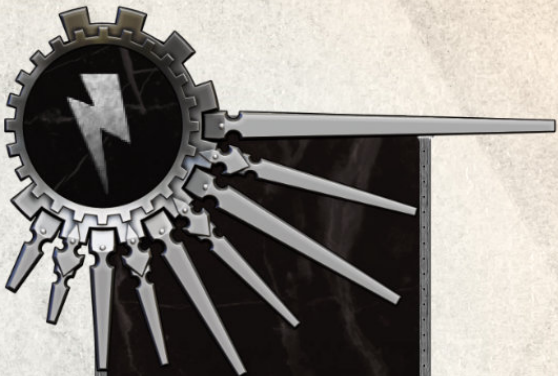

- Deep Strike
- Infantry Transport
- Unified Assault
- Strafing Run (1)

Access Points:

- An Auxilia Aello has one Access Point on each side of the hull and one at the rear.

Options:

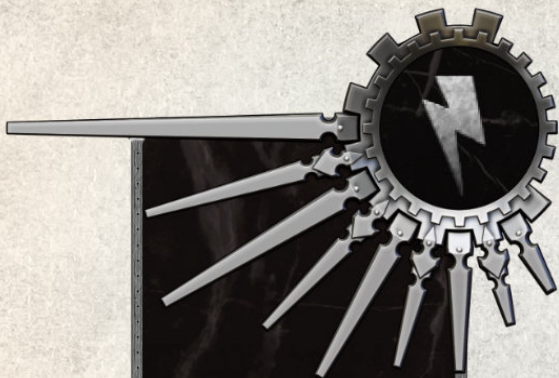

- A Solar Auxilia Aello Gunship Squadron may include:
 - Up to 2 additional Auxilia Aello +125 points per model
- Any Auxilia Aello may exchange up to Two Centreline Mounted Twin-Linked Lascannons, each for the following option:
 - Two Hull (Front) Mounted Hellstrike Missiles Free
- Any Auxilia Kelaino may select one of the following options:
 - Two Sponson Mounted Heavy Bolters +20 points
 - Two Sponson Mounted Multi-Lasers +20 points

FAST ATTACK

Modified from the most common patterns grouped into the Kelaino classification, Aello Gunships featured a reduced capacity to transport men and materiel, but in exchange having the ability to carry a much more potent array of weapons.

Each Aello typically carried three twin-linked Lascannons, enabling them to break through enemy aerospace blockades or act in hunter-killer roles after deploying their cargo of troops.

SOLAR AUXILIA OCYPETE GUNSHIP SQUADRON.....120 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Auxilia Ocypete	20	3	12	12	10	3	-

Unit Composition

- 1 Auxilia Ocypete

Unit Type

- Vehicle (Flyer, Hover, Reinforced, Fast)

FAST ATTACK

The Ocypete was the most heavily-modified variant of the Kelaino-class seen above the battlefields of the Great Crusade and Age of Darkness. Stripped of transport capacity and capability, the Ocypete instead used the internal space reclaimed by such removal for additional munitions and weapons. This allowed these strike craft to become capable of carrying a formidable array of weapons that could be customised to strike at any enemy target, from emplaced infantry to vehicle columns, with deadly effectiveness.

Wargear

- Hull (Front) Mounted Heavy Bolter
- Two Centreline Mounted Gravis Multi-Lasers
- Two Hull (Front) Mounted Hellstrike Missiles
- Searchlight

Special Rules

- Deep Strike
- Strafing Run (1)
- Attack Wing

Options:

- A Solar Auxilia Ocypete Gunship Squadron may include:
 - Up to 2 additional Auxilia Ocypete +110 points per model
- Any Auxilia Ocypete may exchange their two Centreline Mounted Gravis Multi-Lasers for one of the following options:
 - Two Centreline Mounted Missile Launchers (with Frag and Krak missiles)..... +10 points
 - Two Centreline Mounted Multiple Rocket Pods +10 points
 - Two Centreline Mounted Autocannons +10 points
 - Two Centreline Mounted Lascannons +20 points
- Any Auxilia Ocypete may exchange their Two Hull (Front) Mounted Hellstrike Missiles for one of the following options:
 - Two Hull (Front) Mounted Fragmentation Bombs Free
 - Two Centreline Mounted Multiple Rocket Pods +10 points
 - Six Hull (Front) Mounted Hunter-Killer Missiles +20 points
- Any Auxilia Ocypete may exchange their Two Hull (Front) Mounted Hellstrike Missiles and Two Centreline Mounted Gravis Multi-Lasers the following option:
 - Centreline Mounted Twin-Linked Punisher Rotary Cannon..... +30 points

SOLAR AUXILIA
HADES BREACHING DRILL..... 65 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Auxilia Hades Drill	6	3	12	10	10	2	-

Unit Composition

- 1 Auxilia Hades Drill

Unit Type

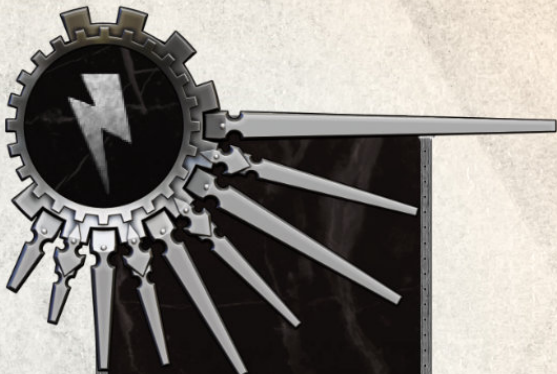

- Vehicle

Wargear

- Melta Cutters

Special Rules

- Subterranean Assault
- Follow-Up Attack

FAST ATTACK

The Hades Breaching Drill was ostensibly a piece of civilian mining equipment militarised for use on the battlefields of the Great Crusade. The Hades Drill was equipped with four large power-cutters which enabled it to easily bore through the earth and a set of melta-cutters to reduce stubborn rock to liquid slag. While far from subtle, the speed at which it could undermine enemy defences made it popular among specialised siege Cohorts.

Unlike its larger and more advanced cousin, the Termite, Hades Drills were not large enough to carry troops directly into battle. Instead those units assigned to its deployment would follow directly behind the drill as it cleared a path to the surface. Those foes who were not caught by the drill itself were left disorientated by crashing waves of flying rock and dust, vulnerable to the auxiliaries emerging from the ground to overwhelm them.

ADDITIONAL WARGEAR OPTIONS FOR EXISTING FAST ATTACK UNITS

In addition to the normal options presented in the rules for various units, the additional wargear presented below may be selected for units at the costs shown. These are intended to be used alongside various publications, including all of Games Workshop's official publications and releases.

ARVUS TRANSPORT

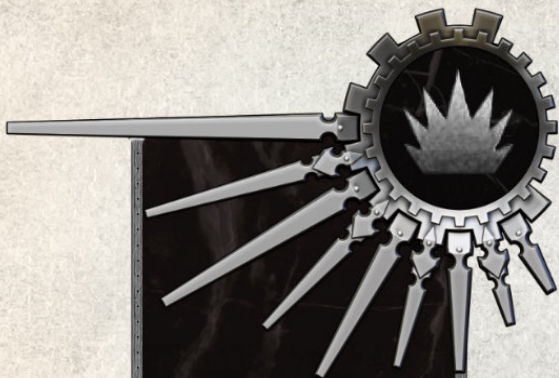

Options:

- An Arvus Transport may select one of the following options:
 - Hull (Front) Mounted Heavy Stubber Free
 - Hull (Front) Mounted Multi-Laser +10 points
 - Hull (Front) Mounted Autocannon +10 points
 - Hull (Front) Mounted Lascannon +15 points
- An Arvus Transport may choose to give a single Ranged Weapon it is equipped with the following Special Rule:
 - Twin-Linked +10 points
- An Arvus Transport may select the of the following option:
 - Flare Shield +20 points

SOLAR AUXILIA: Heavy Support

SOLAR AUXILIA MACHARIUS OMEGA HEAVY TANK.....375 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Auxilia Macharius Omega	10	3	13	11	10	6	-

Unit Composition

- 1 Auxilia Macharius Omega

Unit Type

- Vehicle (Reinforced, Bombard)

HEAVY SUPPORT

Before the age of the Emperor, giant steel behemoths ground across battlefields of many worlds. The majority of these vehicles could trace their lineage back to old Terra, before humanity was scattered across the stars. Considered obsolete by the time of the Great Crusade, a mothballing project began, especially amongst the variants sporting rarer armaments; the weapons destined to be stripped down and refitted onto the new Baneblade chassis.

The outbreak of the Heresy put pause to these plans, and the forges of many worlds lit hot once again as they began producing these outdated patterns. Millions of these esoteric tanks rumbled off of production lines, so they could be ground to dust in the civil war.

Wargear

- Centreline Mounted Omega Pattern Plasma Blastgun
- Two Sponson Mounted Heavy Stubbers
- Smoke Launchers

Special Rules

- Volatile Plasma Containment
- Exposed Plasma Conduits
- Independent Fire Control
- Armoured Superstructure

Options:

- An Auxilia Macharius Omega may exchange both of its Sponson Mounted Heavy Stubbers for one of the following options:
 - Two Sponson Mounted Heavy Flamer Free
 - Two Sponson Mounted Heavy Bolters +5 points
 - Two Sponson Mounted Multi-Lasers +5 points
 - Two Sponson Mounted Autocannons +10 points
 - Two Sponson Mounted Multi-Meltas +15 points
 - Two Sponson Mounted Plasma Cannons +15 points
 - Two Sponson Mounted Lascannons +20 points
- An Auxilia Macharius Omega may select any of the following options:
 - Searchlights +5 points
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points
 - Dozer Blade +10 points
 - Flare Shield +25 points

SOLAR AUXILIA PRAETORIAN HEAVY TANK SQUADRON 275 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Auxilia Praetorian Heavy Tank	12	3	14	13	12	5	-

Unit Composition

- 1 Auxilia Praetorian Heavy Tank

Unit Type

- Vehicle (Reinforced)

Wargear

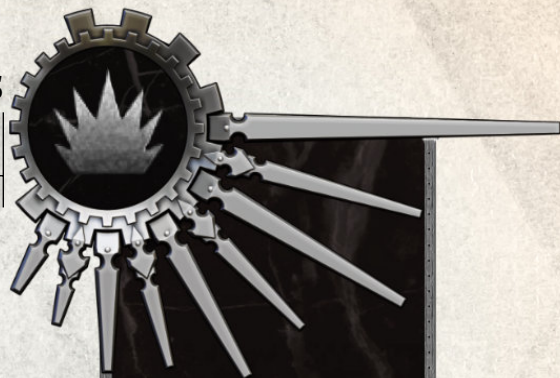

- Turret Mounted Praetorian Battle Cannon
- Centreline Mounted Kheres Assault Cannon
- Smoke Launchers

Special Rules

- None

Options:

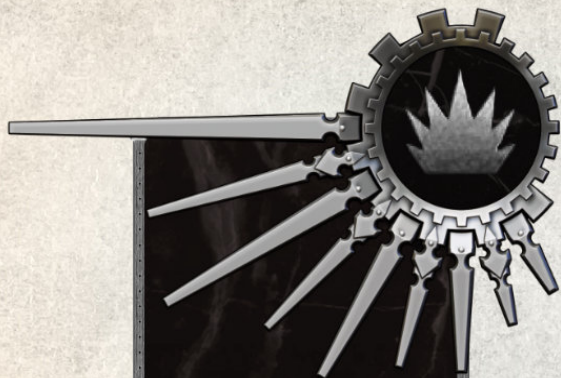

- A Solar Auxilia Praetorian Heavy Tank Squadron may include:
 - Up to 1 additional Auxilia Praetorian Heavy Tank.....+250 points per model
- Any Auxilia Praetorian Heavy Tank may exchange its Centreline Mounted Kheres Assault Cannon for the following option:
 - Centreline Mounted Pulveriser Cannon +25 points
- Any Auxilia Praetorian Heavy Tank may exchange its Turret Mounted Praetorian Battle Cannon for the following option:
 - Turret Mounted Oppressor Cannon with Coaxial Autocannon..... +20 points
- Any Auxilia Praetorian Heavy Tank may exchange its Turret Mounted Praetorian Battle Cannon and Centreline Mounted Kheres Assault Cannon for one of the following option:
 - Centerline Mounted Subjugator Cannon +35 points
- Any Auxilia Praetorian Heavy Tank may select one of the following options:
 - Two Sponson Mounted Heavy Stubbers Free
 - Two Sponson Mounted Heavy Bolters+10 points
 - Two Sponson Mounted Heavy Flamers.....+10 points
 - Two Sponson Mounted Multi-Meltas.....+30 points
- Any Auxilia Praetorian Heavy Tank which is not equipped with a Subjugator Cannon may select one of the following options:
 - Two Hull (Front) Mounted Heavy Stubbers+10 points
 - Two Hull (Front) Mounted Meltaguns +25 points
- Any Auxilia Praetorian Heavy Tank may select one of the following options:
 - Pintle Mounted Heavy Stubber..... +5 points
 - Pintle Mounted Heavy Flamer +5 points
 - Pintle Mounted Multi-Laser+10 points
- Any Auxilia Praetorian Heavy Tank may select any of the following options:
 - Searchlights +5 points
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points
 - Dozer Blade+10 points
 - Flare Shield+50 points

HEAVY SUPPORT

By the ending of the Great Crusade, many impressive and wondrous technological innovations had been rediscovered by the Expeditionary fleets of the nascent Imperium. Among these finds were innumerable weapons of war; guns, ships, and so on - but some discoveries were favoured over all by the Solar Auxilia - Tanks.

Rumoured to have been recovered by the hand of the Imperial Fist, mighty Dorn himself, the Praetorian was one such tank - and what a tank it was. Boasting powerful weapons, a modular internal layout to allow either a turreted cannon of one of a pair of designs, or a centreline tank-destroying cannon, the Praetorian was swiftly incorporated into the doctrines of those regiments that received them.

SOLAR AUXILIA HYDRA FLAK TANK BATTERY100 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Auxilia Hydra Flak Tank	14	3	12	10	10	3	-

Unit Composition

- 1 Auxilia Hydra Flak Tank

Unit Type

- Vehicle (Reinforced)

HEAVY SUPPORT

A specialised variant of the Chimera chassis, Hydra Flak Tanks were used as mobile anti-air defences for the Solar Auxilia, providing cover to their ground forces as they advanced upon the enemy. These batteries were fitted with an automated Servo-Turret, allowing their weapons to track even the swiftest of foes. This, alongside the prodigious volume of fire a Hydra could unleash, allowed a Hydra to rip enemy aircraft out of the air with ease.

Effective, resilient and mobile, these flak batteries were just as likely to see combat on the surface of barren airless moons harassing void craft as they were inside giant city-sized space stations plucking more conventional enemy aircraft from the 'sky'.

Wargear

- Turret Mounted Anvilus Autocannon Battery
- Hull (Front) Mounted Multi-Laser
- Searchlights
- Smoke Launchers
- Helical Targeting Array

Options:

- A Solar Auxilia Hydra Flak Tank Battery may include:
 - Up to 2 additional Auxilia Hydra Flak Tanks+85 points per model
- An Auxilia Hydra Flak Tank may exchange its Hull (Front) Mounted Multi-Laser for one of the following options:
 - Hull (Front) Mounted Heavy Bolter Free
 - Hull (Front) Mounted Heavy Flamer Free
- Any Auxilia Hydra Flak Tank may select any of the following options:
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points
 - Dozer Blade +5 points

Special Rules

- Aerial Interception

AUXILIA ARTILLERY TERCIO ADDITIONS

The unit listed below may be selected instead of or as well as the other options presented in other publications for an Auxilia Artillery Tercio. These additional units must otherwise follow all the normal restrictions on Tercios, and may not be used to expand a Tercio above three units as per the usual restrictions applied on Tercios.

AUXILIA ARTILLERY TERCIO ORGANISATION CHART ADDITIONS

In addition to the normal selections allowed in an Auxilia Artillery Tercio, the following unit may be included:

- 0-3 Solar Auxilia Sabre Batteries

SOLAR AUXILIA SABRE BATTERY25 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Auxilia Sabre Platform	-	1	3	3	5	2	1	1	6	4+

Unit Composition

- 1 Auxilia Sabre Platform

Unit Type

- Infantry (Heavy)

Wargear

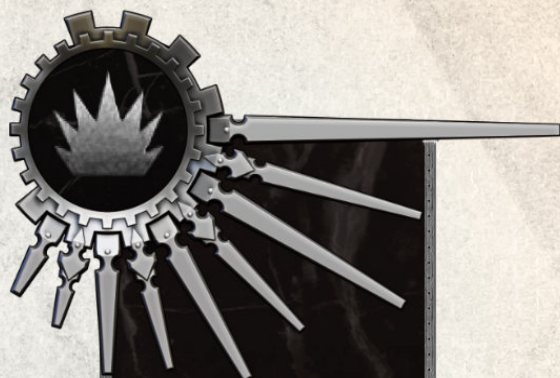

- Two Twin-Linked Heavy Stubbers
- Close Combat Weapon
- Void Armour
- Helical Targeting Array

Special Rules

- Tercio
- Immobile

Options:

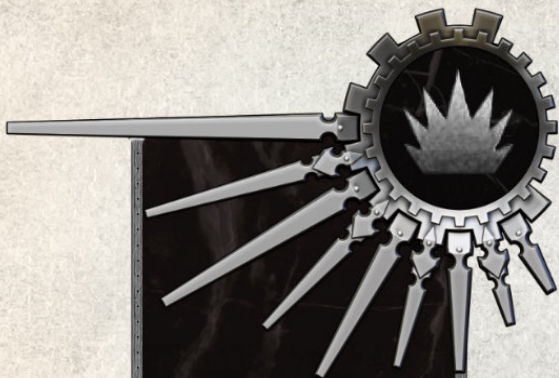

- A Solar Auxilia Sabre Battery may include:
 - Up to 5 additional Auxilia Sabre Platforms+25 points per model
- An Auxilia Sabre Platform may exchange its Two Twin-Linked Heavy Stubbers for one of the following options:
 - Sabre Searchlight Free
 - Gravis Bolt Cannon Free
 - Gravis Multi-Laser+5 points
 - Gravis Autocannon+5 points
 - Gravis Lascannon+15 points

HEAVY SUPPORT

A widespread method to field plentiful yet capable firepower, Static Weapon platforms were used by the diverse Cohorts of the Solar Auxilia as a mundane yet robust method of point-defence, security, and support. The most common pattern of such platforms was the Sabre Weapons Platform, its shared parts with the similarly-ubiquitous Tarantula making it appealing to the Auxilia. Easy to construct and use, static weapons platforms were a mainstay of the Imperial Armouries; for if not glorious, they nevertheless provided a flexible means to support previously unfulfilled battlefield roles and eliminate vulnerabilities in a force.

However, the nature of these platforms and their gunners left them vulnerable to close assault - even so, their crew would be commanded to hold their ground til their last breath, regardless of incoming opposition. This, combined with the immobility of these platforms, often led to the attachment to such a weapon being considered a martyr's assignment.

SOLAR AUXILIA MANTICORE MISSILE TANK BATTERY 200 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Auxilia Manticore Missile Tank	14	3	12	10	10	3	-

Unit Composition

- 1 Auxilia Manticore Missile Tank

Unit Type

- Vehicle (Reinforced)

HEAVY SUPPORT

The Manticore was originally constructed following the recovery of an ancient piece of artillery, dating back to the murky history of pre-unification Terra, which inspired a regimental engineer of the Solar Auxilia to petition their attached Mechanicum elements to build a weapon of similar capability and power. The end result was soon passed to the requesting regiment of the Solar Auxilia, and spread rapidly to others once news reached them of such a weapon.

These vehicles hosted four missiles of devastating power, mounted on the tried and tested Solar Auxilia Chimera chassis. Boasting a fully automated turret and sophisticated range-finding and tracking tools, these vehicles brought death to their enemies no matter the environment they found themselves in.

Although not as widely utilised as the more numerous Armoured Batteries in the Auxilia's arsenal due to their limited ammunition, Manticore Missile Tanks were usually held in specialist reserve companies and deployed when the destructive might they wielded was required.

Wargear

- Turret Mounted Manticore Missile Launcher (with 4 Manticore Missiles)
- Hull (Front) Mounted Multi-Laser
- Smoke Launchers

Special Rules

- None

Options:

- A Solar Auxilia Manticore Missile Tank Battery may include:
 - Up to 2 additional Auxilia Manticore Missile Tanks +200 points per model
- Any Auxilia Manticore Missile Tank may exchange any number of its Manticore Missiles for any of the following options, in any combination:
 - One Storm Eagle Missile Free
 - One Phosphor Incendiary Missile Free
 - One Solutus Chem Missile Free
- An Auxilia Manticore Missile Tank may exchange its Hull (Front) Mounted Multi-Laser for one of the following options:
 - Hull (Front) Mounted Heavy Bolter Free
 - Hull (Front) Mounted Heavy Flamer Free
- Any Auxilia Manticore Missile Tank may select any of the following options:
 - Searchlights +5 points
 - Dozer Blade +5 points
 - Helical Targeting Array +25 points
- Any Auxilia Manticore Missile Tank may select up to two of the following option:
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points

O-I SOLAR AUXILIA DEATHSTRIKE MISSILE PLATFORM 350 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Deathstrike Missile Platform	10	3	12	12	10	3	-

Unit Composition

- 1 Deathstrike Missile Platform

Unit Type

- Vehicle (Reinforced)

Wargear

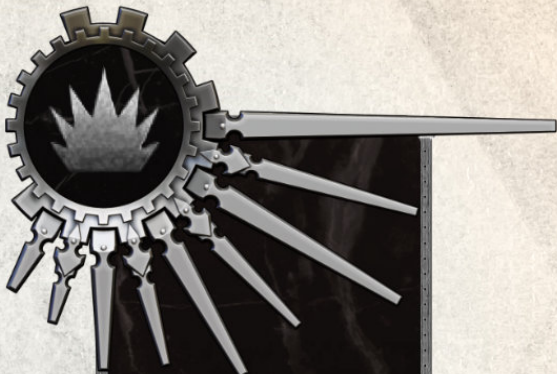

- Centreline Mounted Deathstrike Missile
- Hull (Front) Mounted Multi-Laser
- Smoke Launchers

Special Rules

- Countdown To Launch...
- Launch System Failure
- By His Sanction Alone
- Night Vision

Options:

- A Deathstrike Missile Platform must select one of the following options to equip to its Deathstrike Missile:
 - Plasma Warhead Free
 - Godsppear Warhead+50 points
 - Tactical Nuclear Warhead +75 points
 - Vortex Warhead +100 points
- A Deathstrike Missile Platform may select any of the following options:
 - Searchlights+5 points
 - Dozer Blade+5 points

HEAVY SUPPORT

Some weapons were not merely for the destruction of a particular enemy, or a force - they were as much about the destruction of the very idea of resisting the Emperor's will; of crushing all who dared to stand before any representation of His might. To this end, the Deathstrike Missile Platform would be sanctioned for deployment. Carrying immense missiles with engines that allowed them to cross battlefields as easily as continents, Deathstrike platforms took time to spool up - and so commanders would often have to spend time protecting such an asset as it came up to full readiness, before the missile committed its stately ascent into the skies above upon a cone of billowing fire.

Due to the relative rarity of such missiles, the warheads available to Solar Auxilia commanders often differed. Some Deathstrikes carried Tactical Nuclear warheads whose impacts not only devastated the ground, but blinded all who gazed upon their blooms. Some carried Godsppear warheads - titan-killers reviled by the Mechanicum and only constructed in secret by a handful of enclaves on Terra itself. The most common such warheads, however, were Plasma-cored, bursting apart with a blast of energy that looked for all the world like a miniature sun. However, rumours spoke of a final warhead type, benighted and doomed. This was the Vortex - and none among any of mankind's armies dared speak as to the cataclysm that necessitated their original construction...

ADDITIONAL WARGEAR OPTIONS FOR EXISTING HEAVY SUPPORT UNITS

In addition to the normal options presented in the rules for various units, the additional wargear presented below may be selected for units at the costs shown. These are intended to be used alongside various publications, including all of Games Workshop's official publications and releases.

SOLAR AUXILIA ARMoured COMMAND SECTION

Options:

- A Leman Russ Command Tank may exchange its Turret Mounted Battlecannon for one of the following options:

- Turret Mounted Gravis Heavy Lascannon	Free
- Turret Mounted Exterminator Autocannon	Free
- Turret Mounted Vanquisher Battlecannon and one Co-axial Autocannon	Free
- Turret Mounted Demolisher Cannon	Free
- Turret Mounted Executioner Plasma Cannon	Free
- Turret Mounted Volkite Macro-Saker	Free
- Turret Mounted Eradicator Nova Cannon	Free
- Turret Mounted Conflagration Projector	Free
- Turret Mounted Punisher Rotary Cannon	Free

SOLAR AUXILIA LEMAN RUSS STRIKE SQUADRON

Options:

- All models in a Leman Russ Strike Squadron may exchange their Turret Mounted Battle Cannon for one of the following options (all models in the unit must select the same option):

- Turret Mounted Eradicator Nova Cannon	Free
- Turret Mounted Conflagration Projector	+20 points

SOLAR AUXILIA LEMAN RUSS ASSAULT SQUADRON

Options:

- All models in a Leman Russ Assault Squadron may exchange their Turret Mounted Demolisher Cannon for one of the following options (all models in the unit must select the same option):

- Turret Mounted Punisher Rotary Cannon	+15 points
---	------------

SOLAR AUXILIA MALCADOR HEAVY TANK SQUADRON

Options:

- Any model in a Malcador Heavy Tank Squadron may exchange both its Side (Left) Mounted Heavy Bolter and Side (Right) Mounted Heavy Bolter for one of the following options:

- One Side (Left) Mounted Plasma Cannon and One Side (Right) Mounted Plasma Cannon	+15 points
- One Side (Left) Mounted Multi-Melta and One Side (Right) Mounted Multi-Melta	+20 points
- Any model in a Malcador Heavy Tank Squadron may take any of the following options:

- Siege Retrofit	+75 points
------------------------	------------

SOLAR AUXILIA VALDOR TANK DESTROYER SQUADRON

Options:

- A Solar Auxilia Valdor Tank Destroyer Squadron may include:

- Up to 1 additional Valdor Tank Destroyer	+235 points per model
--	-----------------------
- A Valdor Tank Destroyer may exchange their Centreline Mounted Neutron Beam Laser for one of the following options:

- Centreline Mounted Graviton Annihilator	+25 points
- Centreline Mounted Volkite Curtall	+35 points
- Centreline Mounted Conversion Destructor	+75 points

SOLAR AUXILIA MACHARIUS HEAVY TANK SQUADRON

Options:

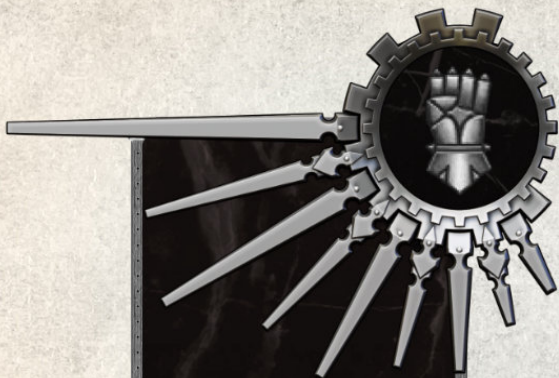

- Any Solar Auxilia Macharius Heavy Tank may exchange its Hull (Front) Mounted Twin-Linked Heavy Stubber for one of the following options:
 - Hull (Front) Mounted Twin-Linked Heavy Flamer Free
 - Hull (Front) Mounted Twin-Linked Heavy Bolter+5 points
 - Hull (Front) Mounted Twin-Linked Multi-Laser+5 points
 - Hull (Front) Mounted Twin-Linked Autocannon..... +10 points
 - Hull (Front) Mounted Twin-Linked Plasma Cannon..... +15 points
 - Hull (Front) Mounted Twin-Linked Lascannon..... +20 points
 - Hull (Front) Mounted Gravis Melta Cannon+25 points
- Any Solar Auxilia Macharius Heavy Tank may exchange both of its Sponson Mounted Heavy Stubbers for one of the following options:
 - Two Sponson Mounted Heavy Flamers..... Free
 - Two Sponson Mounted Heavy Bolters+5 points
 - Two Sponson Mounted Multi-Lasers+5 points
 - Two Sponson Mounted Autocannons +10 points
 - Two Sponson Mounted Plasma Cannons +15 points
 - Two Sponson Mounted Multi-Meltas..... +20 points
 - Two Sponson Mounted Lascannons.....+25 points
- Any Solar Auxilia Macharius Heavy Tank may select any of the following options:
 - Dozer Blade+5 points
 - Flare Shield*+25 points

**If this option is selected, all models in the unit must select the same upgrade.*

**SOLAR AUXILIA:
Lords of War**

DIVISIO AERONAUTICA MARAUDER BOMBER.....400 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Auxilia Marauder Bomber	18	3	12	11	10	5	-

Unit Composition

- 1 Auxilia Marauder Bomber

Unit Type

- Vehicle (Flyer, Lumbering)

LORDS OF WAR

To complement the air support provided by the fighter craft of the Divisio Aeronautica, varying patterns of devastating, long-endurance aircraft were utilised. These flying fortresses could carry immense amounts of ordnance, integrated with sophisticated sensors and fire-control systems to enable successful bombing runs to saturate target areas. Their airframes carried tonnes of fuel to allow operational freedom when traversing active combat airspace.

Wargear

- Centreline (Front) Mounted Twin-Linked Autocannon
- Centreline (Rear) Mounted Twin-Linked Heavy Bolter
- Turret Mounted Twin-Linked Heavy Bolter
- Hull (Front) Mounted Macro-Bomb Cluster

Special Rules

- Deep Strike

Options:

- The Auxilia Marauder Bomber may select the following option:
 - Ramjet Diffraction Grid+30 points

DIVISIO AERONAUTICA MARAUDER DESTROYER.....400 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Auxilia Marauder Destroyer	18	3	12	11	10	5	-

Unit Composition

- 1 Auxilia Marauder Destroyer

Unit Type

- Vehicle (Flyer, Lumbering)

Wargear

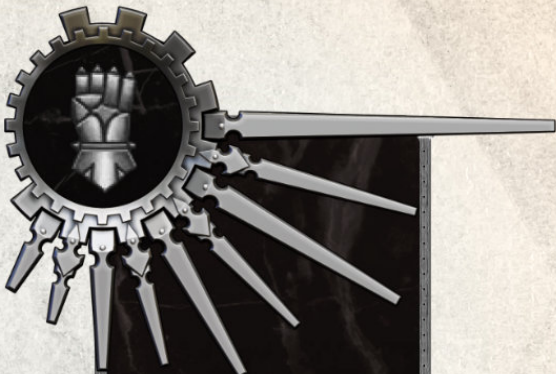

- Centreline (Front) Mounted Gravis Autocannon Battery
- Centreline (Rear) Mounted Kheres Assault Cannon
- Turret Mounted Twin-Linked Heavy Bolter
- Eight Hull (Front) Mounted Hellstrike Missiles
- Four Hull (Front) Mounted Fragmentation Bombs

Special Rules

- Deep Strike

Options:

- The Auxilia Marauder Destroyer may exchange its eight Front (Hull) Mounted Hellstrike Missiles for the following option:
 - Eight Hull (Front) Mounted Skystrike Missiles+30 points
- The Auxilia Marauder Destroyer may select the following option:
 - Ramjet Diffraction Grid+30 points

LORDS OF WAR

Alongside the giant bombing patterns amongst the Divisio Aeronautica, configurations of those aircraft were outfitted for close air support and ground attack. Outfitted with an incredible array of bomb payloads, missile racks, and weapon mounts, these aircraft were capable of both barraging target-rich environments and protecting themselves with its air-to-air weapon platforms simultaneously.

ADDITIONAL WARGEAR OPTIONS FOR EXISTING LORDS OF WAR UNITS

In addition to the normal options presented in the rules for various units, the additional wargear presented below may be selected for units at the costs shown. These are intended to be used alongside various publications, including all of Games Workshop's official publications and releases.

SOLAR AUXILIA CRASSUS ARMoured ASSAULT TRANSPORT

Options:

- A Crassus Assault Transport may exchange both of its Sponson Mounted Heavy Bolters for one of the following options:
 - Two Sponson Mounted Heavy Flamers..... Free
 - Two Sponson Mounted Autocannons +10 points
 - Two Sponson Mounted Lascannons..... +20 pointoints

LIBER IMPERATUS:
Imperialis Militia

ARMIES OF DARK COMPLIANCE

In the years leading up to the Horus Heresy, hundreds of worlds had been secretly preparing for the onset of civil war and immediately declared for the Warmaster. Despite the efforts of Horus' agents, there were still hundreds more planets whose allegiance remained uncertain or steadfast in their loyalty to the Emperor. Taken as a whole these worlds and systems comprised a considerable proportion of the Imperium's military and material power, meaning their capitulation was crucial to the longevity of the Traitor war machine on the Long March towards Terra. The campaigns to control these worlds became known as Dark Compliances – a malevolent parody of the Great Crusade's mission of liberation and enlightenment.

Even at the height of their strength, there had only been so many Legiones Astartes in the galaxy. Inevitably, the bulk of their number were deployed to the most crucial and fiercely contested theatres of the war. As such, the occupation of worlds which had capitulated to Dark Compliance largely fell to armies of mortal soldiers who served under the direct command of Traitor Legiones Astartes. Rarely did these officers place any value on life – save perhaps that of their Astartes – and no cost was too high if it furthered the Warmaster's goals. It was a glimpse of Horus' ultimate vision for the Imperium, where mortals existed as little more than fodder to be expended at the uncaring whims of their transhuman overlords.

As the Horus Heresy ground on, it was the Shattered Legions, Blackshields and other ad-hoc forces who most often clashed with the armies of Dark Compliance that typically served as garrisons for important targets within Traitor-held systems. Further armies were, in turn, raised for the purpose of pursuing these evasive guerrillas when greater numbers of Traitor Astartes could not be committed. Whether presenting ostensibly easy targets to lure in vengeful Loyalists or pinning them down through sheer weight of numbers – quantity, as ever, proved to be its own kind of quality.

Armies of Dark Compliance are not selected in the usual fashion; instead of choosing models from a single Army List as is normally permitted, they are constructed from units from several sources, and have their own Effects and Limitations that must be abided by. Armies constructed in this fashion must be a Primary Detachment, using the Crusade Force Organisation Chart - a Primary Detachment selected in this fashion is then referred to as an Army of Dark Compliance Detachment.

Effects

- An Army of Dark Compliance Detachment is chosen using units drawn from both the Legiones Astartes Army List and the Imperialis Militia Army List.
- All units selected in a Detachment as part of an Army of Dark Compliance are treated as being of the same Faction for the purposes of all Core and Special Rules, including but not limited to Wargear, Transports, Special Rules, and so on.
- An Army of Dark Compliance Detachment may not select any Legiones Astartes Rites of War, though an Imperialis Militia Force Commander may select Provenances of War as normal.
- Any unit with the Militia Unit Sub-Type but without the Independent Character Special Rule may be given the Expendable Special Rule. Any unit with the Expendable Special Rule loses the Line Unit Sub-Type if they had it.
- All models with the Legiones Astartes (X) Special Rule gain The Warmaster's Due Special Rule.

The Warmaster's Due

The Traitor Astartes who led Dark Compliances cared little for the mortal soldiery under their command, callously expending their lives in pursuit of the Warmaster's goals.

If a model with this Special Rule would receive a Cover Save due to Intervening Models and the intervening unit has any models with the Militia Unit Sub-Type as part of the same Detachment, they may elect to receive a +1 bonus to their Cover Save, to a maximum of 4+. After all Saves and Damage Mitigation Rolls are taken, if the bonus is claimed, then the Intervening unit immediately suffers D3+1 Wounds with no Saves of any kind or Damage Mitigation Rolls allowed. These Wounds must be assigned to models with the Militia Unit Sub-Type first. Wounds inflicted this way are distributed as if the enemy unit which the Cover Save had been claimed against had made a Shooting Attack against the Militia unit. When determining the unit with the Militia Unit Sub-Type which will take these wounds, it should be the closest applicable unit to the firing unit which has the Shooting Attack pass through it.

The bonus to Cover Saves provided by this Special Rule cannot be claimed against any weapon that does not roll To-Hit.

A model with this Special Rule may not join a unit containing any models with the Expendable Special Rule. In addition, models with the Expendable Special Rule may not join a unit containing any models with this Special Rule.

Limitations

- An Army of Dark Compliance Detachment may only be selected in a Primary Detachment in an army using the Crusade Force Organisation Chart.
- All units selected as part of an Army of Dark Compliance Detachment must have the same variant of the Legiones Astartes (X) Special Rule, and the army cannot include an Allied Detachment from that same Faction. An Army of Dark Compliance otherwise counts as the Imperialis Militia Sub-Faction of the Imperial Army Faction for the purposes of the Allies Matrix.
- An Army of Dark Compliance must have the Traitor Allegiance.
- An Army of Dark Compliance Detachment may not select a Primarch.
- A model with the Legiones Astartes (X) Special Rule must be selected as the army's Warlord.
- An Army of Dark Compliance Detachment may never have more units with the Legiones Astartes (X) Special Rule than units with the Militia or Third-Line Unit Sub-Types.
- Models with the Legiones Hereticus (X) Special Rule cannot be selected in an Army of Dark Compliance Detachment.

ADDITIONAL PROVENANCES OF WAR

The following list comprises additional Provenances of War that may be used by any Detachment that includes at least one model with the Muster of Worlds Special Rule.

PROVENANCE OF WAR: ACOLYTES OF THE SAVIOUR EMPEROR

As reality itself was torn asunder and the lie of Imperial Truth was laid bare, many desperate souls clung to the belief that the Emperor was their divine saviour. Preachers rallied newfound converts as soldiers prayed in their trenches and many would pay the martyr's price before the end.

- This Provenance of War may only be selected by an army with the Loyalist Allegiance.
- All eligible units and models in a Detachment with this Provenance of War are immune to the effects of the Fear Special Rule, and gain the Crusader and Hatred (Corrupted, Daemon) Special Rules.
- All Compulsory Troops Choices selected in a Detachment using this Provenance of War must have a Demagogue or Mounted Demagogue assigned to them before the game begins. If multiple units are selected as part of the Strength in Numbers Special Rule, each separate unit must have its own Demagogue or Mounted Demagogue assigned before the game begins.
- Imperialis Militia Discipline Master Cadres may not be chosen in a Detachment using this Provenance of War.
- Detachments with this Provenance of War are classed as having an Alliance level of one level lower than normal by Detachments with any variant of the Legiones Astartes Faction.
- This Provenance of War may not be chosen in conjunction with the Mark of the Aeldari Provenance of War.

PROVENANCE OF WAR: KNIGHT WORLD

Though the Knight suits found on some worlds were the primary fighting forces sequestered by the Great Crusade, they were often accompanied by their own Household guards and troops. These troops were often well trained and conditioned by the feudal society of their world to obey all commands from their steel-clad masters.

- If this Provenance of War is selected for the Primary Detachment of an Army, that army must include at least one unit with the Knight Sub-type, either as part of a Questoris Household Detachment, Questoris Crusader Host Detachment, or a Lord of War Detachment. If this model is taken in a Lord of War Detachment, it may select a Household Rank as if it were part of a Questoris Household or Questoris Crusader Host Detachment.
- All models with the Milita Sub-type in a Detachment with this Provenance of War gain a bonus of +1 to their to-Hit rolls when making a Shooting Attack in the Controlling Player's Shooting Phase when they target an enemy unit that has been shot at earlier in the same Shooting phase by a model with the Knight Sub-type.
- Detachments with this Provenance may take a single Armiger Helverin Talon or Armiger Warglaive Talon as a Heavy Support choice, however, if selected in this manner, that unit loses the Armiger Talon Special Rule.
- Detachments with the Knight World Provenance of War treat units with the Armiger Unit Type or Knight Sub-type as though they were Sworn Brothers on the Allies Matrix, and vice versa.
- For the purposes of unlocking Lords of War options when using an Aegis Militant Force Organisation Chart, a Detachment using this Provenance of War allows a single model with the Knight Unit Sub-type to be selected as a Lord of War choice, as though this Detachment had the Mechanicum Faction.
- This Provenance of War may not be chosen in conjunction with the Kinfolk Helots, Abhuman Muster, Ogryn Conscripts, or Ratling Enclave Provenances of War.

PROVENANCE OF WAR: MARK OF THE AELDARI

Through manipulation, desperate circumstances, or outright enslavement, several human populations believed that the Aeldari were their allies – or at the very least, a source of esoteric curios. It was the mission of the Great Crusade to liberate or destroy those in thrall to any division of the Aeldari, but in the chaos of the Horus Heresy some alliances were rekindled - and new ones forged.

- Imperialis Militia Infantry Squads, Imperialis Militia Grenadier Squads, and Imperialis Militia Command Cadres in a Detachment with this Provenance of War may exchange their Lasguns for Lasblasters for free.
- Imperialis Militia Grenadier Squads and Imperialis Militia Command Cadres in a Detachment with this Provenance of War may exchange their Lasguns for Shuriken Catapults at a cost of +20 points per unit.
- Imperialis Militia Grenadier Squads and Imperialis Militia Command Cadres in a Detachment with this Provenance of War may exchange their Laspistols for Shuriken Pistols at a cost of +10 points per unit.
- A Force Commander in a Detachment with this Provenance of War may exchange a Laspistol for a Shuriken Pistol for free, or a Fusion Pistol for +10 points.
- Any model in a Detachment using this Provenance of War which is equipped with or has purchased Frag Grenades may exchange them for Plasma Grenades at no additional points cost.
- Detachments with this Provenance of War are classed as Sworn Brothers with Aeldari Detachments of any Sub-faction. If this Provenance of War is selected for an Allied Detachment, then the Imperialis Militia Detachment is counted as having the Xenos Allegiance even though they are not normally permitted to select it, and may be selected as part of an army with a Primary Detachment composed of any Aeldari Sub-Faction.
- Detachments with this Provenance of War are classed as having an Alliance level of By The Emperor's/Warmaster's Command by Detachments with any variant of the Legiones Astartes, Imperial Army, Agents of the Emperor, or Agents of the Warmaster Factions or Sub-factions, with the sole exception of the Trader-Militant Sub-Faction, which is classed as having an Alliance level of Sworn Brothers.
- This Provenance of War may not be chosen in conjunction with the Debased Rabble, Tainted Flesh, or Acolytes of the Saviour Emperor Provenances of War.

PROVENANCE OF WAR: MINING COLONY

Many militia regiments were raised from mining colonies, either worlds with valuable resources or systems with vast asteroid fields. Filled with rugged types, many of the former miners repurposed their tools into weapons of war, being more familiar with the devices.

- All eligible units and models in a Detachment using this Provenance of War do not suffer the usual -1 penalty to their Ballistic Skill or Leadership Characteristics inflicted by Night Fighting.
- Imperialis Militia Grenadier Squads in a Detachment with this Provenance of War may take a Militia Hades Breaching Drill or a Goliath Heavy Vehicle (which must have been upgraded to have an Auxiliary Crew Bay) as a Dedicated Transport.
- Imperialis Militia Command Cadres in a Detachment with this Provenance of War may take a Militia Hades Breaching Drill or a Goliath Heavy Vehicle as a Dedicated Transport.
- Any unit composed entirely of models with the Infantry Unit Type, and which do not also have the Monstrous or Mechanised Sub-type in a Detachment using this Provenance of War may select up to two of the following options, in any combination (the same option may be selected more than once):
 - Heavy Rock Saw for +5 points per weapon.
 - Heavy Rock Drill for +10 points per weapon.
 - Heavy Rock Cutter for +15 points per weapon.
- Any unit composed entirely of models with the Infantry Unit Type in a Detachment using this Provenance of War may exchange a Heavy Stubber with one of the following options:
 - Seismic Cannon for +10 points per weapon.
 - Mining Laser for +15 points per weapon.
- Any unit composed entirely of models with the Infantry Unit Type (including models with the Mechanised Sub-type) in a Detachment using this Provenance of War may exchange a Lascannon with one of the following options:
 - Heavy Seismic Cannon for no additional points cost.
 - Heavy Mining Laser for no additional points cost.

PROVENANCE OF WAR: RATLING ENCLAVE

Several worlds were home to large populations of Ratling Abhumans who, despite their poor reputation as warriors, nonetheless found themselves pressed into service on the frontlines, where many unassuming Ratlings garnered a reputation as excellent marksmen.

- All models in a Detachment with this Provenance of War with either the Infantry or Cavalry Unit Types receive an increase of +1 to their Ballistic Skill and Initiative Characteristics, but also lower their Movement, Weapon Skill, Strength, and Toughness Characteristics by -1 (to a minimum of 1). Models with a Movement of 0 or - are not affected and remain Movement 0 or -. Imperialis Militia Ratling Squads do not have their Characteristics modified by this Provenance of War.
- A Detachment with this Provenance of War may select Imperialis Militia Ratling Squads as Troops choices.
- Imperialis Militia Force Commanders in a Detachment with this Provenance of War may take a Longlas or Sniper Rifle for +10 points.
- Detachments with this Provenance of War are classed as Distrusted Allies by all Detachments with any variant of the Legiones Astartes Faction, or the Solar Auxilia Sub-faction.
- This Provenance may not be chosen in conjunction with the Kinfolk Helots, Ogryn Conscripts, or Knight World Provenances of War.

PROVENANCE OF WAR: TRAILBLAZERS

A number of the Imperium's worlds were over-abundant in vegetation, or held sparse populations who were required to fight conservatively. Militias raised from these planets were often formed around a core of light infantry; sharpshooters and rangers who were trained to outmanoeuvre superior forces.

- Imperialis Militia Reconnaissance Squads in a Detachment with this Provenance of War lose the Support Squad Special Rule, and gain the Line Sub-Type.
- Imperialis Militia Reconnaissance Squads in a Detachment with this Provenance of War increase their Ballistic Skill Characteristic by +1 (to a maximum of 4).
- Any number of models in Imperialis Militia Command Cadres and Imperialis Militia Grenadier Squads in a Detachment with this Provenance of War may exchange their Lasgun for a Longlas or Sniper Rifle for +10 points per model.
- This Provenance may not be chosen in conjunction with the Debased Rabble or Voidborne Raiders Provenances of War.

PROVENANCE OF WAR: VOIDBORNE RAIDERS

Some militias, either by virtue of having inherited a system-wide reach from their glory days or else driven by the grim necessity of interstellar piracy, became experts in boarding operations and close quarters combat. In such deadly confines, the ability to survive sudden ambushes and deadly melees was far more valuable than swift mobility.

- All models with the Infantry Unit Type in a Detachment with this Provenance of War gain the Heavy Sub-type, and lose the Light Sub-type if they had it.
- Imperialis Militia Force Commanders included in a Detachment with this Provenance of War which have not been upgraded to a Mounted Force Commander may select a Boarding Shield at no additional points cost.
- Any model with the Infantry Unit Type and the Character Sub-type in a Detachment using this Provenance of War may select a Boarding Shield for +5 points.
- All models with the Infantry Unit Type in an Imperialis Militia Command Cadre or Imperialis Militia Grenadier Squad in a Detachment using this Provenance of War may select Boarding Shields for +25 points.
- All models in an Imperialis Militia Infantry Squad in a Detachment using this Provenance of War may take Combat Shields for +20 points.

MODIFICATIONS TO EXISTING PROVENANCES OF WAR

The following list comprises additions to the existing Provenances of War that can be found in the **Legacies of the Age of Darkness: Imperialis Militia** Rules Document. These changes are to be considered in addition to the rules presented in those publications.

PROVENANCE OF WAR: ARMOURY OF OLD NIGHT

Effects

- Imperialis Militia Carnodon Squadrons in a Detachment with this Provenance of War may exchange their Turret Mounted Gravis Multi-Laser for a Turret Mounted Volkite Culverin for free.
- Imperialis Militia Carnodon Squadrons in a Detachment with this Provenance of War may exchange their Two Sponson Mounted Heavy Flamers for Two Sponson Mounted Volkite Calivers for free.
- Imperialis Militia Hellhound Flame Tank Squadrons in a Detachment with this Provenance of War may exchange their Turret Mounted Gravis Heavy Flamer for a Turret Mounted Chem Cannon for +10 points each.
- Option – Relic Arms: Eligible models in Imperialis Militia Mounted Command Cadres may upgrade Lasguns to either Volkite Chargers or Assault Needlers; may upgrade Laspistols to either Volkite Serpenta or Needle Pistols; may upgrade Sniper Rifles to Needle Vultus; and Heavy Stubbers to Volkite Culverin or Needle Cannon at a cost of +30 points per unit, regardless of the number of models or types of weapons upgraded in a given unit.

PROVENANCE OF WAR: CYBER-AUGMETICS

Effects

- Engineer Adepts in units of Engineer Auxilia Detachments in a Detachment with this Provenance of War gain the Line Unit Sub-Type and the Battle-Automata Special Rule.

PROVENANCE OF WAR: DEBASED RABBLE

Effects

- An Imperialis Militia Force Commander in a Detachment with this Provenance of War may exchange a Power Weapon for a Tainted Blade, Tainted Axe, or Tainted Maul for +5 points each.

PROVENANCE OF WAR: KINFOLK HELOTS

Effects

- A model in a Detachment with this Provenance of War and both the Infantry Unit Type and Character Sub-Type may be upgraded with a Power Pack at no additional points cost. A model with a Power Pack may select up to two weapons from the list below at the cost specified, but no model may select the same option more than once:
 - Circular Stone Saw for +5 points.
 - Stone Burner for +10 points.
 - Gem Extractor for +10 points.
 - Kinfolk Arc Welder for +15 points.

PROVENANCE OF WAR: LEGACY OF THE GREAT CRUSADE

Effects

- Imperialis Militia Mounted Command Cadres in a Detachment with this Provenance of War increase their Ballistic Skill by +1 (to a maximum of 4).

PROVENANCE OF WAR: OGRYN CONSCRIPTS

Effects

- Imperialis Militia Ogryn Beastmasters may be selected as Fast Attack choices in a Detachment with this Provenance of War.
- Imperialis Militia Ogryn Brute Squads in a Detachment with this Provenance of War gain the “It’s Dark In Dere!” Special Rule.
- Imperialis Militia Ogryn Brute Squads of no more than 3 models in a Detachment with this Provenance of War may take an Imperialis Militia Chimera Transport or a Vehicle upgraded with an Auxiliary Crew Bay as a Dedicated Transport.
- All Discipline Masters, Militia Medicae, Force Commanders, Rogue Psykers, Ascendant Rogue Psykers, Astropaths, and Demagogues selected as part of a Detachment with this Provenance of War may join Imperialis Militia Ogryn Brute Squads and Imperialis Militia Ogryn Beastmasters, ignoring the usual restrictions for joining a unit with the Monstrous Unit Sub-type.

PROVENANCE OF WAR: SURVIVORS OF THE DARK AGE

Effects

- Any model with the Vehicle Unit Type in a Detachment with this Provenance of War may exchange a Pintle Mounted Heavy Stubber for a Pintle Mounted Twin-Linked Bolter at no additional points cost.

PROVENANCE OF WAR: TAINTED FLESH

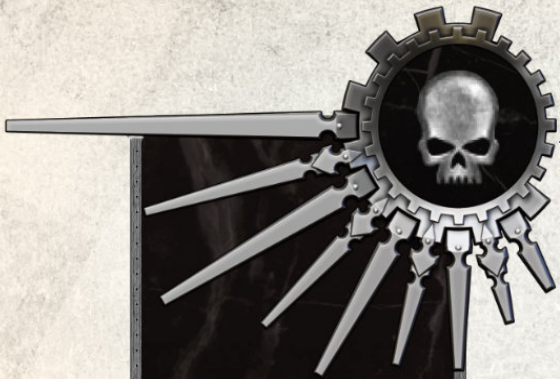

Effects

- An Imperialis Militia Force Commander in a Detachment with this Provenance of War may exchange a Power Weapon for a Tainted Blade, Tainted Axe, or Tainted Maul for +5 points each.
- Imperialis Militia Ascendant Rogue Psykers may be selected as HQ choices in a Detachment with this Provenance of War, in addition to Imperialis Militia Force Commanders and Imperialis Militia Rogue Psykers.
- The 0-1 limit on Mutated Spawn units is removed in a Detachment using this Provenance of War.
- Units with the Corrupted Sub-type, as well as units with the Among the Flock, Militia Medicae Support, or Legiones Astartes (X) Special Rules, in a Detachment with this Provenance of War, are not counted toward the number of Infantry Units for the purposes of determining how many units of Imperialis Militia Levy Squads must be included in the Detachment.

**IMPERIALIS MILITIA:
HQ**

IMPERIALIS MILITIA ASTROPATH.....55 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Astropath	6	2	2	3	3	2	3	1	7	-

Unit Composition

- 1 Astropath

Unit Type

- Infantry (Militia, Psyker, Character)

HQ

Astropaths were psykers trained to send and receive messages across the void of space, serving the vital function of maintaining communication between the Imperium's worlds. The overwhelming majority of psykers within the Imperium – whether civilian or military – were Astropaths and without them the inter-planetary empire would have surely collapsed soon after its inception.

All Astropaths underwent a ritual known as 'soul binding' which moulded their psychic potential towards their defined role, while also strengthening their defences against the inherent dangers of their powers. As a consequence of this ritual, however, all Astropaths were blinded - and many suffered additional damage to their other senses.

Due to the critical role they performed and rarity of their kind, it was unusual for Astropaths serving as part of the Excerptus Imperialis to ever set foot on the field of battle. Nonetheless, desperation would sometimes see Militia commanders directly assign Astropaths to their staff to assist with communications, or in hopes of utilising their powers in an unorthodox capacity.

Wargear

- Las pistol or Autopistol
- Force Staff

Special Rules

- Adamantium Will (4+)
- Astra Telepathica
- Astropathic Communication
- Independent Character
- Support Squad

Options:

- The Astropath may select the following option:
 - Refractor Field +5 points

O-I IMPERIALIS MILITIA ASCENDANT ROGUE PSYKER.....80 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Ascendant Rogue Psyker	6	3	3	3	4	3	4	2	8	-
Militia Warden	6	3	3	3	3	1	3	2	7	5+

Unit Composition

- 1 Ascendant Rogue Psyker

Unit Type

- Ascendant Rogue Psyker:
Infantry (Militia, Psyker, Character)
- Militia Warden: Infantry (Militia)

Wargear

- Laspistol or Autopistol
- Close Combat Weapon

Special Rules

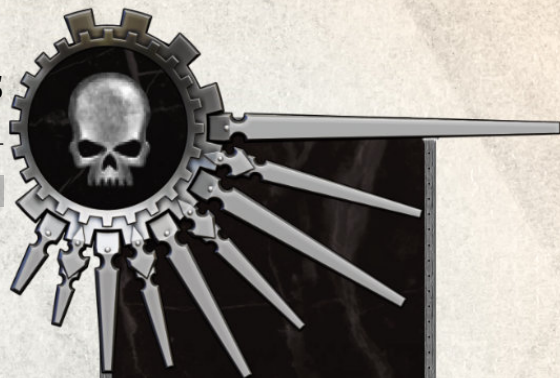

- Alpha Psyker
(Ascendant Rogue Psyker only)
- Fear (1) (Ascendant Rogue Psyker only)
- Independent Character
(Ascendant Rogue Psyker only)
- Psychic Mastery (2)
(Ascendant Rogue Psyker only)
- Unrestrained Power
(Ascendant Rogue Psyker only)
- Traitor

Dedicated Transport:

- A unit which contains at least one Militia Warden and no more than six models may take a Vehicle upgraded with a Command Crew Bay as a Dedicated Transport. A unit which contains at least one Militia Warden may take an Imperialis Militia Aurox Transport, Imperialis Militia Chimera Transport or any Vehicle upgraded with an Auxiliary Crew Bay as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points must still be paid for as part of the army.

Options:

- An Imperialis Militia Ascendant Rogue Psyker unit may include:
 - Up to 9 Militia Wardens +5 points per model
- Any Militia Warden may exchange their Laspistol and/or Close Combat Weapon for one of the following options:
 - Lascarbine Free
 - Shotgun Free
 - Stubcarbine Free
 - Blast Pistol +2 points
 - Chainsword +2 points
- The Ascendant Rogue Psyker may exchange their Laspistol for one of the following options:
 - Bolt Pistol +2 points
 - Blast Pistol +5 points
 - Needle Pistol +5 points
 - Hand Flamer +10 points
 - Plasma Pistol +10 points
- The Ascendant Rogue Psyker may exchange their Close Combat Weapon for the following option:
 - Force Weapon +10 points
- The Ascendant Rogue Psyker may select any of the following options:
 - Refractor Field +5 points
 - Cyber-Familiar +10 points

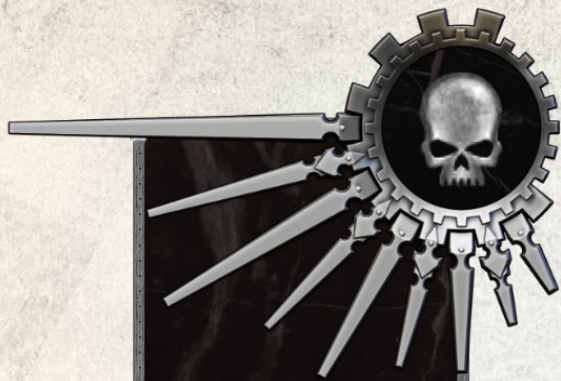

HQ

Individuals classified as Ascendant Psykers were exceeding rare, even compared to the already meagre number of psionic humans. The ability of Imperial authorities to control these powerful psykers beyond the most direct and drastic methods proved limited and few were ever taken by the Black Ships. Mental instability was common, though those who survived into adulthood were capable of defending themselves. Many of their ilk presented as naturally tougher and faster than baseline humans, perhaps as a quirk of unseen mutation or a constant if unwitting projection of their powers.

During the Great Crusade, numerous wars had been waged against those Ascendant Psykers who ruled entire civilisations as Sorcerer-Monarchs. In the years before the Horus Heresy, several forces that would declare for the Warmaster took steps to protect psykers from the Imperial Tithe – in anticipation of utilising their powers at the onset of civil war.

Despite wielding considerable power, the consequences of losing control for such individuals were catastrophic, the baleful destruction they wrought on others reflected back against them. Whether out of desperation or ignorance, many psykers nonetheless pushed their abilities well beyond all reasonable limits, knowing that anything less than complete destruction of the Loyalist cause would, one way or another, lead to their own annihilation.

IMPERIALIS MILITIA MOUNTED COMMAND CADRE..... 65 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Mounted Militia Bodyguard	14	3	3	3	3	2	3	1	6	5+
Mounted Militia Lieutenant	14	4	4	3	3	3	3	2	7	5+

Unit Composition

- 4 Mounted Militia Bodyguards
- 1 Mounted Militia Lieutenant

Unit Type

- Mounted Militia Bodyguard: Cavalry (Light, Militia, Skirmish)
- Mounted Militia Lieutenant: Cavalry (Character, Light, Skirmish, Militia)

Special Rules

- Support Squad
- Household Retinue
- Relentless
- Scout
- Hammer of Wrath (1)

HQ

The command staff of many a Militia commander would find themselves required to take to the field not on foot, but instead upon the backs of beasts of burden or motorised single transport instead. This change of pacing allowed for commander and staff both to keep pace with the very front lines of their force's advance, providing direction at the leading edge of the line.

Wargear

- Close Combat Weapon
- Laspistol or Autopistol
- Lasgun or Autorifle
- Frag Grenades
- Krak Grenades
- Flak Armour
- Militia Cavalry Mount

Options:

- An Imperialis Militia Mounted Command Cadre may include:
 - Up to 10 additional Mounted Militia Bodyguards +12 points per model
- For every five models in the unit beyond its original starting size, one Mounted Militia Bodyguard may be upgraded to a:
 - Mounted Militia Lieutenant +10 points
- Any Mounted Militia Lieutenant may exchange their Laspistol and/or Close Combat Weapon for one of the following options:
 - Chainsword +5 points
 - Bolt Pistol +5 points
 - Blast Pistol +5 points
 - Power Weapon +10 points
 - Plasma Pistol +15 points
 - Power Fist +15 points
- One Mounted Militia Bodyguard may select:
 - Nuncio-Vox +10 points
- One Mounted Militia Bodyguard may select:
 - Militia Standard +10 points
- Any model may replace their Lasgun with one of the following options:
 - Shotgun Free
 - Stubcarbine Free
 - Lascarbine Free
 - Bolter +2 points
 - Militia Lance +5 points
- Any model with a Lasgun, Autorifle, or Bolter may select the following option:
 - Bayonet +1 point
- For every five models in the unit, one Mounted Militia Bodyguard in the squad may exchange their Lasgun for one of the following:
 - Flamer +5 points
 - Heavy Stubber +10 points
 - Grenade Launcher +10 points
 - Longlas or Sniper Rifle +10 points
 - Plasma Gun +10 points
 - Melta Lance +10 points
 - Meltagun +15 points
- The entire unit may exchange its Flak Armour for the following option:
 - Carapace Armour +20 points

ADDITIONAL WARGEAR OPTIONS FOR EXISTING HQ UNITS

In addition to the normal options presented in the rules for various units, the additional wargear presented below may be selected for units at the costs shown. These are intended to be used alongside various publications, including all of Games Workshop's official publications and releases.

IMPERIALIS MILITIA COMMAND CADRE

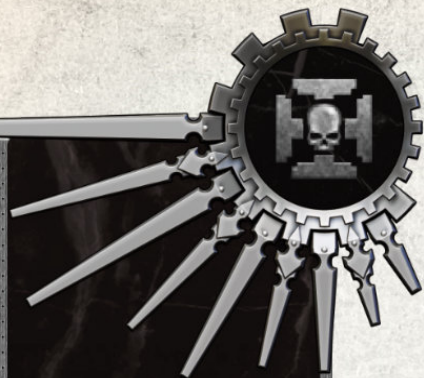

Options:

- For every five models in the unit beyond its original starting size, one Militia Bodyguard may be upgraded to a:
 - Militia Lieutenant +10 points

IMPERIALIS MILITIA:
Elites

IMPERIALIS MILITIA DEMAGOGUE CADRE.....20 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Demagogue	6	3	3	3	3	2	3	2	8	5+
Mounted Demagogue	14	3	3	3	3	2	3	2	8	5+

Unit Composition

- 1 Demagogue

Unit Type

- Demagogue: Infantry (Militia, Character)
- Mounted Demagogue: Cavalry (Militia, Light, Skirmish, Character)

ELITES

While one of the missions of the Great Crusade had been to spread the atheist philosophy of Imperial Truth, this seemingly-rational doctrine would not endure beyond it. Agents of the Warmaster spent the years leading up to the Horus Heresy replanting seeds of faith among many of the armies and planetary populations that would later declare for the Traitors. With the outbreak of civil war, numerous cults – usually led by firebrand preachers – revealed their loyalties and proudly declared their subservience to both the Warmaster and the Primordial Annihilator.

As the Horus Heresy progressed and Daemonic entities tore down the veil of reality, many could not deny the waking nightmare they were trapped in – their belief in Imperial Truth shattered by the existence of otherworldly powers the Imperium had declared false. Driven mad by this revelation, billions of souls gave themselves over to what they now believed were the true gods of the universe.

The belief that the Emperor of Mankind was Himself a god was not new, however. Many cults arose or returned to prominence with declarations that the Emperor was a divine saviour who would banish all evil from beyond the veil. Where planetary commanders might have once denounced those who worshipped Him, desperation forced tolerance of Demagogues who could inspire their forces to stand firm in the face of an increasingly monstrous enemy.

Wargear

- Laspistol or Autopistol
- Close Combat Weapon
- Flak Armour
- Militia Cavalry Mount (Mounted Demagogue only)

Special Rules

- Among The Flock
- Hatred (Everything!)
- Inspiring Rhetoric
- Relentless (Mounted Demagogue only)
- Scout (Mounted Demagogue only)
- Hammer of Wrath (1) (Mounted Demagogue only)

Options:

- An Imperialis Militia Demagogue Cadre may include:
 - Up to 11 additional Demagogues..... +20 points per model
- Any Demagogue or Mounted Demagogue may exchange their Laspistol or Autopistol for one of the following options:
 - Bolt Pistol +2 points
 - Blast Pistol +5 points
 - Needle Pistol +5 points
 - Hand Flamer +10 points
- Any Demagogue or Mounted Demagogue may exchange their Close Combat Weapon for one of the following options:
 - Chainsword +5 points
 - Heavy Chainsword +10 points
 - Power Weapon +10 points
- Any Demagogue or Mounted Demagogue with the Traitor Allegiance may exchange their Close Combat Weapon for one of the following options:
 - Tainted Blade +15 points
 - Tainted Axe +15 points
 - Tainted Maul +15 points
- Any Demagogue may be upgraded to a:
 - Mounted Demagogue* +20 points
- A Mounted Demagogue may exchange a Close Combat Weapon for the following option:
 - Militia Lance +5 points

*A Demagogue upgraded to a Mounted Demagogue must be assigned to either an Imperialis Militia Cavalry Squad, Imperialis Militia Wolf Rapid Response Section, or Imperialis Militia Mounted Command Cadre – this ignores the usual restrictions on assigning models via the Among the Flock Special Rule to units based on Unit Type.

IMPERIALIS MILITIA
RATLING SQUAD40 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Ratling	5	2	4	2	2	1	4	1	5	5+

Unit Composition

- 3 Ratlings

Unit Type

- Infantry (Militia, Skirmish, Light)

Wargear

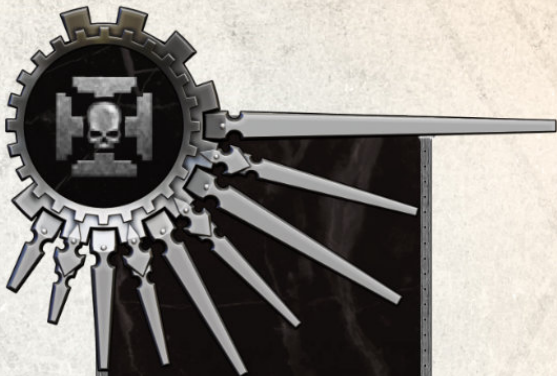

- Longlas or Sniper Rifle
- Frag Grenades
- Flak Armour

Special Rules

- Scout
- Infiltrate
- Shoot Sharp and Scarper

Options:

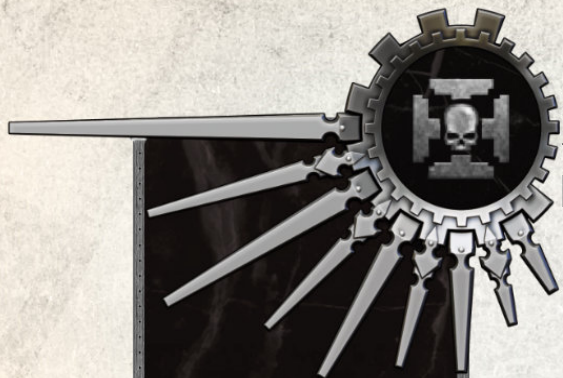

- An Imperialis Militia Ratling Squad may include:
 - Up to 7 additional Ratlings +12 points per model
- The entire unit may select the following option:
 - Shroud Bombs..... +20 points

ELITES

Ratlings were short, keen-eyed abhumans, who lived as an underclass on several Imperial worlds, due not only to their barely tolerated status as mutants, but also for their reputation as indolent and duplicitous creatures. Unsurprisingly, this ensured Ratling enclaves were regularly pressed into service by desperate Militia commanders seeking expendable sources of soldiers.

Ratlings lacked the hardy constitution of other abhuman strains, generally making them poor frontline combatants – in many ways the antithesis of Ogryns – but their inherent abilities as marksmen and diminutive stature led to most Ratling units serving in the role of snipers and scouts. More than once, a battle was decided by a Ratling’s well-placed shot eliminating an enemy commander, though they were seldom decorated for it.

ENGINEER AUXILIA DETACHMENT..... 65 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Engineer Adept	6	3	3	3	3	1	3	1	7	4+
Servo-Automata	6	3	3	4	5	1	1	1	6	5+

Unit Composition

- 1 Engineer Adept
- 4 Servo-Automata

Unit Type

- Engineer Adept: Infantry (Character)
- Servo-automata: Automata (Guardian)

ELITES

The hosts of the Excertus Imperialis would undoubtedly have floundered without the support of the Mechanicum, owing to the sheer volume and diversity of machinery and equipment utilised across its ranks – from its lowest Militia conscript to the loftiest Legate Marshal. To this end, an array of adepts drawn from numerous rungs of the Mechanicum accompanied the Imperialis Auxilia wherever the Imperium sent its armies.

Many of these Engineers were assigned to Militias on newly conquered or Compliant worlds and took to the battlefield alongside them. Such adepts were usually surrounded by a retinue of servo-automata that assisted them in their duties. While the tech-priests and their guardians were known to carry a fearsome, often esoteric array of weaponry, these disciples of the Omnissiah were primarily recognised for their ability to repair damage inflicted onto warmachines and static defences even under heavy fire.

Wargear

- Laspistol (Engineer Adept only)
- Power Axe (Engineer Adept only)
- Servo-arm (Engineer Adept only)
- Close Combat Weapon (Servo-automata only)

Special Rules

- Battlesmith (6+) (Engineer Adept only)
- Stubborn (Engineer Adept only)
- Techo-Arcana: Engineer (Engineer Adept only)

Dedicated Transport:

- An Engineer Auxilia Detachment of no more than six models may take a Vehicle upgraded with a Command Crew Bay as a Dedicated Transport. A unit of no more than ten models may take an Imperialis Militia Aurox Transport as a Dedicated Transport. A unit of no more than twelve models may take an Imperialis Militia Chimera Transport or a Vehicle upgraded with an Auxiliary Crew Bay as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points must still be paid for as part of the army.

Options:

- An Engineer Auxilia Detachment may include:
 - Up to 2 additional Engineer Adepts..... +20 points per model
- An Engineer Auxilia Detachment may include:
 - Up to 6 additional Servo-automata..... +5 points per model
- Any Engineer Adept may take any of the following options:
 - Augury Scanner +5 points
 - Nuncio-Vox..... +10 points
 - Volkite Charger..... +10 points
 - Cortex Controller..... +15 points
 - Graviton Gun +15 points
- Any Engineer Adept may take any of the following options:
 - Cyber-Familiar +5 points
 - Melta Bombs +5 points
- Any Servo-automata may take one of the following options:
 - Las-lock..... +2 points
 - Flamer +5 points
 - Maxima Bolter +5 points
 - Servo-Arm..... +5 points
 - Rotor Cannon +10 points
 - Grenade Launcher (with Frag and Krak Rounds)..... +10 points
 - Heavy Bolter..... +15 points
 - Multi-Melta +25 points

IMPERIALIS MILITIA KINFOLK EXO-DRILLER TEAM..... 50 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Exo-Driller*	5	4	4	4	5	3	2	3	6	2+

Unit Composition

- 1 Exo-Driller

Unit Type

- Infantry (Militia, Monstrous)

Wargear

- Power Fist
- Heavy Flamer
- Exo-Driller Armour

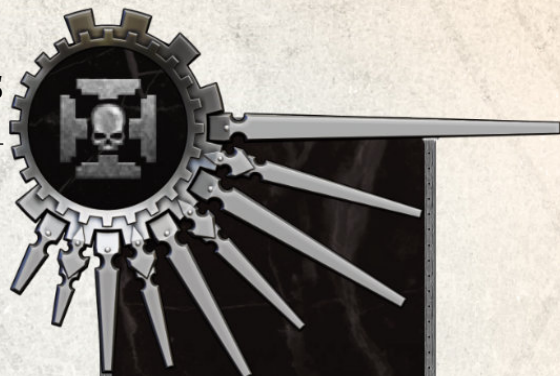

Special Rules

- Provenance (Kinfolk Helots)
- Bulky (3)
- Underground Advance

Options:

- An Imperialis Militia Kinfolk Exo-Driller Team may include:
 - Up to 4 additional Exo-Drillers +50 points per model
- Any Exo-Driller may exchange their Heavy Flamer for one of the following options:
 - Heavy Bolter Free
 - Seismic Cannon +10 points
 - Mining Laser +15 points
- Any Exo-Driller may select any of the following options:
 - Searchlights +5 points
 - Augury Scanner +5 points
- Any Exo-Driller may select the following option:
 - Seismic Crusher +15 points

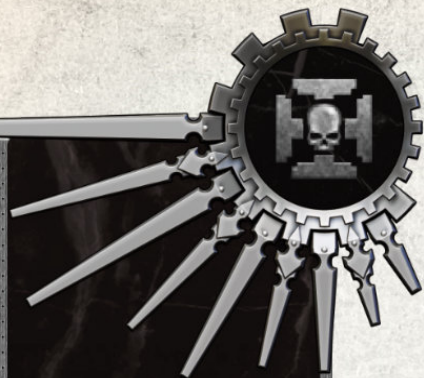

*The Characteristics modifications applied by the Kinfolk Helots Provenance are already applied.

ELITES

Many of the Kinfolk enclaves found on Imperial worlds were specialised in mining and engineering, whether prospecting for the benefit of their people or as glorified slaves enthralled to Imperial masters. Rugged suits of exo-armour, typically referred to as 'Exo-Drillers', were frequently utilised by Kinfolk prospectors to protect their crews from environmental hazards and hostile predators.

Inevitably, many Exo-Driller Teams found themselves thrust onto the frontlines alongside their fellow Kin, where their in-built firepower could be readily turned against human foes. Already experienced in spearheading the deep-dives of lucrative but perilous expeditions, Exo-Driller Teams served in the vanguard of Kinfolk Militias, or outflanked enemy positions as part of daring subterranean assaults.

IMPERIALIS MILITIA OGRYN BEASTMASTERS 35 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Ogryn Handler	7	4	2	5	5	3	2	4	7	5+

Unit Composition

- 1 Ogryn Handler

Unit Type

- Ogryn Handler: Infantry
(Militia, Monstrous, Skirmish)

ELITES

On some more primitive worlds it was not unheard of for Ogryns – themselves extremely strong and imposing abhumans – to successfully wrangle and break feral creatures that even the most experienced beastmasters would balk at ever attempting to capture. In many cases they were reduced to beasts of burden or given over to the menageries of nobility, but among several warlike cultures their fierce fighting spirit was retained in order to fight their master's foes.

When corralled into battle in number, the psychological effect of staring down such imposing war beasts could not be understated, for the predators that these Ogryns had bound to them were always of considerable ferocity and tenacity – eager to sate themselves on the flesh of their handler's chosen prey.

Unlike the beasts goaded into battle by 'mere' human handlers, the monstrous creatures herded into battle by Ogryns were well-feared by all not of their oversized abhuman strain. No two of these hulking beastmasters was accompanied by similar creatures, each one having personally tamed - or more accurately, subdued - their animalistic charges from across the battlefields visited by their Militia regiments before they were eventually called to war. As such, only broad classifications could be applied such creatures - though often these were apt enough to indicate their nature.

Wargear

- Close Combat Weapon (Ogryn Handler only)
- Flak Armour (Ogryn Handler only)
- Frag Grenades (Ogryn Handler only)

Special Rules

- Beastmasters (Ogryn Handler only)
- Bulky (4) (Ogryn Handler only)
- Fleet (1) (Ogryn Handler only)
- Hammer of Wrath (2) (Ogryn Handler only)
- Stubborn (Ogryn Handler only)

Options:

- An Imperialis Militia Ogryn Beastmasters unit may include:
 - Up to 4 additional Ogryn Handlers..... +30 points per model
- Any Ogryn Handler in the unit may select one of the following options:
 - Ripper Gun +5 points
 - Thunderstub +5 points
 - Combat Shield +5 points
 - Augmetic Fist +10 points
 - Taser Goad..... +15 points
 - Power Weapon..... +20 points
- All Ogryn Handlers in the unit may exchange their Flak Armour for the following option:
 - Carapace Armour +15 points
- An Imperialis Militia Ogryn Beastmasters unit may include up to three Great War Beasts for each Ogryn Handler in the unit (see the Great War Beasts options overleaf for more details) and all Great War Beasts in a unit must be of the same type, chosen from the list below:
 - Mauler Hound +20 points per model
 - Sabrefang +20 points per model
 - Wyvern..... +20 points per model
 - Araneae Gigantis +20 points per model
 - Macroacteniceride..... +20 points per model
 - Greater Annelid +25 points per model
 - Rhinox +27 points per model
 - Karkinos +27 points per model
 - Crocodylliad +30 points per model

GREAT WAR BEASTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Mauler Hound	8	4	-	5	4	2	4	3	6	5+
Sabrefang	9	4	-	4	4	2	5	3	6	6+
Crocodylliad	7	4	-	5	5	3	3	3	6	4+
Wyvern	9	4	-	4	4	2	4	4	6	6+
Araneae Gigantis	8	4	-	4	4	2	3	3	6	5+
Greater Annelid	8	4	-	4	5	2	4	3	6	5+
Karkinos	8	4	-	5	4	2	3	3	6	3+
Macroacteniceride	9	4	-	4	4	2	4	3	6	5+
Rhinox	8	4	-	5	5	2	3	3	6	5+

Wargear

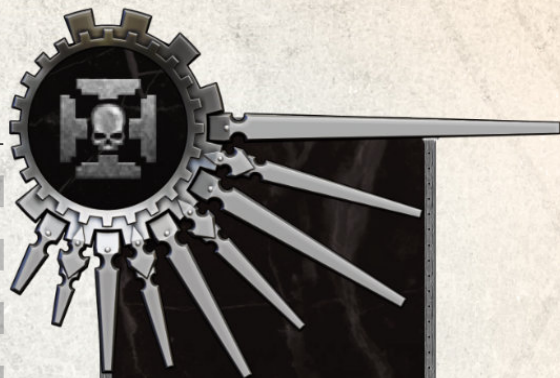

- Close Combat Weapon

Unit Type

- Infantry (Monstrous, Skirmish)

Special Rules

- Bulky (3)
- Breaching (6+)
- Crusader (Macroacteniceride only)
- Feel No Pain (5+) (Crocodylliad only)
- Furious Charge (1)
(Mauler Hound and Rhinox only)
- Hammer of Wrath (3) (Rhinox only)
- Murderous Strike (6+) (Karkinos only)
- Rending (5+) (Karkinos only)
- Pathfinder (Greater Annelid only)
- Sudden Strike (2) (Greater Annelid only)
- Poisoned (3+) (Araneae Gigantis only)
- Rage (2) (Sabrefang only)
- Shrouded (4+) (Wyvern only)
- Fleet (1) (Mauler Hound, Sabrefang, Wyvern, Araneae Gigantis, Greater Annelid, Macroacteniceride, and Rhinox only)

ELITES

Mauler Hounds, Sabrefangs, and Crocodylliads were easily recognised as larger and more ferocious versions of the animals seen accompanying human beastmasters. In contrast, the scaled and winged wyverns were feared for their gouts of noxious steam that concealed them until they had closed in, and were often remarked to be similar to the drakes of Terran myth. Karkinos were another seemingly familiar creature to most, appearing in aspect like the crustaceans of ancient Terra; hard-shelled and possessed of great armoured claws that could shear a man in two, should one be so unlucky. To round out such familiar and yet monstrous creatures was the Rhinox - shaggy-haired and bad-tempered, many scholars remarked it seemed to be akin to a creature that once roamed the Nordafrik plains where humanity was said to have also made their origin.

In contrast to these seemingly familiar creatures, Araneae Gigantis stimulated the fear response of most humans, their hairy eight limbs and too-many-eyed faces activating something primal in the mortal mind, for no insect of Old Earth had ever reached such sizes. Greater Annelids scuttled forward on many times that number of limbs, seemingly ponderous until they pounced on their prey without warning. Similarly possessed of an insectoid body-plan were the Macroactenicerides, their segmented bodies and chittering, clicking mouthparts belying their truth as voracious hunters.

ADDITIONAL WARGEAR OPTIONS FOR EXISTING ELITES UNITS

In addition to the normal options presented in the rules for various units, the additional wargear presented below may be selected for units at the costs shown. These are intended to be used alongside various publications, including all of Games Workshop's official publications and releases.

IMPERIALIS MILITIA MEDICAE DETACHMENT

Options:

- Any Militia Medicae may exchange their Flak Armour for the following option:
 - Carapace Armour+5 points

IMPERIALIS MILITIA OGRYN BRUTE SQUAD

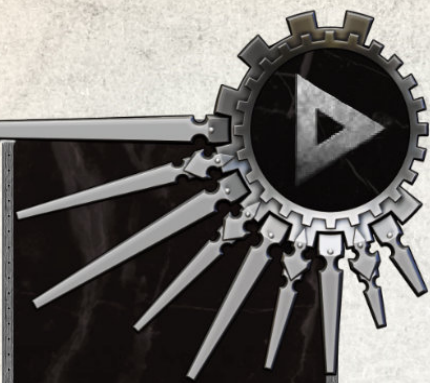

Options:

- Any model in the unit may exchange a Basic Close Combat Weapon for one of the following options:
 - Ripper Gun+5 points
 - Thunderstap+5 points
 - Boarding Shield (and the Heavy Sub-type).....+5 points
 - Lascutter +10 points
 - Power Weapon.....+20 points
 - Heavy Power Weapon.....+35 points
- Any model in the unit may select one of the following options:
 - Lascutter +10 points
 - Power Weapon+20 points
 - Heavy Power Weapon.....+35 points
- Any model in the unit may select one of the following options:
 - Augmetic Fist +10 points
 - Storm-Welder..... +10 points
- An Ogryn Boss may exchange a Basic Close Combat Weapon for one of the following options:
 - Seismic Cannon +10 points
 - Mining Laser +15 points
 - Arc Welder+15 points
 - Heavy Rock Cutter+20 points
 - Heavy Rock Drill.....+20 points
 - Heavy Rock Saw.....+20 points

IMPERIALIS MILITIA: Troops

IMPERIALIS MILITIA VOIDJUMPERS75 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Militia Voidjumper	6	3	3	3	3	1	3	1	5	5+
Militia Voidjumper Sergeant	6	3	3	3	3	1	3	2	6	5+

TROOPS

An incredibly esoteric fighting force, 'Voidjumper' was a designation given to linesmen from a myriad of human civilisations discovered throughout the Great Crusade who utilised jetpack technologies. Similar in effectiveness to jump packs utilised by the forces of the Legiones Astartes, these packs allowed for rapid redeployment and were predominantly made use of for flanking attacks which earned these regiments their reknown.

Many such forces found themselves folded into the Excertus Imperialis, with a large majority ending up seeing combat within the Imperial Army itself. Some worlds, however, found themselves so flush with otherwise-rare jetpacks that they could outfit even their reserve and militia forces with them. Though a pale imitation of the more professional forces with the same equipment, these forces usually found themselves with the advantage of fighting on familiar ground, making their ambushes and flanking strikes all the more deadly.

Unit Composition

- 9 Militia Voidjumpers
- 1 Militia Voidjumper Sergeant

Unit Type

- Militia Voidjumper: Infantry (Militia, Light, Line)
- Militia Voidjumper Sergeant: Infantry (Character, Militia, Light, Line)

Wargear

- Shotgun
- Flak Armour
- Militia Jet Pack
- Close Combat Weapon
- Frag Grenades

Special Rules

- Provenance (Survivors of the Dark Age)
- Strength in Numbers
- Scout
- Infiltrate
- Move Through Cover

Options:

- An Imperialis Militia Voidjumpers unit may include:
 - Up to 10 additional Militia Voidjumpers +6 points per model
- All models in the unit may exchange their Shotguns for one of the following options (all models in the unit must take the same option):
 - Laspistol or Autopistol Free
 - Lascarbines +10 points
 - Stubcarbines +10 points
- All models in the unit may exchange their Shotguns and Close Combat Weapons for the following option (all models in the unit must take the same option):
 - Two Laspistols or Two Autopistols +10 points
- Any model with a Close Combat Weapon may exchange it for the following option:
 - Chainsword +2 points per model
- The entire unit may select the following option:
 - Krak Grenades +15 points
- Up to two Militia Voidjumpers in the unit may select one of the following options:
 - Flamer +5 points
 - Grenade Launcher +5 points
 - Plasma Gun +10 points
 - Two Plasma Pistols +10 points
 - Meltagun +15 points
- The Militia Voidjumper Sergeant may select up to two of the following options:
 - Laspistol or Autopistol +1 point
 - Bolt Pistol +2 points
 - Blast Pistol +5 points
 - Plasma Pistol +10 points
 - Power Weapon +10 points
- The Militia Voidjumper Sergeant may select the following option:
 - Melta Bombs +10 points
- Any model attached to the unit via the Among the Flock, Militia Medicae Support, Among the Ranks, or any other similar such Special Rule may select the following option:
 - Militia Jet Pack (and the Light Sub-type) Free

Designer's Note: This unit does not replace the similarly named existing upgrade option available in the Legacies of the Age of Darkness: Imperialis Militia document - instead being designed as a separate option, so that those players who use the Liber Panoptica but not our add-on faction books can still use the original unit if they desire.

IMPERIALIS MILITIA CHIMERA TRANSPORT.....60 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Chimera Transport	14	3	12	10	10	3	14

Unit Composition

- 1 Militia Chimera Transport

Unit Type

- Vehicle (Third-Line, Transport)

Wargear

- Turret Mounted Multi-Laser
- Hull (Front) Mounted Multi-Laser
- Two Sponson Mounted Lasgun Arrays
- Smoke Launchers

Special Rules

- Amphibious
- Infantry Transport

Dedicated Transport Options:

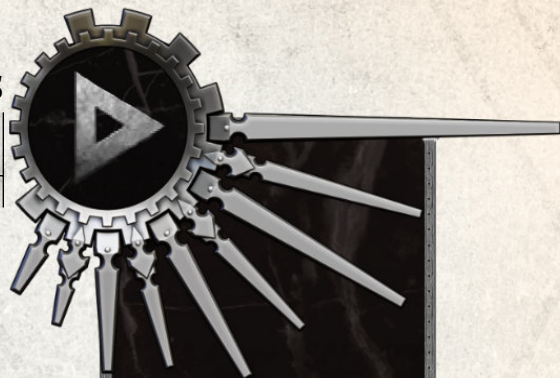

- An Imperialis Militia Command Cadre, Imperialis Militia Rogue Psyker unit containing at least one Militia Warden, Imperialis Militia Grenadier Squad, Imperialis Militia Reconnaissance Squad, or Imperialis Militia Beastmasters unit of no more than ten models may take an Imperialis Militia Chimera Transport as a Dedicated Transport. An Imperialis Militia Fire Support Squad of no more than four models may take an Imperialis Militia Chimera Transport as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points must still be paid for as part of the army.

Access Points:

- A Militia Chimera Transport has one Access Point at the rear.

Options:

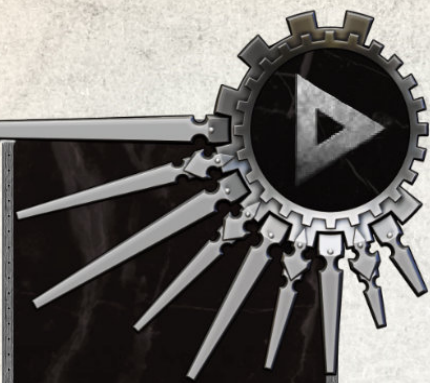

- A Militia Chimera Transport may exchange its Turret Mounted Multi-Laser for one of the following options:
 - Turret Mounted Heavy Bolter..... Free
 - Turret Mounted Heavy Flamer..... Free
 - Turret Mounted Twin-Linked Heavy Bolter..... +5 points
 - Turret Mounted Autocannon..... +5 points
- A Militia Chimera Transport may exchange its Hull (Front) Mounted Multi-Laser for one of the following options:
 - Hull (Front) Mounted Heavy Flamer..... Free
 - Hull (Front) Mounted Heavy Bolter..... Free
- A Militia Chimera Transport may select one of the following options:
 - Pintle Mounted Heavy Stubber..... +5 points
 - Pintle Mounted Heavy Flamer..... +5 points
 - Pintle Mounted Multi-Laser..... +10 points
- A Militia Chimera Transport may select up to two of the following option:
 - Hull (Front) Mounted Hunter-Killer Missile..... +5 points
- A Militia Chimera Transport may select any of the following options:
 - Searchlights..... +5 points
 - Dozer Blade..... +5 points

DEDICATED TRANSPORT

The Chimera Armoured Infantry Transport was a rugged and durable vehicle that was beginning to see widespread use by the Imperialis Auxilia at the time of the Horus Heresy. Its chassis was the basis upon which numerous other variants were designed, but by far the most endearing was its original role as an armoured personnel carrier.

Many infantry units favoured the Chimera not only for the impressive protection it provided, but also the firepower mounted atop it, allowing the Chimera to act in a fire-support role after its charges had disembarked. In addition, most Chimera hulls mounted lasgun arrays that enabled passengers to fight from within the protection of its compartment and repel attackers from nearly all angles.

IMPERIALIS MILITIA AUROX TRANSPORT.....25 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Aurox Transport	15	3	11	11	10	3	12

Unit Composition

- 1 Militia Aurox Transport

Unit Type

- Vehicle (Third-Line, Transport)

DEDICATED TRANSPORT

The Aurox Armoured Transport was created in response to the growing size and staggering diversity of the Excertus Imperialis host. As more and more worlds were brought into Compliance, the need to better standardise the equipment of the Imperialis Auxilia became increasingly apparent. Not unlike the Legion Rhino, the Aurox-chassis was intended to be easily manufactured on a large scale, while allowing for various additional weapon and armour systems.

As a transport the Aurox saw widespread service with most branches of the Imperial Army, extending down to the Imperialis Militia. Although it lacked the armament of the Chimera and other, more heavily personnel carriers, the Aurox was nonetheless commonly sighted among Militia forces – whether because they favoured the robust and swift design or simple necessity.

Wargear

- Smoke Launchers

Special Rules

- Infantry Transport

Dedicated Transport Options:

- An Imperialis Militia Command Cadre, Imperialis Militia Rogue Psyker unit containing at least one Militia Warden, Imperialis Militia Grenadier Squad, Imperialis Militia Reconnaissance Squad, or Imperialis Militia Beastmasters unit of no more than ten models may take an Imperialis Militia Aurox Transport as a Dedicated Transport. An Imperialis Militia Fire Support Squad of no more than three models may take an Imperialis Militia Aurox Transport as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points must still be paid for as part of the army.

Access Points:

- A Militia Aurox Transport has one Access Point on each side of the hull and one at the rear.

Options:

- A Militia Aurox Transport may select one of the following options:
 - Pintle Mounted Heavy Stubber.....+5 points
 - Pintle Mounted Heavy Flamer.....+5 points
 - Pintle Mounted Multi-Laser.....+10 points
- A Militia Aurox Transport may select the following option:
 - Searchlights.....+5 points

IMPERIALIS MILITIA RHINO TRANSPORT.....25 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Rhino Transport	14	3	11	11	10	3	12

Unit Composition

- 1 Militia Rhino Transport

Unit Type

- Vehicle (Transport, Third-Line)

Wargear

- Pintle Mounted Twin-Linked Bolter
- Smoke Launchers

Special Rules

- Provenance (Survivors of the Dark Age)
- Infantry Transport
- Repair

Dedicated Transport Options:

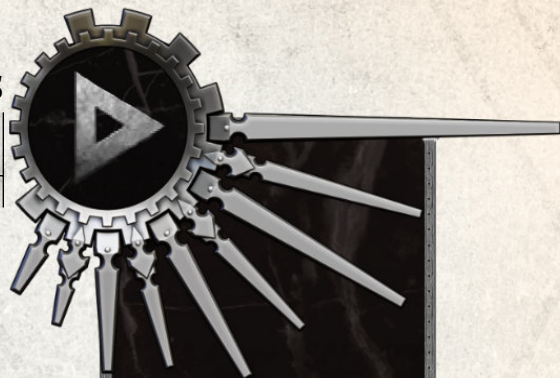

- An Imperialis Militia Command Cadre, Imperialis Militia Rogue Psyker unit containing at least one Militia Warden, Imperialis Militia Ascendant Rogue Psyker unit containing at least one Militia Warden, Engineer Auxilia Detachment, Imperialis Militia Grenadier Squad, Imperialis Militia Reconnaissance Squad, or Imperialis Militia Beastmasters unit numbering no more than ten models may take an Imperialis Militia Rhino Transport as a Dedicated Transport. An Imperialis Militia Fire Support Squad of no more than three models may take an Imperialis Militia Rhino Transport as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points must still be paid for as part of the army.

Access Points:

- A Militia Rhino Transport has one Access Point on each side of the hull and one at the rear.

Options:

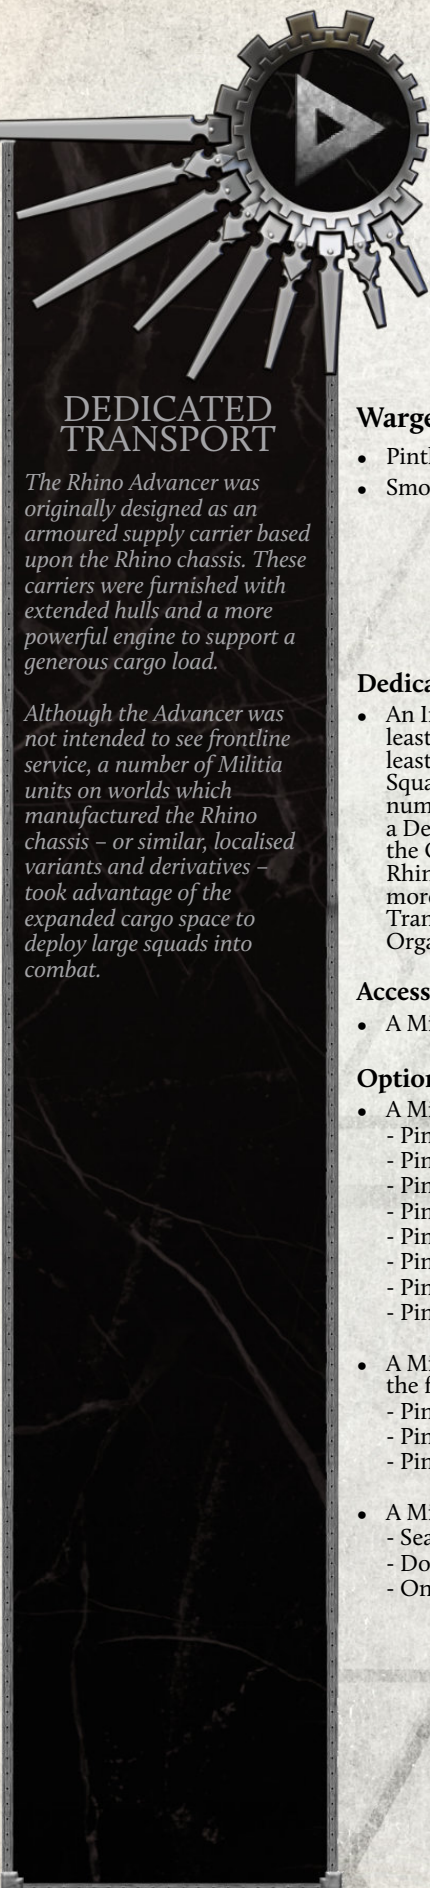

- A Militia Rhino Transport may select one of the following options:
 - Pintle Mounted Heavy Stubber..... +5 points
 - Pintle Mounted Heavy Flamer +5 points
 - Pintle Mounted Twin-Linked Bolter..... +5 points
 - Pintle Mounted Multi-Laser +10 points
 - Pintle Mounted Heavy Bolter..... +10 points
 - Pintle Mounted Combi-Weapon (any type) +10 points
 - Pintle Mounted Havoc Launcher +15 points
 - Pintle Mounted Multi-Melta +30 points
- A Militia Rhino Transport may exchange its Pintle Mounted Twin-Linked Bolter for one of the following options:
 - Pintle Mounted Heavy Stubber..... Free
 - Pintle Mounted Heavy Flamer Free
 - Pintle Mounted Multi-Laser +5 points
- A Militia Rhino Transport may select any of the following options:
 - Searchlights +5 points
 - Dozer Blade +5 points
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points

DEDICATED TRANSPORT

Many of the worlds that endured the horrors of Old Night relatively intact retained the ability to manufacture vehicles of superior design and construction to their contemporaries. Of those that welcomed the Imperium's coming, or where Compliance was achieved without extensive damage to infrastructure, Militias raised from these worlds were able to take advantage of their more advanced motorpools.

The Rhino was one of the most iconic symbols of the Great Crusade – specifically in transporting the Legiones Astartes. Less recognised was the personnel carrier's service with certain regiments of the Imperial Army, including the Imperialis Militia. The robustness and reliability of its design, as well as the ease with which they could be maintained and repaired, ensured they remained popular with the few units able to field them.

IMPERIALIS MILITIA RHINO ADVANCER 65 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Rhino Advancer	14	3	11	11	10	4	22

Unit Composition

- 1 Militia Rhino Advancer

Unit Type

- Vehicle (Transport, Third-Line)

DEDICATED TRANSPORT

The Rhino Advancer was originally designed as an armoured supply carrier based upon the Rhino chassis. These carriers were furnished with extended hulls and a more powerful engine to support a generous cargo load.

Although the Advancer was not intended to see frontline service, a number of Militia units on worlds which manufactured the Rhino chassis – or similar, localised variants and derivatives – took advantage of the expanded cargo space to deploy large squads into combat.

Wargear

- Pintle Mounted Twin-Linked Bolter
- Smoke Launchers

Special Rules

- Provenance (Survivors of the Dark Age)
- Assault Vehicle
- Infantry Transport
- Open-Topped (5)
- Repair

Dedicated Transport Options:

- An Imperialis Militia Command Cadre, Imperialis Militia Rogue Psyker unit containing at least one Militia Warden, Imperialis Militia Ascendant Rogue Psyker unit containing at least one Militia Warden, Engineer Auxilia Detachment, Imperialis Militia Grenadier Squad, Imperialis Militia Reconnaissance Squad, or Imperialis Militia Beastmasters unit numbering no more than twenty models may take an Imperialis Militia Rhino Advancer as a Dedicated Transport. An Imperialis Militia Ogryn Brute Squad in a Detachment using the Ogryn Conscripts Provenance and this Provenance may take an Imperialis Militia Rhino Advancer as a Dedicated Transport. An Imperialis Militia Fire Support Squad of no more than six models may take an Imperialis Militia Rhino Advancer as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points must still be paid for as part of the army.

Access Points:

- A Militia Rhino Advancer counts its entire hull as an Access Point.

Options:

- A Militia Rhino Advancer may select one of the following options:
 - Pintle Mounted Heavy Stubber +5 points
 - Pintle Mounted Heavy Flamer +5 points
 - Pintle Mounted Twin-Linked Bolter +5 points
 - Pintle Mounted Multi-Laser +10 points
 - Pintle Mounted Heavy Bolter +10 points
 - Pintle Mounted Combi-Weapon (any type) +10 points
 - Pintle Mounted Havoc Launcher +15 points
 - Pintle Mounted Multi-Melta +30 points
- A Militia Rhino Advancer may exchange its Pintle Mounted Twin-Linked Bolter for one of the following options:
 - Pintle Mounted Heavy Stubber Free
 - Pintle Mounted Heavy Flamer Free
 - Pintle Mounted Multi-Laser +5 points
- A Militia Rhino Advancer may select any of the following options:
 - Searchlights +5 points
 - Dozer Blade +5 points
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points

IMPERIALIS MILITIA TERMITE ASSAULT DRILL70 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Termite Assault Drill	8	3	12	12	10	3	12

Unit Composition

- 1 Militia Termite Assault Drill

Unit Type

- Vehicle (Transport, Third-Line)

Wargear

- Two Pintle Mounted Twin-Linked Bolters
- Melta Cutters

Special Rules

- Provenance (Survivors of the Dark Age)
- Infantry Transport
- Subterranean Assault

Dedicated Transport Options:

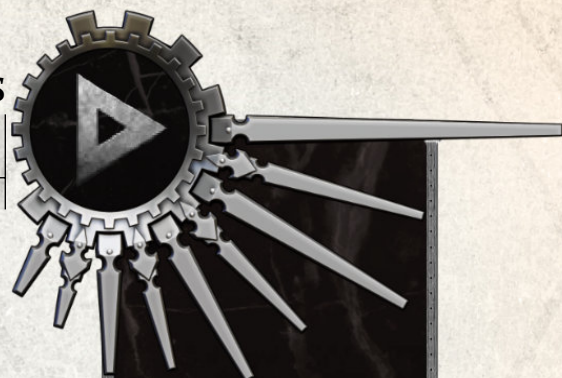

- An Imperialis Militia Command Cadre, Imperialis Militia Rogue Psyker unit containing at least one Militia Warden, Imperialis Militia Ascendant Rogue Psyker unit containing at least one Militia Warden, Enginseer Auxilia Detachment, Imperialis Militia Grenadier Squad, Imperialis Militia Reconnaissance Squad, or Imperialis Militia Beastmasters unit numbering no more than ten models may take an Imperialis Militia Termite Assault Drill as a Dedicated Transport. An Imperialis Militia Fire Support Squad of no more than three models may take an Imperialis Militia Termite Assault Drill as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points must still be paid for as part of the army.

Access Points:

- A Militia Termite Assault Drill has two Access Points, one on each side of the hull.

Options:

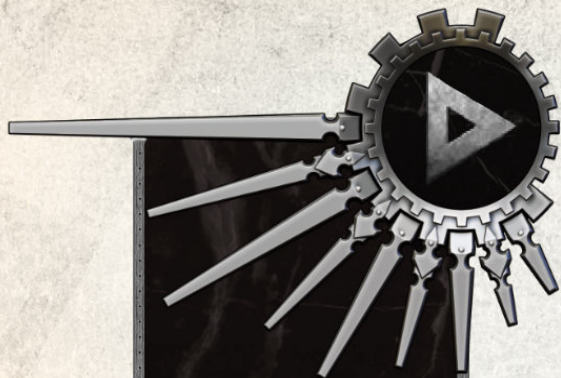

- A Militia Termite Assault Drill may exchange its Two Pintle Mounted Twin-Linked Bolters for one of the following options:
 - Two Pintle Mounted Twin-Linked Heavy Stubbers Free
 - Two Pintle Mounted Heavy Flamers +5 points
 - Two Pintle Mounted Volkite Chargers +5 points
 - Two Pintle Mounted Multi-Lasers +10 points

DEDICATED TRANSPORT

The Termite Assault Drill was a transport vehicle designed to burrow beneath the earth and emerge behind enemy lines, as well as take the fight to those rare civilisations – be they human or otherwise – who lived underground. Unlike crude civilian designs such as the Hades, Termites utilised an array of melta cutters linked to phase-shield generators to tunnel through the ground, rather than brute force alone.

Due to its specialist design and their disposition for fighting defensively, very few Militia units counted the Termite, or transports like it, among their arsenal. Those that did had usually retained the ability to manufacture them from a time before the Great Crusade, but had not yet committed them wholesale to the Imperial Tithe by the arrival of the Age of Darkness.

IMPERIALIS MILITIA LAND RAIDER PROTEUS CARRIER175 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Land Raider Proteus Carrier	12	3	14	14	14	5	12

Unit Composition

- 1 Militia Land Raider Proteus Carrier

Unit Type

- Vehicle
(Transport, Reinforced, Third-Line)

DEDICATED TRANSPORT

The Land Raider Proteus saw use with a small number of Imperialis Militia units raised from worlds and civilisations which had endured the Age of Strife with their culture and infrastructure largely intact, at least when compared to the majority of human populations who propagated the galaxy.

Whilst the rediscovery of the Land Raider's STC on Mars ultimately led to the vehicle – and its numerous variants – becoming relatively widespread throughout the Imperial Host, these were almost exclusively assigned to the Legiones Astartes and certain regular Imperial Army regiments. Those counted among Militia units were nearly always manufactured locally, or were models that shared only passing similarities with the iconic design.

Wargear

- Two Sponson Mounted Gravis Lascannons
- Hull (Front) Mounted Twin-Linked Heavy Bolter
- Smoke Launchers

Special Rules

- Provenance (Survivors of the Dark Age)
- Assault Vehicle
- Power of the Machine Spirit

Dedicated Transport Options:

- An Imperialis Militia Command Cadre, Imperialis Militia Rogue Psyker unit containing at least one Militia Warden, Imperialis Militia Ascendant Rogue Psyker unit containing at least one Militia Warden, or Imperialis Militia Grenadier Squad of no more than ten models may take an Imperialis Militia Land Raider Proteus Carrier as a Dedicated Transport. As a Dedicated Transport this does not use up an additional Force Organisation slot, but its points must still be paid for as part of the army.

Access Points:

- A Militia Land Raider Proteus Carrier has one Access Point on each side of the hull and one at the front.

Options:

- A Militia Land Raider Proteus Carrier may exchange its Hull (Front) Mounted Twin-Linked Heavy Bolter with one of the following options:
 - Hull (Front) Mounted Twin-Linked Heavy Flamer Free
 - Hull (Front) Mounted Twin-Linked Lascannon..... +15 points
- A Militia Land Raider Proteus Carrier may select one of the following options:
 - Pintle Mounted Heavy Stubber +5 points
 - Pintle Mounted Heavy Flamer +5 points
 - Pintle Mounted Twin-Linked Bolter +5 points
 - Pintle Mounted Multi-Laser +10 points
 - Pintle Mounted Heavy Bolter +10 points
 - Pintle Mounted Combi-Weapon (any type) +10 points
 - Pintle Mounted Havoc Launcher +15 points
 - Pintle Mounted Multi-Melta +30 points
- A Militia Land Raider Proteus Carrier may select any of the following options:
 - Searchlights +5 points
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points

ADDITIONAL WARGEAR OPTIONS FOR EXISTING TROOPS UNITS

In addition to the normal options presented in the rules for various units, the additional wargear presented below may be selected for units at the costs shown. These are intended to be used alongside various publications, including all of Games Workshop's official publications and releases.

IMPERIALIS MILITIA FIRE SUPPORT SQUAD

Options:

- The unit may exchange their Flak Armour for the following option:
- Carapace Armour +20 points

IMPERIALIS MILITIA GRENADIER SQUAD

Options:

- Any model in the unit may exchange their Lasgun with the following option:
- Hot-Shot Lasgun +5 points
- Up to two Grenadiers in the unit may exchange a Plasma Gun for the following option:
- Hot-Shot Volley Gun Free
- The Grenadier Sergeant may exchange their Laspistol and/or Close Combat Weapon for one of the following options:
- Hot-Shot Laspistol +5 points

IMPERIALIS MILITIA RECONNAISSANCE SQUAD

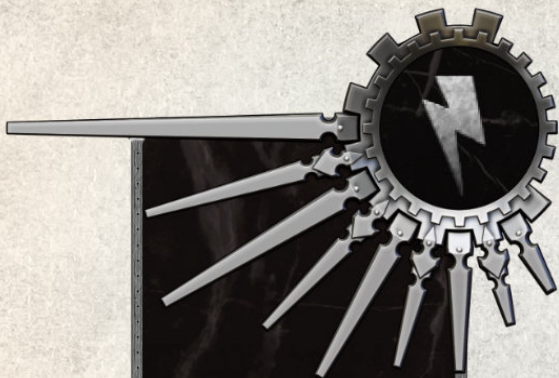

Options:

- The unit may select the following option:
- Shroud Bombs +20 points

IMPERIALIS MILITIA:
Fast Attack

IMPERIALIS MILITIA WAR BEASTS ADDITIONS

The options listed below may be selected instead of other War Beast options as seen in the Imperialis Militia Beastmasters Unit Profile. These additional profiles must otherwise follow all the normal rules and restrictions applied to War Beast selections.

	M	WS	BS	S	T	W	I	A	Ld	Sv
Arachnid	7	4	-	4	3	1	4	2	5	5+
Wurm	7	4	-	3	4	1	4	2	5	5+
Crustacean	7	4	-	5	4	1	3	2	5	4+
Acteniceride	8	4	-	3	4	1	4	2	5	5+

FAST ATTACK

Whilst most Militia Beastmasters contented themselves with the more common - and easily controlled - of animal species found in the wilds of the galaxy, some were not so easily cowed. To them, the challenge of bringing to heel an enormous, eight-legged and venom-spitting Arachnid was the apex of their craft - but stranger still creatures abounded in the galaxy.

Gigantic Wurms the length of a man with razor-sharp mouthparts and two-score legs, or oversized Crustaceans with shearing claws double the size of a man's torso - or even the immense beetle-like Actenicerides; chittering monsters that would pause in their attacks only to feed upon human corpses with proboscis mouthparts, before scuttling forth again with a screeching cry - all these and more were brought to heel and forced to fight on both sides of the war during the Age of Darkness.

Unit Type

- Infantry (Light, Skirmish)

Wargear

- Close Combat Weapon

Special Rules

- Crusader (Acteniceride only)
- Murderous Strike (6+) (Crustacean only)
- Poisoned (3+) (Arachnid only)
- Pathfinder (Wurm only)
- Sudden Strike (1) (Wurm only)
- Fleet (1)
(Arachnid, Acteniceride, and Wurm only)

Options:

- An Imperialis Militia Beastmasters unit may include one War Beast for each Militia Handler in the unit (see the War Beasts options below for more details) and all War Beasts in a unit must be of the same type, chosen from the list below:
 - Arachnid..... +10 points per model
 - Wurm +10 points per model
 - Acteniceride +12 points per model
 - Crustacean..... +15 points per model

O-I MUTATED SPAWN 40 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Mutated Spawn	12	4	-	5	5	3	3	D6	9	5+

Unit Composition

- 1 Mutated Spawn

Unit Type

- Infantry (Monstrous, Corrupted)

Wargear

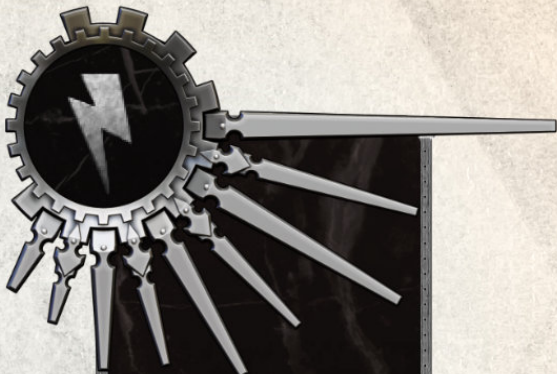

- Two Mutated Appendages

Special Rules

- Bulky (4)
- Fearless
- Hammer of Wrath (2)
- It Will Not Die (5+)
- Mindless Aggression
- Rage (2)
- Fleet (2)
- Traitor

Options:

- A Mutated Spawn unit may include:
 - Up to 5 additional Mutated Spawn..... +40 points per model

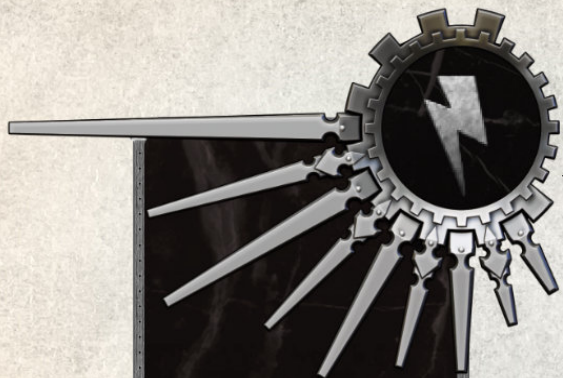

FAST ATTACK

Corruption spread rapidly among those who embraced the Empyrean powers of the Warp and for each scrap of hellish lore indulged and with every drop of blood given, the deepening stain on a human's soul inevitably manifested upon their body and seeped into their mind.

Damnation carried a price and many would pay it before the Heresy's end. Overwhelmed by the terrible powers they had sought to control, victims rapidly spawned mutations that perverted their flesh and destroyed their sanity, painfully devolving into abominations that were unrecognisable as human. Not one of these Warp-spawned monsters was alike, though all were powerful and difficult to destroy – for darker forces seemingly relished in the agony of their creations' existence as much as in the horror of their victims' bloody demise.

It was not unheard of for especially diabolic cultists to willingly bring about such horrors; some even sought to manifest these 'blessings' upon themselves. Shepherded like animals towards the enemy, such monsters proved a simple but brutal weapon that became increasingly common among the most corrupted of the Warmaster's armies.

IMPERIALIS MILITIA HELLHOUND FLAME TANK SQUADRON60 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Hellhound	14	3	12	12	10	3	-

Unit Composition

- 1 Militia Hellhound

Unit Type

- Vehicle (Third-Line, Reinforced)

FAST ATTACK

Based on the Chimera chassis, Hellhound Flame Tanks sacrificed transport capacity for one of several devastating, short-range armaments. The most common of these were large flamethrowers designed to bathe wide areas in their lethal payload, flushing out entrenched infantry and swarming xenos. Less common variants mounted Melta Cannons to deliver a devastating punch through the toughest of strongpoints and vehicles. Militias on worlds plagued by orkoid fungi and other, similarly tenacious organisms were usually the first to receive cast-off Hellhounds.

Due to the limited range of the Hellhound's weaponry – as well as the volatility of their payload – squadrons were kept mobile and fluidly redeployed, favouring engagements where they could rely on speed and the density of terrain to cover their approach.

Infantry units were understandably wary of the risk posed by the Hellhound's volatile payload and more than one squad of helpless soldiers were reduced to screaming torches after being caught in a blast-wave of promethium expelled from an exploding Flame Tank.

Wargear

- Turret Mounted Gravis Heavy Flamer
- Hull (Front) Mounted Heavy Flamer
- Smoke Launchers

Special Rules

- Containment Breach

Options:

- An Imperialis Militia Hellhound Flame Tank Squadron may include:
 - Up to 2 additional Militia Hellhounds +55 points per model
- All models in a Imperialis Militia Hellhound Flame Tank Squadron may exchange their Turret Mounted Gravis Heavy Flamer for the following option (all models in the unit must select the same option):
 - Turret Mounted Melta Cannon +15 points per model
- Any Militia Hellhound may exchange its Hull (Front) Mounted Heavy Flamer for one of the following options:
 - Hull (Front) Mounted Heavy Bolter Free
 - Hull (Front) Mounted Multi-Laser Free
 - Hull (Front) Mounted Multi-Melta +10 points
- Any Militia Hellhound may select one of the following options:
 - Pintle Mounted Heavy Stubber +5 points
 - Pintle Mounted Heavy Flamer +5 points
 - Pintle Mounted Multi-Laser +10 points
- Any Militia Hellhound may select any of the following options:
 - Searchlights +5 points
 - Dozer Blade +5 points
 - One Hull (Front) Hunter-Killer Missile +5 points

IMPERIALIS MILITIA CENTAUR COMBAT TRACTOR SQUADRON40 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Centaur Tractor	12	3	11	11	10	2	*

Unit Composition

- 1 Militia Centaur Tractor

Unit Type

- Vehicle (Fast, Transport, Third-Line)

Wargear

- Hull (Front) Mounted Heavy Stubber
- Smoke Launchers
- Towing Cable*

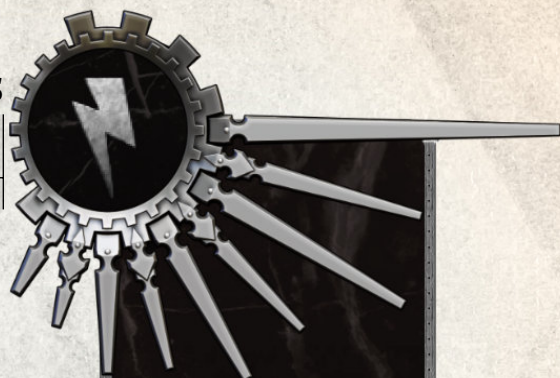

Special Rules

- None

Options:

- An Imperialis Militia Centaur Combat Tractor Squadron may include:
 - Up to 5 additional Militia Centaur Tractors +40 points per model
- Any Militia Centaur Tractor may exchange its Hull (Front) Mounted Heavy Stubber for the following option:
 - Hull (Front) Mounted Heavy Bolter +5 points
- Any Militia Centaur Tractor may select one of the following options:
 - Pintle Mounted Heavy Stubber +5 points
 - Pintle Mounted Heavy Flamer +5 points
 - Pintle Mounted Multi-Laser +10 points
- Any Militia Centaur Tractor may select any of the following options:
 - Searchlights +5 points
 - Dozer Blade +5 points
 - One Hull (Front) Hunter-Killer Missile +5 points

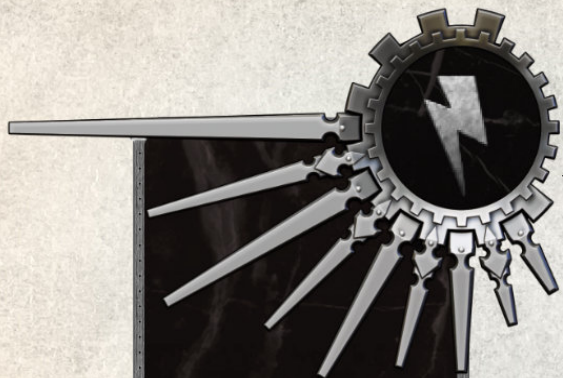

*See the Towing Cable wargear entry.

FAST ATTACK

Centaur, and other small utility vehicles, were utilised across the multitude of different worlds for a plethora of different roles in the great imperial machine. From agri-world harvesting to rapid small-scale cargo transportation, they all shared incredibly powerful engines of varying patterns when compared to their overall size.

Such civilian machines would not be considered suited for military deployment by forces in the Great Crusade, but as the Imperialis Militia took up arms during the civil wars in light of Horus' betrayal, they were soon pushed into service. Retrofitted with reinforced winch cables and light arms, these rapid support craft were capable of hauling a plethora of weapon platforms and emplacements to exactly where they needed to be.

IMPERIALIS MILITIA SALAMANDER SCOUT SQUADRON60 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Salamander Scout Vehicle	16	3	12	10	10	3	-

Unit Composition

- 1 Militia Salamander Scout Vehicle

Unit Type

- Vehicle (Fast, Third-Line)

FAST ATTACK

The Salamander Scout Vehicle was a light reconnaissance vehicle based upon the Chimera chassis, which came into service in the shadow of its sibling chassis. Forming a backbone for light military vehicles, it was known for being rugged, lightweight, and easily maintainable by the forces of the Imperialis Militia.

Due to the lightweight and less-protective nature of the changes the Salamander vehicle had undergone to make it successful at its role of reconnaissance, it was paramount that these vehicles - and the squadrons they operated - were kept well-fuelled and continuously on the move, otherwise the vulnerability of its lacklustre armour could have spelt doom for the crew commanding it. Regardless, it performed successfully enough as a scout to see ongoing use in the motor pools of the Imperialis Militia.

Wargear

- Hull (Front) Mounted Heavy Bolter
- Hull (Front) Mounted Autocannon
- Nuncio-Vox
- Smoke Launchers

Special Rules

- Scout
- Exposed Compartment

Options:

- An Imperialis Militia Salamander Scout Squadron may include:
 - Up to 4 additional Militia Salamander Scout Vehicles..... +50 points per model
- Any Militia Salamander Scout Vehicle may exchange its Hull (Front) Mounted Autocannon for one of the following options:
 - Hull (Front) Mounted Mortar Free
 - Hull (Front) Mounted Heavy Flamer Free
- Any Militia Salamander Scout Vehicle may exchange its Hull (Front) Mounted Heavy Bolter for one of the following options:
 - Hull (Front) Mounted Heavy Flamer Free
 - Hull (Front) Mounted Multi-Laser Free
- Any Militia Salamander Scout Vehicle may select one of the following options:
 - Pintle Mounted Heavy Stubber..... +5 points
 - Pintle Mounted Heavy Flamer +5 points
 - Pintle Mounted Multi-Laser +10 points
- Any Militia Salamander Scout Vehicle may select any of the following options:
 - Searchlights +5 points
 - Dozer Blade +5 points
 - One Hull (Front) Hunter-Killer Missile..... +5 points

IMPERIALIS MILITIA PEGASUS ASSAULT SQUADRON 65 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Pegasus	14	3	12	11	10	3	-

Unit Composition

- 1 Militia Pegasus

Unit Type

- Vehicle (Fast, Third-Line)

Wargear

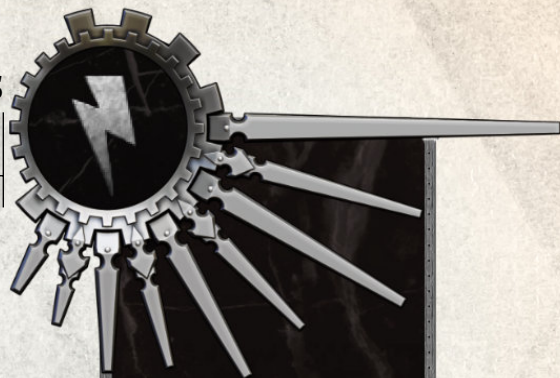

- Turret Mounted Gravis Multi-Laser
- Hull (Front) Mounted Heavy Bolter
- Pintle-Mounted Auto-Launcher
- Smoke Launchers

Special Rules

- Scout

Options:

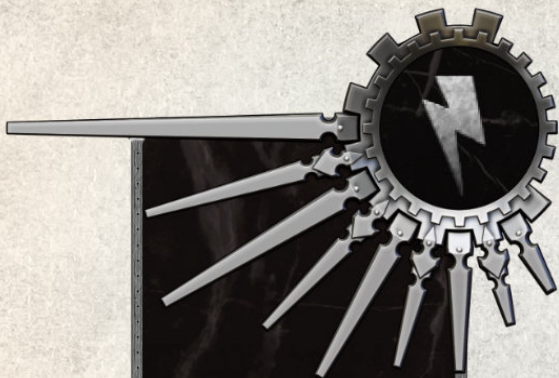

- An Imperialis Militia Pegasus Assault Squadron may include:
 - Up to 4 additional Militia Pegasus..... +60 points per model
- Any Militia Pegasus may exchange its Hull (Front) Mounted Heavy Bolter for one of the following options:
 - Hull (Front) Mounted Heavy Flamer Free
 - Hull (Front) Mounted Multi-Laser Free
- Any Militia Pegasus may exchange its Turret Mounted Gravis Multi-Laser for one of the following options (all models in the unit must select the same option):
 - Turret Mounted Twin-Linked Heavy Bolter..... Free
 - Turret Mounted Pegasus Autocannon..... +15 points
- Any Militia Pegasus may select any of the following options:
 - Searchlights +5 points
 - Dozer Blade +5 points
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points

FAST ATTACK

Trading the ability to carry troops for an upscaled engine and armament, the Pegasus Assault Vehicle was but another one of many vehicles based upon the Chimera Chassis. Built to carry the firepower of a battle tank but maintain the speed of its parent chassis, the Pegasus was a lesser-seen but nevertheless potent strike tank.

Its speed and armament allowed it to attack key targets, whilst the Auto-Launcher mounted atop it allowed it to resist infantry assault; all aiding in buying themselves time to leave as quickly as they struck.

IMPERIALIS MILITIA KELAINO SQUADRON 85 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Kelaino	20	3	12	12	10	3	12

Unit Composition

- 1 Militia Kelaino

Unit Type

- Vehicle
(Third-line, Flyer, Hover, Transport)

FAST ATTACK

In the Imperialis Militia, the designation of 'Kelaino' was often applied in a much more ad-hoc fashion when compared to those squadrons of similar vehicles used by the other arms of the Imperial Army; often cobbled together by regiments from civilian cargo-haulers and retrofitted with weapons.

Though these refitted Kelaino were less reliable than the purpose-built versions brought to bear by the Solar Auxilia, they still fulfilled a similar role, ferrying cargo and small units to and from the battlefield with great speed and then providing fire support upon arrival.

Wargear

- Centreline Mounted Multi-Laser
- Two Hull (Front) Mounted Hellstrike Missiles
- Searchlight

Special Rules

- Deep Strike
- Infantry Transport
- Unified Assault
- Rapid Insertion

Access Points:

- A Militia Kelaino has one Access Point on each side of the hull and one at the rear.

Options:

- An Imperialis Militia Kelaino Squadron may include:
 - Up to 2 additional Militia Kelaino+85 points per model
- Any Militia Kelaino may exchange their Centreline Mounted Multi-Laser for the following option:
 - Centreline Mounted Lascannon+10 points
- Any Militia Kelaino may exchange their Two Hull (Front) Mounted Hellstrike Missiles for the following option:
 - Two Centreline Mounted Multiple Rocket Pods+10 points
- Any Militia Kelaino may select one of the following options:
 - Two Sponson Mounted Heavy Bolters +20 points

IMPERIALIS MILITIA KELAINO SKY-TALON SQUADRON75 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Kelaino Sky-Talon	20	3	12	10	10	3	-

Unit Composition

- 1 Militia Kelaino Sky-Talon

Unit Type

- Vehicle
(Third-line, Flyer, Hover, Transport)

Wargear

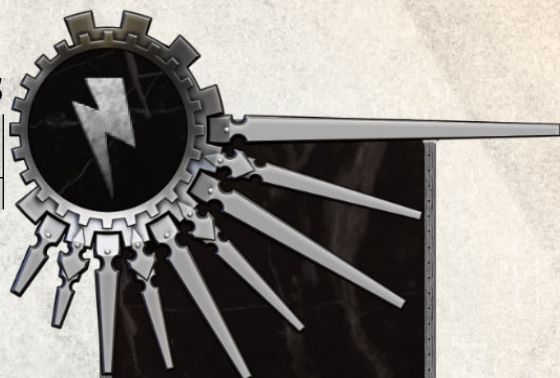

- Centreline Mounted Heavy Bolter
- Searchlights

Special Rules

- Deep Strike
- Combat Transporter
- Auxiliary Vehicle Bay

Options:

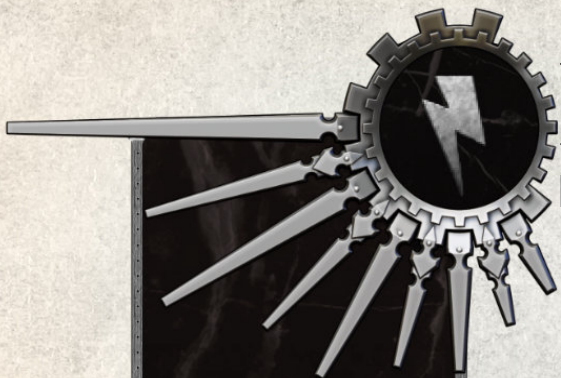

- An Imperialis Militia Kelaino Sky-Talon Squadron may include:
 - Up to 2 additional Militia Kelaino +70 points per model
- Any Militia Kelaino Sky-Talon may exchange their Centreline Mounted Heavy Bolter for the following option:
 - Centreline Mounted Multi-Laser Free
 - Centreline Mounted Lascannon +10 points
- Any Militia Kelaino Sky-Talon may select one of the following options:
 - Two Centreline Mounted Heavy Krak Rockets +10 points
 - Two Centreline Mounted Heavy Frag Rockets +10 points
- Any Militia Kelaino may exchange its Auxiliary Vehicle Bay Special Rule for the following option:
 - The Bunker Drop Special Rule +50 points

FAST ATTACK

Kelaino Sky-Talons, by comparison to their Militia Kelaino cousins, were composed of a more consistent mixture of civilian and industrial aircraft, all of which bore large magnetic lifting clamps hanging from the underside of their fuselage. Before the onset of Horus' Heresy, they were largely used only as cargo transporters, used to haul containers of ammunition, resources, or scrap; however, with the civil war claiming all new production capacity, Imperialis Forces were left with no choice but to press these industrial vehicles into service, hastily outfitting them for use in war.

On the battlefields, these Sky-Talons were utilised as a fast and efficient way to deliver cargo and crew into combat zones, performing airlifting duties before rapidly departing combat airspace. This cargo was regularly vehicles of the Militia's motor pool, but certain leaders felt it necessary to utilise the Sky-Talon's capabilities to deploy entire retrofitted fortifications in the midst of battle, setting up firebases and bunkers before swiftly making their exit.

IMPERIALIS MILITIA WOLF RAPID RESPONSE SECTION60 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Militia Heavy Outrider	14	3	3	3	3	3	3	1	6	5+
Militia Heavy Outrider Sergeant	14	3	3	3	3	3	3	2	7	5+

FAST ATTACK

Where the cavalry units of the Imperialis Militia rode horses, motorised bikes, or similar such modes of transport, Wolf Rapid Response Sections instead mounted heavier transports, such as quad bikes or otherwise larger, hexapodal animals. These sections often mounted heavier weaponry to go along with their larger mounts, making use of their combined weight and manoeuvrability to bring to bear any weapons they carried effectively at speed.

Unit Composition

- 2 Militia Heavy Outriders
- 1 Militia Heavy Outrider Sergeant

Unit Type

- Militia Heavy Outrider: Cavalry (Militia, Skirmish)
- Militia Heavy Outrider Sergeant: Cavalry (Militia, Skirmish, Character)

Wargear

- Laspistol or Autopistol
- Close Combat Weapon
- Flak Armour
- Heavy Stubber
- Militia Cavalry Mount

Special Rules

- Relentless
- Scout
- Hammer of Wrath (2)
- Battle-Hardened (1)
- Firing Protocols (2)

Options:

- An Imperialis Militia Wolf Rapid Response Section may include:
 - Up to 7 additional Militia Heavy Outriders +15 points per model
- Any model in the unit may exchange their Heavy Stubber for one of the following options:
 - Heavy Flamer Free
 - Heavy Bolter +5 points
 - Grenade Launcher (with Frag and Krak rounds) +5 points
 - Multi-Laser +5 points
 - Autocannon +10 points
 - Plasma Gun +10 points
 - Impaler Harpoon +10 points
 - Meltagun +15 points
- Any model which selects an option from the list above may choose to select the following option for that weapon:
 - The Twin-Linked Special Rule +5 points
- For every five models in the unit, one model may exchange their Heavy Stubber for the following option:
 - Mining Laser +15 points
- All models in the unit may select any of the following options (if any of these options are selected, all models in the unit must be so upgraded):
 - Carapace Armour +2 points per model
 - Shredder Prow +5 points per model
- Any model in the unit may take one of the following options:
 - Shotgun +1 points
 - Stubcarbine +2 points
 - Lascarbine +2 points
 - Militia Lance +5 points
- The Militia Heavy Outrider Sergeant may exchange their Laspistol or Autopistol, and/or Close Combat Weapon for one of the following options:
 - Bolt Pistol +5 points
 - Blast Pistol +5 points
 - Chainsword +5 points
 - Power Weapon +10 points
 - Plasma Pistol +15 points

IMPERIALIS MILITIA ACHILLES LIGHT VEHICLE SQUADRON35 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Achilles Light Vehicle	16	3	11	11	10	2	-

Unit Composition

- 1 Achilles Light Vehicle

Unit Type

- Vehicle (Fast, Third-Line)

Wargear

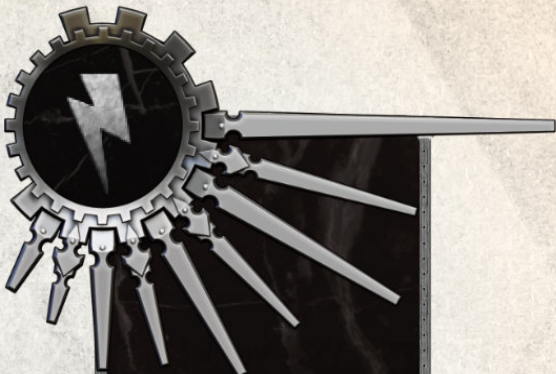

- Turret Mounted Twin-Linked Heavy Stubber
- Smoke Launchers

Special Rules

- Scout
- Move Through Cover
- Engine Overcharge

Options:

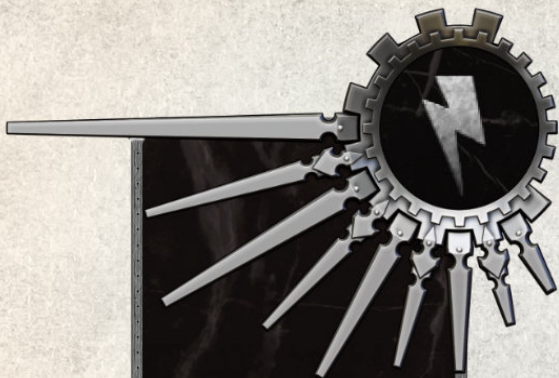

- An Imperialis Militia Achilles Light Vehicle Squadron may include:
 - Up to 4 additional Achilles Light Vehicles..... +35 points per model
- Any model may replace their Turret-Mounted Twin-Linked Heavy Stubber with one of the following options:
 - Turret Mounted Heavy Flamer +5 points
 - Turret Mounted Heavy Bolter..... +5 points
 - Turret Mounted Multi-Laser +5 points
 - Turret Mounted Autocannon..... +10 points
 - Turret Mounted Twin-Linked Grenade Launcher (with Frag and Krak rounds)..... +10 points
 - Turret Mounted Twin-Linked Missile Launcher (with Frag, Krak, and Flak Missiles) +15 points
 - Turret Mounted Heavy Mortar +15 points
 - Turret Mounted Heavy Mining Laser +20 points
- Any model may select any of the following options:
 - Searchlights +5 points
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points
 - Centreline Mounted Twin-Linked Heavy Stubber +10 points
 - Augury Scanner +10 points

FAST ATTACK

The lightest class of true vehicle brought to bear by Militia forces, Achilles-class vehicles were often little more than civilian cars strapped with extra guns. Indeed, many were tuned for performance and speed over reliability or protection, and so it was common for this class of vehicle to lose as many of its number to enemy action as it was terrain.

Despite these shortcomings, however, Imperialis Militia forces continued to field such vehicles - for, if nothing else, they were cheap, plentiful, and easily replaced.

IMPERIALIS MILITIA VENATOR MEDIUM VEHICLE SQUADRON.....50 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Venator Medium Vehicle	16	3	12	11	10	3	-

Unit Composition

- 1 Venator Medium Vehicle

Unit Type

- Vehicle (Third-Line)

FAST ATTACK

Venator Squadrons were found on most Imperial colony worlds, being another broad class of civilian vehicle that could be fitted with powerful weapons if the call of war was to be sounded.

Whilst a broad classification, the most common Venator-class vehicles were the Tauros and Taurox patterns, both most commonly seen ferrying workmen or Arbites - though other patterns were often grouped into such a class for ease if nothing else. In times of war, these vehicles were commandeered, and tech-priests or simply lowly maintenance technicians would set to with welders and rivet guns, attaching armour plating, weapons, and any other wargear available in order to turn these vehicles from mere wagons to weapons of war.

Wargear

- Turret Mounted Gravis Multi-Laser

Special Rules

- Militia Venetaris

Options:

- An Imperialis Militia Venator Medium Vehicle Squadron may include:
 - Up to 2 additional Venator Medium Vehicles +50 points per model
- Any model may replace their Turret-Mounted Gravis Multi-Laser with one of the following options:
 - Two Turret Mounted Twin-Linked Heavy Stubbers Free
 - Turret Mounted Gravis Autocannon +5 points
 - Turret Mounted Kheres Assault Cannon +10 points
 - Turret Mounted Eradicator Nova Cannon +15 points
 - Turret Mounted Skyreaper Battery +15 points
 - Turret Mounted Gravis Lascannon +20 points
 - Centreline Mounted Cyclone Missile Launcher (with Frag, Krak, and Flak Missiles) +20 points
 - Turret Mounted Gravis Multi-Laser and Auxiliary Crew Bay +25 points
 - Turret Mounted Gravis Autocannon and Auxiliary Crew Bay +30 points
- Any model which is not equipped with an Auxiliary Crew Bay may select the following option:
 - Command Crew Bay +15 points
- Any model may select any of the following options:
 - Searchlights +5 points
 - Smoke Launchers +5 points
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points
 - The Pathfinder Special Rule +10 points
 - Two Centreline Mounted Hot-Shot Volley Guns +10 points

IMPERIALIS MILITIA CARNODON SQUADRON..... 60 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Carnodon	15	3	12	11	10	3	-

Unit Composition

- 1 Militia Carnodon

Unit Type

- Vehicle (Third-Line)

Wargear

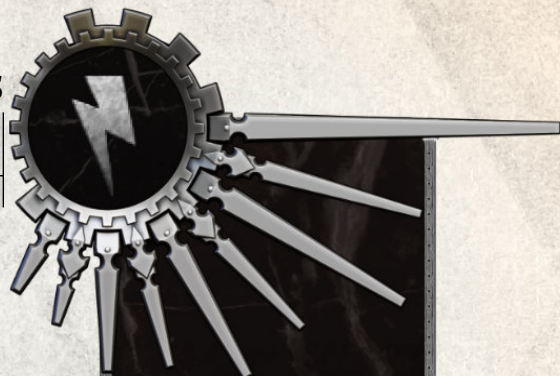

- Turret Mounted Gravis Multi-Laser
- Two Sponson Mounted Heavy Flamers
- Smoke Launchers

Special Rules

- None

Options:

- An Imperialis Militia Carnodon Squadron may include:
 - Up to 2 additional Militia Carnodons +55 points per model
- All models in an Imperialis Militia Carnodon Squadron may exchange their Turret Mounted Gravis Multi-Laser for one of the following options (all models in the unit must select the same option):
 - Turret Mounted Gravis Autocannon +5 points
 - Turret Mounted Gravis Lascannon +20 points
- All models in an Imperialis Militia Carnodon Squadron may exchange their Sponson Mounted Heavy Flamers for one of the following options (all models in the unit must select the same option):
 - Two Sponson Mounted Heavy Bolters Free
 - Two Sponson Mounted Multi-Lasers Free
 - Two Sponson Mounted Autocannons +5 points
 - Two Sponson Mounted Lascannons +15 points
- Any Militia Carnodon may select one of the following options:
 - Pintle Mounted Heavy Stubber +5 points
 - Pintle Mounted Heavy Flamer +5 points
 - Pintle Mounted Multi-Laser +10 points
- Any Militia Carnodon may select the following option:
 - Searchlights +5 points

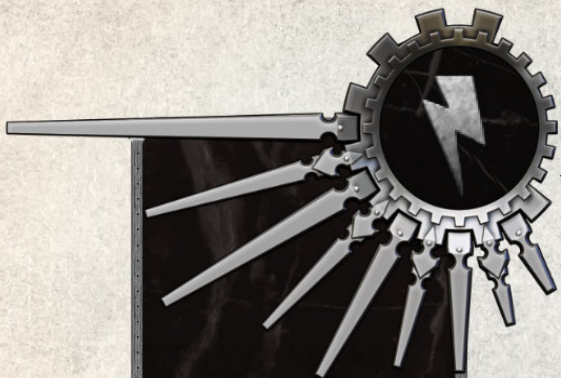

FAST ATTACK

The Carnodon Medium Battle Tank saw extensive service with most branches of the Imperialis Auxilia for the duration of the Great Crusade and its vaunted legacy would go on to inspire the creation of several other battle tanks such as the Leman Russ.

Built upon the versatile modular design of the Aurox-chassis, its transportation capacity was replaced with turret and sponson-mounted heavy weapons, as well as improved armour – all without sacrificing its speed.

By the time production of the Aurox-chassis had peaked, the Leman Russ was entering service with regular Imperial Army units, inevitably relegating most Carnodons and other Aurox variants to strategic reserves. As a result, the Carnodon was typically one of the few battle tanks beside the ageing Malcador that Militia commanders could commit to battle in large numbers.

IMPERIALIS MILITIA HADES BREACHING DRILL.....65 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Hades Drill	6	3	12	10	10	2	-

Unit Composition

- 1 Militia Hades Drill

Unit Type

- Vehicle (Third-Line)

FAST ATTACK

The Hades Breaching Drill was ostensibly a piece of civilian mining equipment militarised for use on the battlefields of the Great Crusade. The Hades Drill was equipped with four large powercutters which enabled it to easily bore through the earth and a set of melta-cutters to reduce stubborn rock to liquid slag. While far from subtle, the speed at which it could undermine enemy defences made it popular among certain inventive Militia units.

Unlike its larger and more advanced cousin, the Termite, Hades Drills were not large enough to carry troops directly into battle. Instead those units assigned to its deployment would follow directly behind the drill as it cleared a path to the surface. Those foes who were not caught by the drill itself were left disorientated by crashing waves of flying rock and dust, vulnerable to the troops emerging from the ground to overwhelm them.

Wargear

- Melta Cutters

Special Rules

- Subterranean Assault
- Follow-up Attack

ADDITIONAL WARGEAR OPTIONS FOR EXISTING FAST ATTACK UNITS

In addition to the normal options presented in the rules for various units, the additional wargear presented below may be selected for units at the costs shown. These are intended to be used alongside various publications, including all of Games Workshop's official publications and releases.

IMPERIALIS MILITIA ARVUS TRANSPORT

Options:

- An Arvus Transport may select one of the following options:
 - Hull (Front) Mounted Heavy Stubber Free
 - Hull (Front) Mounted Multi-Laser +10 points
 - Hull (Front) Mounted Autocannon +10 points
 - Hull (Front) Mounted Lascannon +15 points
- An Arvus Transport may choose to give a single Ranged Weapon it is equipped with the following Special Rule:
 - Twin-Linked +10 points

IMPERIALIS MILITIA CAVALRY SQUAD

Options:

- All models in a unit which has not selected Shotguns, Stubcarbines, Lascarbines, or Militia Lances may select the following option:
 - Militia Lance and Lascarbine +6 points

IMPERIALIS MILITIA SENTINEL SQUADRON

Options:

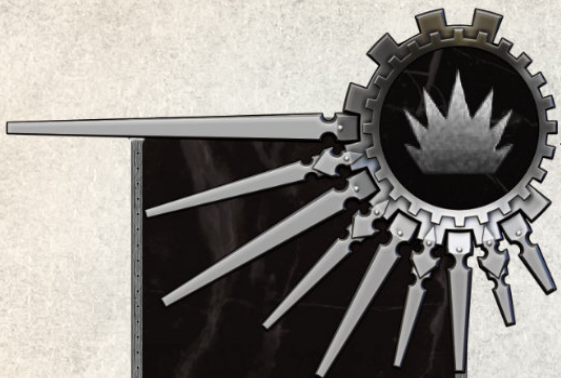

- Any Militia Sentinel may replace its Multi-Laser with one of the following options:
 - Heavy Bolter Free
 - Multiple Rocket Pod +5 points
 - Sentinel Powerlifter +5 points
 - Plasma Cannon +10 points
- Any Militia Sentinel may select any of the following options:
 - One Hunter-Killer Missile +5 points
 - Searchlights +5 points
 - Heavy Chainsword* +5 points

**A Militia Sentinel which has replaced its Multi-Laser with a Sentinel Powerlifter may not select a Heavy Chainsword.*

IMPERIALIS MILITIA: Heavy Support

GREATER MUTATED SPAWN175 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Greater Mutated Spawn	10	4	-	7	7	7	4	D6+2	9	4+

Unit Composition

- 1 Greater Mutated Spawn

Unit Type

- Infantry (Monstrous, Corrupted)

HEAVY SUPPORT

The term 'Greater Mutated Spawn' referred to the largest and most powerful of the many abominations counted amongst the Warp Cults and Traitor Legiones Astartes. No less than enormous, murderously insane beasts that crushed and devoured all before them in a stampede of bloody slaughter; it defies all reasonable explanations that such creatures were once human.

How exactly these larger abominations were propagated proved difficult to catalogue, with many reports being of questionable legibility – their authors since driven mad by their experiences or discovered to be under the thrall of dark powers. Some claimed that mass sacrifices and rituals coalesced the bodies of their victims into one enormous mass of hulking flesh, while others spoke to the seemingly random gestation of an existing mutant having suddenly evolved into an even more terrifying monstrosity.

The apparently only consistent factor in their creation was the overabundance of Warp-energies permeating the site of their origin, which mercifully ensured these indomitable creatures were usually only sighted among the most corrupted of Traitor forces. This would have been small comfort to their innumerable victims, many of which were sacrificed at the altar of a Spawn's creation – if not damned to become one themselves.

Wargear

- Two Monstrous Appendages

Special Rules

- Provenance (Tainted Flesh)
- Bulky (6)
- Fearless
- Feeding Frenzy
- Fleet (2)
- Hammer of Wrath (3)
- Mindless Aggression
- Rage (2)
- Regenerating Horror
- Traitor

Options:

- A Greater Mutated Spawn unit may include:
 - Up to 2 additional Greater Mutated Spawn +175 points per model

IMPERIALIS MILITIA
SABRE BATTERY 20 POINTS

	M	WS	BS	S	T	W	I	A	Ld	Sv
Militia Sabre Platform	-	1	3	3	4	2	1	1	6	5+

Unit Composition

- 1 Militia Sabre Platform

Unit Type

- Infantry (Militia, Heavy)

Wargear

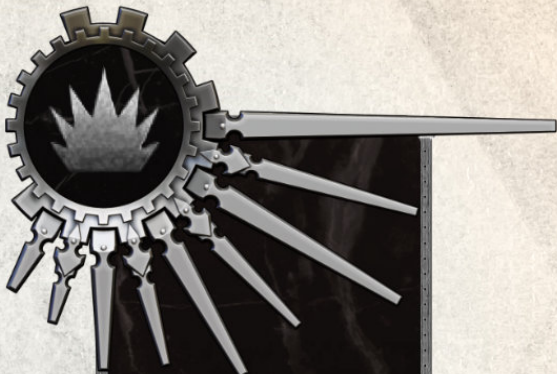

- Two Twin-Linked Heavy Stubbers
- Laspistol
- Flak Armour
- Helical Targeting Array

Special Rules

- Immobile

Options:

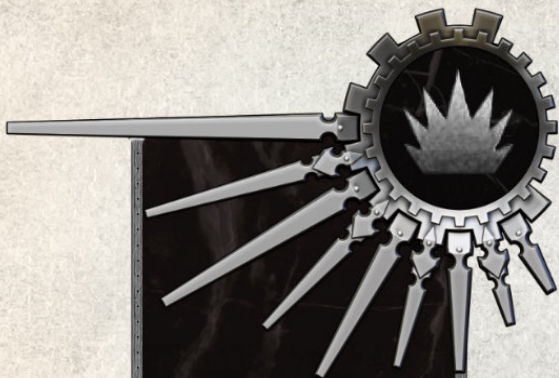

- An Imperialis Militia Sabre Battery may include:
 - Up to 6 additional Militia Sabre Platforms +20 points per model
- Any Militia Sabre Platform may exchange its Two Twin-Linked Heavy Stubbers for one of the following options:
 - Sabre Searchlight Free
 - Gravis Bolt Cannon Free
 - Gravis Multi-Laser +5 points
 - Gravis Autocannon +5 points
 - Gravis Lascannon +15 points

HEAVY SUPPORT

Static weapon systems manned by men rather than machine were used all across the Imperium, especially in the Imperialis Militia, with the Sabre platform being the most ubiquitous of these. Whether industrial and purpose-built, or scavenged and repurposed, static weapon systems were all lightweight in structure and easy to assemble in the field.

Cheap to create, Imperial forces utilised them as a means to bring heavy weapons to field en-masse - or bring support equipment which required mounting and manning - such as high-powered spotlights.

IMPERIALIS MILITIA MACHARIUS HEAVY TANK SQUADRON 200 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Macharius Heavy Tank	10	3	13	12	12	6	-

Unit Composition

- 1 Militia Macharius Heavy Tank

Unit Type

- Vehicle
(Reinforced, Third Line)

HEAVY SUPPORT

Ancient designs carried forward from Old Earth, these lumbering behemoths found themselves fighting in the thick both before, during, and after the Great Crusade.

Up-armoured to the limits of the gunsmiths who created them, those vehicles classified as true heavy tanks were as varied as their makers. Prior to the coming of the Imperium, these vehicles were the centrepiece of many a Warlord's collection, with which once they would have used to level the castles and strongholds of other primitive techno-barbarians. Since those times there had been little further standardisation of these vehicles; many were content simply to leave their complex and idiosyncratic internal systems well alone.

During the Heresy this was deemed a considerable upside, as the drafted regiments of the Imperialis Militia did not need to be trained how to use their vehicles anew; riding happily to battle within machines deemed deathtraps in the service of their liege lords.

Wargear

- Turret Mounted Macharius Battle Cannon
- One Hull (Front) Mounted Twin-Linked Heavy Stubber
- Two Sponson Mounted Heavy Stubbers
- Smoke Launchers

Options:

- An Imperialis Militia Macharius Heavy Tank Squadron may include:
 - Up to 2 additional Militia Macharius Heavy Tanks +175 points per model
- Any Militia Macharius Heavy Tank may exchange its Turret Mounted Macharius Battle Cannon for one of the following options (all models in the unit must select the same option):
 - Turret Mounted Macharius Vanquisher Cannon +5 points
 - Turret Mounted Macharius Rotary Bolt Cannon +10 points
- Any Militia Macharius Heavy Tank may exchange both of its Sponson Mounted Heavy Stubbers for one of the following options:
 - Two Sponson Mounted Heavy Flamers Free
 - Two Sponson Mounted Heavy Bolters +5 points
 - Two Sponson Mounted Multi-Lasers +5 points
 - Two Sponson Mounted Autocannons +10 points
 - Two Sponson Mounted Multi-Meltas +15 points
 - Two Sponson Mounted Plasma Cannons +15 points
 - Two Sponson Mounted Lascannons +20 points
- Any Militia Macharius Heavy Tank may exchange its Hull (Front) Mounted Twin-Linked Heavy Stubber for one of the following options:
 - Hull (Front) Mounted Twin-Linked Heavy Flamer Free
 - Hull (Front) Mounted Twin-Linked Heavy Bolters +5 points
 - Hull (Front) Mounted Twin-Linked Multi-Laser +5 points
 - Hull (Front) Mounted Twin-Linked Autocannon +10 points
 - Hull (Front) Mounted Twin-Linked Plasma Cannon +15 points
 - Hull (Front) Mounted Twin-Linked Lascannon +20 points
 - Hull (Front) Mounted Gravis Melta Cannon +25 points
- Any Militia Macharius Heavy Tank may select one of the following options:
 - Pintle Mounted Heavy Stubber +5 points
 - Pintle Mounted Heavy Flamer +5 points
 - Pintle Mounted Multi-Laser +10 points
- Any model may select any of the following options:
 - Searchlights +5 points
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points
 - Dozer Blade +5 points

IMPERIALIS MILITIA MACHARIUS OMEGA HEAVY TANK325 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Macharius Omega	10	3	13	11	10	6	-

Unit Composition

- 1 Militia Macharius Omega

Unit Type

- Vehicle
(Reinforced, Bombard, Third Line)

Wargear

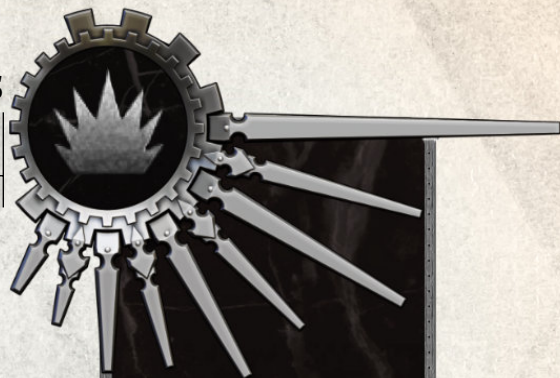

- Centreline Mounted
Omega Pattern Plasma Blastgun
- Two Sponson Mounted
Heavy Stubbers
- Smoke Launchers

Special Rules

- Volatile Plasma Containment
- Exposed Plasma Conduits
- Independent Fire Control
- Armoured Superstructure

Options:

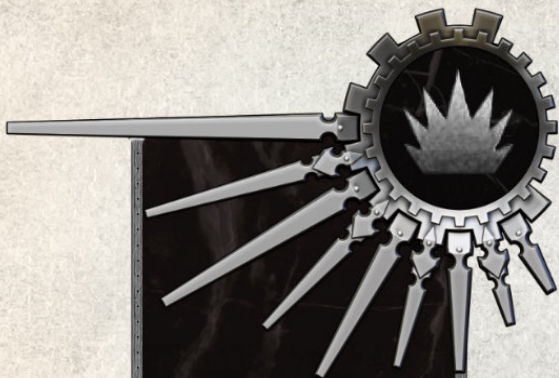

- A Militia Macharius Omega may exchange both of its Sponson Mounted Heavy Stubbers for one of the following options:
 - Two Sponson Mounted Heavy Flamer Free
 - Two Sponson Mounted Heavy Bolters +5 points
 - Two Sponson Mounted Multi-Lasers +5 points
 - Two Sponson Mounted Autocannons +10 points
 - Two Sponson Mounted Multi-Meltas +15 points
 - Two Sponson Mounted Plasma Cannons +15 points
 - Two Sponson Mounted Lascannons +20 points
- Any Militia Macharius Omega may select one of the following options:
 - Pintle Mounted Heavy Stubber +5 points
 - Pintle Mounted Heavy Flamer +5 points
 - Pintle Mounted Multi-Laser +10 points
- A Militia Macharius Omega may select any of the following options:
 - Searchlights +5 points
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points
 - Dozer Blade +10 points

HEAVY SUPPORT

As the Great Crusade brought the galaxy to heel, it encountered a myriad of civilisations. Though the technology levels of these disparate peoples were vastly different, common amongst them were the iconic Standard Template Constructs of old humanity. Oddly enough, however, was a recurrence of oversized heavy battle tanks. Whilst not of STC design, these venerable vehicles were favoured weapons of the tribal warlords who had controlled Terra before the coming of the Emperor, and their designs had proven popular amongst those who travelled the stars in humanity's earliest days.

Bearing weapons deemed esoteric in nature, and otherwise far inferior to modern Imperial designs, these tanks had a poor performance record and offered horrendous crew safety. As such, they were deemed fit only for issue to the Imperialis Militia forces that found themselves drafted into a war between transhuman demigods - and thus desperate for any advantage they could claim.

IMPERIALIS MILITIA MALCADOR DEFENSOR HEAVY TANK SQUADRON 160 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Malcador Defensor Heavy Tank	14	3	13	13	12	5	-

Unit Composition

- 1 Malcador Defensor Heavy Tank

Unit Type

- Vehicle (Third-Line, Fast, Reinforced)

HEAVY SUPPORT

Slowly being phased out by the time of the Great Crusade, the Malcador and all vehicles which shared its chassis were destined to be replaced with newer, more specialised models of tank such as the Leman Russ. By the coming of the Heresy, many Malcadors were scrapped or left to rot in massive tank graveyards as a result - and many Militia commanders found themselves with a fleet of these older tanks. With a bit of elbow grease and persuasion, the most functional of these condemned vehicles were reactivated, before swiftly being sequestered away from the damage the elements and time could inflict, a safety-net should their regiment ever be called for service. At the breaking of the Heresy, all available material stockpiles were reassessed, and as part of that process many Militias found themselves overstocked with Malcador chassis which, despite their efforts, had not survived their stint in storage, both hull and weapon systems damaged almost beyond repair.

It was from these broken and battered hulls that the Defensor pattern was born, the primary weapons systems of the standard Malcador pattern replaced with an armoured pulpit, bristling with as many fixed-traverse heavy bolters as the regimental engineers could cram on. It was in these jury-rigged and botched together hulls that many militia crews fought and died - and yet, the effectiveness of such retrofits ensured that as time passed, many more such vehicles were created and pressed to service.

Wargear

- Two Sponson Mounted Gravis Bolt Cannons
- Hull (Rear) Mounted Heavy Bolter
- Hull (Front) Mounted Heavy Bolter
- Hull (Left) Mounted Heavy Bolter
- Hull (Right) Mounted Heavy Bolter

Options:

- An Imperialis Militia Malcador Defensor Heavy Tank Squadron may include:
 - Up to two additional Malcador Defensor Heavy Tanks..... +150 points per model
- Any Malcador Defensor Heavy Tank may exchange its Hull (Front) Mounted Heavy Bolter for one of the following options:
 - Hull (Front) Mounted Autocannon..... Free
 - Hull (Front) Mounted Heavy Flamer..... Free
 - Hull (Front) Mounted Lascannon..... +10 points
 - Hull (Front) Mounted Demolisher Cannon..... +35 points
- Any Malcador Defensor Heavy Tank may exchange of its Hull (Left) and Hull (Right) Mounted Heavy Bolters for one of the following options:
 - One Hull (Left) Mounted Autocannon and one Hull (Right) Mounted Autocannon..... Free
 - One Hull (Left) Mounted Heavy Flamer and one Hull (Right) Mounted Heavy Flamer..... Free
 - One Hull (Left) Mounted Lascannon and one Hull (Right) Mounted Lascannon..... +20 points
- Any Militia Malcador Defensor Heavy Tank may select one of the following options:
 - Pintle Mounted Heavy Stubber..... +5 points
 - Pintle Mounted Heavy Flamer..... +5 points
 - Pintle Mounted Multi-Laser..... +10 points
- Any model may select any of the following options:
 - Searchlights..... +5 points
 - Smoke Launchers..... +5 points
 - Dozer Blade..... +5 points
 - One Hull (Front) Mounted Hunter-Killer Missile..... +10 points

IMPERIALIS MILITIA
MINOTAUR BATTERY 175 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Minotaur	8	3	13	12	13	4	-

Unit Composition

- 1 Militia Minotaur

Unit Type

- Vehicle (Reinforced, Slow, Third Line)

Wargear

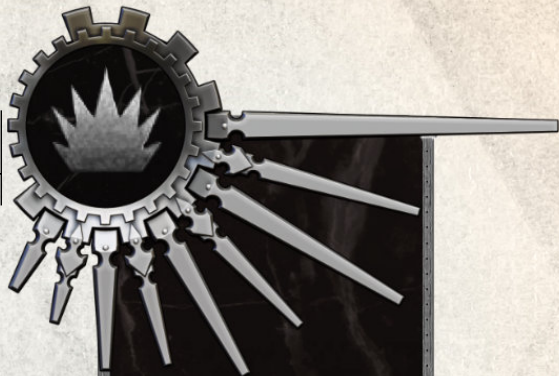

- Centreline (Rear) Mounted Earthshaker Battery
- Smoke Launchers

Special Rules

- Open Crew Compartment

Options:

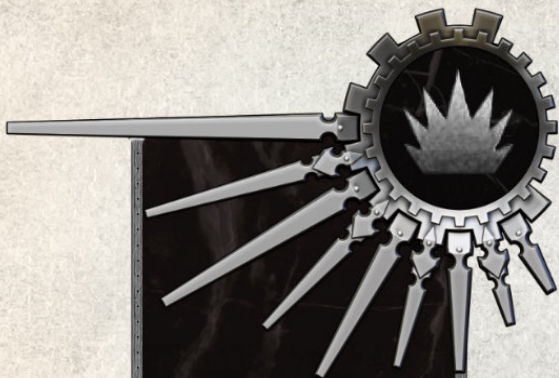

- An Imperialis Militia Minotaur Battery may include:
 - Up to two additional Militia Minotaurs +160 points per model
- Any Militia Minotaur may select one of the following options:
 - Pintle Mounted Heavy Stubber..... +5 points
 - Pintle Mounted Heavy Flamer +5 points
 - Pintle Mounted Multi-Laser +10 points
- Any model may select any of the following options:
 - Searchlights +5 points
 - One Hull (Rear) Mounted Hunter-Killer Missile +5 points

HEAVY SUPPORT

An ancient form of self propelled artillery based on the workhorse Malcador chassis, the Minotaur had largely lost favour in most parts of the Imperial war machine; notable exceptions could be found in the the Imperial Army and Mechanicum, both of whom appreciated the rugged nature and reliability of the chassis. This generalised loss of favour led to droves of these vehicles being mothballed over time, with not enough demand from those still making use of them enough to prevent a slow crawl of many of these venerable artillery pieces to the graveyard.

With the Age of Darkness' arrival, these vehicles found themselves called back to service, and crewmen once again loaded their twinned guns and fired them in anger and rage against their hated foes.

IMPERIALIS MILITIA PRAETORIAN HEAVY TANK..... 250 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Praetorian Heavy Tank	12	3	14	13	12	5	-

Unit Composition

- 1 Militia Praetorian Heavy Tank

Unit Type

- Vehicle (Reinforced, Third-Line)

HEAVY SUPPORT

Whilst a relatively new rediscovery by the ending of the Great Crusade and the dawning of Horus' Heresy, some rare examples of the Praetorian Heavy Tank nonetheless found themselves in the hands of scattered Imperialis Militia forces.

These vehicles were often only partially finished and furnished, or otherwise were early production models which did not boast the range of features that completed Praetorians did. As a result, for many reasons, these vehicles were sometimes indistinguishable from the more ramshackle, locally-produced tanks some Militia forces had access to.

Wargear

- Turret Mounted Praetorian Battle Cannon
- Centreline Mounted Kheres Assault Cannon
- Smoke Launchers

Special Rules

- None

Options:

- Any Militia Praetorian Heavy Tank may exchange its Centreline Mounted Kheres Assault Cannon for the following option:
 - Centreline Mounted Pulveriser Cannon +25 points
- Any Militia Praetorian Heavy Tank may exchange its Turret Mounted Praetorian Battle Cannon for the following option:
 - Turret Mounted Oppressor Cannon with Coaxial Autocannon +20 points
- Any Militia Praetorian Heavy Tank may exchange its Turret Mounted Praetorian Battle Cannon and Centreline Mounted Kheres Assault Cannon for one of the following option:
 - Centerline Mounted Subjugator Cannon +35 points
- Any Militia Praetorian Heavy Tank may select one of the following options:
 - Two Sponson Mounted Heavy Stubbers Free
 - Two Sponson Mounted Heavy Bolters +10 points
 - Two Sponson Mounted Heavy Flamers +10 points
 - Two Sponson Mounted Multi-Meltas +30 points
- Any Militia Praetorian Heavy Tank which is not equipped with a Subjugator Cannon may select one of the following options:
 - Two Hull (Front) Mounted Heavy Stubbers +10 points
 - Two Hull (Front) Mounted Meltaguns +25 points
- Any Militia Praetorian Heavy Tank may select one of the following options:
 - Pintle Mounted Heavy Stubber +5 points
 - Pintle Mounted Heavy Flamer +5 points
 - Pintle Mounted Multi-Laser +10 points
- Any Militia Praetorian Heavy Tank may select any of the following options:
 - Searchlights +5 points
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points
 - Dozer Blade +10 points

IMPERIALIS MILITIA HYDRA FLAK TANK SQUADRON 80 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Hydra Flak Tank	14	3	12	10	10	3	-

Unit Composition

- 1 Militia Hydra Flak Tank

Unit Type

- Vehicle (Third-line)

Wargear

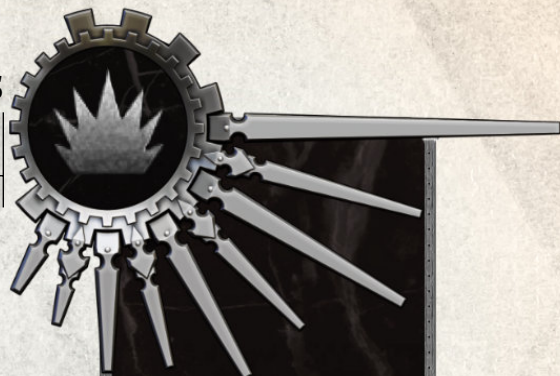

- Turret Mounted Anvilus Autocannon Battery
- Hull (Front) Mounted Heavy Bolter
- Searchlights
- Smoke Launchers
- Helical Targeting Array

Special Rules

- Exposed Compartment
- Aerial Interception

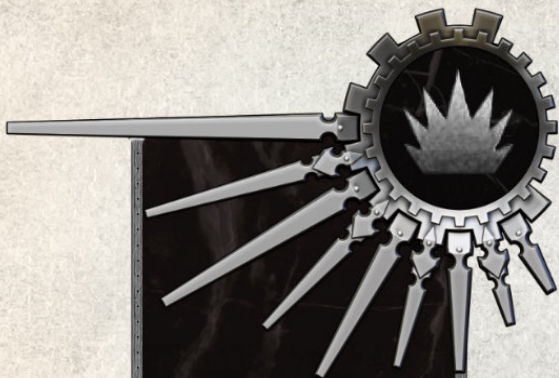

Options:

- An Imperialis Militia Hydra Flak Tank Battery may include:
 - Up to 2 additional Auxilia Hydra Flak Tanks +70 points per model
- A Militia Hydra Flak Tank may exchange its Hull (Front) Mounted Bolter for the following option:
 - Hull (Front) Mounted Heavy Flamer Free
- Any Militia Hydra Flak Tank may select any of the following options:
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points
 - Dozer Blade +5 points

HEAVY SUPPORT

Based off of the chassis of the robust Chimera, the Hydra Anti-Air platform was a rudimentary attempt to copy the more prevalent and effective Hydra Flak Tank Batteries fielded by the Solar Auxilia for bulk use. These copies lacked the enclosed turret and servo-tracking sub-systems of their more advanced brethren; though they made up for some of these shortfalls by using locally-produced variants of autocannon with far higher fire rates, if greater barrel wear. These alterations meant that these vehicles required far more ammunition and servicing than the variants found within the more vaunted regiments of the Excertus Imperialis - though were just as deadly to anything in flight.

IMPERIALIS MILITIA MANTICORE MISSILE TANK BATTERY 175 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Manticore Missile Tank	14	3	12	10	10	3	-

Unit Composition

- 1 Militia Manticore Missile Tank

Unit Type

- Vehicle (Third-Line)

HEAVY SUPPORT

Manticore Missile Batteries were a common sight across the Imperium; fixed artillery pieces serviced by a team of lightly trained crewmen who rain death upon approaching enemies. A number of forward thinking Imperialis Militia commanders began mounting these batteries onto the workhorse Chimera chassis following reports of great successes among the Solar Auxilia. Though crude and requiring a large amount of the vehicle's internals to be exposed in order to make these conversions work, these vehicles were undeniably effective and remained in use among the Militias who built them.

Upon discovery of these jury-rigged chassis, the adepts of Mars officially sanctioned them and codified both the retrofitted variants and official constructions as Manticore Missile Tanks. Though the mechanics and commanders who commissioned and created these vehicles prior to their official designation have had their names long since lost to the march of history, none can deny the effectiveness of their works.

Wargear

- Turret Mounted Manticore Missile Launcher (with 4 Manticore Missiles)
- Hull (Front) Mounted Heavy Bolter
- Smoke Launchers

Special Rules

- Exposed Compartment

Options:

- An Imperialis Militia Manticore Missile Tank Battery may include:
 - Up to 2 additional Militia Manticore Missile Tanks +175 points per model
- Any Militia Manticore Missile Tank may exchange any number of its Manticore Missiles for any of the following options, in any combination:
 - One Storm Eagle Missile Free
 - One Phosphor Incendiary Missile Free
- A Militia Manticore Missile Tank may exchange its Hull (Front) Mounted Heavy Bolter for the following option:
 - Hull (Front) Mounted Heavy Flamer Free
- Any Militia Manticore Missile Tank may select any of the following options:
 - Searchlights +5 points
 - Dozer Blade +5 points
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points
 - Helical Targeting Array +25 points

IMPERIALIS MILITIA HELIOS ORDNANCE CARRIER SQUADRON..... 80 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Helios Ordnance Carrier	12	3	12	10	10	3	-

Unit Composition

- 1 Militia Helios Ordnance Carrier

Unit Type

- Vehicle (Third-Line)

Wargear

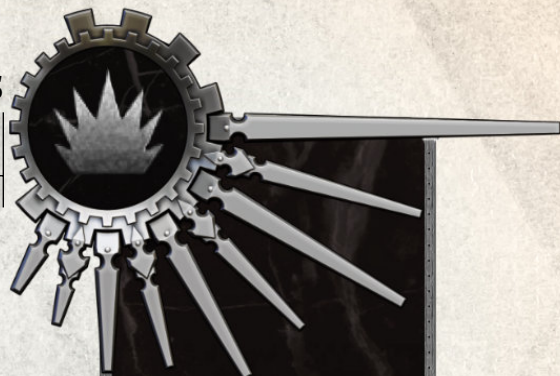

- Hull (Front) Mounted Heavy Bolter
- Centreline Mounted Griffon Mortar
- Smoke Launchers

Special Rules

- Exposed Compartment

Options:

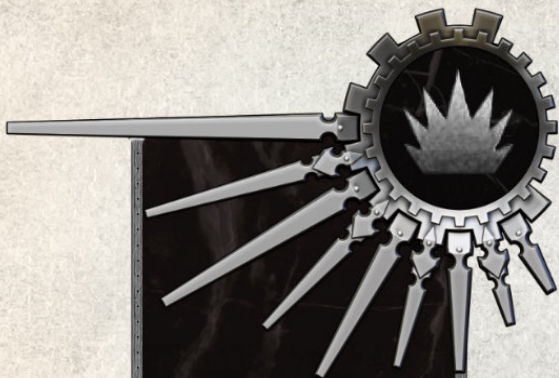

- An Imperialis Militia Helios Ordnance Carrier Squadron may include:
 - Up to 2 additional Militia Helios Ordnance Carriers..... +80 points per model
- Any Militia Helios Ordnance Carrier may replace its Centreline Mounted Griffon Mortar for one of the following options:
 - Centreline Mounted Thunderblast Cannon..... Free
 - Centreline Mounted Thudd Launcher+10 points
- Any Militia Helios Ordnance Carrier may exchange its Hull (Front) Mounted Heavy Bolter for one of the following options:
 - Hull (Front) Mounted Heavy Flamer Free
 - Hull (Front) Mounted Multi-Laser Free
- Any Militia Helios Ordnance Carrier may select one of the following options:
 - Pintle Mounted Heavy Stubber..... +5 points
 - Pintle Mounted Heavy Flamer +5 points
 - Pintle Mounted Multi-Laser+10 points
- Any Militia Helios Ordnance Carrier may select any of the following options:
 - Searchlights +5 points
 - Dozer Blade +5 points
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points

HEAVY SUPPORT

One of many variants built upon the chimera chassis, the Helios Ordnance carrier was designed as a light artillery tank able to provide indirect fire support, but also to be capable of rapid relocation when compared to its larger cousins. The weapons mounted upon the Helios did not match the range of other long-firing support platforms, but it made up for this with the ability to position itself efficiently; being able to maintain its targeting capabilities alongside its speed.

Where the Basilisk or Medusa tanks of the Solar Auxilia would fall behind the advance of Imperial forces, outpaced by the advance of the line, the Helios Carrier was able to keep up whilst continuing to lay down supporting fire.

IMPERIALIS MILITIA GOLIATH HEAVY VEHICLE SQUADRON 75 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Goliath Heavy Vehicle	12	3	13	12	10	4	8

Unit Composition

- 1 Goliath Heavy Vehicle

Unit Type

- Vehicle (Reinforced, Transport, Third-Line)

HEAVY SUPPORT

The very largest of civilian road vehicles pressed into service by the Imperialis Militias of the Age of Darkness were classified as 'Goliaths' - and this apt classification reflected the size and weight of such vehicles.

Often mounting heavy weapons or industrial tools, these vehicles could defend themselves as capably as most Imperial tanks - and with their ability to mount crew bays, industrial tools, as well as a range of various other weapons, few doubted their effectiveness on the battlefield; even despite their decidedly ordinary origins.

Wargear

- Command Crew Bay
- Turret Mounted Gravis Multi-Laser

Special Rules

- Infantry Transport
- Open-Topped (5)
- Militia Venetaris

Options:

- An Imperialis Militia Goliath Heavy Vehicle Squadron may include:
 - Up to 2 additional Goliath Heavy Vehicles..... +75 points per model
- Any Goliath Heavy Vehicle may replace its Turret-Mounted Gravis Multi-Laser with one of the following options:
 - Turret-Mounted Gravis Autocannon..... +10 points
 - Turret-Mounted Flamestorm Cannon..... +15 points
 - Turret-Mounted Heavy Seismic Cannon..... +15 points
 - Turret-Mounted Heavy Mining Laser..... +20 points
- Any Goliath Heavy Vehicle may replace its Command Crew Bay with the following option:
 - Auxiliary Crew Bay..... +15 points
- Any Goliath Heavy Vehicle with a Command Crew Bay may select the following option:
 - Sawtooth Rockgrinder..... +25 points
- Any Goliath Heavy Vehicle may select up to two of the following options:
 - Pintle Mounted Heavy Stubber..... +5 points
 - Pintle Mounted Heavy Flamer..... +5 points
 - Pintle Mounted Multi-Laser..... +10 points
- Any Goliath Heavy Vehicle may select any of the following options:
 - Searchlights..... +5 points
 - Smoke Launchers..... +5 points
 - One Hull (Front) Mounted Hunter-Killer Missile..... +10 points

IMPERIALIS MILITIA IRONCRAWLER SQUADRON..... 100 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Ironcrawler	10	3	14	13	11	4	12

Unit Composition

- 1 Militia Ironcrawler

Unit Type

- Vehicle (Third-Line, Reinforced, Slow, Transport)

Wargear

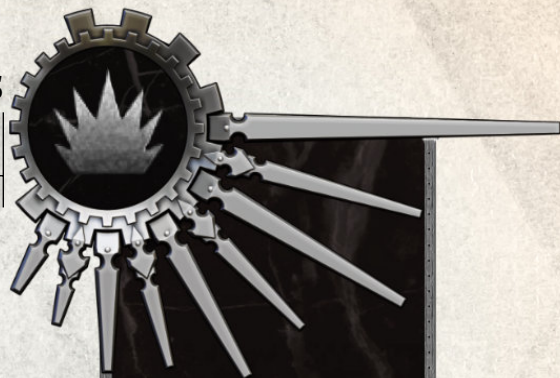

- 2 Pintle Mounted Heavy Stubbers

Special Rules

- Open-Topped (5)

Options:

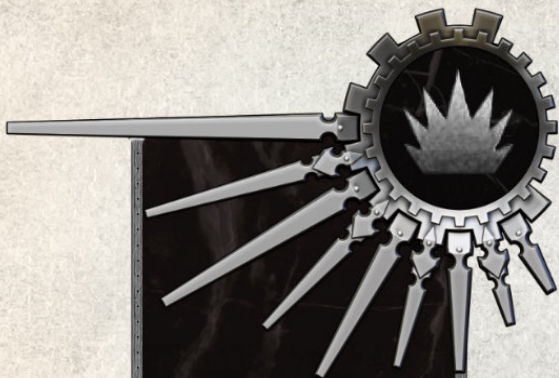

- An Imperialis Militia Ironcrawler Squadron may include:
 - Up to 2 additional Militia Ironcrawlers +100 points per model
- Any Militia Ironcrawler may replace any of its Pintle Mounted Heavy Stubbers with one of the following options:
 - Pintle Mounted Mounted Grenade Launcher (with Frag and Krak rounds) Free
 - Pintle Mounted Mounted Bolter Free
 - Pintle Mounted Mounted Combi-Bolter +2 points
 - Pintle Mounted Mounted Twin-Linked Heavy Stubber +2 points
 - Pintle Mounted Mounted Heavy Flamer +5 points
 - Pintle Mounted Mounted Impaler Harpoon +5 points
 - Pintle Mounted Mounted Combi-Weapon (any type) +5 points
 - Pintle Mounted Mounted Multi-Laser +5 points
 - Pintle Mounted Mounted Autocannon +10 points
 - Pintle Mounted Mounted Heavy Bolter +10 points
 - Pintle Mounted Mounted Seismic Cannon +15 points
 - Pintle Mounted Mounted Multi-Melta +20 points
 - Pintle Mounted Mining Laser +20 points
- Any Militia Ironcrawler may select any of the following options:
 - Searchlights +5 points
 - Smoke Launchers +5 points
 - Dozer Blade +5 points
 - One Hull (Front) Mounted Hunter-Killer Missile +10 points
 - Sawtooth Rockgrinder +20 points

HEAVY SUPPORT

A term used to describe all manner of massive all-terrain vehicles of various patterns found all across the Imperium, Ironcrawlers were utilised for a variety of transportation roles across the galaxy.

With environmentally-sealed cabins to protect the driver and cargo alike from attackers and environments, and an open platform on its rear for active security personnel, Ironcrawlers were one of the Imperium's premium haulers. At the outbreak of the civil war, commanders recognised the absolute size and robustness of these machines, using their cargo space for transporting their troops into battle, and outfitting them with a variety of weaponry to serve as a true mobile fortress.

IMPERIALIS MILITIA ARTILLERY BATTERY125 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Artillery Tank	14	3	12	10	10	3	-

Unit Composition

- 1 Militia Artillery Tank

Unit Type

- Vehicle (Third-Line)

HEAVY SUPPORT

Whilst the varied forces of the Imperialis Militias fielded static weapons platforms, many self-propelled artillery vehicles were also brought to bare. Whether retrofitted using old or otherwise redundant chassis, or purpose built through industrial processes, all manner of artillery weapons were mounted for the purposes of mobility and relocation, quickly proving to be effective.

Due to the lesser-equipped nature of Militia forces, Artillery Tanks of a less-fortunate nature that were found at the whims of flanking opposition would swiftly find themselves and their crew obliterated.

Nevertheless, the availability of these vehicles and their weapons saw them deployed repeatedly and effectively by both sides of the galactic civil war, often en-masse for maximum battlefield effect.

Wargear

- Centreline Mounted Earthshaker Cannon
- Hull (Front) Mounted Heavy Bolter
- Smoke Launchers

Special Rules

- Exposed Compartment

Options:

- An Imperialis Militia Artillery Battery may include:
 - Up to 2 additional Militia Artillery Tanks +125 points per model
- Any Militia Artillery Tank may exchange its Centreline Mounted Earthshaker Cannon for one of the following options:
 - Centreline Mounted Medusa Mortar..... +25 points
 - Centreline Mounted Mars-Colossus Bombard..... +40 points
- A Militia Artillery Tank may exchange its Hull (Front) Mounted Heavy Bolter for the following option:
 - Hull (Front) Mounted Heavy Flamer Free
- Any Militia Artillery Tank may select any of the following options:
 - Searchlights +5 points
 - Dozer Blade +5 points
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points

ADDITIONAL WARGEAR OPTIONS FOR EXISTING HEAVY SUPPORT UNITS

In addition to the normal options presented in the rules for various units, the additional wargear presented below may be selected for units at the costs shown. These are intended to be used alongside various publications, including all of Games Workshop's official publications and releases.

IMPERIALIS MILITIA RAPIER BATTERY

Options:

- All Militia Gunners in the unit may exchange their Flak Armour for the following option:
- Carapace Armour +20 points

IMPERIALIS MILITIA MALCADOR HEAVY TANK

Options:

- The unit may include:
- Up to two additional Malcador Heavy Tanks +160 points

IMPERIALIS MILITIA HEAVY ORDNANCE BATTERY

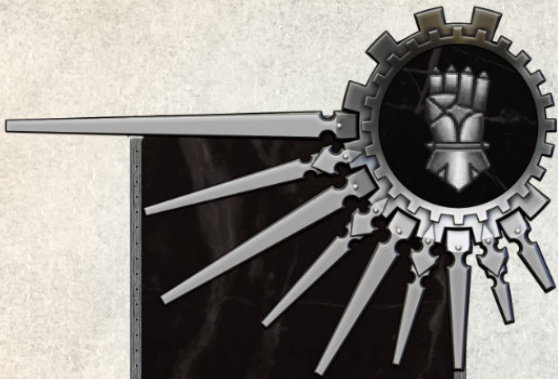

Options:

- All Militia Gunners in the unit may exchange their Flak Armour for the following option:
- Carapace Armour +20 points
- Any Gun Carriage may exchange its Earthshaker Cannon for one of the following options:
- Anvilus Autocannon Battery and Helical Targeting Array Free
- Manticore Missile Launcher (with Four Storm Eagle Missiles) +35 points

IMPERIALIS MILITIA:
Lords of War

IMPERIALIS MILITIA MARAUDER BOMBER.....385 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Marauder Bomber	18	3	12	11	10	5	-

Unit Composition

- 1 Militia Marauder Bomber

Unit Type

- Vehicle (Flyer, Lumbering, Third-Line)

LORDS OF WAR

Following the outbreak of the Civil War that plagued the galaxy from end-to-end, forces throughout the Imperium retrofitted all sorts of large-scale aircraft, from their own civilian or industrial vehicles to “retired” third-line military craft, to carry large amounts of ordnance for deployment on the field as a platform of air interdiction.

The deployment of these titanic machines was not done without consideration of many resources, and the logistics required to maintain such beasts was only achievable by the best leading minds.

Wargear

- Centreline (Front) Mounted Twin-Linked Autocannon
- Centreline (Rear) Mounted Twin-Linked Heavy Bolter
- Turret Mounted Twin-Linked Heavy Bolter
- Hull (Front) Mounted Macro-Bomb Cluster

Special Rules

- Deep Strike

Options:

- The Militia Marauder Bomber may select the following option:
 - Ramjet Diffraction Grid+30 points

IMPERIALIS MILITIA MARAUDER DESTROYER.....370 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Marauder Destroyer	18	3	12	11	10	5	-

Unit Composition

- 1 Militia Marauder Destroyer

Unit Type

- Vehicle (Flyer, Lumbering, Third-Line)

Wargear

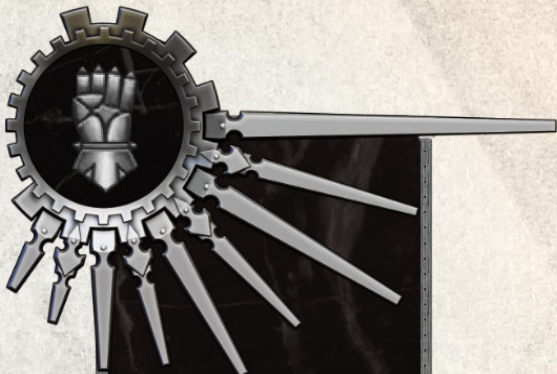

- Centreline (Front) Mounted Gravis Autocannon Battery
- Centreline (Rear) Mounted Kheres Assault Cannon
- Turret Mounted Twin-Linked Heavy Bolter
- Eight Hull (Front) Mounted Heavy Krak Rockets
- Four Hull (Front) Mounted Fragmentation Bombs

Special Rules

- Deep Strike

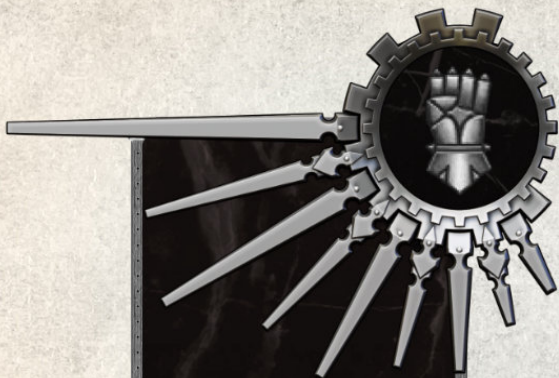

Options:

- The Militia Marauder Destroyer may exchange its eight Front (Hull) Mounted Heavy Krak Rockets for the following option:
 - Eight Hull (Front) Mounted Heavy Frag Rockets..... Free
- The Militia Marauder Destroyer may select the following option:
 - Ramjet Diffraction Grid+30 points

LORDS OF WAR

Retrofitted Gunship aircraft were fielded alongside the Bomber configurations pressed into service by the forces of the Imperialis Militia. Created using various retired military and non-military chassis to fit a wider range of weaponry, these aircraft - colloquially named Destroyers by their pilots - mounted a vast array of ranged armaments intended for close air support and air interception.

IMPERIALIS MILITIA PRAETOR ARMOURED ASSAULT LAUNCHER.....385 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Praetor Armoured Assault Launcher	10	3	13	12	12	8	-

Unit Composition

- 1 Militia Praetor Armoured Assault Launcher

Unit Type

- Vehicle (Third-Line, Super-Heavy)

LORDS OF WAR

A designation of locally produced siege vehicles, the Praetor class was made up of a number of specialist missile artillery platforms encountered during the Great Crusade. Much like the Macharius pattern, there was no standardisation between any of these crude, lumbering behemoths.

Generally looked down upon by the more regimented members of the Exertus Imperialis, these vehicles generally found themselves relegated to garrison duties. Though fitted with potent weaponry, these vehicles usually suffered from reliability and maintenance issues - though the defender's advantage present to Imperialis Militia forces alleviated these issues, allowing them to bring these behemoths devastating might to bear against their enemies.

Wargear

- Centreline Mounted Praetor Launcher
- Two Sponson Mounted Heavy Bolters
- Smoke Launchers

Special Rules

- None

Options:

- A Militia Praetor Armoured Assault Launcher may exchange both of its Sponson Mounted Heavy Bolters for one of the following options:
 - Two Sponson Mounted Heavy Flamers..... Free
 - Two Sponson Mounted Autocannons+10 points
 - Two Sponson Mounted Lascannons +20 points
- A Militia Praetor Armoured Assault Launcher may select any of the following options:
 - Searchlights +5 points
 - One Hull (Front) Mounted Hunter-Killer Missile +5 points

IMPERIALIS MILITIA CRASSUS ARMOURED ASSAULT TRANSPORT.... 300 POINTS

	M	BS	Armour			HP	Transport Capacity
			Front	Side	Rear		
Militia Crassus Assault Transport	10	3	13	12	12	8	48

Unit Composition

- 1 Militia Crassus Assault Transport

Unit Type

- Vehicle (Third-Line, Super-Heavy, Transport)

Wargear

- Hull (Front, Left) Mounted Heavy Bolter
- Hull (Front, Right) Mounted Heavy Bolter
- Two Sponson Mounted Heavy Bolters
- Smoke Launcher

Special Rules

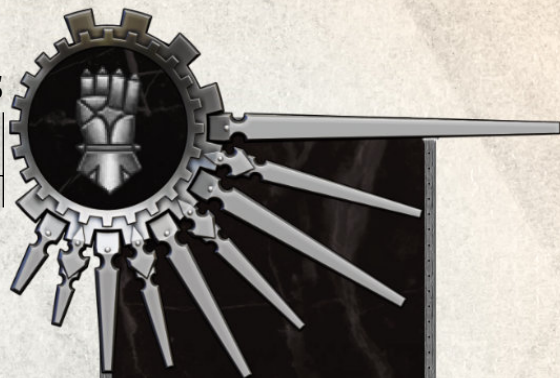

- Transport Bay

Access Points:

- A Militia Crassus Assault Transport has one Access Point at the rear.

Options:

- A Militia Crassus Assault Transport may exchange both of its Sponson Mounted Heavy Bolters for one of the following options:
 - Two Sponson Mounted Heavy Flamers..... Free
 - Two Sponson Mounted Autocannons..... +10 points
 - Two Sponson Mounted Lascannons..... +20 points
- A Militia Crassus Assault Transport may exchange its Hull (Front, Left) Mounted Heavy Bolter and Hull (Front, Right) Mounted Heavy Bolter for one of the following options:
 - Hull (Front, Left) Mounted Heavy Flamer and Hull (Front, Right) Mounted Heavy Flamer..... Free
 - Hull (Front, Left) Mounted Autocannons and Hull (Front, Right) Mounted Autocannons..... +10 points
 - Hull (Front, Left) Mounted Lascannons and Hull (Front, Right) Mounted Lascannons..... +20 points
- A Militia Crassus Assault Transport may select any of the following options:
 - Searchlights..... +5 points
 - One Hull (Front) Mounted Hunter-Killer Missile..... +5 points

LORDS OF WAR

The Crassus Transport was commonly seen in use by the armies of the Imperialis Militia; more akin to giant ark-ships used to transport ancient man across the seas of Terra than the tracked behemoths required to traverse the dangerous environs of the Age of Darkness. The enclosed nature of their armoured shells offered proof against shot and shell to the contingent of soldiers that huddled inside, resounding as though a struck bell when a shot rang true.

Though not as widespread as the Gorgons more often seen in service of Militia forces, these vehicles were prized by many commanders on both sides of the Heresy.

LIBER IMPERATUS:
Archaeotechnological Relics

ARCHAEOTECHNOLOGICAL RELICS

In the wake of the Age of Strife and the coming of the Great Crusade, considerable amounts of esoteric and powerful technologies were uncovered by the Emperor's armies; whether pried from the bodies of slain warlords or found buried away by unknown hands. These relics included weaponry, as well as other dangerous and poorly understood devices that would nonetheless prove especially potent on the battlefield. These were inevitably taken up by the most influential of the Imperium's champions – in spite of the Mechanicum's efforts to catalogue and hoard them.

Whilst the Legiones Astartes inherently favoured archaeotech that enhanced their killing potential, many officers of the Excerptus Imperialis took a view that their service was a means to an end; anticipating a life beyond warfare, or at least a dynasty that would continue long after their remains had gone cold. As a sign of their prestige and influence, a great deal of such archaeotech made its way into the hands of this burgeoning aristocracy, much of it – on the surface – frivolous or relatively impotent – but just as many pieces concealed a deadly purpose or had an unconventional battlefield application.

A Solar Auxilia Legate Marshal, Rogue Trader Militant, or Imperialis Militia Force Commander (who must either be in a Detachment with the Armoury of Old Night Provenance, or have the Merchant Princeling or Connoisseur of Alien Curios Warlord Traits) may make a single selection from the following Archaeotechnological Relics list, paying the respective points cost in each entry to select that wargear item. Each item may grant the model to be upgraded with a number of new Special Rules, abilities, or may modify the upgraded model's Unit Type, Unit Sub-Type, or Characteristics. In all cases, the Archaeotechnological Relic will specify all changes, benefits and limitations.

Archaeotechnological Relics must be visually represented on the upgraded model by a suitable conversion on the model where possible.

ARCHAEOTECHNOLOGICAL RELIC: APEX DIGITAL WEAPON

Digital weapons were highly sought after by those of wealth and influence as signs of their prestige – apex-class weapons most of all. Ostensibly little more than decorative but otherwise unremarkable signet rings, they disguised weapons of considerable power.

This Archaeotechnological Relic may be purchased for an applicable model at a cost of +15 points.

Once per game when making a Shooting Attack, a model with an Apex Digital Weapon can declare it will fire either a Disintegrator, Lascannon, Multi-Melta, Plasma Cannon or Volkite Culverin. When firing this weapon, treat the model as if it had the Relentless Special Rule.

ARCHAEOTECHNOLOGICAL RELIC: DISPLACER MATRIX

Shield generators that utilised teleportation as a means of protection, Displacer Maxtrixes were known to disappear the bearer out of harm's way entirely if necessary – whether they wished to abandon the field or not.

This Archaeotechnological Relic may be purchased for an applicable model at a cost of +30 points.

A Displacer Matrix provides a 3+ Invulnerable Save. This Invulnerable Save does not stack with other Invulnerable Saves, and cannot benefit from rules (like Cyber-Familiar wargear) that specifically increase existing saves. If a model has another Invulnerable Save then the Controlling Player must choose which one to use.

In addition, the first time a roll of '1' is made for an Invulnerable Save for a model with a Displacer Matrix, the Wound is ignored, and the model is removed from the battlefield, entering the Controlling Player's Reserves assigned to a Deep Strike Assault (even if one had already been made earlier in the game). If the model was part of a unit, they count as having left the unit – even if they would not ordinarily be allowed to do so. No other units may be assigned to this Deep Strike Assault, and resolving this Deep Strike Assault does not prevent the Controlling Player from resolving another Deep Strike Assault later in the game if they have units still assigned to one. This Deep Strike Assault automatically arrives in the Controlling Player's next game turn. If the Deep Strike Assault is Disordered, or the game does not continue into the next turn (in which this model would arrive), then the model is counted as Destroyed.

ARCHAEOTECHNOLOGICAL RELIC: GRAV-WAVE GENERATOR

Small and portable devices sent out pulses of force that momentarily slowed advancing foes, sapping their charge of momentum.

This Archaeotechnological Relic may be purchased for an applicable model at a cost of +10 points.

When an enemy unit declares a Charge targeting a unit which includes a model with a Grav-Wave Generator, the unit may make the Hold The Line Advanced Reaction (see the Horus Heresy: Age of Darkness rulebook, page 330) without expending a point of the Reactive Player's Reaction Allotment, and automatically passes the associated Morale Check. This does not allow the unit to make more than one Reaction per Phase, but does allow the Controlling Player to exceed the normal three Reactions limit in a given phase.

In addition, a model receives no benefit from the Hammer of Wrath (X) Special Rule if they Charge a unit which makes a Hold The Line Advanced Reaction that includes a model with a Grav-Wave Generator.

ARCHAEOTECHNOLOGICAL RELIC: METAPHASIC READER

Unique scanners of unknown design, these devices utilised input devices that were capable of detecting every form of energy known to the Mechanicum - and several to which the Martian Priesthood at large remained ignorant of.

This Archaeotechnological Relic may be purchased for an applicable model at a cost of +20 points.

A model with a Metaphasic Reader gains the Night Vision Special Rule, and enemy models cannot be deployed using the Infiltrate Special Rule within 18" of a model with a Metaphasic Reader.

In addition, when any enemy unit is deployed to the battlefield from Reserves, a unit that includes at least one model with a Metaphasic Reader may make the Interceptor Advanced Reaction (see the Horus Heresy: Age of Darkness rulebook, page 309) without expending a point of the Reactive player's Reaction Allotment. This does not allow the unit to make more than one Reaction per Phase, but does allow the controlling player to exceed the normal three Reactions limit in a given Phase.

ARCHAEOTECHNOLOGICAL RELIC: PSI-JAMMER

Harnessing a combination of many poorly understood technologies, Psi-Jammers generated an invisible barrier which mitigated the effects of psychic powers in the vicinity of the wearer.

This Archaeotechnological Relic may be purchased for an applicable model at a cost of +20 points.

Any enemy model within 18" and line of sight of a model with a Psi-Jammer must reduce its Leadership by -2 when making Psychic Checks. This modifier is not cumulative and no model may suffer penalties from more than one Psi-Jammer.

In addition, a model with a Psi-Jammer and any unit they have joined gains the Adamantium Will (5+) Special Rule.

ARCHAEOTECHNOLOGICAL RELIC: VOID SHIELD HARNESS

This armoured harness mounted upon its rear an impressive and heavy-looking shield projector - the field from which, when struck, could deflect all weaponry save those normally reserved for destroying armoured vehicles.

This Archaeotechnological Relic may be purchased for an applicable model at a cost of +35 points.

A model with a Void Shield Harness gains the Void Shields (2) Special Rule. Whenever a Shooting Attack is assigned to a unit containing a model with a Void Shield Harness, that Shooting Attack must instead target the Void Shields (even if that attack had the Sniper or Precision Shots (X) Special Rule), so long as they have not been collapsed earlier in the battle. In addition, when the Void Shields provided by a Void Shield Harness collapse, all models within D6" of a model with a Void Shield Harness suffer an immediate hit at S8 AP-.

**LIBER IMPERATUS:
Psychic Disciplines**

IMPERATUS PSYCHIC DISCIPLINES

This document includes a number of Psychic Disciplines referenced from elsewhere. These are presented here for easy reference and operate under the rules established for Psychic Disciplines in the **Horus Heresy: Age of Darkness Core Rulebook**:

Psychic Discipline: Anathemata

A Psyker with this Discipline and the Traitor Allegiance gains the Breach the Veil Psychic Power and the Void Darts Psychic Weapon. A Psyker with this Discipline and the Loyalist Allegiance gains the Seal the Veil Psychic Power and the Void Darts Psychic Weapon. Psykers with this Discipline of any Allegiance also gain the Aetheric Lightning Psychic Weapon (see page 322 of the Horus Heresy: Age of Darkness rulebook for the rules for Aetheric Lightning) - unless they have already gained this power from another source.

Seal the Veil (Psychic Power)

Whether by sheer force of will, or indeed by beseeching a higher power, the Psyker compelled the very fabric of reality to reknit and heal itself.

Instead of making a Shooting Attack, a Psyker with this Psychic Power may select a single enemy unit composed entirely of models with the Daemon Unit Type or Corrupted Unit Sub-type that is within line of sight and has at least one model within 18" of the Psyker. All models in the target unit must reduce their Strength and Toughness by 1 (to a minimum of Toughness or Strength 1) until the end of the target unit's Controlling Player's next turn - the Controlling Player of the Psyker using this Power may then choose to make a Psychic check for the Psyker. If the Check is passed the target unit also suffers Perils of the Warp, and if the Check is failed then both the target unit and the Psyker using this Psychic Power suffer Perils of the Warp.

Breach the Veil (Psychic Power)

Calling out to those beyond the void, the Psyker invited those darkling horrors to intrude into the materium.

Instead of making a Shooting Attack, a Psyker with this Psychic Power may select a point within 12" and at least 3" away from any enemy model or Impassable Terrain - place a Blast (3") Marker to represent the Warp Rift until this power is resolved.

The Controlling Player may then choose to make a Psychic check for the model casting this Psychic Power. If the Check is failed or not taken then the chosen point is scattered as per the normal rules for Scatter. If it scatters onto Impassable Terrain, within 3" of an enemy model, or off of the edge of the battlefield then the model casting this Psychic Power suffers Perils of the Warp, and the chosen point is moved the minimum distance required in a direction of the Controlling Player's choice to place it clear of all Impassable Terrain, on the battlefield, and at least 3" away from any enemy model. If the Check is passed then the Warp Rift does not scatter.

Once the final location of the chosen point is determined, the model casting this Psychic Power's Controlling Player may choose to deploy up to one of the Ruinstorm Daemon units in Reserves onto the battlefield (that player may choose to place no units if they wish). That unit moves onto the battlefield from any point along the edge of the Blast marker placed to represent the Warp Rift as if it was entering play from Reserves, treating the Warp Rift marker as though it was the Controlling Player's battlefield edge.

Once all models in the unit have moved onto the battlefield, the Warp Rift marker is removed from play. The Daemon unit brought into play by use of this power may be targeted by the Interceptor Reaction and may act as normal in the Shooting phase in which it arrives and may declare a Charge in the Assault phase of the turn in which it enters play.

Note that to use this power, a player will need access to the Ruinstorm Daemons Army List.

Void Darts (Psychic Weapon)

Crafting the very substance of unreality into a weapon, the Psyker cast forth that energy as bladed projectiles, capable of damaging both things from our reality - and those from without.

	Range	Str	AP	Type
Void Darts	18"	5	4	Assault 12, Sanctic, Deflagrate, Psychic Focus

Psychic Discipline: Diabolism

A Psyker with this Discipline gains the listed Powers, Weapon and other Special Rules, as well as the Aetheric Lightning Psychic Weapon (see page 322 of the Horus Heresy: Age of Darkness rulebook for the rules for Aetheric Lightning) - unless they have already gained this power from another source.

A Dark and Terrible Power (Psychic Power)

Great were the boons available to those who accepted the power of the immaterium; though the price was, unbeknownst to most, yet to be paid...

When a Charge is declared for a model with this power, or for a unit that includes a model with this power, the Controlling Player may choose to make a Psychic check for the model before any dice are rolled to determine the Charge Distance of that Charge. If the Psychic check is successful then the model with this power gains the Hammer of Wrath (3) Special Rule and increases both their Strength and Toughness Characteristics by +1 for the duration of that Assault phase. If the Check is failed then the model suffers Perils of the Warp, and once that has been resolved gains +1 to both its Strength and Toughness Characteristics until the start of the Controlling Player's next turn.

Hellfire (Psychic Weapon)

Calling forth the malign sentence of the warp itself, the Psyker projected it forth as a torrent of gelid flame which seemed to cackle and cry as it burned.

	Range	Str	AP	Type
Hellfire	Template	7	4	Assault 1, Rending (6+), Deflagrate, Psychic Focus

Psychic Discipline: Navis Astrologis

A Psyker with this Discipline gains the listed Powers, Weapon and other Special Rules.

Lidless Stare (Psychic Weapon)

Opening their third eye, the Navigator could project forth horrors only they could see; colour and shape out of phase with our reality burning the very minds of those unprepared to see such horrific things.

	Range	Str	AP	Type
Lidless Stare	Template	2	-	Assault 1, Pinning, Force, Instant Death

LIBER IMPERATUS:
Unit Types

IMPERATUS UNIT TYPES

This document includes a number of new unit Sub-types to represent the various sub-factions of the Imperium, as well as some referenced from elsewhere. These Unit Types and Unit Sub-types are presented here for easy reference and operate under the rules established for Unit Types and Unit Sub-types in the **Horus Heresy: Age of Darkness Core Rulebook**:

ANATHEMA UNIT SUB-TYPE

Unspeakably rare, some humans were born without a warp presence - and some whispered, thusly a soul - and were as a result harvested in their thousands by a scheme of the Emperor's designing to swell the ranks of the Silent Sisterhood.

The following rules apply to all models with the Anathema Sub-type:

- A unit that includes at least one model with the Anathema Sub-type may not be directly targeted by any Psychic Power or use any Psychic Power or make attacks with a Psychic Weapon. Psychic Powers whose effects would otherwise be applied to a unit that includes at least one model with the Anathema Sub-type (due to area of effect, scattering or other rules) have no effect, but are not cancelled and may continue to affect other units.
- A model with the Anathema Sub-type that is allocated Wounds caused by a Psychic Weapon (which is any weapon granted to a unit or model by a Psychic Discipline) will always fail to Wound without any dice being rolled and any special rules attached to that Psychic Weapon will not trigger. Any Wounds allocated to a model with the Anathema Unit Sub-type caused by a Force Weapon gain no benefit from the Force, Achean Force, or Soul Tear Special Rules, but are otherwise resolved as normal. These effects do not apply to a model with the Transport Sub-type that has models with the Anathema Sub-type Embarked within, unless the model with the Transport Sub-type also has the Anathema Sub-type.
- All models that do not have the Anathema Sub-type, but are part of a unit that includes one or more models with the Anathema Sub-type, suffer a penalty of -2 to their Leadership Characteristic, and models with the Anathema Sub-type suffer a penalty of -1 to their Leadership. Any unit with at least one model within 6" of a model with the Anathema Sub-type suffers a penalty of -1 to the Leadership of all models in that unit that do not also have the Anathema Sub-type, or -2 if that unit includes one or more models with the Corrupted or Psyker Sub-types, or the Daemon Unit Type. Note that these two penalties are not cumulative; they apply only the most severe penalty. However, they do stack with other Special Rules that modify Leadership (such as the Fear (X) Special Rule).
- A unit that is Embarked on a Vehicle, Fortification or Building suffers no penalties to its Leadership Characteristic due to the Anathema Sub-type. However, units with the Stubborn Special Rule do suffer penalties to their Leadership from the effects of this Sub-type (note that this only applies to the Stubborn Special Rule, and other special rules that ignore penalties to Leadership ignore the effects of the Anathema Sub-type).

ASURYANI UNIT SUB-TYPE

The remnants of the Aeldari Empire did not take to the fields of war often in the years following the Fall; but on those occasions that they did, the Children of Asuryan displayed a power and mastery that echoed their heights of old.

The following rules apply to all models with the Asuryani Sub-type:

- Any model with this Sub-type has the Legacies of the Fall Special Rule.
- Any model with the Infantry or Cavalry Unit Type and this Sub-type has the Battle Focus Special Rule.

CORRUPTED UNIT SUB-TYPE

As the Horus Heresy progressed, the Warmaster's armies became increasingly twisted in body and soul by the malign influence of the Emyrean.

The following rules apply to all models with the Corrupted Sub-type:

- All models with the Corrupted Unit Sub-type gain the Fear (1) Special Rule.
- Any Hits inflicted on a model with the Corrupted Unit Sub-type by a weapon with the Force or Psychic Focus Special Rules gain the Instant Death Special Rule.
- Any unit composed entirely of models with the Corrupted Unit Sub-type is immune to the effects of the Fear (X) Special Rule, automatically passes Regroup tests, and cannot choose to fail a Morale check due to the Our Weapons Are Useless Special Rule. When a unit composed entirely of models with the Corrupted Unit Sub-type fails a Morale check it does not Fall Back as per the standard rules, but instead suffers D3 automatic Wounds with no saves or Damage Mitigation rolls of any kind allowed.
- No unit that does not also have the Corrupted Unit Sub-type or the Daemon Unit Type may join a unit that includes one or more models with the Corrupted Unit Sub-type.

GUARDIAN UNIT SUB-TYPE

Certain automata lacked any initiative of their own, existing only to shield their masters from harm.

The following rules apply to all models with the Guardian Sub-type:

- Units including models with the Guardian Unit Sub-type may Embark freely upon models with the Transport Unit Sub-type and within Buildings and Fortifications as if they had the Infantry Type, even if their Unit Type would normally restrict this.
- Units including models with the Guardian Unit Sub-type may be joined by friendly models with the Character Unit Sub-type or Independent Character Special Rule, and when they are joined in this manner may make Reactions, even if their Unit Type would normally restrict this.
- If a unit contains any models with the Guardian Unit Sub-type as well as one or more models with the Character Unit Sub-type, any Wounds which would be allocated to the Character (even those caused by the Precision Strikes (X) or Sniper Special Rules) may instead be allocated to a model with the Guardian Unit Sub-type first.
- Unless they are joined by a friendly Character, all models with the Guardian Unit Sub-type suffer the following provisions:
 - Reduce their Movement Characteristic by -2 and may not Run.
 - Reduce their Initiative Characteristic to 1.

RILLIETANN UNIT SUB-TYPE

The most enigmatic of all the Aeldari, the Rillietann - Harlequins, in low gothic - were masters of war and performance in equal measure. Their blend of theatrical storytelling and combative finesse combined into a unique - and supremely dangerous - style of warfare.

The following rules apply to all models with the Rillietann Sub-type:

- Any model with this Sub-type has the Fear (1), Move Through Cover, Hit & Run, Chosen Warriors, and Furious Charge (1) Special Rules.
- Models with this Sub-type may only be taken in a Saedathii Detachment.

SYCOPHANTICA UNIT SUB-TYPE

These automata-constructs contained engrams that made them unusually responsive to esoteric stimuli - causing them to hunt it down with something bordering fanatical anger. Many speculated that the data-constructs forming the mind of these machines actually bore a darker origin - that of the mind, and even perhaps brain-matter, of a slain Silent Sister, forever imprisoned in an engrammatic code-hell.

The following rules apply to all models with the Sycophantica Sub-type:

- As long as a unit including models with the Sycophantica Unit Sub-type also includes at least one model with the Character Unit Sub-type, the unit may make Reactions, even if their Unit Type would normally restrict this.
- A model with the Sycophantica Unit Sub-type may fire all weapons they are equipped with in each Shooting Attack they make, including as part of a Reaction where eligible.
- Models with the Sycophantica Unit Sub-type may fire Heavy and Ordnance weapons and count as Stationary even if they moved in the preceding Movement phase, and may declare Charges as normal regardless of any Shooting Attacks made in the same turn.
- Models with the Sycophantica Unit Sub-type ignore any penalties to their Initiative Characteristic when Charging into or through Difficult Terrain or Dangerous Terrain.

LIBER IMPERATUS:
Special Rules

IMPERATUS SPECIAL RULES

The units that form the various sub-factions in this document have a number of additional new Special Rules - these can be found below. These function in addition to the Special Rules found in the official Horus Heresy publications, and operate under the broader Rules and Conventions laid out in the **Horus Heresy: Age of Darkness** Core Rulebook.

Abominant Aura

To stand in proximity of the Repressor-Constructs bound to the Silent Sisterhood whilst possessing malintent toward their Null-Maiden guides was to invite their dread aura forth. Unbelievably potent, this projected malignance was likened in effect to feeling the weight of a thousand souls dragged to their doom for their defiance of His Will - and the inevitability of following their path for any similar transgression...

Models with the Traitor Allegiance suffer a penalty of -1 to their Initiative and Leadership Characteristics whilst within 6" of a unit containing a model with this Special Rule. This penalty is cumulative with other effects, and units with the Stubborn Special Rule do suffer penalties to their Leadership from the effects of this Special Rule (note that this only applies to the Stubborn Special Rule, and other Special Rules that ignore penalties to Leadership ignore the effects of the Abominant Aura Special Rule).

Aerial Interception

Some weapon platforms were equipped with suites of sensor auguries, gyroscopic aim assistors, or other more arcane targeting systems which let them quickly bring heavier weapons to bear upon incoming aircraft.

A model with this Special Rule which performs the Interceptor Advanced Reaction may fire a single Battle Weapon it is equipped with when shooting at a unit with the Flyer Unit Sub-Type.

Agripinaan Guidance System

Pioneered by the Forge World of Agripinaa, these guidance systems contained an array of additional scanners and range finders. Though initially promising, these systems caused cataclysmic errors and conflicts with almost all other machine spirits. Only the Eradicator pattern of Leman Russ, and a scant handful of other chassis, showed complete compatibility with these systems, their machine spirits belligerent enough to accept the technology - all the better to lay waste to their enemies.

A weapon with this Special Rule may toll two Scatter Dice when firing a weapon with the Blast (X) Special Rule; and may select one of those dice to discard when resolving that weapons scatter. When firing a weapon with this Special Rule, if this model re-rolls its scatter die then it must re-roll both.

Alpha Psyker

The most powerful Psykers possessed extremely high psionic potential and had little difficulty unleashing devastating displays of power - with or without training.

A model with this Special Rule gains the Anathemata Psychic Discipline (see page 264). In addition, they may select a single Psychic Discipline from the following list: Biomancy, Pyromancy, Telekinesis (see the Horus Heresy: Age of Darkness Core Rulebook, page 322), Diabolism (see page 269).

Among the Flock

Many Demagogues took their place among the rank and file; whether to shepard the faithful or inspire new followers.

An Imperialis Militia Demagogue Cadre is selected like any other unit, using up a single Force Organisation slot and bought in the same manner. However, before the first turn begins and any models are deployed to the battlefield, all models in an Imperialis Militia Demagogue Cadre must be assigned to another unit from the same Detachment of the army they were selected as part of. Demagogues may only be assigned to units composed entirely of models with the Infantry Unit Type, and either the Militia or Artillery Unit Sub-Types, unless upgraded to a Mounted Demagogue, in which case that model must be assigned to a Unit with the Cavalry Unit Type and the Militia Unit Sub-Type.

Once assigned to a unit, the Demagogue is considered part of that unit and may not leave it under any circumstances - if that unit is removed as a casualty then the Demagogue is removed as well. In battles using Victory points, no Victory points are ever scored for removing a Demagogue as a casualty. When assigned to a unit, an Demagogue gains all of the special rules (with the exception of those that specifically forbid it, such as the Bitter Duty Special Rule) and Unit Sub-types listed for the unit to which it is attached, but does not gain access to any additional Wargear options available to the unit to which it is assigned.

Amphibious

Some vehicles were designed to cross bodies of water that would have impeded most other forces.

A model with this Special Rule treats all water-based terrain as Open Terrain when it moves.

Armoured Doors

Often retracted when delivering its passengers on the ground, the Otos' heavy duty doors were designed to protect its cargo from the vagaries of void combat.

At the beginning of the Controlling Player's Movement phase, the Controlling Player must decide if the Otos Transport's Armoured Doors will be opened. If the doors are declared to be open, then the Otos Transport gains the Open-Topped (4) and Assault Vehicle Special Rules until the beginning of the Controlling Player's next Movement phase, where they are assumed to automatically close.

Armoured Superstructure

Approaching in bulk that of a Super-Heavy vehicle, some armoured behemoths could withstand blows that would utterly destroy a lesser target.

Whenever a roll is made on the Vehicle Damage Table against a model with this Special Rule, subtract -1 from the result rolled.

Array Fire (X)

Some vehicles – most famously the Chimera – mounted weaponry intended to be crewed by its passengers, allowing them to contribute to its defence even while sheltered within.

A weapon with this Special Rule may only be fired if the model equipped with it is a Transport with at least one model embarked upon it. For each model embarked, the weapon may be fired again as part of the same Shooting Attack, up to a total number of times equal to the value in brackets. Models with the Bulky (X) Special Rule count as a single model for the purposes of this Special Rule.

Artillery Spotters

These spotters worked in tandem with their charges, calling targets for those under their command to assail.

A unit with this Special Rule may grant the benefits of a Cognis Signum it has purchased to a single unit with at least one model within 6" of a model from this unit, instead of using the benefit itself.

Note that the unit must be from the same Tercio as it to grant it the benefits of the Cognis Signum in this way.

Astra Telepathica

Bound in soul and mind to the Emperor Himself, those from among the Astra Telepathica could send messages across vast distances, warnings and portents all...

A model with this Special Rule and the Psyker Sub-type must select a single Psychic Discipline from the following list: Divination, Telepathy, Telekinesis (see the Horus Heresy: Age of Darkness Core Rulebook, page 322).

Astropathic Communication

When not required to bridge the enormity of space to send their messages, an Astropath's abilities can be used to relay communiques between the relatively short distances to a circling spacecraft, to assist in coordinating ground-based armies.

As long as a model with this Special Rule is on the battlefield (but not in Reserves) then all Reserve rolls made by the Controlling Player may be re-rolled.

Attack Wing

Often deployed in squadrons to act as one, these craft soared and swooped through the skies in great wings, diving upon enemies to deliver their doom.

When deployed onto the battlefield (either at the start of the battle or when arriving from Reserves), all models with this Special Rule in a unit must be placed within unit coherency, but afterwards operate independently and are not treated as a unit. Once a unit with this Special Rule has separated, each model counts as its own unit for the purposes of Victory Points, Units Destroyed, and similar rules.

Auramite Talon

Operating together in perfect synchronicity, not even death could prevent the warriors of the Custodians from fighting in lockstep.

When deployed onto the battlefield (either at the start of the battle or when arriving from Reserves), all models with this Special Rule in a unit must be placed within unit coherency, but afterwards operate independently and are not treated as a unit. Once a unit with this Special Rule has separated, each model counts as its own unit for the purposes of Victory Points, Units Destroyed, and similar rules.

Auxilia Rangers

A designation applied to the Solar Auxilia's scouting forces, these units moved ahead of the main battleline to perform reconnaissance, disruption, and coordination work. Trained to harry their foe in any manner they could to hinder their movements, Auxilia Rangers specialised in this duty to allow the main battlelines hammering strikes to better impact their enemy.

A unit that includes any models with this Special Rule may not join or be joined by any model that does not also have this Special Rule, and a unit that includes any models with this Special Rule may never count as a Scoring unit or a Denial unit regardless of any other Special Rule or Mission rules in use.

In addition, models with this Special Rule may re-roll all failed Shrouded Damage Mitigation saves.

Auxiliary Vehicle Bay

Certain transports were of such large scale that they were able to carry smaller vehicles directly into battle, though the risk of deploying them under fire was considerable.

Models with the Vehicle Unit Type may Embark on a model with this Special Rule, Embarking and Disembarking as per the normal rules for Embarking/Disembarking. A model with this Special Rule may carry one model with the Vehicle Unit Type whose starting Hull Points Characteristic is 4 or less. A model with the Vehicle Unit Type Embarking or Disembarking from a model with this Special Rule may do so from any point on the model's base, or its hull if it has no base.

Battle Focus

Warriors of the Aeldari entered a semi-trance state when at war, enabling them to enact pinpoint assaults whilst still utilising their natural agility for rapid repositioning.

A unit composed entirely of models with this Special Rule may choose to Advance in the Controlling Player's Movement Phase and still shoot in the following Shooting Phase. If they choose to Advance in the Movement Phase, all shooting attacks the unit makes in the following Shooting Phase are resolved at a Ballistic Skill Characteristic of 2.

Battle Psyker

Battlefield psykers were rare among the Solar Auxilia, but the cohorts who enlisted them could call upon a range of powers to devastate enemy ranks and support their Tercios.

An Auxilia Battle Psyker may select a single Core Psychic Discipline from the following list: Biomancy, Divination, Pyromancy, Telekinesis, Telepathy, Thaumaturgy (see the Horus Heresy: Age of Darkness Core Rulebook, page 322).

Battle-Automata

It was not uncommon for Engineers to deploy alongside Battle-Automata seconded to the Imperialis Auxilia. In such circumstances, an Adept's duties extended to issuing machine-cant commands during combat and, in the aftermath, scouring the field for wounded Auxiliaries who might replace their fallen.

For every model in a Detachment with this Special Rule that is also equipped with a Cortex Controller, a single Thallax Cohort or Castellax Battle-Automata Maniple (see Liber Mechanicum) may be included in the army as an Elites choice. A Thallax Cohort selected in this way may not select a Dedicated Transport.

Bunker Drop

Many forces of the Imperialis Militia chose to utilise makeshift fortifications on the battlefields of the Horus Heresy. Typically retrofitted cargo containers, these were well built enough to protect those inside from small arms fire, if not a little claustrophobic.

A model with this Special Rule starts the game carrying a single Deployable Bunker, which does not use up any Force Organisation slot. This bunker is a Fortification (Building) and has Access Points on each side. It has Front, Side, and Rear Armour Values of 12, a Hull Points value of 4, a Fire Points value of (Front, 6), and a Transport Capacity of 12. This Deployable Bunker may also choose to select two Emplacement Mounted Heavy Stubbers at no additional points cost. Models may start the battle Embarked within the Deployable Bunker, but may not disembark until the Deployable Bunker is deployed, and the Deployable Bunker or its Embarked unit may not act until the Deployable Bunker is deployed.

Whenever the Kelaino Sky-Talon is eligible to have models Disembark, it may instead choose to deploy the Deployable Bunker. Place the Deployable Bunker within base contact of the Kelaino Sky-Talon. If there is no location in which the Deployable Bunker can be placed on the battlefield in which its final position is not within 1" of an enemy model, Objective Marker, or Impassable Terrain, then the Deployable Bunker may not be deployed. If the Deployable Bunker may be deployed, and the model's final position has been decided, the Deployable Bunker remains in that location for the duration of the game and is now treated as a Fortification, following all usual rules that Fortifications follow.

If a Kelaino Sky-Talon suffers the Crash and Burn damage result whilst it is carrying a Deployable Bunker, after resolving the initial Crash and Burn result (as shown on the Vehicle Damage table), resolve an additional Small Blast (3") marker using the Crash and Burn rules. The Flyer, the Deployable Bunker, and any unit that was embarked within it, are then removed from play.

Designer's Note: The Bunker should be roughly of a size which allows it to fit on a 120 x 92mm base.

Burst (X)

Designed to fire multiple projectiles in quick succession, the speed of such fire ensured that if one shot was on target, all that followed it were also sure to connect.

If this weapon inflicts a Hit then instead of one Hit it inflicts a number of Hits equal to the number in brackets included as part of the Special Rule.

By His Sanction Alone

Some weapons were simply too great and terrible to be authorised for use against any foes but the most dangerous - requiring the sanction of the Emperor Himself, or one of near-standing, to authorise their use.

A model with this Special Rule may only be selected in a Detachment that also contains the Army's Warlord, and in games of 2,500 points or above.

Combat Transporter

The sheer weight of the cargo this vehicle carries made it hard to properly deploy countermeasures.

If a model with this Special Rule is carrying a Vehicle or any Dreadnoughts in its Auxiliary Vehicle Bay, reduce any rolls for Countermeasures Saves it makes by -1.

Countdown to Launch...

The blaring of alarms and targeting cogitators signalled the priming and preparation of these dread weapons to fire, often only moments before they flared to life in a cone of raw fire and took to the skies.

A Deathstrike Missile Platform may not fire its Deathstrike Missile normally for any reason. Instead, in order to fire a Deathstrike Missile, the Controlling Player should roll a D6 and add the current Turn Number during the Controlling Player's Shooting Phase. If the total is 7 or higher, the Deathstrike Missile is immediately launched!

The Controlling Player must laugh maniacally, then proceed to resolve their selected Warhead anywhere on the battlefield - It should be noted that the Warheads do not have a Range as the Blast Marker can be placed anywhere the battlefield! This Blast Marker must still be Scattered following the usual Rules, reducing the distance scattered by the model's own unmodified Ballistic Skill.

Once fired, a Deathstrike Missile may not be fired again for the remainder of the game for any reason, and is counted as having suffered an irreparable Weapon Destroyed Result. A Deathstrike Missile cannot suffer the effects of Weapon Destroyed results for any other reason, and is immune to any effects which would allow another player to fire a weapon belonging to an enemy model.

Crew-Served Weapon

The weight and bulk of some heavy weapons required multiple troops to partially deconstruct and carry them when repositioning or boarding most transports.

A model with this Special Rule may Embark on models with the Transport Unit Sub-Type and Infantry Transport Special Rule, contrary to the restriction on models with the Bulky (X) Special Rule rule, but still must take into account their size due to the Bulky (X) Special Rule.

Defender

Some weapons committed to hindering and hampering enemy combatants with hot shrapnel or shocking blasts rather than damaging the foe directly.

A unit hit by one or more models or weapons with this Special Rule from attacks made during an Overwatch Reaction resolve their attacks in the following Assault Phase with a negative modifier of -1 to their to-Hit rolls.

Destructor

Some strikes heaped damage upon damage, their pummelling strikes grinding and breaking through any obstacle in their path.

When a model is allocated a Wound or Hull Point Loss inflicted by a weapon with this Special Rule, it does not suffer only one Wound or Hull Point of damage, but instead suffers D6 Wounds or Hull Points of damage instead, with all of the Wounds or Hull Points inflicted using the same AP and special rules as that of the initial Wound. Roll to save against each Wound or Hull Point of damage inflicted separately, but note that Wounds or Hull Points of damage caused in excess of a given model's remaining Wounds or Hull Points do not spill over to other models and are lost.

In addition, if the target of this attack is a model with the Knight, Titan, Gargantuan, Super-Heavy Vehicle, or Building or Fortification Unit Type, or the Monstrous Unit Sub-type, increase the number of Wounds suffered or Hull Points lost to 2D6.

Dimensional Edge (X)

The blade of this weapon was not truly at home in our reality - and the exotic matter that constituted its form would, when caught in the right phase, pass straight through any matter it touched.

Weapons with this Special Rule can only ever cause a Wound on the number indicated in brackets. No Saves or Damage Mitigation rolls of any kind may be taken against Wounds caused by this weapon.

Embrace of Death (X)

Some weapons were so swift as to defy the eyes, moving before perceptions could even register their presence.

On a turn in which a model equipped with a weapon with this Special Rule charges, or are themselves charged, they may make a number of attacks indicated in brackets at Initiative step 10 with it, but may not assign or make any further attacks to or with it. Note this attack does not grant an additional Pile In move, and a weapon with this Special Rule may not be used in subsequent turns of the same combat, but may be used even if the charge made was Disordered.

Emplaced Position

Heavy Weapon Sections were equipped with crew-portable weaponry that required valuable seconds to prepare a viable firing position.

A unit that includes any models with this Special Rule may only make the Return Fire or Overwatch Core Reactions, or the Interceptor Advanced Reaction – no other Reaction of any kind may be made.

Engine Overcharge

Some engines on civilian vehicles could be coaxed to impressive levels of performance, at some risk to the vehicle and its crew both.

Whenever a unit with this Special Rule moves as part of a Reaction, the distance may be increased by +6", but if the unit chooses to do so, all models in the unit must immediately make a Dangerous Terrain Test once the move is complete.

Exposed Compartment

Whilst the open crew bays of some vehicles made them easier to operate for many tasks, they also made easy prey for weapons designed to take advantage of such weaknesses.

Any rolls on the Vehicle Damage Table that target a model with this Special Rule add +1 to the result.

Exposed Plasma Conduits

The containment mechanisms of some plasma weapons ran so hot there was no other choice than to vent them to the atmosphere.

Each time a model with this Special Rule suffers a Penetrating hit, add an additional +1 to all rolls on the Vehicle Damage chart.

Eye of the Storm

To stand at the centre of an inferno from such a weapon was to invite death upon yourself in a manner so final as to be utterly inescapable.

Any hits applied to a model under the 5" marker at the centre of the Apocalyptic Mega-Blast from a weapon with this Special Rule also gain the Destructor Special Rule. Any unit which suffers a hit by any part of the Apocalyptic Mega-Blast Marker from an attack with this Special Rule permanently reduces the Toughness Characteristic of all models it contains by -1 for the rest of the game.

Faceless Mask

Unlike the masks worn by the other Saedathii, this mask never left a blank, impassive state; equal parts unsettling and judging of all it surveyed.

A model with this Special Rule may be included in a Detachment which is not a Saedathii Detachment, in exception to the normal restriction imposed by the Rillietann Sub-type.

Feeding Frenzy

Flailing tendrils snatched up the dead and dying to be devoured by one of the creature's many fanged maws. The feast of flesh was added to its mass – regenerating damage inflicted upon it.

At the end of an Initiative Step in which an enemy model is slain in close combat as a result of attacks made by a model with this Special Rule, the Controlling Player may roll a D6 for each model slain. On a result of a 6 a model with this Special Rule in the attacking unit immediately regains 1 Wound, up to its starting Wounds Characteristic.

Field Officer

The officers of the Solar Auxilia were never far from the frontlines, ready and able to lead their troops into battle directly if necessary.

When this model with this Special Rule joins a unit with the Close-Order Unit Sub-Type, it automatically gains the Close-Order Unit Sub-Type for as long as it remains part of that unit.

Follow-Up Attack

Rather than carrying any passengers, troops followed behind Hades Drills as they cleared a path to the surface.

Before the game begins, you may assign a single Infantry unit from the same Detachment as a model with this Special Rule to each Auxilia Hades Drill or Militia Hades Drill as though it had the Transport Unit Sub-Type, and the unit was embarked upon it. The Auxilia Hades Drill or Militia Hades Drill is assumed to have a Transport Capacity big enough to fit any unit assigned to it. A unit with any version of the Bulky (X) Special Rule may not be assigned to either an Auxilia Hades Drill or Militia Hades Drill.

When an Auxilia Hades Drill or Militia Hades Drill arrives as part of a Subterranean Assault, place a 3" Blast Marker directly beneath the model. This marker is now treated as Difficult Terrain, and the Blast Marker remains in play for the rest of the game. The Auxilia Hades Drill or Militia Hades Drill gains the Shrouded (5+) Special Rule for the duration of the turn it arrives.

In any of the Controlling Player's following Movement Phases, the unit embarked upon the Auxilia Hades Drill or Militia Hades Drill may be deployed as though it was disembarking, measuring from any point of the Blast Marker. The unit may move up to their Movement Characteristic and may choose to Run. A unit deploying in this way cannot be the target of the Interceptor Advanced Reaction if it deploys in the Controlling Player's first Movement Phase after the Auxilia Hades Drill or Militia Hades Drill has arrived. A unit can still be deployed in this way even if the Auxilia Hades Drill or Militia Hades Drill is destroyed after it has been deployed. If there is not sufficient room to deploy the unit, then it must remain in Reserve and move onto the battlefield in their Controlling Player's next turn.

Forward Defences

Pioneer Sections were responsible for establishing defensive positions alongside and, when viable, ahead of the cohort's main advance, around which infantry sections could form firing lines and shelter from enemy fusillades.

The Controlling Player of a model with this Special Rule may select a single Defence Line for each Solar Auxilia Pioneer Section in the army without a Dedicated Transport, for the appropriate points cost before the game begins, as long as they have points remaining to do so. This Defence Line takes up no Force Organisation choices for the army and may be upgraded normally. If this option is taken, the unit must be deployed on the table at the start of the game and may not be held in Reserves.

Fragile Alliance

Through wit, guile, and no small amount of favours exchanged, the forces led by this commander were bound by common cause to their will - for as long as they were fit to lead...

As long as a model with this Special Rule has not been removed as a casualty and is your army's Warlord, all models in an army that contains them count their Level of Alliance as Fellow Warriors, unless they are already Sworn Brothers.

Furibundus Talon

Whilst often deployed from great landing vessels in drop-racks, once on the ground the Solar Auxilia Dreadnoughts would separate, each undertaking the objectives assigned to them by their Legate.

When deployed onto the battlefield (either at the start of the battle or when arriving from Reserves) all models in the unit must be placed within unit coherency, but afterwards operate independently and are not treated as a single unit. Once a unit with this Special Rule has separated, each model counts as its own unit for the purposes of Victory Points, Units Destroyed, and similar rules.

Gravitic Implosion

The immense forces emitted by this weapon's strikes were strong enough to pulp flesh and grind armour to paste.

Instead of rolling To Wound normally with this weapon, any non-Vehicle model that suffers a Hit from a weapon with this Special Rule must instead roll under their Strength on a 2D6 or suffer a Wound (a roll of double '6' always counts as a failure). Armour Saves and Damage Mitigation rolls may be taken as normal - except Shrouded rolls which may not be used. Against targets with an Armour Value, the attacking player rolls 4D6 for Armour Penetration instead.

If a Graviton Pulse weapon also has the Blast type, then leave the Blast marker in place after resolving all Wounds, or otherwise mark the area. This area now counts as both Difficult Terrain and Dangerous Terrain until the start of the next turn of the player that made the attack.

Gravitic Repulsion

The sheer power of the graviton-repellers used to keep some anti-grav craft airborne would push back and pummel any foolish enough to approach.

Whenever a charge is declared against a model with this Special Rule, the Charging unit suffers a -2 penalty to their Charge roll.

Guardian Retainers

Standing as an unbroken circle around the Rogue Trader Militant, these Guards would let no harm come to them; though for honour, personal gain, or any other selfish reason, none might say...

A Retainers Militant unit may only be selected as part of a Detachment that includes at least one model with the Warrant of Trade Special Rule. A unit selected in this manner is considered a 'Retinue Squad' and the model with the Warrant of Trade Special Rule is referred to as the Retinue Squad's Leader for the purposes of this Special Rule (if the Detachment includes more than one model with the Warrant of Trade Special Rule then the Controlling Player selects one as the unit's Leader).

The Retinue Squad does not use up a Force Organisation slot and is considered part of the same unit as the model selected as its Leader. The Retinue Squad must be deployed with the model selected as its Leader deployed as part of the unit and the Leader may not voluntarily leave the Retinue Squad during play. A Retainers Militant unit may not be selected as part of an army without a Leader.

Harbingers of Judgement

The characteristic shriek of Halian Heavy Jetbikes' anti-grav systems were often the first, terrifying noise that enemies would hear, heralding the sudden approach of the Silent Sisterhood.

A unit that includes any models with this Special Rule may not join or be joined by any model that does not also have this Special Rule.

In addition, a unit that includes any models with this Special Rule never counts as a Scoring or Denial unit regardless of any other Special Rule or Mission rules in use - however, a model with this Special Rule may re-roll all failed Shrouded Damage Mitigation rolls.

Heavy Beam

As opposed to the normal pulsing shots emitted by weapons, this weapon projects a constant barraging stream of power.

When the weapon with this special rule is used to make a Shooting Attack, draw a 1" wide line from the end of the gun barrel up to the listed range of the weapon - this is the beam area. The initial target for the weapon (the model in the beam area closest to the attacking model) must be an enemy model.

- All models (friend and enemy) caught in the beam area (excepting the firing model) suffer a Hit with the listed profile of the weapon, except models with the Flyer Sub-type which cannot be affected or targeted.
- Units with any models in the beam area receive a number of Hits equal to the number of their models caught in the path of the beam; casualties are removed from affected units using the normal rules for removing casualties.
- If a Terrain piece, Building, model with the Vehicle Unit Type or any model with 6 or more Wounds is in the beam area, the attack is blocked and its line of effect will go no further than that model. The blocking model will, however, suffer 1+D3 separate Hits, rather than just 1.
- If a model with the Vehicle Unit Type and the Transport Sub-type suffers a Penetrating Hit from a weapon with this special rule, each unit Embarked on it suffers D6 Str 4 AP - Hits with the Deflagrate Special Rule, in addition to any other effects. Any Wounds caused are allocated by the controller of the target unit.

Heavy Walker

Certain combat units were not heavy enough to be considered vehicles, but were of such tall, broad or otherwise inflexible design that they proved difficult to transport.

A model with this Special Rule may not Embark on a model unless it has the Transport Bay Special Rule.

Heralds of the Advance

Moving at speeds impossible to manage for those not augmented to endure, those employed by a Rogue Trader to range ahead of the main forces and scout safe lanes to their goals were unmistakable in their role as the heralds of the Militant Host.

A unit that includes any models with this Special Rule may not join or be joined by any model that does not also have this Special Rule.

In addition, a unit that includes any models with this Special Rule never counts as a Scoring unit or a Denial unit regardless of any other Special Rules or Mission rules in use – however, a model with this Special Rule may re-roll all failed Shrouded Damage Mitigation rolls.

Honour-Bound, Honour-Defined

To those bound by the strict honour-codes of the duellist, to ignore a worthy opponent was a shameful and ignoble thing, tantamount to death.

If possible, a unit that includes a model with this Special Rule must issue a Challenge when Engaged in combat, and if an enemy player issues a Challenge to a unit including one or more models with this Special Rule then a model with this Special Rule must accept. In addition, during any Assault phase where this model begins the Fight sub-phase Engaged in a Challenge, or enters into a Challenge with an enemy model, this model and all friendly models in the same combat gain the Fearless Special Rule until the end of that Assault phase.

Immobilized

Fixed in place, or otherwise unable to move in any fashion, these units had to stand their ground or perish.

A model with this Special Rule may not move for any reason, including making Run moves, declaring or otherwise making Charge moves, falling back, or make Reactions which would allow it to move. If it would be forced to do so, the model is immediately destroyed.

Impact Flash

Against the flaring solar heat of such a weapon, no amount of distance could shield the retinas of those who witnessed their blooms.

Any unit which can draw direct Line of Sight to any part of the Blast Marker used to resolve a weapon with this Special Rule's Shooting Attack at its final position must immediately take a Blind test.

Impale

Designed specifically not only to capture an enemy, but also to inflict debilitating damage upon them, these weapons were dreaded by all who faced them.

A unit may re-roll Charge Rolls when attempting to Charge an enemy unit that has suffered one or more Hits from a weapon with the Impale Special Rule caused by one or more models in the unit for which the Charge was declared in the same player turn. This takes effect even if no Wounds are caused by the Hits. If one or more Wounds are caused by a weapon with this Special Rule, the affected unit decreases its Initiative characteristic by -1 until the end of the subsequent Assault phase.

Independent Fire Control

Whether achieved by automated targeting cogitators or human crew, some vehicles could target their weapons at separate targets.

After a model with this Special Rule (or a unit composed entirely of models with this Special Rule) has resolved a Shooting Attack targeting an enemy unit, any weapons that were not used to attack (either due to being out of line of sight or range of the enemy unit, or because the Controlling Player voluntarily opted not to attack with them) may make a number of Secondary Shooting Attacks using those weapons that did not fire as part of its initial Shooting Attack. Each weapon not fired as part of the initial Shooting Attack may be fired once, either all of them in a single Secondary Shooting Attack, each in a separate Secondary Shooting Attack targeting a different enemy unit or any combination – however, each weapon may only be used to attack once and in no more than one Secondary Shooting Attack. All Secondary Shooting Attacks obey all the normal rules for range and line of sight and are with a modifier of -1 on all To Hit rolls.

Instead of the above, in a turn in which a model with this Special Rule either remained Stationary or moved at Combat Speed during the Controlling Player's Movement Phase, then for the duration of the Controlling Player's following Shooting Phase, it may make Shooting Attacks as if it had the Super Heavy Sub-Type.

Inexorable

No matter the odds, some warriors refused to halt their advance.

A unit that contains only models with this Special Rule ignores modifiers to Leadership when making a Morale check or Pinning test – except those caused by the Fear (X) Special Rule or the Corrupted and Anathema Sub-types. If a unit has both the Fearless and Inexorable Special Rules, it uses the rules for Fearless instead of Inexorable.

Inspiring Rhetoric

Demagogues were fanatical orators whose words inspired those around them to fight on where others would have fled.

A unit containing a model with this Special Rule rolls an additional dice when making a Morale Check or Pinning Check (but not Psychic Checks) and discards the dice with the highest result before determining the result of the Check.

“It’s Dark In Dere!”

The dim and cramped confines of vehicle interiors were not designed with Ogryns in mind; however trusted officers and comrades could, with effort, convince them to board certain transports.

If a unit with this Special Rule selects a Dedicated Transport, a model without this Special Rule (such as a Discipline Master) must be assigned to them before the game begins. So long as a model without this Special Rule is part of the unit, models with this Special Rule may Embark upon a Vehicle with the Transport Unit Sub-Type and the Infantry Transport Special Rule, ignoring the usual restriction on models with the Bulky (X) Special Rule being ineligible to Embark, but must still adhere to Bulky (X) for the purposes of Transport Capacity.

Launch System Failure

With the unimaginable power of some weapons came a deadly repercussion - unspent munitions easily turning upon their wielders at the merest unlucky happenstance.

Whenever a model with this Special Rule loses its last Hull Point, if it has not already fired its Deathstrike Missile during the game, the Vehicle will suffer Catastrophic Damage in the manner of a Vehicle with the Super-Heavy Sub-type, and will immediately explode regardless of any other factor. Note that if this result is applied, the Vehicle cannot suffer an Explodes result from any other source.

Legacies of the Fall

The Asuryani simultaneously despised and feared She Who Thirsts. In the neverborn of the warp they encounter in real-space, they saw their doom made manifest.

A model with this Special Rule has the Hatred (Daemons) Special Rule.

In addition, a unit with this Special Rule suffers a -1 penalty to their Leadership whilst locked in a combat which includes at least one model with the Daemon Unit Type. This penalty is cumulative with other penalties applied to the unit’s Leadership Characteristic.

Light Command Tank

Not unlike Battle Tank Cohorts, many officers of the Solar Auxilia were trained to lead their tank squadrons from the hatch of their vehicle, co-ordinating the units under their command with eagle-eyed precision and coordination.

A model with this Special Rule is selected as a separate unit, but during deployment must be assigned to another unit from the same Tercio and may not be deployed as a separate unit. If multiple appropriate units are available, the Controlling Player chooses which unit a model with this Special Rule is assigned to. Once assigned to a unit, a model with this Special Rule counts as a part of that unit and may not leave the unit during play for any reason.

Makeshift Weapon

Whilst not all tools of the 31st millennium were intended to see combat, in a pinch they too served as deadly weapons of war.

A model equipped with a weapon with this Special Rule may only make a single attack at Initiative Step 1 with it, and may not gain a bonus attack for Charging or from any Special Rules that would normally grant additional Attacks.

Master of the Shield-Hosts

Among the Legio Custodes, many distinctive and recognisable differences in how different Shield-Hosts waged war existed, even before the outbreak of the Horus Heresy. These Shield-Hosts would often take immense pride in their unique methods of war; seeing their prowess and traditions as their own personal dedication to the Emperor made manifest. Foremost in the Legio Custodes in shaping and maintaining these traditions were the Host-Masters, and when an army of Custodes sallied forth in His name, they often included these representatives of a Shield-Host.

A model with this Special Rule is required to select a single Shield-Host upgrade. However, no model may take more than one such upgrade, and no model in your army may select the same Shield-Host upgrade option as another. Each Shield-Host upgrade must be paid for at a cost in points, indicated as part of the army list entry for the unit. Shield-Host upgrades may provide Special Rules, Wargear, Unit Sub-types, or other effects; these are noted in their description, along with any other benefits or restrictions. In all cases, the Shield-Host’s description will indicate all changes, benefits and restrictions.

Militia Venetaris

The crew of Imperialis Militia vehicles were oft-renowned for their independence and ability to function as separate units to harass the enemy; though many commanders suspected that cowardice and cruelty were more likely motives.

When deployed onto the battlefield (either at the start of the battle or when arriving from Reserves) all models in a unit with this Special Rule must be placed within unit coherency, but afterwards operate independently and are not treated as a single unit. Once a unit with this Special Rule has separated, each model counts as its own unit for the purposes of Units Destroyed or similar rules.

Mindless Aggression

Whilst mutated in form beyond recognition, one trait survived – the desire to kill.

A unit with this Special Rule must always Charge in the Assault phase, if possible. If multiple targets are available, the Controlling Player may choose their Charge target. The unit must always attempt to Sweeping Advance, if able.

Navigis Astrologica

The hidden knowledge of the Navigators could be revealed to those foolish enough to stand unprotected in the glare of the Noble's third eye.

A model with this Special Rule and the Psyker Sub-type automatically knows the Thaumaturgy (see the Horus Heresy: Age of Darkness Core Rulebook, page 322) and Navis Astrologis (see page 269) Psychic Disciplines.

Null-Soul

With great effort, those who possessed the dubious 'gift' of being a Null could suppress their dread aura, minimising the discomfort their presence caused upon others.

A model with this Special Rule may not be included in a unit that contains any models with the Psyker Sub-type, but does not apply the Leadership Characteristic Penalties from the Anathema Sub-type to a unit it has joined which does not have the Anathema Sub-type.

Open-Topped (X)

Some vehicle hulls were open to the elements, allowing for their occupants to fire - but at the cost of protection.

Up to X number of models in a unit Embarked upon a Transport with this Special Rule may make a Shooting Attack in the Controlling Player's Shooting Phase (where X is the number in brackets next to the Special Rule), measuring from the Transport's Hull. If a model chooses to fire in this way, they are counted as having moved - note that this may prevent them from shooting certain weapon types. It should be noted that any ability which replaces a Shooting Attack (such as, but not limited to, casting a Psychic Power or Cybertheurgic Rite) may not be used. Shooting Attacks made in this manner may target a different unit to ones made by the Transport, but any Reactions made to these target the Transport as normal. Units with any Special Rule that allows them to count as stationary for the purposes of Shooting attacks (such as Relentless, Legiones Astartes (Death Guard), etc) may not benefit from them whilst embarked on a Transport with this Special Rule.

In addition, any rolls on the Vehicle Damage Table that target a model with this Special Rule add +1 to the result.

Open Crew Compartment

Designed with the safety of crew as a primary concern, some vehicles bore weapons so dangerous they were vented directly to the atmosphere.

Any Hits scored against a Vehicle with this Special Rule in close combat (including as part of a Death or Glory Advanced Reaction) are resolved against the Vehicle's Armour Facing with the lowest value.

Overload (X)

Whenever this weapon contacted a foe, the sheer force and coruscating energy of the hit was said to feel like a barrage to any unlucky enough to be struck...

Whenever a weapon with this Special Rule causes a successful hit, a hit roll of X instead inflicts three automatic hits. On weapons which use a Blast Marker or Template to hit, every successful hit inflicted is instead counted as three successful hits against the unit.

Paired Weapons

Some weapons require they are used together to achieve full effectiveness.

A model armed with a weapon with this Special Rule gains an extra Attack.

Ponderous Aim

Some weapons were simply too unwieldy to use without difficulty - though their troublesome use was often offset by their decidedly impressive effects.

A weapon with this Special Rule cannot be fired as part of a Reaction or used to Snap Shoot.

Plasma Burn

The outpouring of plasma some weapons launched forth burnt and overloaded circuits and armour both.

If the target of a weapon with this Special Rule is a model with the Vehicle Unit Type and that model loses one or more Hull Points as the result of an attack from this weapon, roll a D6. On a 4+, the target model loses an additional D3 Hull Points with no Cover Saves or Damage Mitigation rolls allowed.

Provenance (X)

The Imperialis Militia counted a staggeringly diverse array of cultures, warmachines and stratagems among its number, and while most musters shared at least some similarities, there were several units that could only have been raised from a specific source.

A unit with this Special Rule may only be selected in a Detachment with the corresponding Provenance of War that matches the option indicated in brackets - for example, a unit with the Provenance (Survivors of the Dark Age) Special Rule could only be selected in a Detachment which had that Provenance of War selected for it during Army Selection.

Psychic Mastery (X)

A raw bulwark of ethereal power, this psyker could push past the limits that would spell doom for others - despite the great risk of doing so...

A model with this Special Rule may cast an amount of Psychic Powers per phase, up to the number indicated in brackets, in spite of the normal limitations on doing so. Note that a Psychic Power counted as a Shooting Attack counts as a single power for the purposes of this Special Rule.

Psykana Militis

Those of the Psykana were often trained in the arts of defensive and offensive powers both - though some could draw upon darker powers still...

A model with this Special Rule and the Psyker Sub-type must select a single Psychic Discipline from the following list: Biomancy, Divination, Pyromancy, Telekinesis (see the Horus Heresy: Age of Darkness Core Rulebook, page 322), or Anathemata (see page 268).

Psykana-Battery

Utilising the power of a caged psyker, funnelled into their weapon via arcane circuitry and forbidden lore, these weapons were a risky endeavour to use - but a risk the Silent Sisterhood were willing to take, for in doing so, an enemy could be entirely obliterated from existence with a single shrieking shot. Even so, the risks were immense, and ever-present was the risk of a catastrophic backlash against which not even their null-soul could protect.

Wherever a model equipped with a weapon with this Special Rule suffers a wound as a result of the Gets Hot Special Rule whilst firing the weapon with this Special Rule, the Controlling Player must make a Leadership Check for the model. If this is failed, the weapon has suffered catastrophic psychic feedback - the firing model is instantly slain by the rampant psychic energies! In addition, a Blast (3") marker should be placed as close as possible to the model's final position - this marker is then treated as if it had been placed as a result of the Vortex Special Rule.

Rapid Insertion

For the most daring of mortals, the requirement to deploy onto the battlefield from several hundred feet above it was no major issue - and with a grav-pack, such a challenge was ripe for the taking.

If a model with this Special Rule has moved at Cruising speed or has otherwise made a Zoom move, passengers may still disembark in spite of the normal restrictions, via the following procedure.

Nominate any point over which this model moved this turn, and place a single model from the disembarking unit onto that point, then scatter that model. If the unit scatters, every model in the disembarking unit must immediately take a Dangerous Terrain test. In the case of a unit split across multiple transports (such as via the Unified Assault Special Rule) only a single Scatter roll should be made for the entire unit, with the same result applied to the models as a unit.

Once the final position of the placed model is determined, deploy the rest of the unit in coherency with it. Any models that cannot be placed into coherency and at least 1" away from enemy models are destroyed.

Regenerating Horror

The most devastating blows and the heaviest firepower could only inflict so much damage against such an unnatural abomination.

Any model with this Special Rule and a Wounds Characteristic which suffers an Unsavable Wound with the Instant Death Special Rule is not immediately removed as a casualty, but instead loses 3 Wounds instead of 1 for each Unsavable Wound with the Instant Death Special Rule inflicted upon it.

Repair

Designed with simplicity in mind, some vehicles could be pressed back into service even under fire by crew with only scant technical ability.

In any of the Controlling Player's Shooting phases, instead of making any Shooting Attacks with a model with this Special Rule, the controlling player may instead roll a D6. On the roll of a '4' or more, a damage result of Immobilised that has been inflicted on this model may be removed but no Hull Points are returned.

Representative of the Legion

Seconded from a Legion's support staff, those among the Presages of the Legion were tasked to uphold the traditions and honour of their brothers in the courts of the Traders Militant.

A model with this Special Rule must have the same variant of the Legiones Astartes (X) Special Rule as the Detachment which allowed you to select it. In addition, a Legion Presage may select any Legion-Specific options permitted by their variant of the Legiones Astartes (X) Special Rule, counting as having the Character Sub-type for the purposes of selecting them, and is affected by any effects of such rules, despite not being in a unit entirely composed of models with that Special Rule.

Resonance (X)

Certain pieces of industrial mining equipment sent out waves of sonic force capable of demolishing structures and, when used as weapons, could reduce human's internal organs to mush.

When rolling To Wound and for Armour Penetration for a model that has the Resonance (X) Special Rule, or is attacking with a weapon that has the Resonance (X) Special Rule, for each To Wound roll equal to or higher than the value listed in brackets, the Controlling Player must resolve these wounds at AP 1 instead of the weapon's normal AP value. Against any building or Fortification with a Hull Points value this Special Rule is triggered on a Armour Penetration Roll of 2+ instead.

Restricted Trajectory

Though fearsome, a number of larger weapons lacked the ability to depress their barrel or launch system far enough to achieve direct fire of their payload, requiring at least a short arching shot.

A weapon with this Special Rule may not be fired directly.

Sanctic

Some attacks were imbued with energies that allowed them to directly damage even the most incorporeal of foes.

A weapon with this Special Rule always wounds models with the Daemon Unit Type on a 2+ and any successful Invulnerable Saves made by models with the Daemon Unit Type against any Wounds it inflicts must be re-rolled.

Seismic Shock

The ground itself rippled and shook apart at the touch of such a weapon's fury.

Units which suffer one or more Wounds or Hull Points lost from an attack from a weapon with this Special Rule halve their Movement Characteristic and may not Run or make Reactions until the end of the attacker's next Shooting phase.

Severax Talon

The Carnodon crews of those who travelled with the Traders Militant were trained to rove ahead of the main force, working in smaller groups to ensure they could outmanoeuvre and entrap the forces of foes much larger than themselves.

Before deploying a unit with this Special Rule (either at the start of the battle or when arriving from Reserves), the unit must be split into two separate units, with models split as evenly as possible. These units are then deployed separately, with the two separate units being allowed to be placed anywhere permitted, but having to follow all normal restrictions for models within each unit for being placed within unit coherency and so on. Once a unit with this Special Rule has separated, each unit counts separately for the purposes of Victory Points, Units Destroyed, and similar rules.

Shoot Sharp and Scarper

Due in large part to their small stature, Ratling marksmen were adept at avoiding counter-sniper fire.

Shooting Attacks made as part of a Reaction in the Shooting Phase targeting a unit composed entirely of models with this Special Rule are resolved as Snap Shots.

Shieldbreaker

Designed expressly to pierce shielding via a complex "warp-skip" drive built into their munitions, these weapons were hazardous in the extreme to any enemy - especially those who thought themselves impervious to harm.

Invulnerable saves may not be taken against Wounds or Hull points of damage inflicted by a Weapon with this Special Rule. In addition, a weapon with this Special Rule ignores the effects of both the Void Shields (X) Special Rule, and Flare Shields wargear.

Silence Descends

Certain craft among the Silent Sisterhood were used not as tools of retrieval in the ordained task of recovering Psykers, but as weapons of aerial terror and supremacy to ensure the mission of those Null-Maidens on the battlefield below went uninterrupted.

A unit or model with this Special Rule may be placed into Combat Air Patrol at the start of the battle, before any models are deployed onto the battlefield. Models assigned to Combat Air Patrol are not deployed onto the battlefield and remain in Reserves – however, no Reserves rolls are made for these models.

Instead, the Controlling Player gains access to the Combat Air Patrol Advanced Reaction:

Advanced Reaction: Combat Air Patrol

Advanced Reactions are available to specific players as noted in their description. Unlike Core Reactions they are activated in unique and specific circumstances, and can often have game changing effects. Advanced Reactions use up points of a Reactive player's Reaction Allotment as normal and obey all other restrictions placed upon Reactions, unless it is specifically noted otherwise in their description.

Combat Air Patrol

This Advanced Reaction may be made whenever any enemy model that has the Vehicle Unit Type and the Flyer Sub-type enters the battlefield from Reserves. The Reactive player may nominate any one model that has been assigned to Combat Air Patrol. Once the enemy model with the Vehicle Unit Type and Flyer Sub-type that triggered this Reaction has finished any and all Movement as it is brought into play, the chosen model assigned to Combat Air Patrol is brought into play from any point on the edge of the battlefield, moving into play as if it had entered play from Reserves. Once the Combat Air Patrol model has finished its Movement it may immediately make a Shooting Attack targeting the enemy model that triggered this Reaction – as long as it has finished its Movement with line of sight to that model.

Only models with the Vehicle Unit Type and Flyer Sub-type may make the Combat Air Patrol Reaction.

Skilled Rider

A lifetime in the saddle allows the most skilled to fire their arsenal at full effectiveness - even on the move.

A model with this Special Rule may opt to run in the Movement Phase and still fire a single ranged weapon in the Shooting Phase. These shots are made at BS2. The To-Hit rolls for these shots cannot be improved by any source.

Note that if a unit makes use of this Special Rule, they may not claim the benefits of the Firing Protocols (X) Special Rule in the same Game Turn.

Slayer of Kings

Utilising their improved speed and resilience to hunt the leadership of an enemy army, these custodians took grim pride in their role as the killers of tyrants and the slayers of kings.

A model with this Special Rule gains the Preferred Enemy (Independent Characters) Special Rule, but this Special Rule is not conferred to any model that does not have the Slayer of Kings Special Rule.

Solar Auxilia Command Tank

The commanders of sub-units of Solar Auxilia Tank Cohorts would often be required to conduct battles isolated from the wider command structure, becoming solely responsible for themselves and their charges in the fires of war.

A model with this Special Rule is selected as a separate unit, but during deployment must be assigned to another unit and may not be deployed as a separate unit. If multiple appropriate units are available, the Controlling Player chooses which unit a model with this Special Rule is assigned to. Once assigned to a unit, a model with this Special Rule counts as a part of that unit and may not leave the unit during play for any reason.

A model with this Special Rule must be assigned to another unit made up entirely of models with the Vehicle Unit Type purchased as part of the same Tercio.

In addition, a model with this Special Rule may still make Shooting Attacks as normal in a turn in which they use their Cognis-Signum to provide +1 Ballistic Skill to all other models in their unit, even though this would normally be prevented by using this Wargear.

Sonic Pulse

Operated on the same principles as the Sonic Destructors mounted on the venerable and respected Ordinatus Ulator platforms, these weapons unleashed a smaller - if no less potent - sonic pulse that resonated through even the strongest armour to shake it apart.

When making a Shooting Attack with this weapon, place the Blast (3") marker so that its edge touches the barrel of the firing model's weapon. Instead of scattering this Blast marker, move the marker in a direct line away from the firing model, travelling in any direction within the weapon's 45° forward firing arc until its maximum range is reached or the template leaves the battlefield. All models the template passes over suffer a single automatic Hit. Flyers cannot be hit by this attack. Should a model with the Knight, Titan, Super-Heavy Vehicle, Building or Fortification Unit Type be Hit by this attack, increase the Strength of the attack to 8.

Spotted!

These lights blazed beyond that of mere illum-beacons or handheld torches, allowing none to escape their rays and brightening all to see.

A model equipped with a weapon with this Special Rule gains the Split Fire Special Rule, and also ignores all penalties imposed by the Night Fighting rules when making Shooting Attacks. However, enemy units ignore the 24" line of sight limitation when making Shooting Attacks that target a unit including a model equipped with a weapon with this Special Rule.

In addition, any unit that has received any amount of hits from a weapon with this Special Rule may be freely targeted for Shooting Attacks by any other unit in the same Shooting phase, ignoring the Ballistic Skill Penalty and 24" restriction to line of sight imposed by the Night Fighting rules.

Sworn to Serve

Sworn to serve the Traders Militant, none dared to break the bonds of both blood and honour that bound such a force together.

A model with this Special Rule may only be selected as part of a Retainers Militant unit by paying the cost indicated in that unit's options, and may not be selected in any other manner.

Sudden Strike (X)

Relying on speed to ensure a pre-emptive strike, some warriors could not bring their arms to bear without it.

In a turn in which a model with this Special Rule Charges into combat, it adds a bonus to its Initiative Characteristic until the end of the Assault phase. The bonus added to the model's Initiative is equal to the value in brackets after the Special Rule; for example, a model with Sudden Strike (2) adds a bonus of +2 to its Initiative.

A model that has made a Disordered Charge that turn receives no benefit from Sudden Strike (X).

Techno-Arcana: Enginseer

Enginseers were the most common of the Mechancium's Tech-Priests; they regularly accompanied the warmachines of the Excertus Imperialis into battle and performed vital repairs.

While the unit contains any number of Servo-Automata, Enginseer Adepts in the unit improve their Battlesmith (X) Special Rule to Battlesmith (4+).

Thermal Runaway

Unlike the more precise and controlled reactor cores of Legiones Astartes Dreadnoughts or Mechanicum Automata, the effects of a breach on a vented reactor core could be catastrophic.

Whenever a model with this Special Rule rolls a dice to determine an explosion radius, add +3" to the result rolled.

Titanic Weight

Certain weapons were so cumbersome or were simply heavy enough that even the monstrously strong struggled to wield them.

A weapon with this Special Rule always strikes at Initiative 1, regardless of other modifiers.

Traitor

Some combatants upon the battlefields of the Age of Darkness had irredeemably given themselves to Horus' cause.

A model with this special rule may only be included in an army that has the Traitor Allegiance.

Tremor

Whilst most conventional barrage ordnance described great looping arcs through the sky, these weapons instead burrowed into the earth itself.

A unit successfully hit by a weapon with this Special Rule treats all Terrain, including open Terrain, as Difficult and Dangerous Terrain until the end of their Controlling Player's Next Game Turn.

In addition, for the purposes of line of sight, a weapon with this Special Rule should be treated as if it had the Barrage Special Rule, but note that it can still be fired even in Zone Mortalis Games without Line of Sight, despite this normally being prevented.

Underground Advance

Experienced miners and diggers all, Exo-Driller Teams were able to outmanoeuvre enemy positions by tunnelling beneath their lines, or taking advantage of preexisting passages known only to the Kinfolk.

During Deployment, a unit with this Special Rule may be given the Subterranean Assault Special Rule and placed into Reserve.

Ungainly

Awkward to bring to bear, certain weapons were best used as part of a crushing charge to harness their full effect.

A model may only attack with this weapon on a turn in which it makes a Charge (even if that Charge is Disordered), but does not gain a bonus attack for Charging or from any Special Rules that would normally grant additional Attacks.

Unified Assault

Operating in close proximity came naturally to some pilots, and their craft were not often parted from their precisely-spaced formations.

During Deployment, a unit may elect to split itself across a unit with this Special Rule's transport capacity, rather than all in a single Transport as is the norm. The squad must not exceed the total Transport Capacity of the transports in the squadron in order to do so. If a unit elects to do so, the models with this Special Rule must remain in unit coherency, effectively negating the effects of any Special Rules which would normally allow them to separate, until the squad has disembarked from all transports.

Note that the transported unit must observe coherency requirements despite disembarking from separate transports – meaning if the contents of one transport elects to disembark, all other members of the unit carried in other transports must elect to do so within coherency of the other members of the unit in the same phase. If a model transporting a unit across multiple models has one suffer a Crash and Burn result on the damage table, all models inside the destroyed transport are automatically counted as destroyed – Any models spread across other multiple models in the Squadron's Transport Capacity must still disembark within normal unit coherency as normal. Note that no Leadership tests can be inflicted for models removed from play in this way.

Unrestrained Power

Some Psykers were so powerful that even when barely trained, they could innately push their abilities beyond the limits of most other psykers – but in drawing so deeply from the Warp, they always risked exposing themselves to an enormous psychic backlash.

If a model with this Special Rule suffers Perils of the Warp, it receives D6 Wounds instead of D3.

In addition, the first time in each Game Turn a model with this Special Rule makes a Psychic Check, they may choose to roll three dice instead of two, discarding the die with the highest roll when determining the result of the check. If they do this, when making any further Psychic Checks in the same Game Turn, they must roll three dice instead of two, discarding the die with the lowest roll, when determining the result of the check.

Vigilant Covenant

Those Sisters of Silence who were given specific duties upon the field of battle took them seriously - even by the standards of their dour order.

A Vigilant Covenant is selected as any other unit, using up a single Force Organisation slot and bought in the same manner. However, before the first turn begins, all models in a Vigilant Covenant must be assigned to another unit from another unit from the same detachment if the army they were selected as part of. Knight Vestals may only be assigned to units entirely composed of models with the Infantry Unit Type and the Silent Sisterhood (X) Special Rule.

A Knight Vestal cannot be assigned to any unit that includes one or more models with the Independent Character Special Rule or Unique Unit Sub-type (but such models may join a unit that includes a Knight Vestal as normal during either deployment or any following turn).

No more than one Knight Vestal may be assigned to any given unit. Once assigned to a unit, the Knight Vestal is considered part of that unit and may not leave under any circumstances - if that unit is removed as a casualty then the Knight Vestal is removed as well. In battles using Victory Points, no Victory Points are ever scored for removing a Knight Vestal as a casualty. When assigned to a unit, a Knight Vestal gains all of the Special Rules (with the exception of those that specifically forbid it, such as the Bitter Duty Special Rule) and Unit Sub-types listed for the unit to which it is attached, but does not gain access to any additional wargear options available to the unit to which it is assigned.

Volatile Plasma Containment

Some plasma weapons' containment fields were not designed to resist external pressure - and the effects of damage from hostile forces could often detonate them.

If a model with this Special Rule loses its last Hull Point due to the Gets Hot Special Rule then it also suffers the effects of the Explodes result on the Vehicle Damage table. When a model with this special rule suffers an Explodes result (as shown on the Vehicle Damage table), the Strength of any Hits it causes is increased to 10.

Vortex

The collapsing singularities caused by these weapons tore and broke at the fabric of reality itself.

Once an attack with this special rule has been fully resolved, any Blast markers placed as part of that attack are not removed from play and instead are left in place for the remainder of the battle. Such a Blast marker is then referred to as the Vortex marker. The area under a Vortex marker is treated as Area Terrain for the remainder of the battle, and applies the following effects to all models that enter its boundaries:

No line of sight may be drawn through, into, or out of the area covered by the Vortex marker (as such, models within such an area of terrain cannot draw line of sight to any other model, nor can other models draw a line of sight to them).

Any models that enter the boundary of this area of terrain, or begin the Movement phase of the model's Controlling Player within its boundaries, immediately suffer one Str 10, AP 1 Hit and the Instant Death and Armourbane (Melee) special rules. If the model has the Vehicle Unit Type and suffers a Penetrating Hit due to this effect then it adds a modifier of +3 to that roll on the Vehicle Damage table.

This area of terrain does not confer a Cover Save and no model within its boundary may use a Cover Save granted by any other rule or effect.

Warrant of Trade

Written and signed most often by the Emperor's hand Himself, these Warrants were worth more than entire sub-sectors to those intelligent enough to understand them; though some among those handed these documents of authorisation understood that they were in effect also orders of banishment; permanent exile formalised and sealed with a wax crest.

During Army Selection, a model with the Warrant of Trade Special Rule must select one of the following Warrants; these may grant certain additional effects to the Detachment containing the model with this Special Rule, as well as affecting which Factions and Sub-factions may be included in the same army, and at what Level of Alliance.

Weaponsmith's Ingenuity

Jokaero were natural tinkers, unable to stop themselves from meddling with all manner of inventions and improvements - though these were often for no reason other than to appease their curiosity.

Once per game turn, at the start of the Controlling Player's Shooting Phase, the Controlling Player may choose to roll on the below chart. The result rolled applies to all models in the unit with the Trader Militant Sub-faction until the start of the Controlling Player's next Shooting Phase.

D6	Result	Description
1	Oops!	The weapons of all models affected gain the Gets Hot Special Rule, or if they already have it, a to-Hit roll of a 1 or a 2 triggers the effects of the Special Rule instead.
2	Aesthetic Modifications	The modifications have no noticeable effect.
3	Rangefinder Calibration	All Ranged weapons in the unit increase their Range Characteristic by 12".
4	Armour Repairs	All models affected may re-roll Armour Save rolls of 1.
5	Cooling Coils	All models affected's Ranged Weapons increase the number of shots they fire by 1 (for example, a weapon with Assault 2 becoming Assault 3), and may ignore the effects of the Gets Hot Special Rule on their weapons, if they have it.
6	Complete Overhaul	The Controlling Player may choose two different results from this table and apply them to the unit.

Wrecker

Designed to sunder armour beyond repair, nothing could stay the wrath of such weapons.

Penetrating Hits caused by attacks made with weapons or models with this Special Rule add +1 to the result of any rolls on the Vehicle or Building Damage tables.

LIBER IMPERATUS:
Armoury of the Imperium

ARMOURY OF THE IMPERIUM

The units that form the various sub-factions in this document have access to a number of new Weapons - these can be found below. These function in addition to the Weapons found in other Horus Heresy publications, and operate under the broader Rules and Conventions laid out in the **Horus Heresy: Age of Darkness** Core Rulebook.

RANGED WEAPONS

Adrathic Weapons

Whilst insanely potent, Adrathic weapons were not widely disseminated across the armies of the Imperium, instead remaining only the purview of the Legio Custodes and Silent Sisterhood - for their terrible ability to tear asunder the very form of an enemy in an explosive bloom of power was deemed to dangerous for any but the guardians of the Emperor to possess.

All weapons listed here are counted as 'Adrathic' weapons for those rules that affect such weapons.

Weapon	Range	Str	AP	Type
Adrathic Decimator	24"	8	3	Heavy 3, Instant Death, Armourbane (Ranged), Breaching (5+), Gets Hot
Adrathic Destructor	12"	5	3	Assault 1, Instant Death, Armourbane (Ranged), Gets Hot, Breaching (5+)
Adrathic Devastator	18"	6	3	Heavy 2, Instant Death, Armourbane (Ranged), Gets Hot, Breaching (5+)

Artillery Cannon

Designed to bombard the enemy from long range, the deployment of artillery was a vital component of the Imperium's military doctrines.

Weapon	Range	Str	AP	Type
Demolisher Cannon	24"	12	3	Ordnance 1, Blast (3"), Sunder, Rending (6+), Brutal (3), Wrecker
Earthshaker Battery	12 - 240"	9	4	Ordnance 2, Barrage, Large Blast (5"), Shred, Pinning, Breaching (6+)
Earthshaker Cannon	12 - 240"	9	4	Ordnance 1, Barrage, Large Blast (5"), Shred, Pinning, Breaching (6+)
Griffon Mortar	36"	6	4	Heavy 1, Large Blast (5"), Barrage, Pinning, Shell Shock (1), Ignores Cover
Heavy Mortar	36"	6	4	Heavy 1, Blast (3"), Barrage, Pinning, Ignores Cover
Mars-Colossus Bombard	12 - 72"	7	3	Ordnance 1, Barrage, Large Blast (5"), Pinning, Shell Shock (1), Ignores Cover, Wrecker
Praetor Launcher				
- Firestorm Munitions	72"	7	4	Ordnance 2, Barrage, Massive Blast (7"), Pinning, Shell Shock (2), Rending (5+), Ignores Cover
- Foehammer Munitions	72"	8	3	Heavy 12, Guided Fire, Breaching (5+), Ignores Cover
Pulveriser Cannon	18"	10	3	Heavy 1, Blast (3"), Sunder, Breaching (6+), Brutal (2)
Thudd Launcher	12 - 60"	5	5	Heavy 1, Massive Blast (7"), Barrage, Shred, Restricted Trajectory

Auto Weapons

Making use of an innovation used since the dawn of large-scale warfare, auto-weapons used a chemical reaction to propel solid-shot ammunition at rapid velocities - though more uncommon variations, such as mag-lev impellers, were also occasionally found in the armouries of the Age of Darkness.

All weapons listed here are counted as 'Auto' weapons for those rules that affect such weapons.

Weapon	Range	Str	AP	Type
Anvilus Autocannon Battery	48"	7	4	Heavy 4, Rending (5+), Sunder, Twin-Linked
Astartes Shotgun	12"	4	-	Assault 2, Concussive (1)
Auto-Launcher				
- Blind Rounds	12"	1	-	Assault 1, Blast (3"), Blind
- Defender-Frag Rounds	12"	3	5	Assault 1, Blast (3"), Pinning, Defender
Eradicator Nova Cannon	36"	6	4	Heavy 1, Large Blast (5"), Agripinaan Guidance System, Ignores Cover
Exterminator Autocannon	48"	7	4	Heavy 6, Rending (5+), Twin-Linked
Gravis Autocannon Battery	48"	7	4	Heavy 4, Rending (6+), Twin-linked
Iliastus Accelerator Cannon Arrays	48"	8	3	Heavy 6, Rending (6+), Brutal (2), Twin-Linked
Kheres Assault Cannon	24"	6	4	Heavy 6, Rending (6+)
Macharius Battle Cannon	48"	8	4	Heavy 1, Large Blast (5"), Twin-Linked, Pinning, Shell Shock (1), Breaching (6+)
Macharius Vanquisher Cannon	72"	9	2	Heavy 2, Sunder, Brutal (2), Twin-Linked, Exoshock (4+)
Magnarail Lance	24"	7	2	Heavy 1, Brutal (2)
Oppressor Cannon	72"	10	2	Heavy 2, Sunder, Brutal (3)
Pegasus Autocannon	48"	7	4	Heavy 3, Rending (5+)
Praetorian Battle Cannon	48"	8	4	Heavy 2, Large Blast (5"), Breaching (6+), Pinning
Punisher Rotary Cannon	36"	6	4	Heavy 18, Pinning, Shell Shock (1)
Skyreaper Battery	48"	7	4	Heavy 5, Skyfire, Twin-Linked
Subjugator Cannon	72"	12	2	Ordnance 3, Sunder, Brutal (3)

Bolt Weapons

The mass-reactive rounds ejected by these weapons were feared by man and xenos both - for the explosive demise they promised to their targets was often brutal and bloody.

All weapons listed here are counted as 'Bolt' weapons for those rules that affect such weapons.

Weapon	Range	Str	AP	Type
Avenger Bolt Cannon	36"	6	3	Heavy 7
Gravis Bolt Cannon	48"	5	4	Heavy 6, Twin-Linked
Maxima Bolter	12"	4	5	Assault 3
Macharius Rotary Bolt Cannon	36"	6	3	Heavy 10, Pinning, Shell Shock (1), Reactor Overload
Rotary Bolt Cannon	24"	6	3	Heavy 3, Pinning, Shred
Vratine Bolt Cannon	24"	6	4	Heavy 5, Pinning, Psy-Shock

Conversion Beam Weapons

Usually reserved for the most elite echelons of the Imperial warmachine, these strange devices fire beams of blinding light which power the further they travel. In the era of the Horus Heresy many of these delicate devices have had to undergo field repair unbefitting of their storied history, and as such these cast offs find themselves in the hands of lesser member of the conflict.

All weapons listed here are counted as 'Conversion Beam' weapons for those rules that affect such weapons. An attack made with a Conversion Beam Weapon has a number of different profiles, the use of which depends upon how far the chosen target is from the attacking model up to the weapon's maximum range. When attacking with one of these weapons measure the distance to the target, place the weapon's Blast template and scatter as normal for a blast weapon. Once the final location of the template has been determined, measure to the centre of the Blast marker and consult the weapon's chart to determine the effect.

Weapon	Range	Str	AP	Type
Conversion Beamer	0" - 18"	6	-	Heavy 1, Blast (3"), Blind
	18" - 42"	8	4	Heavy 1, Blast (3"), Blind
	42" - 72"	10	1	Heavy 1, Blast (3"), Blind
Conversion Destructor	0" - 18"	8	3	Ordnance 1, Large Blast (5"), Blind
	18" - 42"	10	2	Ordnance 1, Large Blast (5"), Blind, Sunder
	42" - 80"	12	1	Ordnance 1, Large Blast (5"), Blind, Sunder, Wrecker

Disintegrator Weapons

Whilst the secrets for reproducing these accursed weapons had long been lost by the dawning of the Great Crusade, some examples of this foul technology still remained in use during the Horus Heresy.

All weapons listed here are counted as 'Disintegrator' weapons for those rules that affect such weapons.

Weapon	Range	Str	AP	Type
Disintegrator	24"	5	2	Rapid Fire, Instant Death, Gets Hot
Disintegrator Pistol	12"	5	2	Pistol 1, Instant Death, Gets Hot

Flame Weapons

Varied were the type of flame weapons the armies of mankind brought to bear upon their enemies, but all invariably left horrifically-charred corpses in their wake.

All weapons listed here are counted as 'Flame' weapons for those rules that affect such weapons.

Weapon	Range	Str	AP	Type
Conflagration Projector	Template	6	4	Heavy 1, Torrent (18"), Breaching (6+), Concussive (1)
Flamestorm Cannon	Template	6	4	Heavy 1, Torrent (18")
Gravis Heavy Flamer	Template	6	4	Heavy 1, Torrent (8")
Infernus Firepike	Template	6	4	Heavy 1, Torrent (9")
Toxiferan Flamer	Template	4	5	Assault 1, Poisoned (3+), Rending (6+)

Graviton Weapons

Esoteric and shrouded in myth, even by the standards of Imperial weapons, these devices created pockets of gravitational anomalies which short-circuited machinery and pulped organic matter.

All weapons listed here are counted as 'Graviton' weapons for those rules that affect such weapons.

Weapon	Range	Str	AP	Type
Graviton Annihilator	48"	*	3	Ordnance 1, Large Blast (5"), Gravitic Implosion*, Haywire, Concussive (2)
Graviton Gun	18"	*	4	Heavy 1, Blast (3"), Concussive (1), Graviton Pulse*, Haywire
Graviton Imploder	18"	*	3	Heavy 2, Concussive (1), Graviton Pulse*, Haywire

Grenade Weapons

Designed to fire small, canister-style cartridges that exploded on impact, these weapons had changed little in thousands of years - though their munitions had been improved many times over.

Weapon	Range	Str	AP	Type
Balistus Grenade Launcher				
- Frag	18"	3	6	Assault 1, Blast (3"), Pinning, Shell Shock (1)
- Krak	18"	6	4	Assault 2, Concussive (1)
- Tanglefoot	18"	4	-	Assault 2, Entangle (1)
Grenade Launcher				
- Frag	24"	3	6	Assault 1, Blast (3"), Pinning
- Krak	24"	6	4	Assault 1
Vratine Grenade Launcher				
- Frag	24"	3	6	Assault 1, Blast (3"), Pinning
- Krak	24"	6	4	Assault 1
- Psyk-Out	24"	4	-	Assault 1, Blast (3"), Psy-Shock

Guardian Weapons

Whilst the more common variants of Guardian weapons were seen in the hands of most of the Legio Custodes, some rarer variants existed - and these unusual weapons were largely confined to special formations of even that elite group.

Unlike most weapons, Guardian weapons always have several profiles, one for when making a Shooting Attack with the weapon and one for use in combat. The Shooting profile must be used when the weapon attacks as part of any Shooting Attack, and the Melee profile must be used when a model makes attacks with that weapon when resolving an Assault (though any Shooting Attacks made during the Assault phase, such as the Overwatch Reaction, still use the Shooting profile). The 'Shooting' profiles from the Tempest Spear listed here is counted as a 'Las' weapon for those rules that affect such weapons. The Melee profile for the Tempest Spear is counted as a 'Power' weapon, but may not be selected by models that are eligible to select a generic Power Weapon.

Weapon	Range	Str	AP	Type
Tempest Spear				
- Shooting	12"	8	1	Heavy 1, Lance, Exoshock (6+)
- Melee	-	+1	2	Melee, Two-Handed, Reaping Blow (1)

Harpoon Weapons

These huge, thorned harpoons were launched at terminal velocity, their powered fields allowing them to punch through almost any target with horrifying ease.

Weapon	Range	Str	AP	Type
Impaler Harpoon	12"	6	3	Heavy 1, Impale

Industrial Gear

Certain pieces of heavy equipment designed for civilian purposes - usually mining and excavation - could be turned against living targets with little, if any modification.

Weapon	Range	Str	AP	Type
Storm-Welder	12"	6	5	Heavy 3, Gets Hot, Rending (5+)

Las Weapons

The favoured weapons of many forces within the Excertus Imperialis, Las weapons fired high-powered beams of light at foes. With reliability, sheer stopping power, and powerful rechargeable energy cells, there was little wonder billions of these weapons rolled out of forges across the galaxy during the Great Crusade and well into the Horus Heresy.

All weapons listed here are counted as 'Las' weapons for those rules that affect such weapons.

Weapon	Range	Str	AP	Type
Hot-Shot Lasgun	18"	3	3	Rapid Fire
Hot-Shot Laspistol	9"	3	3	Pistol 1
Hot-Shot Volley Gun	24"	4	3	Heavy 3
Lasblaster	24"	3	5	Assault 3
Lascannon Array	48"	9	2	Heavy 2, Twin-Linked, Sunder
Las-Lock	18"	4	6	Assault 2
Lascutter (Ranged)	8"	10	1	Assault 1, Armourbane (Ranged)
Heavy Lascutter (Ranged)	12"	10	1	Heavy 1, Armourbane (Ranged)
Gravis Heavy Lascannon	48"	10	2	Heavy 2, Sunder
Lasgun Arrays	24"	3	-	Rapid Fire, Array Fire (3)
Mining Laser	18"	9	1	Heavy 1, Exoshock (6+)
Heavy Mining Laser	24"	9	1	Heavy 1, Exoshock (6+)
Photon Gauntlet	12"	5	2	Assault 2, Blind, Gets Hot
Photon Thruster	24"	6	2	Assault 2, Blind, Lance, Gets Hot
Ranger Long-Rifle	48"	5	4	Heavy 1, Sniper, Rending (5+), Pinning

Melta Weapons

These weapons projected a beam of searing power so immensely hot that armour and flesh trickled and burned like wax in their path.

All weapons listed here are counted as 'Melta' weapons for those rules that affect such weapons.

Weapon	Range	Str	AP	Type
Melta Cannon	24"	8	1	Heavy 3, Armourbane (Melta)
Gravis Melta Cannon	24"	8	1	Heavy 2, Armourbane (Melta), Twin-Linked
Fusion Gun	12"	8	1	Assault 1, Armourbane (Melta)
Fusion Pistol	8"	8	1	Pistol 1, Armourbane (Melta)

Missile Weapons

Whether firing 'dumb' ballistics with rocket motors, or targeted warheads that chased down a target, missile weaponry could be used for anything from anti-infantry duty to tank hunting - provided the correct munitions were used.

All weapons listed here are counted as 'Missile' weapons for those rules that affect such weapons.

*A Manticore Missile Launcher may only fire a single Missile it is equipped with as part of any Shooting Attack it makes.

Weapon	Range	Str	AP	Type
Cyclone Missile Launcher				
- Frag	48"	4	6	Heavy 1, Large Blast (5"), Pinning
- Krak	48"	8	3	Heavy 2, Twin-Linked
- Flak	48"	7	3	Heavy 2, Skyfire, Twin-Linked
Deathstrike Missile				
- Godspear Warhead	-	16	1	Ordnance 1, Large Blast (5"), Wrecker, Destructor, Shieldbreaker
- Plasma Warhead	-	10	2	Ordnance 1, Apocalyptic Blast (10"), Plasma Burn, Ignores Cover, Pinning, Shell Shock (3)
- Tactical Nuclear Warhead	-	14/10/6	1/2/3	Ordnance 1, Apocalyptic Mega-Blast, Eye of the Storm, Impact Flash, Seismic Shock, Ignores Cover
- Vortex Warhead	-	12	1	Ordnance 1, Massive Blast (7"), Vortex, Armourbane (Ranged), Instant Death, Wrecker, Ignores Cover
Fragmentation Bomb	-	5	5	Bomb 1, Blast (3"), One Use
Gravis Missile Launcher				
- Frag	48"	4	6	Heavy 1, Large Blast (5"), Pinning
- Krak	48"	8	3	Heavy 2
Havoc Launcher	48"	5	5	Heavy 1, Blast (3"), Twin-Linked
Hellstrike Missile	72"	9	2	Heavy 1, Sunder, One Shot
Macro-Bomb Cluster	-	8	4	Bomb 1, Apocalyptic Barrage (6), One Shot
Manticore Missile Launcher*				
- Manticore Missile	18 - 300"	8	3	Ordnance 1, Large Blast (5"), Breaching (4+), One Shot, Ponderous Aim
- Phosphor Incendiary Missile	12 - 72"	5	4	Ordnance 1, Barrage, Large Blast (5"), Ignores Cover, Pinning, Shell Shock (2), One Shot, Ponderous Aim
- Solutus Chem Missile	12 - 72"	1	-	Ordnance D3+1, Barrage, Blast (3"), Brutal (2), Breaching (5+), One Shot, Fleshbane, Ponderous Aim
- Storm Eagle Missile	12 - 120"	10	2	Ordnance 4, Guided Fire, One Shot, Ponderous Aim
Missile Launcher				
- Rad Missile	48"	4	3	Heavy 1, Blast (3"), Fleshbane, Rad-Phage
- Psyk-Out Missile	36"	7	3	Heavy 1, Psy-Shock
Mole Mortar	48"	6	4	Heavy 1, Blast (3"), Ignores Cover, Tremor
Multiple Rocket Pod	24"	4	6	Heavy 1, Large Blast (5"), Pinning
Salvo Launcher				
- Melta Missile	18"	8	1	Heavy 1, Armourbane (Melta)
- Flakburst Missile	24"	7	3	Heavy 1, Skyfire
Skystrike Missile	72"	8	2	Heavy 1, Skyfire, Sunder, One Use
Vratine Rotary Missile Launcher	48"	8	2	Heavy 2, Exoshock (6+), Ignores Cover, Twin-Linked, Psy-Shock

Needle Weapons

Ejecting a volley of tiny slivers of toxin-coated shards at incredible velocity, these weapons could lay low enemies with the sheer potent virulency of their ammunition - though against armoured targets, they often clattered harmlessly as they failed to reach the flesh of their target.

All weapons listed here are counted as 'Needle' weapons for those rules that affect such weapons.

Weapon	Range	Str	AP	Type
Needle Cavalcade	30"	2	-	Heavy 6, Poisoned (3+), Pinning

Phosphex Weapons

The crawling, emerald flames of these weapons seemed alive, seeking victims to consume by movement alone.

All weapons listed here are counted as 'Phosphex' weapons for those rules that affect such weapons.

Weapon	Range	Str	AP	Type
Phosphex Bomb	6"	5	2	Assault 1, One Use, Blast (3"), Poisoned (3+), Crawling Fire, Linging Death
Phosphex Canister Shot (Rapier)	12 - 24"	4	3	Heavy 1, Barrage, Blast (3"), Poisoned (3+), Crawling Fire, Linging Death

Plasma Weapons

The super-heated plasma ejected by various weapons burns hotter than a star for a fraction of a second - but that is often enough...

All weapons listed here are counted as 'Plasma' weapons for those rules that affect such weapons.

Weapon	Range	Str	AP	Type
Phased Plasma-Fusil	24"	6	3	Heavy 3, Breaching (4+), Gets Hot
Omega Pattern Plasma Blastgun	48"	9	3	Ordnance 1, Massive Blast (7"), Rending (4+), Gets Hot
Plasma Cannon	36"	7	4	Heavy 1, Blast (3"), Breaching (4+), Gets Hot

Rad Weapons

Firing concentrated bursts of radiation, these weapons could melt flesh from bone and even blister metal in the blink of an eye.

All weapons listed here are counted as 'Rad' weapons for those rules that affect such weapons.

Weapon	Range	Str	AP	Type
Irad-Cleanser	Template	2	5	Assault 1, Fleshbane, Rad-phage
Lucifex	8"	2	5	Pistol 1, Fleshbane, Rad-phage

Snare Weapons

Capable of unleashing prodigious quantities of entangling shred-nets, these weapons could immobilise targets in seconds - allowing for those key to the Emperor's plans who refused to come quietly to be retrieved with ease...

Weapon	Range	Str	AP	Type
Heavy Snare Cannon	24"	7	-	Heavy 6, Entangle (2)

Seismic Weapons

Operating on a similar principle to the Transonic weapons hoarded by the Mechanicum, these tools projected a cone of sheer force that pulverised whatever stood before them - equally at home pounding rock to dust as flesh to paste.

Weapon	Range	Str	AP	Type
Seismic Cannon				
- Short-Wave	12"	8	4	Heavy 2, Concussive (1), Resonance (5+)
- Long-Wave	24"	5	5	Heavy 4, Concussive (1), Resonance (6+)
Heavy Seismic Cannon				
- Short-Wave	12"	8	4	Heavy 3, Concussive (2), Resonance (4+)
- Long-Wave	24"	5	5	Heavy 6, Concussive (2), Resonance (5+)
Seismic Crusher	Template	*	3	Heavy 1, Graviton Pulse*, Haywire, Concussive (1)

Transonic Weapons

Designed to emit great waves of sonic force, these weapons blasted apart armoured targets with resonant frequencies - whilst those of the flesh struck by them simply disintegrated into bloody matter and bone.

All weapons listed here are counted as 'Transonic' weapons for those rules that affect such weapons.

Weapon	Range	Str	AP	Type
Transonic Cannon	9"	4	2	Heavy 1, Blast (3"), Sonic Pulse, Armourbane (Ranged), Pinning, Ignores Cover

Shuriken Weapons

Rather than the crude ammunition of other races, shuriken weapons fired bladed disks at supersonic velocities to shred their targets.

All weapons listed here are counted as 'Shuriken' weapons for those rules that affect such weapons.

Weapon	Range	Str	AP	Type
Shuriken Catapult	18"	4	5	Assault 2, Breaching (6+)
Shuriken Pistol	12"	4	5	Pistol 1, Breaching (6+)

Volkite Weapons

Ancient beyond measure, Volkite formed part of the Imperial war machine since before it earned the name, and both new and experimental variants of these ray-weapons found their ways into forces on both sides of the heresy as material and manpower stretched needs thin.

All weapons listed here are counted as 'Volkite' weapons for those rules that affect such weapons.

Weapon	Range	Str	AP	Type
Volkite Caliver	30"	6	5	Heavy 3, Deflagrate
Volkite Curtall	45"	8	3	Ordnance 1, Heavy Beam, Deflagrate, Pinning
Volkite Dual-Culverin	45"	6	5	Heavy 6, Deflagrate, Twin-Linked
Volkite Macro-Saker	45"	6	5	Heavy 8, Deflagrate, Pinning

Exotic and Miscellaneous Weapons of the Imperium

Some weapons found in the Imperial armouries were so unique in form and aspect that they composed a class all of their own.

The Adrastus 'Disintegrator' is counted as an 'Adrathic' and 'Disintegrator' weapon and has two separate profiles. In each Phase where a Shooting Attack may be made by a model with an Adrastus Bolt Caliver, only one of these profiles may be used to attack with, chosen by the Controlling Player.

Weapon	Range	Str	AP	Type
Adrastus Bolt Caliver				
- Bolt Volley	36"	5	4	Assault 4, Shred, Pinning
- Disintegrator	24"	5	2	Assault 1, Instant Death, Gets Hot, One Shot
Chem Cannon	Template	1	-	Heavy 1, Fleshbane, Breaching (5+)
Chem Destroyer	Hellstorm	3	3	Ordnance 1, Torrent (9"), Breaching (5+), Fleshbane, Pinning
Reclaimator-Chainclaw (Ranged)	12"	7	-	Heavy 1, Impale, Entangle (2)
Neuro Disruptor	12"	1	2	Pistol 1, Fleshbane
Sabre Searchlight	48"	*	-	Heavy 1, Large Blast (5"), Twin-Linked, Spotted!*
Sinistrae Magnificat	15"	10	1	Heavy 1, Blast (3"), Gets Hot, Vortex, Instant Death, Psykana-Battery, Ponderous Aim
Vortex Grenade	8"	8	2	Assault 1, Blast (3"), Haywire, Concussive (1), Vortex, One Use, Ponderous Aim

MELEE WEAPONS

Arc Weapons

Utilising similar high-retention capacitor blocks as ranged Arc weaponry, melee Arc weapons let out huge bangs, flashes, and bursts of smoke as they contact enemies, searing flesh and burning circuits alike.

All weapons listed here are counted as 'Arc' weapons for those rules that affect such weapons.

Weapon	Range	Str	AP	Type
Taser Goad	-	+2	-	Melee, Overload (6+)

Chain Weapons

Infamous for their ability to tear through flesh and the resulting eruption of gore, chain weapons were composed of razor-edged blades given motion by powerful motors.

All weapons listed here are counted as 'Chain' weapons for those rules that affect such weapons.

Weapon	Range	Str	AP	Type
Chainfist	-	x2	2	Melee, Armourbane (Melee), Unwieldy
Gravis Chainfist	-	10	2	Melee, Armourbane (Melee), Murderous Strike (5+)
Heavy Chainsword	-	+2	-	Melee, Shred, Two-Handed, Rending (6+)

Force Weapons

Designed to channel and project the psychic might of their wielders, these weapons could be used to deadly effect by those with the power to harness the Warp.

All weapons listed here are counted as 'Force' weapons for those rules that affect such weapons.

A model that is eligible to select a Force Weapon may take any of the weapons included in this Profile.

Weapon	Range	Str	AP	Type
Force Axe	-	+1	2	Melee, Force, Unwieldy
Force Maul	-	+2	3	Melee, Force
Force Staff	-	+1	3	Melee, Force, Reach (1)
Force Sword	-	User	3	Melee, Force, Rending (6+)

Industrial Gear

Certain pieces of heavy equipment designed for civilian purposes – usually mining and excavation – could be turned against living targets with little, if any, modification.

Weapon	Range	Str	AP	Type
Arc Welder	-	+3	2	Melee, Specialist Weapon, Unwieldy, Reaping Blow (1)
Augmetic Fist	-	+1	3	Melee, Unwieldy, Breaching (5+)
Heavy Rock Cutter	-	x2	2	Melee, Two-Handed, Unwieldy, Murderous Strike (5+)
Heavy Rock Drill	-	x2	2	Melee, Two-Handed, Unwieldy, Brutal (2)
Heavy Rock Saw	-	x2	2	Melee, Two-Handed, Unwieldy, Sunder
Sentinel Powerlifter	-	x2	2	Melee, Brutal (2), Paired Weapon

Las Weapons

Discharging great cells of power in a confined space allowed for Laser weapons to punch great holes in a target - and the closer that target, the greater the damage could be...

All weapons listed here are counted as 'Las' weapons for those rules that affect such weapons.

Weapon	Range	Str	AP	Type
Lascutter (Melee)	-	10	1	Melee, Makeshift Weapon
Heavy Lascutter (Melee)	-	10	1	Melee, Armourbane (Melee), Unwieldy, Specialist Weapon

Power Packs

Power Packs were equipped by ranking Kinfolk for mining and salvage operations. Worn on the back, these devices were not dissimilar to servo-arms. They mounted pairs of tools that aided the user in their role – whether carving through rock and stone, or driving back attackers.

A model with a Power Pack may make one additional attack in the Shooting Phase or Assault Phase for each incorporated weapon, using the profiles shown below. A model equipped with a weapon selected as part of a Power Pack with a Melee profile makes a single additional attack with each, but cannot allocate any additional attacks to those profiles. A Power Pack cannot have more than two weapons and each weapon may only be selected once.

Weapon	Range	Str	AP	Type
Circular Stone Saw	-	4	5	Melee, Shred
Gem Extractor	-	6	3	Melee, Rending (6+)
Kinfolk Arc Welder	-	7	2	Melee, Unwieldy
Stone Burner	6"	7	2	Pistol 1, Armourbane (Melta)

Power Weapons

Energised by powerful disruption fields, these weapons could shear through armour as though it were merely paper - reducing flesh to a bloodless, smoking ruin with a cleaving blow.

All weapons listed here are counted as 'Power' weapons for those rules that affect such weapons. A model that is eligible to select a Power Weapon and has the Imperialis Militia Sub-faction may select any of the weapons included in this section as a Power Weapon selection, instead of any other variant of Power Weapon.

Weapon	Range	Str	AP	Type
Power Hammer	-	+3	2	Melee, Two-Handed, Unwieldy
Power Pick	-	+2	3	Melee, Unwieldy, Breaching (5+)

Although technically operated on the same principle, the following weapons are far rarer and more difficult to master than the more common weapons, and so may not be selected by a model eligible to claim a generic Power weapon.

A model armed with two of the same weapons marked with a * gains +2 attacks, instead of the normal +1 for having two combat weapons.

Weapon	Range	Str	AP	Type
Dreadnought Power Glove	-	8	2	Melee, Armourbane (Melee)
Executor Great-Blade	-	User	3	Melee, Reaping Blow (2), Rending (5+)
Gravis Power Fist	-	9	2	Melee, Brutal (2)
Heavy Power Weapon	-	x2	2	Melee, Titanic Weight, Two-Handed
Indictor Axe	-	+3	2	Melee, Unwieldy, Two-Handed, Rending (6+), Murderous Strike (6+)
Lightning Claw*	-	User	3	Melee, Shred, Rending (6+), Specialist Weapon
Pneumatic Claw	-	+1	3	Melee, Brutal (2)
Reclaimator-Chainclaw (Melee)	-	+1	3	Melee, Breaching (5+), Brutal (2)
Terminus Power Claw	-	x2	2	Melee, Brutal (2)

Servo Weapons

Designed to aid those who undertook manual labour to repair all manner of technology, those grafted with servo arms and their like were able to carry impossible loads or otherwise undertake feats that none so equipped could hope to manage

A model equipped with a Servo-Arm may make an additional single attack per turn as well as any they would normally be eligible to make, while a model equipped with a Machinator Array makes two additional attacks per turn. These attacks are made using the weapon profiles shown below.

Additionally, a Machinator Array incorporates a Flamer and a Meltagun. A model with the Battlesmith (X) Special Rule may add +2 to their Repair roll result if they also have a Machinator Array.

Weapon	Range	Str	AP	Type
Machinator Array	-	+1	2	Melee, Unwieldy, Shred, Armourbane (Melee)
Servo-Arm	-	8	2	Melee, Unwieldy

Solarite Weapons

Forged from alloys impossible to reproduce outside of the hidden tempest-galleries of Terra, and energised by technologies long kept hidden at the Emperor's command, these weapons are masterworks not seen outside of the armouries of the Legio Custodes, except in unspeakably rare circumstances.

Weapon	Range	Str	AP	Type
Interceptor Lance	-	8	1	Melee, Sudden Strike (3), Brutal (2), Two-Handed

Tainted Weapons

Perhaps once gleaming examples of the power of the Imperium, these weapons had been corrupted by both the Warp and the twisted souls of their owners.

A model that is eligible to select a Tainted Weapon may take any of the weapons included in this Profile.

Weapon	Range	Str	AP	Type
Tainted Blade	-	User	3	Melee, Rending (6+), Murderous Strike (6+)
Tainted Axe	-	+1	2	Melee, Unwieldy, Murderous Strike (6+)
Tainted Maul	-	+2	3	Melee, Murderous Strike (6+)

Exotic and Miscellaneous Weapons of the Imperium

Some weapons found in the Imperial armouries were so unique in form and aspect that they composed a class all of their own.

A model armed with two of the same weapons marked with a * gains +2 attacks, instead of the normal +1 for having two combat weapons.

Weapon	Range	Str	AP	Type
Corposant Stave	-	+1	4	Melee, Two-Handed, Haywire
Harlequin's Caress	-	User	-	Melee, Fleshbane, Rending (5+)
Harlequin's Edge	-	User	-	Melee, Rending (4+), Dimensional Edge (4+), Murderous Strike (6+)
Harlequin's Embrace	-	6	3	Melee, Monofilament, Embrace of Death (2)
Harlequin's Kiss	-	+1	-	Melee, Rending (5+), Murderous Strike (6+)
Haywire Grenade	-	-	-	Melee, Haywire, Detonation
Impetus Lance	-	+3	3	Melee, Deflagrate, Burst (D3), Sudden Strike (3), Two-Handed, Ungainly
Melta Lance	-	8	1	Melee, Ungainly, Lance, Sudden Strike (2), Two-Handed, One Use
Monstrous Appendage	-	9	2	Melee, Brutal (3)
Mutated Appendages	-	+2	4	Melee, Rending (5+)
Ripper Gun	-	+1	5	Melee, Reaping Blow (1), Two-Handed
Shrike Talon*	-	User	4	Melee, Poisoned (3+), Psy-Shock
Tarsus Buckler	-	+1	3	Melee

LIBER IMPERATUS:
Wargear

IMPERATUS WARGEAR

The units that form the various sub-factions in this document have access to a number of new items of Wargear - these can be found below. These function in addition to the Wargear found in the official Horus Heresy publications, and operate under the broader Rules and Conventions laid out in the **Horus Heresy: Age of Darkness** Core Rulebook.

Aeldari Shields

Unlike the bulky and restrictive shield projectors of other races, the shield projectors of the Eldar were discrete and sophisticated, comparatively incredibly powerful for their size.

Forceshield

A Forceshield confers a 5+ Invulnerable Save.

Improved Forceshield

An Improved Forceshield confers a 4+ Invulnerable Save.

Holo-Suit

A Holo-Suit confers a 4+ Invulnerable Save.

Aetherlabe Instrumenta

These scrying mechanisms allowed those skilled enough to perceive the ebb and flow of the warp.

The Controlling Player of an enemy unit that arrives via Deep Strike Assault within 12" of a model with this Special Rule must roll an additional D6 when rolling to Scatter that unit.

Alkonost Combat Bike

Only seen to be fielded by the Silent Sisterhood, the Alkonost Combat bike was a pattern of skeletonised ground bike, allowing for only the most rapid of scout-and-strike operations whilst remaining low in profile and silhouette. Perfectly constructed for a round performance on all forms of terrain, it allowed potent actions during light combat and harassment Manoeuvres.

An Alkonost Combat Bike has a Twin-Linked Vratine Bolter, and sets the Unit Type of any model equipped with an Alkonost Combat Bike to Cavalry (Skirmish), though the model keeps any additional Sub-types it may have, and changes its Movement Characteristic to 16".

In addition, a model with a Alkonost Combat Bike has the Shrouded (6+) Special Rule, which increases to Shrouded (5+) until the start of the Controlling Player's Next Turn if the model chooses to Run.

A model equipped with an Alkonost Combat Bike also gains the Firing Protocols (2), Hammer of Wrath (1), Skilled Rider, and Battle-Hardened (1) Special Rules.

Allarus Terminator Armor

Designed to grant both protection and mobility to Custodians who were called upon to make savage, full-frontal assaults, Allarus Terminator Armour was developed using a blend of technology from the new Tartaros suits provided to the Legiones Astartes and Aquilon's proven strength both.

Allarus Terminator Armour confers a 2+ Armour Save and a 5+ Invulnerable Save.

Arkadia Pattern Grav-Attack

A rare and relatively unknown pattern of anti-gravitic craft, the Grav-Attack was seldom seen, for its light armour contrasted with a comparatively heavy armament load. The Arkadia pattern of Grav-Attack was of special note again, however - for those examples that appeared within armouries across the Imperium before the outbreak of the Heresy were unlike many other such grav-craft seen at that time, rarity heaped upon the unknown, and this factor coupled with their strange provenance made many outside the Traders Militant reluctant to use these unusual vehicles.

An Arkadia Pattern Grav-Attack has two Heavy Bolters.

In addition, a model equipped with an Arkadia Pattern Grav-Attack that chooses to Run gains the Shrouded (5+) Special Rule until the start of the Controlling Player's next turn.

Asuryani Armour

The Asuryani were not a dedicated military force - and the battlefields of the Great Crusade and Age of Darkness were unkind to those unprepared to fight upon them. As a result, rapid innovation was required by the Bonesingers of the Craftworlds, as well as raids on old Anrathe caches to bolster existing supplies. This would result in armour wholly unique to that strand of the Aeldari race, designed from the best they could muster to defend themselves.

Mesh Armour

Fashioned from scales of psychically-sensitive armour in a fashion similar to chainmail, these suits were light, and preserved the mobility of those who wore them.

Heavy Mesh Armour:

Heavy Mesh Armour confers a 4+ Armour Save.

Auric Shackles

These dread restraints were crafted from the same alloys as the armour of the Custodians, but were also imbued with various psychic wards and technological measures to make escape from them utterly impossible.

Whenever a model equipped with Auric Shackles fights in a Challenge, they add +2 to the Wounds score used to determine if they won the Combat.

In addition, if a unit including a model equipped with Auric Shackles slays the enemy Warlord as the result of a Melee attack or Sweeping Advance, the Controlling Player gains an additional +1 Victory Point.

Auspex Surveyor

This vast array provided a broad spectrum of constant data within a greater localised area than that of man-portable multi-scanners, making its squadron aware of the presence of nearby foes with pinpoint accuracy.

A unit that includes at least one model with an Auspex Surveyor makes Shooting Attacks as if they had the Ignores Cover Special Rule. In addition, they gain the following benefits:

- Enemy models cannot be deployed using the Infiltrate special rule within 24" of a model with an Auspex Surveyor.
- A unit that includes at least one model with an Auspex Surveyor ignores the 24" limit to line of sight and the -1 penalty to Ballistic Skill when making Shooting Attacks while the Night Fighting rules are in effect.
- When any enemy unit is deployed to the battlefield from Reserves, a unit that includes at least one model with an Auspex Surveyor may make the Interceptor Advanced Reaction (see the Horus Heresy: Age of Darkness rulebook, page 309) without expending a point of the Reactive player's Reaction Allotment. This does not allow the unit to make more than one Reaction per Phase, but does allow the controlling player to exceed the normal three Reactions limit in a given Phase.

Auxilia Tempestor Land Speeder

A sub-class of the more common Proteus pattern, these vehicles featured a large suite of command and control equipment, as well as extra armour plating to further protect its human crew. Tempestor scouting vehicles roved ahead of the main force of the Auxilia, their fully environmentally-sealed nature allowing them to function as strike craft in low- or zero-gravity environments. Carrying a multitude of weaponry, the Tempestor was notoriously deadly to enemy infantry and light vehicles.

An Auxilia Tempestor Land Speeder has a Multi-Laser and a Havoc Launcher.

In addition, a model equipped with an Auxilia Tempestor Land Speeder that chooses to Run gains the Shrouded (5+) Special Rule until the start of the Controlling Player's next turn.

Auxiliary Crew Bay

Either by removing as many nonessential components from a vehicle as possible, or because it was designed to carry large numbers of passengers in the first place, the Imperialis Militia had access to a range of civilian and military vehicles that could transport troops into battle.

A model equipped with an Auxiliary Crew Bay gains the Transport Sub-type, a Transport Capacity of 14 models (or otherwise increases its existing Transport Capacity to 14), Access Points on both of its sides and rear (if it did not already have these), and the Infantry Transport Special Rule.

Battle Servitor Control

By delegating weak-spot recognition to dedicated servitor units, the damage inflicted by shots was greatly increased.

A model with Battle Servitor Control gains the Sunder Special Rule.

Boarding Shields

These sizeable shields were composed of an armoured plate which itself concealed small field generators that amplified their protective qualities.

Boarding Shields confer a 5+ Invulnerable Save, but a model with a Boarding Shield cannot claim bonus attacks for having more than one melee weapon, or make attacks during the Assault phase using a weapon with the Two-handed Special Rule.

Invulnerable Saves granted by a Boarding Shield do not stack with other Invulnerable Saves, but can benefit from rules (like Cyber-Familiar wargear) that specifically increase existing saves. If a model has another Invulnerable Save then the Controlling Player must choose which one to use.

Breacher Charge

Breacher Charges were specialised explosive devices utilised to force entry through fortified walls and doors.

The Controlling Player may choose to have a model with a Breacher Charge that is Engaged or otherwise in base contact during the Assault phase with a Building or Fortification model, inflict one automatic Str 10, AP 2 Hit on the target in Initiative Step 1 instead of attacking normally. Any model in a unit that is chosen to inflict Hits using breacher charges may not otherwise attack or make use of any other Special Rule or item of Wargear that inflicts Hits or Wounds on a model in the same Assault phase (but may participate in Sweeping Advances as normal).

Combat Shields

A small shield or buckler worn on the wrist, these shields often contained small field generators that amplified their protective capabilities.

Combat Shields confer a 6+ Invulnerable Save.

Invulnerable Saves granted by a Combat Shield do not stack with other Invulnerable Saves, but can benefit from rules (like Cyber-Familiar wargear) that specifically increase existing saves. If a model has another Invulnerable Save then the Controlling Player must choose which one to use.

Command Crew Bay

While the doctrines of the Imperialis Auxilia – at least during the Horus Heresy – usually relied on numbers to carry the day, certain vehicles served to transport only small squads, primarily officers and their attendants.

A model equipped with an Command Crew Bay gains the Transport Sub-type, a Transport Capacity of 8 models (or otherwise increases its existing Transport Capacity to 8), Access Points on both of its sides (if it did not already have these), and the Infantry Transport Special Rule.

Command Vox

These bulky vox units allowed commands to be relayed instantly.

Any friendly unit that includes at least one model with a Command Vox may choose to use the Leadership value of any model in a friendly unit with another Command Vox when making Pinning tests or Morale checks – this includes any friendly units with Command Voxes that are in Reserves or Embarked on unit with the Vehicle Unit Type. A unit that includes a Command Vox also offer benefits to friendly units that include a Vox Interlock. While at least one model with a Command Vox is present on the battlefield and not Embarked in a Vehicle or Building, the Controlling Player may re-roll any Scatter rolls made (whether as part of a weapon attack or the deployment of a model or unit), as long as the model with the Command Vox has line of sight to the unit targeted by the attack or the point chosen as the target of the deployment.

Cortex Controller

Adepts of the Mechanicum who wielded these devices were able to directly control those Battle-Automata upgraded with cybernetica cortex systems and observe the battlefield through them.

Any unit that includes one or more models with the Cybernetica Unit Sub-type may ignore the Programmed Behaviour provision described as part of that Sub-type while within 12" of a friendly model with a Cortex Controller.

Custodes Dawneagle Jetbike

Introduced to the Custodes armoury toward the latter half of the Great Crusade, these bikes sacrificed the raw speed of the Agamatus for both better performance over rough terrain, and ease of construction.

A Custodes Dawneagle Jetbike has Two Lastrum Storm Bolters.

In addition, a model with a Custodes Dawneagle Jetbike that chooses to Run gains the Shrouded (5+) Special Rule until the start of the Controlling Player's next turn.

A model that is equipped with a Custodes Dawneagle Jetbike must change its unit type to Cavalry (Antigrav, Skirmish), if it does not already have this Unit Type and Sub-types, keeping any other unit Sub-types it had. Additionally, the model must change its Movement Characteristic to 14", and gains the Hammer of Wrath (1), Skilled Rider, Firing Protocols (2) and Deep Strike Special Rules.

Exo-Driller Armour

Found near-exclusively among Kinfolk enclaves who had retained some measure of independence, Exo-Driller Armour was designed to protect miners from environmental hazards and enable them to fight back against bandits and aggressive fauna. Many were further upgraded with suites of sensor equipment to track valuable mineral seams and detect hostile movement. Due to the excellent protection afforded by Exo-Driller Armour, the origin of these suits was a jealously guarded secret.

Exo-Driller Armour confers a 2+ Armour Save and a 5+ Invulnerable Save.

Explorator Augury Web

These clustered systems of auspexes, location-finders, and range seeking apparatus were so powerful that they could determine the precise coordinates of enemy or friendly units that were a continent away.

At the start of each of the Controlling Player's turns, that player may choose to activate the Explorator Augury Web in either Disruption or Relay mode, the effects of which last until the beginning of the Controlling Player's next turn:

- **Disruption Mode:** Any Reserves rolls made by an enemy player to bring units into play from Reserve are modified by -1 while this mode is active. This modifier does not stack with any other negative modifiers to Reserves rolls – use the highest single modifier instead. However, once the final negative modifier to a Reserves roll is determined, it can be reduced by any positive modifiers applied to the roll (for example if a Reserves roll was affected by both a -1 and +1 modifier then they would cancel each other and no modifier would be applied).
- **Relay Mode:** Any Reserves rolls made by the Controlling Player to bring units into play from Reserves may be re-rolled while this mode is active.

Flip Belt

The exclusive purview of the Saedathii Eldar, these belts allowed the wearer to treat gravity with contempt and walk astride any surface they so chose.

A unit composed entirely of models equipped with Flip Belts may choose to ignore terrain and intervening friendly units while Moving, including Charges, Fall Back moves, Advancing, and during Reactions. A unit that ends or begins its movement in Dangerous Terrain will still need to take Dangerous Terrain tests as normal, though they entirely ignore the effects of Difficult Terrain.

Geo-Locator Beacon

These immense vox arrays could call out from a planet's surface and into the void, guiding in their fellow warriors.

As long as a model equipped with a Geo-Locator Beacon is deployed on the battlefield, the Controlling Player may choose to re-roll all failed Reserves rolls they make.

Halian Heavy Jetbike

Sitting somewhere between a true Jetbike and a Speeder, the Halian was capable of mounting a variety of potent heavy weapons while maintaining a blistering maximum speed. The Silent Sisterhood used this combination to respond rapidly to enemy threats with devastating firepower.

A Halian Heavy Jetbike has a Heavy Snare Cannon.

In addition, a model with a Halian Heavy Jetbike gains the Shrouded (6+) Special Rule on any turn in which it has moved, or the Shrouded (5+) Special Rule if it has Run in that turn.

Helical Targeting Array

Designed to track targets moving at extremely high speeds or that were heavily obfuscated, Helical Targeting Arrays ensured a war machine's weaponry could find its mark against even the most guileful foes.

The Controlling Player of a model with a Helical Targeting Array may activate it at the start of any of their own turns, or, if the Controlling Player is not taking the first turn of the battle, at the start of the battle, before the beginning of the Opposing Player's first turn. Once the Helical Targeting Array is activated, the model is affected by the following conditions until the beginning of the Controlling Player's next turn:

- The model may not move, Run or declare or make any Reactions other than the Interceptor or Overwatch Reaction.
- The Controlling Player may choose to use the Skyfire Special Rule when making any Shooting Attacks with the model.
- No model may make a Damage Mitigation Roll provided by the Shrouded Special Rule against an attack made by a model with a Helical Targeting Array while it is active.
- When the model makes a Shooting Attack as part of the Interceptor Reaction, the Reaction does not cost the Controlling Player a point from their Reaction Allotment. This does not allow the unit to make more than one Reaction per Phase, but does allow the Controlling Player to exceed the normal three Reactions limit in a given Phase.
- When a model with the Vehicle Unit Type and a Helical Targeting Array makes a Shooting Attack as part of the Interceptor Reaction, that model may fire all of its weapons, not just Defensive Weapons, as part of the Shooting Attack.

Indomitus Terminator Armour

Combining numerous features of both Cataprahtii and Tartaros armour, Indomitus armour became increasingly prevalent among the armies of both Loyalist and Traitor as the Horus Heresy progressed – having proven much easier to produce than either of its predecessor designs, if slightly more cumbersome.

Indomitus Terminator Armour confers a 2+ Armour Save and a 5+ Invulnerable Save.

Jokaero Armaments

The long mechanical armatures that formed a Jokaero's hands could reshape to form a weapon of its choosing in moments.

Whenever a model armed with Jokaero Armaments makes a Shooting Attack, the Controlling Player may choose a single weapon from the following list for the model to make their Shooting Attack with:

Lascannon, Multi-Melta, Heavy Flamer, Volkite Culverin, Disintegrator

Mechanicum Protectiva

Rare devices exclusive to all but the highest ranking of the Mechanicum's magi, they were not of a singular design but covered a variety of shield generators intended to protect the bearer from harm – whether on the battlefield when confronting the enemies of mankind or from rivals who sought to assassinate them.

A model with a Mechanicum Protectiva gains a 4+ Invulnerable Save.

Invulnerable Save granted by a Mechanicum Protectiva do not stack with other Invulnerable Saves, but can benefit from rules (like Cyber-Familiar wargear) that specifically increase existing saves. If a model has another Invulnerable Save then the Controlling Player must choose which one to use.

Plasma Grenades

Unlike the lesser races, the Eldar would carry usually only a single type of grenade – and with which, both infantry and vehicles would fall.

A unit that includes at least one model with Plasma Grenades makes attacks at its normal Initiative Step during an Assault after it has successfully Charged through Difficult Terrain or Dangerous Terrain, but still suffers any penalties to Charge rolls imposed by Difficult Terrain or Dangerous Terrain when resolving a Charge through Difficult Terrain or Dangerous Terrain.

In addition, the Controlling Player may choose to have a model with Plasma Grenades that is Engaged or otherwise in base contact during the Assault phase with a Building or Fortification, or a model with the Vehicle, Dreadnought or Automata Unit Type, inflict one automatic Str 5, AP 4 Hit with the Breaching (6+) Special Rule, on the target in Initiative Step 1 instead of attacking normally. If this option is selected, the unit makes its Pile In move at the Initiative 1 step. Any model in a unit that is chosen to inflict Hits using Plasma Grenades may not otherwise attack or make use of any other Special Rule or item of Wargear that inflicts Hits or Wounds on a model in the same Assault phase (but may participate in Sweeping Advances as normal).

Power Armour

Employing armoured plates and electro-fibre bundles to both protect and augment their wearers, versions of these armoured suits that could fit mortal frames were in high demand during the Great Crusade and Horus Heresy.

Power armour provides a 3+ Armour Save.

Praesidium Shield

These golden shields could weather storms that threatened even the Emperor's Golden Host could not.

A model with a Praesidium Shield adds +1 to its Invulnerable Save (to a maximum of 3+) or an Invulnerable Save of 6+ if they do not already possess one. In addition, a model with a Praesidium Shield cannot claim bonus attacks for having more than one melee weapon, or make attacks during the Assault phase using a weapon with the Two-Handed Special Rule.

Proteus Pattern Storm Shield

Whilst not in general use during the Great Crusade, by the Age of Darkness the first prototypes of 'Storm Shields' had reached all of the Legiones Astartes – loyalist or otherwise.

A model with a Proteus Pattern Storm Shield gains a 4+ Invulnerable Save, Invulnerable Saves granted by a Proteus Pattern Storm Shield do not stack with other Invulnerable Saves, and cannot be modified by any other Special Rule. If a model has another Invulnerable Save then the Controlling Player must choose one to use. A model with a Proteus Pattern Storm Shield may never gain an additional Attack for being armed with two close combat weapons or make attacks using a weapon with the Two-Handed Special Rule.

Psychic Hood

Trained psykers utilised these esoteric devices to focus in on concentrations of Warp-energy being expended by hostile witches and mitigated their impact accordingly.

Any enemy model within 18" and line of sight of a model with a Psychic Hood must reduce its Leadership by -2 when making Psychic checks. This modifier is not cumulative and no model may suffer from penalties from more than one Psychic Hood.

Rad Grenades

Seldom issued except in the most dire of circumstances and against only the most heinous foes, Rad Grenades poisoned not only the enemy, but the very ground on which they detonated.

During a turn in which a unit with at least one model with Rad Grenades successfully Charges, or is themselves successfully Charged, all models in the enemy unit(s) suffer a -1 penalty to their Toughness Characteristic, to a minimum of Toughness 1, until the end of the Fight Sub-phase that follows the successful Charge.

Note: This does affect Instant Death thresholds.

Rad Furnace

The devices known as Rad Furnaces were originally an offshoot of research into Atomantic technology - although their diversion from the ordinary shielding such machines usually provided was apparent in the appalling radiation they spewed forth, itself weaponised to weaken and debilitate foes.

Any melee Hits allocated to models locked in combat with one or more units that include a model with a Rad Furnace require one lower result To Wound than they would normally, to a minimum of 2+. This effect is not cumulative with itself if more than one model in a combat has a Rad Furnace.

Models with Rad Furnaces are immune to the effects of Rad Grenades, the Rad-Phage Special Rule and the Rad Furnaces of models they are locked in combat with. In addition, Hits from weapons with the Rad-Phage Special Rule that are allocated to a model with a Rad Furnace only successfully wound on a To Wound roll of a 6+.

Sawtooth Rockgrinder

Some industrial vehicles mounted large ploughs which utilised whirling cutter arrays to grind through rock and other solid obstacles. Desperate or unconventional Militia units turned these drilldozer blades against living targets, reducing victims to nothing more than bloody sinew.

A model equipped with a Sawtooth Rockgrinder gains the following effects:

- The model's Front Armour Value is increased by +1 (to maximum of a Front Armour Value of 14).
- The model's Movement Characteristic is decreased by -2".
- The model ignores the effects of Difficult and Dangerous Terrain.
- Whenever the model performs a Ram attack, increase the number of hits inflicted by +D3, and the Strength Characteristic of the Ram attacks by +3. In addition, all Ram attacks made by a model with this upgrade are resolved at an AP value of 3, with the Sunder and Shred Special Rules.

Shredder Prow

These bladed, whirling industrial prow attachments were a mimicry of the larger Sawtooth grinders - but were no less deadly for it.

A model with this upgrade does an additional +D3 hits when resolving Hammer of Wrath attacks. In addition, all Hammer of Wrath attacks made by a unit with this upgrade are resolved at an AP value of 3.

Shroud Bombs

Designed to conceal users from the enemy's sight, Shroud Bombs varied in design from army to army - from basic smoke bombs, to chaff grenades and portable jamming arrays.

Whenever targeted by a Shooting Attack, the range between an attacking unit and a unit that includes at least one model with Shroud Bombs is considered to be 6" further than the actual range between the two units - enemy models with the Night Vision Special Rule and models with the Primarch Unit Type ignore this effect. In addition, when attacked by a weapon with the Barrage Special Rule, a unit that includes at least one model with Shroud Bombs is always treated as though it was out of Line of Sight when scattering any attacks.

Siege Retrofit

Though famed for their speed, Malcadors frequently found themselves involved in prolonged siege warfare where their weaker front armour and large size impeded their performance. As such, many Malcadors found themselves refitted and up-armoured in prolonged campaigns. These siege retrofits greatly increased the tank's durability - however, the added bulk severely taxed their engines, leading to reduced top speed and increased rates of engine failure.

A model equipped with a Siege Retrofit loses the Fast Unit Sub-type, increases their Front Armour Characteristic to 14, and additionally gains a Flare Shield at no additional Points cost, though may not purchase a Flare Shield from any other source.

Suspensor Web

These miraculous devices rendered even the heaviest weapons portable - at the cost of accuracy.

A Heavy Weapon with a Suspensor Web may be treated as having the type Assault rather than Heavy when used to attack as part of any Shooting Attack at targets at up to half the weapon's usual maximum range.

For example, a Heavy Bolter with a Suspensor Web, which is usually a Range 36" Heavy 4 weapon, can instead be used as if it were a Range 18" Assault 4 weapon if the Controlling Player wishes.

A weapon with a Suspensor Web may be fired as an Assault weapon at half range or less. If a weapon fired in this manner has any Special Rules that rely on range (such as Armourbane (Melta)) then the range required to trigger this Special Rule is calculated based on the weapon's original range, not the modified range from the Suspensor Web's effects.

Tarsus Buckler

These bladed shields could be used to attack as well as defend.

Reduce the Strength characteristic of Shooting Attacks made against a unit in which the majority of models have a Tarsus Buckler by -2 (to a minimum of 1)

Tenebris Praetoria

Designed to obscure and confound, the Tenebris Praetoria cast out an ink-black pall - within which even the shining gold of the Custodians was rendered invisible.

Whenever targeted by a Shooting Attack, the range between an attacking unit and a unit including one or more models with a Tenebris Praetoria is considered to be 6" further than the actual range between the two units - enemy units with the Night Vision Special Rule, weapons with the Template Special Rule and models with the Primarch Unit Type ignore this effect. In addition, when attacked by a weapon with the Barrage Special Rule, a unit including one or more models with a Tenebris Praetoria is always treated as though it was out of line of sight when scattering any attacks.

Towing Cable

With a powerful engine and an industrial tether, many battlefield emplacements could be pulled across even the most broken landscapes of war - their spotters and gunners holding what purchase they could to ensure they too were taken swiftly alongside them.

At any point in the Controlling Player's Movement Phase, a model with a Towing Cable may target a friendly Infantry model with a Movement Characteristic of "-" in contact with this model's Hull. A model which is currently locked in combat may not be targeted.

Both the targeted model and the model with this Special Rule may move an amount of inches up to the model with this Special Rule's remaining Movement, so long as it remains in contact with the model with this Special Rule's hull for the duration of that move. If moving that model for any reason would cause it to be removed as a casualty, such as by the effects of a Special Rule, it is not for the purposes of being moved this way.

Furthermore, if there are other models in the same unit as a model targeted by the Towing Cable and they have a Movement Characteristic of "1" or more, they are counted as having embarked on this vehicle for as long as a model is being moved via the Towing Cable Special Rule. They must disembark via the normal procedure once a model with a Towing Cable has finished its move in the Movement Phase. If there are multiple models with a Movement Characteristic of "-" being towed by multiple models equipped with a Towing Cable, then any models counted as embarked may disembark from any model with a Towing Cable which was towing a model from their unit.

A model with this Special Rule may not activate its Towing Cable if it moves Flat-out; and a model with this Special Rule may not move Flat-out if it activates its Towing Cable. Any Infantry models moved via this Special Rule may only fire Snap Shots in the following Shooting Phase.

Trader-Militant Banner

The immense banners born by the Retainers Militant were one-of-a-kind heirlooms, proclaiming proudly the successes and victories of the Trader Militant and their household. A uniting force, the banner served to rally all those loyal to the Rogue Trader's cause. To allow one to fall was a great dishonour, and so only the most trusted were allowed to bear them into battle.

A unit that includes at least one model with a Trader-Militant Banner adds +1 to the Wounds score used to decide if they win a Combat in the Assault phase. A unit that includes at least one model with a Trader-Militant Banner may choose to Fall Back only a distance equal to the roll of a D6 instead of 2D6, and if forced to move off the edge of the battlefield will instead stop with each model 1" away from the edge of the battlefield. In addition, all of the Controlling Player's units that are part of an Army in which the Primary Detachment is from the Traders Militant Sub-faction within 12" of a model with a Trader-Militant Banner are considered to have a Leadership Characteristic of 9 (unless they already had a higher Leadership Characteristic) when resolving Morale checks or Pinning tests (but not Psychic checks).

Verticalis Drop Harness

Whether locally patterned as anti-gravitic devices or short-fuse thruster packs, the Verticalis Drop Harness was utilised by specialised veterans of the Solar Auxilia Cohorts as a means of rapid insertion deep into enemy lines. Dropped from high in sub-orbit or out the back of fast-moving aircraft, these robust devices allowed deep strikes in almost every environment.

A model equipped with a Verticalis Drop Harness gains the Deep Strike Special Rule. Furthermore, Models with the Verticalis Drop Harness can disembark from Zooming Flyers and Flyers they are embarked upon that move at Cruising Speed, regardless of other rules.

Vexillum Imperatus

Immense banners that shone with internal light, these symbols of the might of the Emperor and Imperium both were said to be enough to rally all to them.

All of the Controlling Player's units with the Legio Custodes Special Rule within 12" of a friendly model with a Vexillum Imperatus are considered to have a Leadership Characteristic of 10 when resolving Morale checks or Pinning tests. Once per game, whenever a friendly unit with the Legio Custodes Special Rule within 12" of a model with a Vexillum Imperatus fails a Leadership Test, that Leadership test may be re-rolled.

In addition, all models in a unit that includes a Vexillum Imperatus gain the Line Sub-type as long as they remain part of that unit - this benefit is lost immediately if the model with the Vexillum Imperatus is removed as a casualty or leaves the unit.

Vigilant Standard

These banners bore esoteric symbols of fealty and devotion to the Emperor, as well as arcane wards and warnings of the null nature of the Silent Sisters; these standards felt to all as eyes boring into the soul.

A unit that includes at least one model with an Vigilant Standard adds +1 to the Wounds score used to determine if they win a Combat in the Assault phase. In addition, a unit that includes at least one model with a Vigilant Standard may, before any dice are rolled to determine Fall Back distance, choose to Fall Back only a distance equal to the roll of a D6 instead of 2D6, and if forced to move off the edge of the battlefield will instead stop moving, with any model that would have moved off of the battlefield instead ending its Fall Back move prematurely when it reaches 1" from the edge of the battlefield.

Vox Disruptor Array

Designed to project counter-frequencies and disruption waves, these devices could utterly scramble any radio equipment.

At the start of each Game Turn you can declare whether each Vox Disruptor Array in your army is turned on or turned off. While there is at least one model on the battlefield with a Vox Disruptor Array turned on, regardless of whether that model is enemy or friendly, any attempt to perform a Deep Strike Assault, Drop Pod Assault, Area Denial Drop or Subterranean Assault during that turn is Disordered on the roll of a '1', '2' or '3' instead of just on a '1'.

Vratine Voidplate

Taking technologies discovered from the tactical dreadnought armour program, and combining them with the incredible selenite void-mail, these large suits of armour - literally "Voidplate of the Oath" - provided greater protection and enhanced systems to their wearer whilst still allowing them some of the manoeuvrability lighter panoplies could provide.

Vratine Voidplate confers a 2+ Armour Save. In addition, a unit that includes any models with Vratine Voidplate make Sweeping Advance rolls at a penalty of -1.

Vratine Chainmail

Lacking many of the power armour systems Vratine Armour provides, the primary utilisation of Selenite void-mail in the build of "the Chainmail of the Oath" provided those equipped with it a greater alacrity in trade for its lesser protection.

Vratine Chainmail confers a 4+ Armour Save.

**LIBER IMPERATUS:
Base Sizing Chart**

BASE SIZING CHART

The units made available to Imperial armies by this document may not immediately have an obvious base size to use for them - our recommendations for these can be found below.

TRADERS MILITANT MODELS

Model	Base Size
Rogue Trader Militant	Round, 40mm
Retainers Militant	
- Militant Bodyguard	Round, 25mm
- Trader-Militant Standard Bearer	Round, 25mm
- Adjuevant Medicae	Round, 25mm
- Jokaero Courtier	Round, 25mm
- Navigator Nobilis	Round, 25mm
- Templax Challenger	Round, 25mm
- Astropathica Primus	Round, 25mm
- Primus Psykana	Round, 25mm
- Defensor-Automata	Round, 25mm
- Presage of the Legion	Round, 32mm
- Magos Attendis	Round, 32mm
- Militaris Adjutant	Round, 25mm
- Custodian Observer	Round, 40mm
- Executor of the Black Fleet	Round, 32mm
- Envoy of the Asur	Round, 32mm
- Faceless Delegate	Round, 32mm
Voidsmen Cadre	Round, 25mm
Imperatrix Bondsmen Cadre	Round, 25mm
Savaris Bondsmen Cadre	Round, 25mm
Arvus Transport	Flying, Oval, 120x92mm
Aurox Transport	No Base
Land Raider Armoured Carrier	No Base
Grav-Speeder Squadron	Round, Flying, 60mm
Carnodon Severax Squadron	No Base

LEGIO CUSTODES MODELS

Model	Base Size
Custodian Host-Master	Round, 40mm
Custodian Agamatii Shield Captain	Round, Flying, 60mm
Custodian Vertorii Shield Captain	Oval, Flying, 75mm
Custodian Allarii Shield Captain	Round, 40mm
Custodian Aquilus Shield Captain	Round, 50mm
Custodian Venataris Shield Captain	Round, Flying, 40mm
Allarus Terminator	Round, 40mm
Contemptor-Moritiux Dreadnought	Round, 60mm
Dawneagle	Oval, Flying, 75mm
Custodes Land Raider	No Base
Custodes Grav-Raider	Round, Flying, 100mm
Custodes Land Raider Spartan	No Base
Custodes Grav-Spartan	Round, Flying, 100mm

SISTERS OF SILENCE MODELS

Model	Base Size
Sikari Dar	Round, 40mm
Knight Ensign	Round, 32mm
Indictor Cadre	Round, 40mm
Perditor Cadre	
- On Foot	Round, 32mm
- With Venataris Jump Harness	Round, Flying, 32mm
Repressor Automata Maniple	
- Repressor Mistress	Round, 32mm
- Repressor Automata	Round, 60mm
Silent Sisterhood Rhino Transport	No Base
Silent Sisterhood Grav-Rhino	Round, Flying, 60mm
Shrike Cadre	Round, 32mm
Impetor Cadre	Oval, 75mm
Otos Transport	Flying, Oval, 120x92mm
Aymhari Interceptor	Flying, Oval, 120x92mm
Arbiter Cadre	Round, Flying, 60mm
Caedecius Exoframe Cadre	Round, 60mm
Stymphalia Attack Craft	Flying, Oval, 120x92mm

SOLAR AUXILIA MODELS

Model	Base Size
Lord Marshal Ireton MaSade	
- Ireton MaSade	Round, 28.5mm
- Ireton MaSade Mechanised	Round, 50mm
Solar Auxilia Battle Psyker	Round, 25mm
Solar Auxilia Furibundus Dreadnought Talon	Round, 60mm
Possessed Auxilia	
- Possessed Auxilia	Round, 25mm
- Greater Possessed Auxilia	Round, 40mm
Extremis Boarding Rig Section	Round, 50mm
Enginseer Auxilia Section	
- Enginseer Adept	Round, 32mm
- Servo-Automata	Round, 25mm
Solar Auxilia Breacher Command Section	Round, 25mm
Solar Auxilia Breacher Section	Round, 25mm
Solar Auxilia Ancillary Command Section	Round, 25mm
Solar Auxilia Pioneer Section	Round, 25mm
Solar Auxilia Special Weapons Section	Round, 25mm
Solar Auxilia Heavy Weapons Section	Round, 50mm
Solar Auxilia Chimera Transport	No Base
Solar Auxilia Verticalis Drop Command Section	Round, 25mm
Solar Auxilia Verticalis Drop Section	Round, 25mm
Solar Auxilia Drop Sentinel Squadron	Round, 60mm
Solar Auxilia Salamander Command Vehicle	No Base
Solar Auxilia Salamander Scout Squadron	No Base
Solar Auxilia Pegasus Assault Squadron	No Base
Solar Auxilia Carnodon Command Section	No Base
Solar Auxilia Carnodon Strike Squadron	No Base
Solar Auxilia Tempestor Land Speeder Squadron	Round, Flying, 60mm
Solar Auxilia Aethon Heavy Sentinel Squadron	Round, 60mm
Solar Auxilia Hellhound Flame Tank Squadron	No Base
Divisio Aeronautica Avenger Strike Fighter	Flying, Oval, 120x92mm
Solar Auxilia Kelaino Squadron	Flying, Oval, 120x92mm
Solar Auxilia Aello Gunship Squadron	Flying, Oval, 120x92mm
Solar Auxilia Ocypete Gunship Squadron	Flying, Oval, 120x92mm
Solar Auxilia Hades Breaching Drill	No Base

SOLAR AUXILIA MODELS CONTINUED

Model	Base Size
Solar Auxilia Macharius Omega Heavy Tank	No Base
Solar Auxilia Praetorian Heavy Tank Squadron	No Base
Solar Auxilia Hydra Flak Tank Battery	No Base
Solar Auxilia Sabre Battery	Round, 60mm
Solar Auxilia Manticore Missile Tank Battery	No Base
Solar Auxilia Deathstrike Missile Platform	Round, Flying, 40mm
Divisio Aeronautica Marauder Bomber	Round, Flying, 160mm
Divisio Aeronautica Marauder Destroyer	Round, Flying, 160mm

IMPERIALIS MILITIA MODELS

Model	Base Size
Imperialis Militia Astropath	Round, 25mm
Imperialis Militia Ascendant Rogue Psyker	
- Ascendant Rogue Psyker	Round, 28.5mm
- Militia Warden	Round, 25mm
Imperialis Militia Mounted Command Cadre	Oval, 60x35mm
Imperialis Militia Demagogue Cadre	
- Demagogue	Round, 25mm
- Mounted Demagogue	Oval, 60x35mm
Imperialis Militia Ratling Squad	Round, 25mm
Enginseer Auxilia Detachment	
- Enginseer Adept	Round, 32mm
- Servo-Automata	Round, 25mm
Imperialis Militia Kinfolk Exo-Driller Team	Oval, 50mm
Imperialis Militia Ogryn Beastmasters	
- Ogryn Beastmasters	Round, 40mm
- Greater War Beasts (all variants)	Round, 50mm
Imperialis Militia Voidjumpers	Round, 25mm
Imperialis Militia Chimera Transport	No Base
Imperialis Militia Aurox Transport	No Base
Imperialis Militia Rhino Transport	No Base
Imperialis Militia Rhino Advancer	No Base
Imperialis Militia Termite Assault Drill	No Base
Imperialis Militia Land Raider Proteus Carrier	No Base
Imperialis Militia War Beasts	Round, 40mm
Mutated Spawn	Round, 50mm
Imperialis Militia Hellhound Flame Tank Squadron	No Base
Imperialis Militia Centaur Combat Tractor Squadron	No Base
Imperialis Militia Salamander Scout Squadron	No Base
Imperialis Militia Pegasus Assault Squadron	No Base
Imperialis Militia Kelaino Squadron	Flying, Oval, 120x92mm
Imperialis Militia Kelaino Sky-Talon Squadron	Flying, Oval, 120x92mm
Imperialis Militia Wolf Rapid Response Section	Round, 60mm
Imperialis Militia Achilles Light Vehicle Squadron	Oval, 120x92mm
Imperialis Militia Venator Medium Vehicle Squadron	No Base
Imperialis Militia Carnodon Squadron	No Base
Imperialis Militia Hades Breaching Drill	No Base
Greater Mutated Spawn	Round, 100mm
Imperialis Militia Sabre Battery	Round, 60mm
Imperialis Militia Macharius Heavy Tank Squadron	No Base
Imperialis Militia Macharius Omega Heavy Tank	No Base
Imperialis Militia Malcador Defensor Heavy Tank Squadron	No Base
Imperialis Militia Minotaur Battery	No Base
Imperialis Militia Praetorian Heavy Tank	No Base
Imperialis Militia Hydra Flak Tank Squadron	No Base
Imperialis Militia Manticore Missile Tank Battery	No Base
Imperialis Militia Helios Ordnance Carrier Squadron	No Base
Imperialis Militia Goliath Heavy Vehicle Squadron	No Base
Imperialis Militia Ironcrawler Squadron	No Base

The background of the entire image is a dark, almost black, marble texture. It features a complex network of thin, light-colored veins in shades of grey and white, which meander and branch out across the surface, creating a classic marbled effect.

“I remember the Imperium as it was meant to be, as it could have been, and unlike the Emperor, I have no gilded wonder to keep me, and soon I shall pass.”

We Remember.
